

Errata

In May 2008, EPA incorporated the following changes to *Background Documents Supporting Climate Change Science Program Synthesis and Assessment Product 4.1: Coastal Elevations and Sensitivity to Sea Level Rise*.

Page	Section	Correction
15	1.1	Figure 1.1.5 has been updated
101	1.3.3	Fourth paragraph, first sentence should read "Overall, we estimate between 8,792 and 10,882 square kilometers of land within 50 cm above the tides, and 11,032 to 12,985 square kilometers within 1 meter above the tides in the middle Atlantic (see Appendix C)."
116-118	1.3	Table A.8: Low and high estimates of the area of land have been revised.
131-133	1.3	Table C.1: Low and high estimates of the area of land have been revised for Pamlico-Albemarle Sound, Atlantic Coast of North Carolina, and the region-wide totals of dry land and all land.
