U.S. DEPARTMENT OF HOMELAND SECURITY - FEDERAL EMERGENCY MANAGEMENT AGENCY RIVERINE HYDROLOGY & HYDRAULICS FORM

O.M.B No. 1660-0016 Expires: 12/31/2010

PAPERWORK REDUCTION ACT

Public reporting burden for this form is estimated to average 3.25 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the needed data, and completing, reviewing, and submitting the form. You are not required to respond to this collection of information unless a valid OMB control number appears in the upper right corner of this form. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing this burden to: Information Collections Management, U.S. Department of Homeland Security, Federal Emergency Management Agency, 500 C Street, SW, Washington DC 20472, Paperwork Reduction Project (1660-0016). Submission of the form is required to obtain or retain benefits under the National Flood Insurance Program. Please do not send your completed survey to the above address.

F	looding	Source:	

Note: Fill out one form for each flooding source studied

A. HYDROLOGY

1.	Reason for New Hydrologic Analysis (check all that apply)				
	Not revised (skip to section B)	No existing analysis		Improved data	
	Alternative methodology	Proposed Conditions (CLOMR)	Changed physical con	dition of watershed
2.	Comparison of Representative 1%-Annu	arison of Representative 1%-Annual-Chance Discharges			
	Location	Drainage Area (Sq. Mi.)	Effective/F	FIS (cfs)	Revised (cfs)
3.	. Methodology for New Hydrologic Analysis (check all that apply)				
	Statistical Analysis of Gage Records Precipitation/Runoff Model Begional Regression Equations Other (please attach description) Please enclose all relevant models in digital format, maps, computations (including computation of parameters) and documentation to support the new analysis.				
					cumentation to support the
4.	Review/Approval of Analysis				
	If your community requires a regional, state, or federal agency to review the hydrologic analysis, please attach evidence of approval/review.				e of approval/review.
5.	Impacts of Sediment Transport on Hydrology				
	Was sediment transport considered? 🗌 Yes 🗋 No If yes, then fill out Section F (Sediment Transport) of Form 3. If No, then attach your explanation for why sediment transport was not considered.				

B. HYDRAULICS

1.	Reach to be Revised					
		Description	Cross Section	Water-Surface Elevations (ft.)		
				Effective	Proposed/Revised	
	Downstream Limit					
	Upstream Limit					
2.	Hydraulic Method/Model Used					

3. Pre-Submittal Review of Hydraulic Models

DHS-FEMA has developed two review programs, CHECK-2 and CHECK-RAS, to aid in the review of HEC-2 and HEC-RAS hydraulic models, respectively. These review programs may help verify that the hydraulic estimates and assumptions in the model data are in accordance with NFIP requirements, and that the data are comparable with the assumptions and limitations of HEC-2/HEC-RAS. CHECK-2 and CHECK-RAS identify areas of potential error or concern. **These tools do not replace engineering judgment.** CHECK-2 and CHECK-RAS can be downloaded from http://www.fema.gov/plan/prevent/fhm/frm_soft.shtm. We recommend that you review your HEC-2 and HEC-RAS models with CHECK-2 and CHECK-2 and CHECK-RAS. Review of your submittal and resolution of valid modeling discrepancies may result in reduced review time.

4.	Models Submitted	Nat	Natural Run		Floodway Run		
	Duplicate Effective Model* Corrected Effective Model* Existing or Pre-Project Conditions Model Revised or Post-Project Conditions Model Other - (attach description)	File Name: File Name: File Name: File Name: File Name:	Plan Name: Plan Name: Plan Name: Plan Name: Plan Name:	File Name: File Name: File Name: File Name: File Name:	Plan Name: Plan Name: Plan Name: Plan Name: Plan Name:		
* Fc	* For details, refer to the corresponding section of the instructions.						
	Digital Models Submitted? (Required)						

C. MAPPING REQUIREMENTS

A **certified topographic map** must be submitted showing the following information (where applicable): the boundaries of the effective, existing, and proposed conditions 1%-annual-chance floodplain (for approximate Zone A revisions) or the boundaries of the 1%- and 0.2%-annual-chance floodplains and regulatory floodway (for detailed Zone AE, AO, and AH revisions); location and alignment of all cross sections with stationing control indicated; stream, road, and other alignments (e.g., dams, levees, etc.); current community easements and boundaries; boundaries of the requester's property; certification of a registered professional engineer registered in the subject State; location and description of reference marks; and the referenced vertical datum (NGVD, NAVD, etc.).

Digital Mapping (GIS/CADD) Data Submitted

Note that the boundaries of the existing or proposed conditions floodplains and regulatory floodway to be shown on the revised FIRM and/or FBFM must tie-in with the effective floodplain and regulatory floodway boundaries. Please attach **a copy of the effective FIRM and/or FBFM**, annotated to show the boundaries of the revised 1%- and 0.2%-annual-chance floodplains and regulatory floodway that tie-in with the boundaries of the effective floodplain and regulatory floodway at the upstream and downstream limits of the area of revision.

Annotated FIRM and/or FBFM (Required)

D. COMMON REGULATORY REQUIREMENTS*

1.	For LOMR/CLOMR requests, do Base Flood Elevations (BFEs) increase?	🗌 Yes 🔲 No		
	 a. For CLOMR requests, if either of the following is true, please submit evidence of compliance with Section 65.12 of the NFIP regulations: The proposed project encroaches upon a regulatory floodway and would result in increases above 0.00 foot. The proposed project encroaches upon a SFHA with or without BFEs established and would result in increases above 1.00 foot. 			
	b. For LOMR requests, does this request require property owner notification and acceptance of BFE increases?			
	If Yes, please attach proof of property owner notification and acceptance (if available) . Elements of and examples of property own notification can be found in the MT-2 Form 2 Instructions.			
2.	Does the request involve the placement or proposed placement of fill?	🗌 Yes 🗌 No		
	If Yes, the community must be able to certify that the area to be removed from the special flood hazard ar proposed structures, meets all of the standards of the local floodplain ordinances, and is reasonably safe from NFIP regulations set forth at 44 CFR 60.3(a)(3), 65.5(a)(4), and 65.6(a)(14). Please see the MT-2 instructions for	flooding in accordance with the		
3.	For LOMR requests, is the regulatory floodway being revised?	🗌 Yes 🗌 No		
	If Yes, attach evidence of regulatory floodway revision notification . As per Paragraph 65.7(b)(1) of the NFIP required for requests involving revisions to the regulatory floodway. (Not required for revisions to approximate 19 [studied Zone A designation] unless a regulatory floodway is being added. Elements and examples of regulatory can be found in the MT-2 Form 2 Instructions.)	%-annual-chance floodplains		
4.	For LOMR/CLOMR requests, does this request have the potential to impact an endangered species?	🗌 Yes 🗌 No		
	If Yes, please submit documentation to the community to show that you have complied with Sections 9 and 10 (ESA). Section 9 of the ESA prohibits anyone from "taking" or harming an endangered species. If an action mig a permit is required from U.S. Fish and Wildlife Service or National Marine Fisheries Service under Section 10 of	ht harm an endangered species,		

For actions authorized, funded, or being carried out by Federal or State agencies, please submit documentation from the agency showing its compliance with Section 7(a)(2) of the ESA.

* Not inclusive of all applicable regulatory requirements. For details, see 44 CFR parts 60 and 65.
