Storm Data and Unusual Weather Phenomena

March 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		Character of Storm
					Killed	Injured	Property	Crops	

ARKANSAS, Southeast

Chicot County

2 SW Lake Vlg to 2 S Lake Vlg	05	2213CST 2217CST			0	0			Hail(0.75)
----------------------------------	----	--------------------	--	--	---	---	--	--	------------

Ashley County

2 S Crossett to 3 SE Portland	09	1054CST 1113CST			0	0	700K		Thunderstorm Wind (EG67)
----------------------------------	----	--------------------	--	--	---	---	------	--	--------------------------

A potent squall line of thunderstorms moved across Ashley county and caused widespread damage, especially across southern and eastern sections of the county. As the squall line moved through, a small segment of the line pushed out ahead of the line. This "bow segment" caused extensive damage along a swath from just south of Crossett to near Portland. The most significant damaged occurred just south and southeast of Crossett. Along the damage swath, numerous trees and power lines were blown down. Several structures sustained damage along with a few outbuildings blown away.

Chicot County

11 SW Lake Vlg to 6 E Lake Vlg	09	1120CST 1141CST			0	0	150K		Thunderstorm Wind (EG60)
-----------------------------------	----	--------------------	--	--	---	---	------	--	--------------------------

Chicot County

Eudora	09	1133CST			0	0	3K		Thunderstorm Wind (EG55)
--------	----	---------	--	--	---	---	----	--	--------------------------

A swath of wind damage occurred as a line of thunderstorms moved through Chicot County. Within this line, a "bow echo" segment moved from just east of Parkdale, along the Ashley/Chicot County lines, northeast to just south and then east of Lake Village. This "bow echo" segment caused the most extensive damage across the county which included numerous trees and power poles blown down. As the storm moved across the south side of Lake Village, many more trees were blown down, a few signs were down and a few homes sustained minor roof damage along with some outbuildings destroyed. This line continued east across the Mississippi River into Washington county.

The southern end of the line was not as strong. However, it was still severe and several trees were blown down in and around Eudora.

LOUISIANA, Northeast

LAZ016

Madison

09	1014CST				1	0	50K		Strong Wind (MG43)
----	---------	--	--	--	---	---	-----	--	--------------------

Strong wind gusts 43 knots (50 mph) occurred just ahead of an approaching squall line. These winds were responsible for downing a tree which fell on a house. This fallen tree resulted in one fatality to the woman that owned the home.

F60PH

MorehouseParish

2 N Bastrop	09	1054CST			0	0	5K		Thunderstorm Wind (EG55)
-------------	----	---------	--	--	---	---	----	--	--------------------------

Several trees were blown down just north of Bastrop as a line of storms pushed east-northeast across the parish.

MorehouseParish

2 SE Bastrop	09	1102CST			0	0			Thunderstorm Wind (MG52)
--------------	----	---------	--	--	---	---	--	--	--------------------------

Bastrop AWOS measured 52 kts (60 mph).

RichlandParish

3 NE Rayville	09	1130CST			0	0			Thunderstorm Wind (EG53)
---------------	----	---------	--	--	---	---	--	--	--------------------------

Several trees were blown down.

West CarrollParish

2 S Oak Grove	09	1133CST			0	0			Thunderstorm Wind (EG53)
---------------	----	---------	--	--	---	---	--	--	--------------------------

A few trees were blown down.

Lake Providence **09** **1158CST** **0** **0** **Thunderstorm Wind (EG50)**

Catahoula Parish

Jonesville **09** **1210CST** **0** **0** **10K** **Thunderstorm Wind (EG58)**
A few power lines were blown down.

Madison Parish

Tallulah **09** **1225CST** **0** **0** **10K** **Thunderstorm Wind (EG58)**
Several trees and a few power lines were blown down around town.

Tensas Parish

**8 W Newellton to
3 S Newellton** **09** **1235CST
1244CST** **0** **0** **20K** **Thunderstorm Wind (EG60)**
A roof was blown off a camp house about 8 miles west of Newellton. Additionally, just south of Newellton a few trees were blown down.

Concordia Parish

Clayton **09** **1240CST** **0** **0** **40K** **Thunderstorm Wind (EG58)**
Several trees were blown down and some homes had shingles peeled off their roof.

Catahoula Parish

Jonesville **09** **1245CST** **0** **0** **5K** **Thunderstorm Wind (EG55)**
A couple of power lines were blown down.

MISSISSIPPI, Central

MSZ048

Hinds

09 **0945CST** **0** **0** **15K** **Strong Wind (EG40)**
Strong wind gusts 40 knots (46 mph) ahead of a deepening surface low and approaching squall line caused a few trees to get blown down and knock down power lines. The damage occurred near the Metro Center Mall and caused power outages for a portion of that area.

MSZ034

Washington

09 **1116CST** **0** **0** **1K** **Strong Wind (MG40)**
Strong gradient winds occurred ahead of a squall line. Wind gusts to 40 kts (46 mph) were measured at the Greenville Airport

Bolivar County

**Benoit to
Mound Bayou** **09** **1140CST
1200CST** **0** **0** **600K** **Thunderstorm Wind (EG70)**

A line of thunderstorms moved across Bolivar County around noon on March 9th and produced substantial damage from Benoit to just west of Cleveland to around Mound Bayou. The most significant damage occurred in a segment of the squall line called a "bow echo". Numerous trees and power lines were snapped or blown down as a swath of 70 to 80 mph winds blew across the county. Just northwest of Cleveland, a mobile home park had several homes significantly damaged while a few permanent homes sustained major roof damage.

Washington County

Arcola **09** **1156CST** **0** **0** **300K** **Thunderstorm Wind (EG60)**

A wind gust to nearly 70 mph blew an 18 wheel tractor trailer over at the intersection of US Highway 61 and State Highway 438 around Arcola.

Storm Data and Unusual Weather Phenomena

March 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons Killed	Number of Persons Injured	Estimated Damage Property	Estimated Damage Crops	Character of Storm
----------	------	----------------------------	---------------------------	--------------------------	--------------------------------	---------------------------------	---------------------------------	------------------------------	--------------------

MISSISSIPPI, Central

Sunflower County

Indianola to 6 NE Sunflower	09	1210CST 1225CST			0	0	5M		Thunderstorm Wind (EG80)
--	-----------	----------------------------	--	--	----------	----------	-----------	--	---------------------------------

As a line of severe storms pushed through the Mississippi Delta, a small segment of the line caused extensive damage in Indianola and then across areas to the northeast. This "bow echo" segment was extremely intense with winds estimated around 80 kts (92 mph). The core of the damaging winds moved from Indianola, north eastward to the Sunflower Community and then into west-central Leflore County.

The worst damage occurred in and around Indianola where several hundred trees were uprooted or snapped and dozens of power lines were taken down. Numerous buildings and homes sustained significant to major roof damage and many other homes sustained at least some kind of shingle damage. Several awnings to area gas stations were damaged or blown down. Additionally, several homes, and a Community Bank sustained structural damage. The hardest hit building was the Lockard Elementary. Here windows were blown out and much of the roof was blown off.

The storm then moved northeast, away from Indianola, and toward the Sunflower Community. More trees and power lines were blown down along with some minor damage to a few homes.

MSZ027-048-060

Carroll - Hinds - Adams									
	09	1212CST 1220CST			0	0	3K		Strong Wind (MG45)

Strong gradient winds ahead of a squall line gusted to 45 kts (52 mph) at the Greenwood-Leflore County Airport

Issaquena County

4 NE Mayersville	09	1219CST			0	0			Thunderstorm Wind (EG50)
-------------------------	-----------	----------------	--	--	----------	----------	--	--	---------------------------------

Sharkey County

Rolling Fork	09	1225CST			0	0	50K		Thunderstorm Wind (EG53)
---------------------	-----------	----------------	--	--	----------	----------	------------	--	---------------------------------

Several homes had shingles blown off and peeled up. Additionally, an awning on a gas station was damaged.

Leflore County

6 SW Sandy Ridge to Minter City	09	1225CST 1235CST			0	0	50K		Thunderstorm Wind (EG65)
--	-----------	----------------------------	--	--	----------	----------	------------	--	---------------------------------

Leflore County

Itta Bena	09	1240CST			0	0	5K		Thunderstorm Wind (EG55)
------------------	-----------	----------------	--	--	----------	----------	-----------	--	---------------------------------

Leflore County

Greenwood	09	1252CST			0	0	5K		Thunderstorm Wind (EG55)
------------------	-----------	----------------	--	--	----------	----------	-----------	--	---------------------------------

The same "bow echo" which moved through Indianola and caused extensive damage, continued into west-central Leflore County and tracked northeast near the Schlater and Minter City Communities. This "bow echo" remained rather intense and down numerous trees and power lines from around Schlater to near Minter City. By 1235 pm, the "bow echo" segment lifted northeast out of Leflore county. However, the rest of the squall line still had to move across the southern half of Leflore County. As the line moved through, a few power lines were blown down in Itta Bena and then Greenwood causing many power outage.

MSZ062

Lincoln									
	09	1225CST			0	0	40K		Strong Wind (EG45)

Strong gradient winds occurred ahead of a squall line. Winds gusted around 45 kts (52 mph) and caused a few power lines to get blown down across the county. Additionally, a country store just west of Brookhaven had a portion of its metal roof blown off.

Humphreys County

Belzoni	09	1244CST			0	0			Thunderstorm Wind (EG57)

------------------------------------	-----------	----------------------------------	--	--	----------	----------	------------	--	---------------------------------

The squall line which caused the damage across eastern Attala County intensified and tracked across a large portion of central Winston County. A very intense "bow echo" formed in the line and caused a swath of extensive damage from around the Four Corners Community to Louisville and then to points northeast around Betheder.

The "bow echo" began near the Four Corners Community and several large signs were blown down or snapped off and a large commercial building had its roof blown off. Many trees and power lines were blown down around this area and across the western portion of the county. As the "bow echo" approached Louisville two homes sustained roof damage and more trees were blown down. Areas in and around Louisville were particularly hard hit. Nearly a dozen homes and businesses sustained significant roof damage with the funeral home having the roof totally removed. Nearly six other homes sustained minor roof damage. Dozens of trees, along with several power lines, were blown down around town. The storm continued to the northeast and downed more trees and power lines before it moved into southern Oktibbeha County.

Choctaw County

Ackerman	09	1450CST			0	0			Thunderstorm Wind (EG55)

MISSISSIPPI, Central

was from just west and southwest of Columbus eastward to the Alabama state line.

The first swath of damage downed numerous trees and power lines. Many homes sustained roof and shingle damage with a few homes sustaining minor structural damage. One home, which was under construction, was completely leveled. Most of this damage occurred in and around the Caledonia Community.

The second swath of damage started just southwest of Columbus and pushed east right through town and toward the Alabama state line. The damage began with several highway signs blown down along Highway 82. The winds grew stronger as the squall line neared town. Extensive damage occurred across the south side of town and point just to the east of town. Hundreds of trees were snapped or blown down with dozens of large trees uprooted. Many power lines and power poles were taken down as well. Nearly 25 roads were blocked from downed trees and power lines. Many homes sustained roof and shingle damage with several homes sustaining significant roof damage. Many sheds and outbuildings were damaged or destroyed. Five to ten homes had trees fall on them caused major damage. An apartment complex just east of town had extensive roof damage and a few trees on some of the buildings. Here, 3 injuries occurred.

Noxubee County **1 N Brooksville**

09	1527CST								
		0	0	200K	Thunderstorm Wind (EG57)				

Many shingles were blown off some homes and a few businesses along with a gas station sign blown down

MSZ066

Jones

09	1530CST								
		0	0	60K	Strong Wind (EG45)				

Strong winds ahead of a squall line caused a building to loose a portion of its tin roof. This large portion of tin was blown off and laid across the street. Additionally, the strong winds blew down a few power lines. All the damage around Laurel occurred before the rain and line of storms arrived.

Lawrence County **New Hebron**

09	1535CST								
		0	0	Thunderstorm Wind (EG55)					

Several trees were blown down.

Noxubee County **Macon to** **1 N Macon**

09	1540CST								
		0	0	120K	Thunderstorm Wind (EG65)				

Many trees and several power lines were blown down. Just north of Macon, one building had its roof peeled off

Neshoba County **9 E Philadelphia**

09	1540CST								
		0	0	Thunderstorm Wind (EG55)					

Several trees were blown down. One tree was blocking an area road.

Newton County **Newton**

09	1545CST								
		0	0	100K	Thunderstorm Wind (EG67)				

Numerous trees were blown down, one home had its roof blown off and a few sheds were blown over
