MEMORANDUM TO: Christopher I. Grimes, Program Director  
Policy and Rulemaking Program  
Division of Regulatory Improvement Programs, NRR

FROM: Joseph L. Birmingham, Project Manager */RA/*  
Policy and Rulemaking Program  
Division of Regulatory Improvement Programs, NRR

SUBJECT: SUMMARY OF SEPTEMBER 19, 2002, PUBLIC MEETING TO  
DISCUSS COMMENTS ON DRAFT REGULATORY GUIDES DG-1111  
AND DG-1113 REGARDING CONTROL ROOM HABITABILITY (CRH)

On September 19, 2002, a public meeting was held at the Nuclear Regulatory Commission's (NRC) headquarters in Rockville, Maryland, to discuss the comments received on draft regulatory guides DG-1111, "Atmospheric Relative Concentrations for Control Room Radiological Habitability Assessments at Nuclear Power Plants," and DG-1113, "Methods and Assumptions for Evaluating Radiological Consequences of Design Basis Accidents at Light-Water Nuclear Power Reactors." The meeting was an opportunity to clarify the content of the comments which were generally technical in nature. Those attending the meeting are identified in Attachment 1 of this memorandum. Copies of DG-1111 and DG-1113 may be found in NRC's document management system, ADAMS, under accession numbers ML013130132 and ML020160023 respectively. Attachment 2 of this memorandum, lists the accession numbers of the public comments received on each of the draft regulatory guides.

Steve LaVie and Mark Blumberg discussed the comments for the NRC and Stephen Schultz was the lead for industry. Because the meeting was intended only to discuss the comments there was no presentation and there were no meeting handout materials. After discussing the comments, the group agreed that the effort had been beneficial in achieving a clearer understanding of the comments which should result in a better regulatory guide. Having completed the review, the meeting was adjourned.
