### Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 75 percent of your average yield. For example, an average apple yield of 500 boxes per acre would result in a 250 boxes per acre guarantee at the 50-percent coverage level.

**Catastrophic (CAT) Coverage** is fixed at **50 percent** of your average yield and **55 percent** of the price election. Your cost for CAT coverage will be an administrative fee of \$100 per county, regardless of the acreage.

## Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$100 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county FSA office for an agent listing.
