Notes:

1. The Tariff Schedule of the United States (TSUS), established by the Tariff Classification Act of 1962, was used to classify imports into the United States from August 1963 to December 1988.
2. The Harmonized System, adopted under the Omnibus Trade and Competitiveness Act of 1988, replaced TSUS in January 1989.
3. APTA, which appears at the end of several product descriptions, refers to the Automotive Parts Trade Agreement signed with Canada in 1965. APTA allowed tariff free movement of auto parts, including bearings, between U.S. and Canada. APTA was incorporated into the Canadian Free Trade Agreement in 1989.
4. Product Code, up to 8-digits, is unofficial; it is used here to organize data and facilitate comparison of domestic production, imports and exports.
