

Federal PKI Legal & Policy Working Group Meeting
April 22, 2002

Since the FBCA is going to interoperate with non-Federal agencies, new language is being discussed and drafted for the FBCA CP. An example of this would be the language in section 2.2 (Liability) of the FBCA CP.

John briefed the group on the Federal Tort Claims Act.

There was a discussion concerning the filtering of IP addresses that try to access the FBCA directory.

There will be a discussion on the draft PKI Assessment Guide in Brief at a future LPWG meeting. In the meantime, please review and be ready to discuss this document.

The Citizen Cert Team drafted a report that deals with accreditation of a certificate authority for citizen certificates. This report was submitted to Judy for comments. Judy wants Gene to rework the draft to incorporate all types of identity credentials (PIN/Passwords, digital certificates, different levels of identity assurance) for the e-Authentication task force.

Mark Giguere of NARA will brief the group on "Electronic Records Management Guidance for PKI" at the next LPWG meeting.

Gene would like to start a team interested in policy for identity proofing. If you would like to volunteer, contact Gene for more information.

The following action items were assigned:

1. Shauna and John will draft a revised liability statement to make sure that the proposed language meets the intent of the members present.
2. Shauna will email the final version of the draft PKI Assessment Guide in Brief to the LPWG members.
3. Gene and Peter will rewrite the Citizen Cert draft report to incorporate all types of identity credentials for the e-authentication task force.
4. Peter will research the capability of filtering IP addresses that try to access the FBCA directory.

The next LPWG meeting is scheduled for May 20th at 1pm. Located at the GSA/NCR building in conference room 5700.
