Enter without dashes

NIH31 is a random weight chunk formula (random chunks), ranging from approximately 2.0gr – 3.0gr
Pellet size can not be pre-selected with this choice of formula.

NIH31/NIA Fortified pellet sizes cut to order, starting at 2.5gr up to 5.0gr in increments of .5gr
You must indicate the pellet size and quantity desired, or Harlan can calculate the quantity needed if you provide the strain, sex, age of animals (in the Special Requirements section below), and the number of weeks (in the Duration column in the table below) that the animals are going to be fed.

Select only one formula (NIH31 or NIH31/NIA-Fortified) per line.

NIH31	NIH31/NIA -Fortified	Pellet Size	Quantity	Duration	Delivery Date
