

EPA National Decontamination Team

US EPA Office of Solid Waste and Emergency Response Office of Emergency Management National Decontamination Team

Formed in 2004, The National Decontamination Team (NDT) is a federal scientific and technical resource for decontamination science that supports actions to protect human health, the environment, and national security. NDT provides coordination, communication, and delivery of decontamination expertise to local, national, and international agencies supporting hazardous material response and remedial operations. The team consists of highly specialized and experienced emergency responders, engineers and scientists dedicated to providing immediate technical decontamination expertise at the scene of a chemical, biological, or radiological attack. NDT is a resource for expertise and support to On-Scene Coordinators (OSCs) on decontamination of buildings or other structures in the event of an incident involving releases of radiological, biological or chemical contaminants.

Decontamination crews in the Hart Senate Office Building in 2001.
