

What you can do during an earthquake

1. Every one should **duck and cover and hold**. Well-trained children and adults will generally do that. Do not move until the shaking stops.
2. If you are outside, stay away from overhead power lines, trees and overpasses. **Duck and cover**.
3. If you are in a car, pull over to the side of the road and stop. Stay away from overhead power lines, trees, and overpasses. Stay in the car until the shaking stops.
