

Oilseeds: World Markets and Trade

Soy Oil Prices Accelerating Faster than Palm Oil as Soy Stocks Drop and Palm Oil Rises

Ending stocks of soy oil and palm oil are forecast to diverge as soy oil supplies are drawn down by massive demand from China and the development of the Argentine biodiesel industry. Alternatively, palm oil stocks are forecast to rebound due to surging production in Malaysia and Indonesia. This divergence has widened the price gap between soy oil and palm oil to \$195/ton, representing the largest price discount palm oil has held against soy oil.

Palm oil prices are rising because of the imposition of a progressive, price-based export tax on palm oil shipments from Indonesia and strong domestic use attributed to the development of biodiesel industries in both Indonesia and Malaysia. But because other vegetable oil prices are rising faster, palm oil is increasingly becoming the most attractive vegetable oil for importing nations, especially in the developing world, as they seek to mitigate rising vegetable oil prices.
