

ARE NOT CAUSED BY FIRE ALONE.

Most people think of a burn as an injury from a fire. But there are many ways to get burned, which means you should be thinking about preventing different kinds of burns. Unscramble the words in the right column to discover the six major types of burns and write it on the line. Read how each burn is caused. Then look for all of the underlined words in the definitions as well as the words you wrote on the lines in the word search below:
