April 2, 2003

Mr. John L. Skolds, President Exelon Nuclear Exelon Generation Company, LLC 4300 Winfield Road Warrenville, IL 60555

# SUBJECT: DRESDEN NUCLEAR POWER STATION NRC INSPECTION REPORT 50-237/03-03(DRS); 50-249/03-03(DRS)

Dear Mr. Skolds:

On March 28, 2003, the NRC completed an inspection at your Dresden Nuclear Power Station, Units 2 and 3. The enclosed report documents the inspection findings, which were discussed on March 28, 2003, with Mr. R. Hovey and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel. Specifically, this inspection focused on emergency preparedness, including your staff's determinations of performance indicators for the Emergency Preparedness Cornerstone.

On the basis of the results of this inspection, no findings of significance were identified.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the USNRC Public Document Room or from the Publicly Available Records (PARS) component of USNRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <u>http://www.nrc.gov/reading-rm/adams.html</u> (the Public Electronic Reading Room).

Sincerely,

# /**RA**/

Sonia Burgess, Acting Chief Plant Support Branch Division of Reactor Safety

Docket Nos: License Nos:	50-237; 50-249 DPR-19; DPR-25
Report No:	50-237/03-03(DRS); 50-249/03-03(DRS)
Licensee:	Exelon Generation Company, LLC
Facility:	Dresden Nuclear Power Station, Units 2 and 3
Location:	6500 North Dresden Road Morris, IL 60450
Dates:	March 24 through March 28, 2003
Inspectors:	<ul> <li>T. Ploski, Senior Emergency Preparedness Inspector</li> <li>R. Jickling, Emergency Preparedness Inspector</li> <li>R. Schmitt, Radiation Protection Inspector</li> <li>B. Dickson, Resident Inspector</li> </ul>
Observers:	D. Eskins, Resident Inspector C. Zoia, Examiner R. Echoles, Engineer
Approved by:	Sonia Burgess, Acting Chief Plant Support Branch Division of Reactor Safety

### SUMMARY OF FINDINGS

IR 05000237-03-03(DRS), 05000249-03-03(DRS); Exelon Generation Company, LLC; on 03/24-03/28/2003; Dresden Station, Units 2 and 3. Emergency Preparedness Specialist Report.

The report covers a one-week baseline inspection by two regional emergency preparedness inspectors, a radiation protection inspector, and a resident inspector. The inspection focused on the Emergency Preparedness Cornerstone in the Reactor Safety strategic performance area during the biennial emergency preparedness exercise. This inspection also included a review of records related to the three emergency preparedness performance indicators for the fifteen-month period ending December 31, 2002. No findings of significance were identified.

The NRC's program for overseeing the safe operation of commercial nuclear power reactors is described in NUREG-1649, "Reactor Oversight Process," Revision 3, dated July 2000.

# **REPORT DETAILS**

# 1. **REACTOR SAFETY**

### **Cornerstone: Emergency Preparedness**

### 1EP1 Exercise Evaluation (71114.01)

#### a. Inspection Scope

The inspectors reviewed the March 26, 2003 exercise's objectives and scenario to ensure that the exercise would acceptably test major elements of the licensee's emergency plan and to verify that the exercise's simulated problems provided an acceptable framework to support demonstration of the licensee's capability to implement its plan. The inspectors also reviewed records of a drill, which was conducted on February 2003, to determine whether the associated accident scenario was sufficiently different from the scenario used in the March 26, 2003 exercise.

The inspectors evaluated the licensee's exercise performance, focusing on the risk-significant activities of emergency classification, notification, and protective action decision making, as well as implementation of accident mitigation strategies in the following emergency response facilities:

- Control Room Simulator;
- Technical Support Center (TSC);
- Operations Support Center (OSC); and
- Emergency Operations Facility (EOF).

The inspectors also assessed the licensee's recognition of abnormal plant conditions, transfer of responsibilities between facilities, internal communications, interfaces with offsite officials, readiness of emergency facilities and related equipment, and overall implementation of the licensee's emergency plan.

The inspectors attended post-exercise critiques in the TSC, OSC, and EOF to evaluate the licensee's initial self-assessment of its exercise performance. The inspectors later met with the licensee's lead exercise evaluators to obtain the licensee's refined assessments of its exercise participants' performances. These self-assessments were then compared with the inspectors' independent observations and assessments.

### b. Findings

No findings of significance were identified.

# 4. **OTHER ACTIVITIES**

### 4OA1 Performance Indicator (PI) Verification (71151)

#### a. Inspection Scope

The inspectors reviewed the licensee's records related to each of the three emergency preparedness PIs to verify that the licensee's program was implemented consistent with the industry guidelines in Nuclear Energy Institute publication No. 99-02, "Regulatory Assessment Performance Indicator Guideline," Revision 2, and related licensee procedures. Specifically, licensee records related to the performance of the Alert and Notification System (ANS), key Emergency Response Organization (ERO) members' drill participation, and Drill and Exercise Performance (DEP) were reviewed to verify the accuracy and completeness of the data submitted to USNRC for the period from October 2001 through December 2002.

b. Findings

No findings of significance were identified.

#### 40A6 Meetings

#### Exit Meeting

The inspectors presented the inspection results to Mr. R. Hovey and other members of licensee management and staff at the conclusion of the inspection on March 28, 2003. The licensee acknowledged the information presented. No proprietary information was identified.
