

Drinking Water Infrastructure Needs Survey and Assessment Third Report to Congress

Content

EXECUTIVE SUMMARY	1
Methods for the Assessment	2
Methods Used to Assess State Needs	2
Methods Used to Assess American Indian and Alaska Native Village Water System Needs	3
Models for Assigning Costs to Projects Without Costs	4
Total National Need	4
Total Need Compared to Previous Needs Assessments	5
Total Need: System Size and Type	6
Total Need: Current and Future	6
Total Need: Project Type	7
The Regulatory Need	9
Security Needs	10
Needs for Small Water Systems	11
Needs of American Indian and Alaska Native Village Water Systems	11
Challenges for Future Assessments	11
Conclusions	12
SCOPE OF THE ASSESSMENT AND SURVEY METHODS	13
Scope of the Assessment	13
Assessment Methods	16
Conducting the State Survey for Large and Medium Systems	16
Improvements for the 2003 Needs Assessment of Medium and Large Systems	16
Method for Estimating the Small System, Not-for-Profit Noncommunity System, and American Indian and Alaska Native Village Need	17
Documented Costs and Cost Models	18
Information Quality	19
FINDINGS	23
Total 20-Year National Need	23
Current and Future Needs	24
Total Need by Project Type	26
The Regulatory Need	29
Existing Regulations	30
Security Needs	31
Community Water Systems Serving 10,000 and Fewer People	33
Not-for-Profit Noncommunity Water Systems	33
American Indian and Alaska Native Village Water System Need	34
American Indian Water System Needs	35
Alaska Native Village Water System Needs	35
Total Need Compared to Previous Needs Assessments	36
APPENDIX A—PAYING FOR AND FINANCING INFRASTRUCTURE IMPROVEMENTS	39
APPENDIX B—METHODS: SAMPLING AND COST MODELING	43
APPENDIX C—SUMMARY OF QUALITY ASSURANCE PROCEDURES	51
APPENDIX D—SUMMARY OF FINDINGS	57
APPENDIX E—SUMMARY OF FINDINGS FOR SYSTEMS SERVING 10,000 AND FEWER PEOPLE	67
APPENDIX F—GLOSSARY	69

These photographs show the construction and completion of a tank in Bartlesville, Oklahoma.

Exhibits

Exhibit ES-1: 1999 versus 2003 Current and Future Need	6
Exhibit ES-2: Total 20-Year Need	7
Exhibit ES-3: Total 20-Year Need by Project Type	8
Exhibit ES-4: 20-Year Regulatory and Non-Regulatory Need	9
Exhibit ES-5: 20-Year Regulatory Need	10
Exhibit ES-6: Total 20-Year American Indian and Alaska Native Village Water System Need by Project Type	11
Exhibit 1: Overview of Needs by System Size and Type	24
Exhibit 2: Overview of Needs by State	25
Exhibit 3: Total Need by Project Type	27
Exhibit 4: 20-Year Total Regulatory and Non-Regulatory Need	29
Exhibit 5: 20-Year Regulatory Need	30
Exhibit 6: Security Needs by Project Type	32
Exhibit 7: Total 20-Year Need for Not-for-Profit Noncommunity Water Systems by Project Type	33
Exhibit 8: Total American Indian and Alaska Native Village Water System Need by Project Type	34
Exhibit 9: Total 20-Year Need by Project Type for American Indian Water Systems	35
Exhibit 10: Total 20-Year Need by Project Type for Alaska Native Village Water Systems	35
Exhibit B-1: Size Category Definitions	44
Exhibit B-2: Community Water System Sample Sizes	46
Exhibit B-3: Conventional Treatment Plant Project Cost Curve	48
Exhibit D-1: Total Need for Water Systems in the States by Project Type	58
Exhibit D-2: Current Need for Water Systems in the States by Project Type	59
Exhibit D-3: Total Need for Water Systems in the States by System Size	60
Exhibit D-4: Current Regulatory Need for Water Systems in the States	61
Exhibit D-5: Total Existing Regulatory Need for Water Systems in the States	62
Exhibit D-6: Total Need for American Indian and Alaska Native Village Systems by EPA Region	63
Exhibit D-7: Total Need by Project Type for American Indian and Alaska Native Village Water Systems	64
Exhibit D-8: Total Existing Regulatory Need for American Indian and Alaska Native Village Water Systems	65
Exhibit D-9: Total Proposed and Recently Promulgated Regulatory Need	66
Exhibit E-1: Total Need for Systems Serving 10,000 and Fewer People	68

Fort Peck-Dry Prairie Regional Water System. This raw water intake pump station will draw an average daily flow of 5.5 million gallons per day (MGD) from the Missouri River to serve 22 communities in northeastern Montana. These communities are currently served by individual wells with poor water quality.

ACKNOWLEDGMENTS

Many dedicated individuals contributed to the 2003 Drinking Water Infrastructure Needs Survey and Assessment. We would like to thank the state and EPA Needs Assessment Coordinators and their supporting staff and contractors for active participation and continuing interest in the project. Not listed are the operators and managers of the approximately 4,000 systems who spent their valuable time completing the questionnaires we sent to them. We thank them for their assistance.

Mark Spinale—U.S. EPA Region 1
Theodore Dunn, Raymond Jarema—Connecticut
Shannon Gallant, Roger Crouse—Maine
Michael Maynard, Jack Hamm—Massachusetts
Richard Skarinka—New Hampshire
Gary Chobanian, Romeo Mendes—Rhode Island
Rodney Pingree—Vermont

Raymond Kvalheim—U.S. EPA Region 2
Roger Tsao—New Jersey
Steve Marshall—New York
Eva Hernandez, Olga Rivera—Puerto Rico
Christine Lottes—Virgin Islands

Don Niehus—U.S. EPA Region 3
George Rizzo—U.S. EPA Region 3, District of Columbia
Ed Hallock—Delaware
Daniel Piasecki, Saeid Kasraei, Chris Carski—Maryland
Renee Bartholomew, Dana Aunkst—Pennsylvania
Thomas B. Gray—Virginia
Patrick Taylor—West Virginia

Walter Hunter, Dale Froneberger—U.S. EPA Region 4
Eric Holt—Alabama
Craig Diltz, Tim Banks—Florida
Aileen Trotter—Georgia
Carol Moore—Kentucky
Sheila Williams, Keith Allen—Mississippi
Sid Harrell—North Carolina
Tom McDonough—South Carolina
Khaldoun Kailani—Tennessee

William Tansey—U.S. EPA Region 5
Rick Cobb, Eric Portz—Illinois
Shelley Love, Cortney Stover—Indiana
Richard Benzie—Michigan
Brian Noma—Minnesota
Stacy Barna—Ohio
James Witthuhn—Wisconsin

Tom Poeton—U.S. EPA Region 6 and New Mexico
Raymond Thompson—Arkansas
Julie Comeaux—Louisiana
Robert K. Mullins—Oklahoma
Fawn McDonald—Texas

Kelly Beard-Tittone—U.S. EPA Region 7
Roy Ney—Iowa
William Carr—Kansas
Stephen Jones—Missouri
Larry Steele—Nebraska

Minnie Moore Adams, Adrienne Rivera—U.S. EPA Region 8 and Wyoming
John Payne—Colorado
Marc Golz, Gary Wiens—Montana
Chuck Abel—North Dakota
Jim Anderson—South Dakota
Tim Pine—Utah

Jose Caratini, Sara Jacobs—U.S. EPA Region 9
Susan Cox, Barry Pollock—U.S. EPA Region 9, Pacific Islands
Moncef Tihami—Arizona
Uyen Trinh-Le, Robin Hook—California
Angel Marquez—Guam
Bill Wong, Denise Dang—Hawaii
Adele Basham—Nevada

Richard Green—U.S. EPA Region 10
Sherri Trask, James Weise—Alaska
Nancy Bowser—Idaho
Mike Grimm—Oregon
Peter Beaton—Washington

EPA Office of Water
David Travers, Lisa Almodovar and Robert Barles—Needs Assessment Coordinators
Chuck Job—Drinking Water Infrastructure Branch Chief
The Cadmus Group, Inc.—Prime Contractor
