

KCBT Migration to Globex

As previously announced, the Kansas City Board of Trade (KCBT) will be migrating its products to the Globex® platform as we continue our hosting agreement listing KCBT products for electronic trading with the CME Group. As such, KCBT products, similar to CBOT products, will be migrating from the e-cbot® platform to Globex in January 2008. Firms currently connected in the e-cbot environment will be contacted by either e-cbot Key Account Managers (KAMs) or Globex Account Managers (GAMs) to confirm your desired clearing relationship setup for Globex.

Although much of the information contained at the links below is geared toward those responsible for the operation at firms and Independent Software Vendors (ISV), we encourage everyone involved with, or participating in, electronic trading of KCBT products to familiarize yourself with the migration schedule, Globex system functionality and system policies. For those market participants connected through firms and ISVs, please contact your representative to be certain you understand what steps, if any, will be necessary to ensure you are able to trade on the Globex platform by the “go-live” date.

Key Dates and Informational Links

| Milestone | Date |
|--|---|
| Testing available in the New Release Environment | August 12, 2007 |
