

Domestic Private Foundations and Charitable Trusts: Charitable Distributions and Investment Assets, Tax Year 2004

by Melissa Ludlum

P rivate foundations distribute billions of dollars to the charitable sector each year. Generally, these distributions are grants to other tax-exempt organizations to assist in funding their charitable programs. Because the activities of private foundations are primarily charitable, most income that they receive is exempt from tax under Internal Revenue Code (IRC) section 501(c)(3). However, private foundations are subject to a variety of IRS regulations regarding their activities. Private foundations report compliance with IRS regulations, as well as detailed financial information, using the annual information return Form 990-PF, *Return of Private Foundation (or Section 4947(a)(1) Charitable Trust Treated as a Private Foundation)*. Certain nonexempt charitable trusts that are treated as private foundations for tax purposes are also required to file this return.

Form 990-PF can provide insight into a wide range of issues related to private foundations and nonexempt charitable trusts, such as organizational and operating characteristics; composition of assets, revenue, and expenditures; and the relationship between charitable contributions and investment return. Between Tax Years 2003 and 2004, the total number of Forms 990-PF filed by private foundations increased by less than 1 percent to 76,897. The number of returns filed by nonexempt charitable trusts increased more substantially, by 12 percent, to 3,511.

Contributions, gifts, and grants distributed to the charitable sector by both private foundations and nonexempt charitable trusts increased for Tax Year 2004. Private foundations distributed \$27.6 billion in contributions, gifts, and grants for 2004, a 4-percent increase from the previous tax year. Nonexempt charitable trusts distributed 13 percent more in contributions, gifts, and grants for Tax Year 2004 than for the previous year, an increase that nearly mirrored the change in the number of returns filed. Various financial data that were reported on Forms 990-PF by private foundations and nonexempt charitable trusts for 2003 and 2004, including asset, revenue, and expense items, are shown in Figure A.

Often, investment assets provide the basis for giving by grantmaking foundations and charitable

trusts. The value of investment assets held by private foundations increased by 7 percent between Tax Years 2003 and 2004. Investment assets represented more than 94 percent of the fair market value of total assets reported by private foundations, which also increased by 7 percent to \$509.9 billion. Non-investment assets, such as cash; receivables; inventories; prepaid expenses and deferred charges; and land, buildings, and equipment held for charitable purposes, increased by 10 percent to \$28.7 billion. The value of investment assets held by nonexempt charitable trusts increased by 10 percent between Tax Year 2003 and Tax Year 2004. Nonexempt charitable trusts reported an aggregate fair market value of total assets of \$5.6 billion; investment assets represented 98 percent of that amount.

Revenue received by private foundations and nonexempt charitable trusts for Tax Year 2004 consisted primarily of income derived from assets and contributions, gifts, and grants received. Income derived from assets, including net gains from sales of assets, interest and dividends from securities, and interest on savings, accounted for more than half of total revenue reported by private foundations. Contributions, gifts, and grants received represented an additional 40 percent of total revenue.

Overall, private foundations reported 21 percent more revenue received for Tax Year 2004 than for Tax Year 2003. Total revenue reported by nonexempt charitable trusts increased by nearly 48 percent to \$502 million. Nearly 60 percent of revenue reported by nonexempt charitable trusts was received from net gains from sales of assets, interest and dividends from securities, and interest on savings. Contributions, gifts, and grants received accounted for approximately one-third of revenue reported by nonexempt charitable trusts.

The Statistics of Income Study

The data presented in this article are from sampled Forms 990-PF filed for Tax Year 2004 by domestic private foundations and from the population of Tax Year 2004 Forms 990-PF filed by domestic nonexempt charitable trusts that were treated as private foundations. Domestic foundations and trusts are those that were organized in the United States. Tax Year 2004 includes all accounting periods beginning in Calendar Year 2004 and thus ending between

[1] Sum of "Investments in land, buildings, and equipment (less accumulated depreciation)," "Investments in mortgage loans," and miscellaneous items such as advances; certificates of investment; and investments in art, coins, gold, and gems.

December 2004 and November 2005. Consequently, the returns reflect financial activity that occurred in either Calendar Year 2004 or 2005, or some portion of both (see the Data Sources and Limitations section for further information).

Statistics of Income studies based on stratified random samples of returns filed by private foundations have been conducted for Tax Years 1974, 1979, 1982, 1983, and annually since 1985. Studies based on sampled Forms 990-PF filed by charitable trusts have been conducted for Tax Year 1979 and annually since 1989. Beginning with Tax Year 2003, the population of Forms 990-PF filed by nonexempt charitable trusts has been included in the SOI study.

Composition of Filers

Under IRC section 501(c)(3), private foundations and other organizations that conduct activities or provide financial support for charitable purposes are granted exemption from the income taxes described in IRC, Title 26, Subtitle A.¹ Foundations represent a minority of tax-exempt organizations; most tax-ex-

empt organizations are hospitals, schools, churches, and organizations that receive broad support from the general public. Many of these types of tax-exempt organizations file Form 990, *Return of Organization Exempt From Income Tax*, or Form 990-EZ, the short version of this information return.²

Several characteristics distinguish a foundation from other types of tax-exempt organizations, including its narrow sphere of support and control. A private foundation may be organized as a corporation, association, or trust. Typically, a foundation is funded by a small number of private donors. Additionally, control of the private foundation is generally limited to an individual, family, or corporation.

Nonexempt charitable trusts that are treated as private foundations for tax purposes are trusts that have not obtained tax-exempt status, but they are funded and operated nearly identically to tax-exempt private foundations. These trusts have exclusively charitable interests and have amounts in trust for which donors are allowed to claim a tax deduction for charitable contributions. Unlike private founda-

¹ Programs termed "charitable" refer to tax-exempt activities that are charitable, educational, scientific, social, literary, or religious in nature.

² For a detailed discussion of organizations other than private foundations that are tax-exempt under IRC section 501(c)(3), see Arnberger, Paul, "Charities, Social Welfare, and Other Tax-Exempt Organizations, 2004," *Statistics of Income Bulletin*, in this issue.

NOTES: Detail may not add to totals because of rounding and processing tolerances. "FMV" is an abbreviation for fair market value.

tions, nonexempt charitable trusts are required to pay an annual tax on income that is not distributed for charitable purposes, and they must report such income and tax on Form 1041, *U.S. Fiduciary Income Tax Return*, in addition to filing Form 990-PF. Nonexempt charitable trusts with no taxable income for a tax year may file Form 990-PF only.

All private foundations and nonexempt charitable trusts are characterized as having one of two operating types—"nonoperating" or "operating." Private foundations and nonexempt charitable trusts that are characterized as nonoperating primarily contribute grants and other financial support to charitable organizations or activities. Nonoperating private foundations and charitable trusts are by far the most common Form 990-PF filers; 92 percent of Forms 990-PF filed for Tax Year 2004 were filed by nonoperating foundations or trusts.

Private foundations and charitable trusts that principally focus on the operation of their own charitable programs are known as operating foundations. Private foundations that operate as museums, housing or healthcare facilities, or organizations that conduct

scientific research are examples of foundations that frequently receive operating status. In order to qualify as operating, a foundation must meet certain financial criteria (see "Operating Foundations and Charitable Trusts" in the Explanation of Selected Terms section for information on operating foundations).

Figure B shows the number of returns filed, fair market value of total assets, total revenue, and total contributions, gifts, and grants paid, for Tax Year 2004 reported by Form 990-PF filers, by organization and operating type. More than 95 percent of Tax Year 2004 Forms 990-PF were filed by private foundations. In terms of financial activity, private foundations were even more dominant, reporting 99 percent of both the fair market value of total assets held and total contributions, gifts, and grants distributed by all Form 990-PF filers. Most foundations and nonexempt charitable trusts were similarly sized, with the majority of both types of organizations holding assets with fair market values of less than \$1,000,000. In fact, at \$390,803 for private foundations and \$336,692 for nonexempt charitable trusts, the median fair market values of total assets held by

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

foundations and trusts were nearly identical. However, the mean fair market value of total assets held by private foundations for Tax Year 2004 was \$6.6 million, but just \$1.6 million for charitable trusts, illustrating the presence of a small number of foundations holding large amounts of assets.

Large private foundations, defined as those with \$50 million or more in fair market value of total assets at the end of Tax Year 2004, accounted for the majority of financial activity of Form 990-PF filers. These organizations represented less than 2 percent of Tax Year 2004 Form 990-PF filers, including both private foundations and charitable trusts, yet held 67 percent of the aggregate fair market value of total assets reported. Further, nearly 60 percent of all assets for Form 990-PF filers were held by the 610 private foundations with assets valued at \$100 million or more. Large foundations also received most of the revenue, 57 percent, and distributed 55 percent of grants reported by all Tax Year 2004 Form 990-PF filers.

Ten Largest Domestic Foundations

The largest foundations, based on asset size, and the largest grantmakers, based on the total amount of contributions, gifts, and grants reported for Tax Year 2004, are shown in Figure C.³ Data obtained from Forms 990-PF differ from most other IRS return data, since individual return information may be published. In fact, returns are available for public review under IRC section 6104(b). For Tax Year 2004, ten foundations alone held nearly one-fifth of the total assets reported by the domestic Form 990-PF filers.

With assets valued at \$28.8 billion, the Bill and Melinda Gates Foundation was by far the largest organization in the domestic top ten. The Ford Foundation, with \$11.6 billion in assets, was the second-largest domestic private foundation. The J. Paul Getty Trust was the only operating foundation included in the top ten for Tax Year 2004. This foundation, which operates the J. Paul Getty museum, reported assets valued at more than four times those reported by the second-largest operating foundation, the Washington-based Casey Family Programs, which was ranked as the 22nd-largest foundation. The Bill and Melinda Gates and Ford foundations were also

Total.....		4,041	89,825

[1] The J. Paul Getty Trust is an operating foundation. All other organizations listed are nonoperating foundations.

[2] The W.K. Kellogg Foundation Trust (classified as a private foundation and not as a section 4947(a)(1) charitable trust) is located in New York and has a "passthrough" relationship with the W.K. Kellogg Foundation, located in Michigan. Typically, the entire amount of the annual qualifying (charitable) distributions of the W.K. Kellogg Foundation Trust is made in the form of a grant to the W.K. Kellogg Foundation, which then redistributes the grant for charitable purposes. The combined total assets of the two organizations are shown in the "Total assets" column, but, in order to avoid duplication, only the grants paid by the W.K. Kellogg Foundation are shown in the "Total grants paid" column.

NOTE: Detail may not add to totals due to rounding.

the leading grantmakers in Tax Year 2004, distributing \$1.3 billion and \$.5 billion in contributions, gifts, and grants for the year, respectively.

Investment Assets and Income

Investment performance figures significantly in the ability of private foundations to fund their short- and long-term grantmaking. Private foundations, particu-

³ Seven of the ten largest foundations and seven of the ten biggest grantmakers had calendar year accounting periods, meaning that all of their activity occurred during the calendar year period. However, three of the ten had other fiscal year accounting periods. For the 2004 Tax Year, the Ford Foundation had an accounting period ending in September 2005, the J. Paul Getty Trust in June 2005, and the W.K. Kellogg Foundation and the W.K. Kellogg Foundation Trust in August 2005; therefore, much of their activity for Tax Year 2004 occurred in Calendar Year 2005. See the *Data Sources and Limitations* section.

[1] Sum of "Investments in land, buildings, and equipment (less accumulated depreciation)," "Investments in mortgage loans," and miscellaneous items, such as advances; certificates of investment; and investments in art, coins, gold, and gems.

NOTES: Amounts have been adjusted for inflation based on the 2000 chain-type price index for Gross Domestic Product, as published by the U.S. Department of Commerce, Bureau of Economic Analysis and may differ from investment amounts in other tables and figures. Tax Year 2004 is the base year. Detail may not add to totals because of rounding and processing tolerances.

larly those that focus on long-term grantmaking, rely on growth from investment assets to finance future charitable distributions. Income derived from investment assets, including sales, dividends, and interest, provided more than half of foundation revenue for Tax Year 2004.

Figure D shows inflation-adjusted changes in the values of total and selected types of investments held by nonoperating foundations and charitable trusts, between Tax Years 2003 and 2004.⁴ The value of investments, which totaled \$481.2 billion in 2004, increased by 4 percent from Tax Year 2003. This relatively modest growth followed a 17-percent real increase in investment values between Tax

Years 2002 and 2003. Securities, comprising corporate stocks and bonds and Government obligations, represented the largest component of investment assets, accounting for three-quarters of aggregate investment assets. Savings and temporary cash investments and "other investments" represented 6 percent and 19 percent of the aggregate value of investments, respectively. The "other investments" category represents an aggregation of several items, including investments in land, buildings, and equipment (less accumulated depreciation); mortgage loans; and such additional items as advances, certificates of investment, and investments in art, gold, coins, and gems.

⁴ Data for investment assets in the text and in Figure D differ from those presented elsewhere in this article because they have been adjusted for inflation. Tax Year 2003 investment totals were adjusted based on the 2000 chain-type price index for Gross Domestic Product as reported by the U.S. Department of Commerce, Bureau of Economic Analysis; 2004 was used as the base year. Unless otherwise noted, all other data are in current dollars.

Domestic Nonoperating Private Foundations and Charitable Trusts: Net Investment Income Yields and Rates of Total Return on Assets, by Size of Beginning-of-Year Fair Market Value of Total Assets and Organization Type, Tax Year 2004

Organization type and asset size	Net investment income yields (percentages)		Rates of total return (percentages)	
	Median	Mean	Median	Mean
	(1)	(2)	(3)	(4)
All nonoperating private foundations.....	2.9	11.8	3.5	8.3
Less than \$1,000,000.....	2.2	9.9	2.0	9.6
\$1,000,000 under \$50,000,000.....	4.3	14.7	5.0	5.5
\$50,000,000 or more.....	5.9	28.4	7.2	7.4
All nonoperating charitable trusts.....	3.4	6.6	4.6	16.9
Less than \$1,000,000.....	3.1	6.9	4.4	20.8
\$1,000,000 under \$10,000,000.....	4.4	5.5	5.2	6.3
\$10,000,000 or more.....	4.5	5.9	5.9	5.6

Fixed-income investments, including Government obligations and corporate bonds, held by private foundations each declined by 5 percent, in real terms, for Tax Year 2004. These decreases likely reflected interest rate increases by the Federal Reserve throughout Calendar Year 2004; such increases can negatively impact fixed income values, potentially inducing organizations to move from fixed-income to higher yield investments. Increases of 4-percent and 16-percent in the respective values of corporate stocks and other investments more than offset the decreases in the values of fixed income investments. Savings and temporary cash investments virtually equaled the previous year's total.

In real terms, the value of investments held by medium foundations, defined as those holding from \$1,000,000 to \$50,000,000 in fair market value of total assets, rose by 5 percent. The value of investments held by large foundations rose by 4 percent. For foundations in each of these asset-size classes, values of other investments and corporate stocks increased. Total asset values of small foundations were nearly unchanged from Tax Year 2003. The value of securities held by small foundations fell by 3 percent, a decline attributable to decreases of 6 percent and 20 percent in the values of corporate bonds and Government obligations.

The composition of the aggregate investments held by nonexempt charitable trusts was similar to that of private foundations. Securities accounted for 79 percent of total investment assets. Savings and

temporary cash investments and other investments, represented 5 percent and 16 percent of aggregate investment values, respectively. The aggregate fair market value of investment assets held by charitable trusts increased by 7 percent to \$5.5 billion, in real terms, but was inflated by the addition of nearly 400 new filers. The fair market value of corporate stock increased by 12 percent, while the fair market value of corporate bonds was nearly unchanged. Only the value of Government obligations, which decreased by 17 percent, was less than that reported for the previous year.

The "net investment income yield" and "rate of total return" are indicators of the annual investment performance of private foundations and charitable trusts. Net investment income is the realized investment income received from investment assets. It includes interest, dividends, net income from realized capital gains, and other income earned independently of a foundation's charitable purpose. The net investment income yield equals net investment income divided by the value of noncharitable-use assets.⁵ The real rate of total return on assets provides a more comprehensive indication of total investment performance than the net investment income yield. It includes the realized income from investments and other assets, as well as the unrealized appreciation or depreciation in computing the fair market value of assets. The rate, which is an indicator of the total inflation-adjusted capital appreciation of a foundation's assets, equals the change in the value of the

⁵ The net investment income amount used in calculating the net investment income yield was obtained from column (b) of the income statement, found in Part I of Form 990-PF.

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

entire asset base (adjusted for contributions received, grants paid, and certain expenses) divided by the value of the base.⁶

Figure E shows median and mean net investment income yields and rates of total return on assets for domestic nonoperating foundations and charitable trusts, by size, for 2004. The median rates, which minimize the effects of large outliers in the data, provide an approximate measure of the investment performance of a typical foundation. For all but the largest foundations, the median net investment income yield realized by nonoperating foundations for Tax Year 2004 was nearly identical to the Tax Year 2003 net investment income yield, indicating that foundations received comparable rates of income from their investment assets in both tax years. In contrast, the median rate of total return fell from 10.8 percent for Tax Year 2003 to 3.5 percent for Tax Year 2004, reflecting the more modest appreciation in the fair market value of total assets for Tax Year 2004.

Median net investment income yields and rates of total return increased with organization size. Median rates of return for medium foundations dropped from 12.2 percent for Tax Year 2003 to 5.0 percent for Tax Year 2004. Nevertheless, median rates of total return were higher for medium and large nonoperating foundations than for small nonoperating foundations. The median rate of total return for small foundations was just 2.0 percent, down from 8.1 percent for the previous year.

For Tax Year 2004, larger-sized nonoperating foundations generally realized higher net investment income yields, but experienced lower rates of total return than for the previous tax year. The median net investment income yield for large nonoperating foundations for Tax Year 2004 was 5.9 percent, compared to a median 3.9 percent in Tax Year 2003. However, rates of total return for large nonoperating foundations fell from 14.8 for Tax Year 2003 to 7.2 for Tax Year 2004.

Median net investment income yields and rates of total return were slightly higher for nonoperating charitable trusts than for nonoperating private foundations. Net investment income yields and rates of total returns for nonexempt charitable trusts varied less by asset size than those realized by private foundations.

The realized income from investments, or net investment income, that is reported by private foundations and nonexempt charitable trusts is subject to an excise tax each year under IRC section 4940. This tax is intended to cover expenses incurred by the Internal Revenue Service in the oversight of foundation activities and the enforcement of laws governing their exempt status. Generally, domestic foundations are taxed at a rate equal to 2 percent of their worldwide net investment income.⁷ Domestic private foundations that were able to demonstrate growth in the rate of their charitable distributions were eligible to pay the net investment income tax at a reduced 1-percent rate. Specifically, if total Tax Year 2004 qualifying distributions were larger than the total of

⁶ The rate-of-total-return formula used here is the same as that developed and used by Salamon and Voytek in their studies on foundation assets. See Salamon, Lester M. and Kenneth P. Voytek (1989), *Managing Foundation Assets: An Analysis of Foundation Investment and Payout Procedures and Performance*, The Council on Foundations, Washington, DC, p. 32. The formula for this calculation is shown below:

$$\begin{aligned} &\text{Rate of Total Return} = \\ &[\text{Ending Fair Market Value of Assets} \\ &- \text{Indexed Beginning Fair Market Value of Assets} \\ &- \text{Contributions Received} \\ &+ \text{Grants Paid} \\ &+ \text{Operating and Administrative Expenses} \\ &+ \text{Excise Tax Paid on Net Investment Income}] \\ &\text{DIVIDED BY} \\ &\text{-----} \\ &[\text{Indexed Beginning Fair Market Value of Assets} \\ &+ 50 \text{ percent of Contributions Received}] \end{aligned}$$

To calculate the rate of total return shown in Figure G, samples of private foundation information returns for 2003 and 2004 were matched in order to analyze both the beginning and end-of-year fair market value data. The beginning fair market value of assets for 2004 equals the ending fair market value reported on the 2003 tax return. Thus, in order to provide a consistent form of measurement by which to compare rates of total return among different years, the ending fair market value of asset amounts (reported for both the year subject to the computation and the prior year) was used to compute the rate of return. In order to obtain an inflation-adjusted real rate of return, the beginning-of-year fair market value of assets was indexed based on the 2000 chain-type price index for Gross Domestic Product as published by the Bureau of Economic Analysis, using 2004 as the base year. To maximize comparability between the real rate of total return and the net investment income yield formulas, the published net investment income yields also exclude organizations for which returns were not sampled for both Tax Years 2003 and 2004.

⁷ Foreign foundations, which are organized abroad but required to file Form 990-PF and pay excise taxes on net investment income, are subject to a 4-percent tax on the value of their U.S.-based net investment incomes. Data from returns filed by foreign foundations are not included in this article.

[1] Represents net investment income of foundations and charitable trusts reporting excise tax. Total net investment income was \$34.0 billion for all foundations and \$303.8 million for all charitable trusts.

averaged qualifying distributions made between 1999 and 2003 plus 1 percent of the total amount of current net investment income, a foundation was eligible for the reduced tax rate for Tax Year 2004. In addition, certain domestic operating foundations may receive a total exemption from this excise tax. To qualify for the total exemption, operating foundations must show a broader sphere of support and control than other private foundations by maintaining public support through income and contributions received from a broad section of the general public for a 10-year period. Additionally, they must have boards of trustees or other governing bodies that are representative of the general public, rather than boards composed of a small group of “insiders.” Boards of trustees can consist of no more than 25 percent “disqualified persons” for the tax year, none of whom can serve as an officer of the foundation. A disqualified person is a substantial contributor; a foundation manager; a person who owns more than 20 percent of a corporation, partnership, trust, or unincorporated enterprise that is itself a substantial contributor; or a family member of a disqualified person. Only 16 percent of all operating foundations reported that they had met the exemption requirements and were not liable for the excise tax on net investment income.⁸

Private foundations reported \$34.0 billion in net investment income for Tax Year 2004, a 35-percent increase from the previous year. Approximately 80 percent of private foundations reported receiving net investment income for Tax Year 2004. As shown in Figure F, \$32.7 billion of net investment

income were subject to the excise tax, which totaled \$469 million. Less than half of all foundations, 44 percent, reported eligibility for the reduced 1-percent rate. Large foundations were more likely to qualify for the reduced tax rate than smaller foundations; half of all large foundations were eligible for the reduction. Despite the lower average tax rates, excise tax on net investment income paid by large foundations accounted for 68 percent of total tax liability. Just 41 percent of small foundations reported that they qualified for the reduced rate. Nonexempt charitable trusts reported \$5 million in net investment income tax liability for Tax Year 2004.

The Private Foundation Rules

The Tax Reform Act of 1969 (TRA69) established rules specific to private foundations and formed the basis for sections 4940-4945 of the IRC. Section 4940 describes the excise tax on net investment income. Under section 4942, nonoperating private foundations, and nonexempt charitable trusts treated as private foundations, are required to distribute a minimum annual amount for charitable purposes, known as the “distributable amount,” or pay an excise tax on any undistributed portion. The distributable amount equals approximately 5 percent of the fair market value of a private foundation’s investment assets. The remaining private foundation rules detail excise taxes on a variety of “prohibited activities” that are considered to be contrary to the public interest. Private foundations and nonexempt charitable trusts report taxes on the activities described in IRC

⁸ The J. Paul Getty Trust, the largest operating foundation, is exempt from the excise tax on net investment income.

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

sections 4941-4945 on Form 4720, Return of Certain Excise Taxes on Charities and Other Persons Under Chapters 41 and 42 of the Internal Revenue Code.⁹

Qualifying Distributions

The required distributable amount, as described under section 4942, is derived from a foundation's minimum investment return, which is calculated based on the reported value of its net investment, or "noncharitable-use," assets. Noncharitable-use assets are those assets held for investment purposes only and may include such items as securities, investments in art, coins, or other collectables, and investments in real estate. Conversely, assets used directly to conduct charitable activities, such as office buildings, art held by museums, and computers are "charitable-use" assets; these holdings are excluded from the minimum investment return calculation.

Valuation methods used for assets included in the minimum investment return calculation are described under Net Value of Noncharitable-Use Assets in the Explanation of Terms section. The minimum investment return is calculated as 5 percent of the net value of noncharitable-use assets, which equals the value of noncharitable-use assets, less both the indebtedness incurred to acquire these assets and the amount of cash held for charitable activities. Cash deemed held for charitable activities is generally 1.5 percent of noncharitable-use assets less acquisition indebtedness. Finally, the distributable amount is the minimum investment return reduced by the excise tax on net investment income and any income taxes paid plus or minus other adjustments. Additional adjustments are detailed under Net Adjustments to Distributable Amount in the Explanation of Terms section. Under section 4942, foundations that fail to meet this distributable amount by the close of a 1-year grace period are subject to an excise tax equaling 15 percent of the undistributed amount.

Current-year distributions for charitable purposes that may be directed toward meeting the distribution requirement are known as "qualifying distributions." Qualifying distributions are primarily the contributions, gifts, and grants disbursed by a foundation or charitable trust throughout the year. However, qualifying distributions may also include operating and administrative expenses related to conduct-

ing charitable operations; "set-asides," which are amounts earmarked for future charitable distributions; program-related investments, such as loans to other 501(c)(3) organizations; and amounts paid to acquire buildings, equipment, supplies or other assets for charitable use.

For Tax Year 2004, nonoperating private foundations distributed contributions, gifts, and grants totaling \$27.1 billion. Contributions, gifts, and grants comprised 89 percent of total qualifying distributions made by nonoperating private foundations, followed by operating and administrative expenses, at 9 percent. Amounts paid to acquire assets for charitable use represented 1 percent of total qualifying distributions; set-asides and program-related investments each accounted for less than 1 percent of the total.

Nonoperating charitable trusts distributed \$312 million in contributions, gifts, and grants; this amount represented 94 percent of qualifying distributions reported by these organizations. Operating and administrative expenses accounted for 6 percent of qualifying distributions reported by nonexempt charitable trusts. Together, amounts paid to acquire assets, set-asides, and program-related investments accounted for less than 1 percent of qualifying distributions reported by nonexempt charitable trusts for Tax Year 2004.

Figure G shows qualifying distributions and required distributable amounts for nonoperating private foundations and charitable trusts, by end-of-year asset size, for Tax Year 2004. Qualifying distributions for nonoperating foundations totaled \$30.5 billion, an amount more than 1.4 times larger than the required distributable amount for 2004. Nonexempt charitable trusts also reported qualifying distributions that exceeded the required distributable amount.

While large private foundations provided the majority of qualifying distributions to charitable organizations, smaller-sized foundations were more likely to make distributions in excess of the required amount. Small foundations, those that held less than \$1,000,000 in fair market value of total assets, distributed amounts more than 4 times larger than required. Some small foundations serve as "pass-through" organizations for larger foundations. These small foundations distribute grants that they receive from the larger foundations and may thus report

⁹ For complete information on Forms 990-PF filed for Tax Year 2003, as well as additional information on excises taxes paid under sections 4941 through 4945, see Ludlum, Melissa and Mark Stanton, "Private Foundations, Tax Year 2003," *Statistics of Income Bulletin*, Fall 2006, Volume 26, Number 2.

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

Figure G

Domestic Nonoperating Private Foundations and Charitable Trusts: Qualifying Distributions and Distributable Amounts, by Size of End-of-Year Fair Market Value of Total Assets, Tax Year 2004

NOTE: Detail may not add to totals because of rounding and processing tolerances.

qualifying distributions that are large relative to asset size. As aggregate asset size increased for private foundations, the percentage by which qualifying distributions exceeded the distribution requirement decreased. This may indicate the preference of larger-sized foundations to focus on long-term, rather than short-term, giving, by maintaining a more substantial portion of their asset base for future grantmaking.

Distributions by charitable trusts, based on asset size, showed similar patterns to those of private foun-

dations with one notable exception—charitable trusts in the largest asset-size category, those holding more than \$10,000,000 in fair market value of total assets, made distributions that were 1.3 times in excess of the distributable amount, a greater excess than was reported by charitable trusts in all but one other size category. Only the smallest trusts, those holding less than \$100,000 in the fair market value of total assets, which distributed 7.7 times the distributable amount, exceeded the requirement by a larger margin. Nonoperating

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

charitable trusts in the smaller size classes generally exceeded the distribution requirement by a narrower margin than did similarly sized private foundations.

Excess Distributions and Undistributed Income

Nonoperating foundations and charitable trusts must meet the distributable amount requirement for the current tax year by the end of the next tax year or pay the section 4942 excise tax on the undistributed amount. For example, a foundation must have disbursed the required amount for Tax Year 2004 before the end of Tax Year 2005 in order to avoid paying the excise tax. The distributable amount is calculated at the end of the tax year and, because it is based on averaged net investment asset values, could be influenced by late-year changes. For example, if net investment asset growth is higher than expected in the closing months of a tax year, a foundation or charitable trust may be unable to sufficiently increase its contributions to meet the requirement. Foundations and charitable trusts that have not met the requirement may choose to take advantage of the 1-year tax-free “grace period” and report all or any unmet portion of their current-year required distributable amounts as “undistributed income” on their current-year Form 990-PF. This undistributed income is carried forward to the end of the subsequent tax year; if it has not been paid by the end of that year, it becomes taxable. Thus, a nonoperating organization could direct all or part of its 2004 qualifying distributions toward the 2003 required distributable amount.

Similarly, foundations and charitable trusts also carry forward excess qualifying distributions and may apply them to unmet distributable amount requirements for up to 5 subsequent tax years. In other words, a foundation that did not meet the distributable amount requirement for Tax Year 2004, but had distributions in excess of the required distributable amount for any of Tax Years 1999 through 2003, could have applied those distributions to the distributable amount for Tax Year 2004.

The majority of foundations used their Tax Year 2004 qualifying distributions to satisfy the 2004 distributable amount requirement and thus did not take advantage of the 1-year grace period. About 35 percent of foundations that had a minimum distribution requirement reported undistributed income at the end of Tax Year 2004. Small foundations, whose net investment values are perhaps more predictable than those of their larger counterparts, were the least likely

to require the additional tax year to meet the distribution requirement. Only 31 percent of small foundations carried Tax Year 2004 undistributed income to Tax Year 2005, compared to 42 percent of medium and 46 percent of large foundations. Nonoperating foundations reported that 69 percent of the aggregate Tax Year 2004 distributable amount was satisfied based on Tax Year 2004 qualifying distributions.

Figure H provides a breakout of the 2004 distributable amount for nonoperating private foundations and charitable trusts, showing the percentage of the distributable amount that was met by 2004 qualifying distributions and excess qualifying distributions from previous tax years, as well as unpaid amounts carried forward as undistributed income to Tax Year 2005. Large foundations directed the highest percentage of qualifying distributions to the distributable amount, reporting 72 percent of the requirement paid by current-year qualifying distributions. Less than 4 percent of the Tax Year 2004 requirement for nonoperating foundations was fulfilled using carryovers from a previous tax year. The percentage of the distributable amount met using carryovers decreased as asset size increased, with small foundations reporting that 10 percent of their distributable amounts were satisfied using carryovers from previous years. In contrast, large foundations paid just 3 percent of the Tax Year 2004 distributable amount using previous-year carryovers.

Nonoperating charitable trusts carried higher percentages of their 2004 distributable amounts forward to Tax Year 2005 than did private foundations. Overall, nonexempt charitable trusts carried 39 percent of their 2004 distributable amounts forward to Tax Year 2005. Charitable trusts in the smallest asset-size category, those holding less than \$1,000,000 in fair market value of total assets, brought forward the highest percentage of undistributed income, 46 percent, and directed the smallest amount of current-year qualifying distributions toward the 2004 distributable amount.

Payout Rates

The payout rate captures the relationship between an organization’s charitable distributions and its investment assets and provides further insight into the degree to which nonoperating foundations and charitable trusts exceed their charitable payout requirements. The rate is based on both qualifying distributions and carryovers, and is adjusted to include certain taxes

and deductions and divided by the total value of non-charitable-use assets to arrive at an organization's payout rate.¹⁰ Tax Year 2004 median payout rates for private foundations, by asset size, are displayed in Figure I. The figure also shows ranges of payout rates and the associated percentage of foundations whose payout rates fell within each range.

For Tax Year 2004, most nonoperating private foundations, 70 percent, met or exceeded the payout requirement, but 2004 payout rates were generally lower than those reported for 2003. More than half of nonoperating private foundations reported payout rates that exceeded the required 5 percent. Although investment assets of nonoperating foundations and charitable trusts grew, albeit at a slower pace in Tax Year 2004 than in the previous year, the median

payout rate for all nonoperating private foundations decreased from 5.9 percent for 2003 to 5.4 percent for 2004. More than a third of nonoperating private foundations, approximately 35 percent, reported payout rates that were between 4.8 percent and 6.5 percent. One-quarter of private foundations reported payout rates of 13 percent or more. Approximately 10 percent of nonoperating foundations reported payout rates of less than 3.3 percent, with 5 percent of nonoperating private foundations reporting payout rates of less than 0.2 percent.

Small nonoperating private foundations exceeded the payout requirement far more frequently than did medium or large foundations, while large foundations were more likely to have payout rates at or near the required 5 percent. More than 40 percent

¹⁰ The payout rate was calculated by dividing the amount of (adjusted) qualifying distributions by the value of noncharitable-use assets. The numerator is adjusted to account for deductions and additions made in the distributable amount calculation. This payout formula is as follows:

$$\begin{aligned}
 & \text{Qualifying Distributions (Part XII, Line 4) + Taxes (Part XI, Line 2c) -} \\
 & \text{Recoveries of Amounts Treated as Qualifying Distributions (Part XI, Line 4) +} \\
 & \text{Deduction from Distributable Amount (Part XI, Line 6) +} \\
 & \text{Excess Distributions Applied to 2004 (Part XIII, Column A, Line 5)} \\
 & \text{DIVIDED BY} \\
 & \text{-----} \\
 & \text{Net Value of Noncharitable-Use Assets (Part X, Line 5)}
 \end{aligned}$$

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

of small nonoperating foundations reported payout rates of 8 percent or higher. Additionally, 14 percent of small foundations reported payout rates of 75 percent or higher. Small foundations that served as passthrough organizations for Tax Year 2004 were likely to have made charitable distributions that exceeded their asset values, resulting in notably high payout rates. For large nonoperating foundations, the median payout rate was 5.1 percent, and half of large foundations reported payout rates that were between 4.8 and 6.5 percent. Of nonoperating foundations in the three asset-size classes, large foundations were the least likely to report payout rates that were lower than 3.3 percent or higher than 13 percent.

Median payout rates for nonoperating charitable trusts were lower than those of private foundations for Tax Year 2004. Nonoperating charitable trusts reported a median payout rate of 5 percent for 2004, which was identical to both the previous-year median payout rate for these organizations and the Tax Year 2004 required payout rate. Just 18 percent of nonoperating charitable trusts reported payout rates that were greater than 6.5 percent, compared to 21 percent for Tax Year 2003. In contrast, 44 percent of nonoperating charitable trusts reported payout rates that were below 4.8 percent, an increase of 6 percentage points over Tax Year 2003.

Summary

Nearly the same number of private foundations filed Form 990-PF for Tax Year 2004 as for the previous year, while the number of nonexempt charitable trusts treated as private foundations that filed the return increased by 12 percent. Nonoperating private foundations, which provide grants to other charitable organizations, accounted for the majority of Form 990-PF filers and their financial activities. The Bill and Melinda Gates Foundation was the largest foundation, based on asset size and the biggest grantmaker, based on contributions, gifts, and grants disbursed, for Tax Year 2004.

Investment assets, the basis for computing the required distributable amount, are frequently the cornerstone for giving by grantmaking foundations and charitable trusts. These investments increased by 4 percent for private foundations and 7 percent for nonexempt charitable trusts, in real terms, between Tax Years 2003 and 2004. Investment assets totaled \$481.2 billion for private foundations and \$5.5 billion for nonexempt charitable trusts. The aggregate

Figure J

Realized Sampling Rates for Private Foundation Returns, Tax Year 2004

End-of-year fair market value of total assets	Realized sampling rate (percentage)
Less than \$125,000.....	1.0
\$125,000 less than \$400,000.....	1.9
\$400,000 less than \$1,000,000.....	2.0
\$1 million less than \$2.5 million.....	6.4
\$2.5 million less than \$10 million.....	9.9
\$10 million or more.....	100.0

amount of net investment income received increased by 35 percent for private foundations and 43 percent for nonexempt charitable trusts. The excise tax on this income, imposed under IRC section 4940, was \$469 million for private foundations and \$5 million for nonexempt charitable trusts. Net investment income yields and rates of total return for private foundations suggested that foundations received similar rates of realized income from investment assets for Tax Years 2003 and 2004, but experienced a decline in unrealized investment growth for Tax Year 2004. Both net investment income yields and rates of total return were highest for large private foundations.

Qualifying distributions, which included contributions, gifts, and grants and other outlays for charitable purposes, outpaced the required 2004 distributable amount for both nonoperating private foundations and charitable trusts. Qualifying distributions totaled \$30.5 billion for Tax Year 2004 for nonoperating private foundations; \$27.1 billion of that amount consisted of contributions, gifts, and grants distributed. Nonoperating charitable trusts made qualifying distributions of \$331 million. Of that amount, \$312 million were in the form of contributions, gifts, and grants. The majority of the distributable amount was satisfied based on current-year qualifying distributions for both foundations and charitable trusts, although charitable trusts carried over 39 percent of the Tax Year 2004 distributable amount to Tax Year 2005 as undistributed income.

Median payout rates, which measure the relationship between charitable distributions and investment assets, were around the required 5 percent for both nonoperating private foundations and nonexempt charitable trusts. Generally, private foundations reported higher payout rates than nonexempt charitable trusts. Large private foundations deviated less from the required 5-percent payout rate than did smaller foundations. Small foundations were more likely

[1] Returns in this category are sampled at a 100-percent rate and are not subject to sampling error.

than their larger counterparts to distribute at rates of 13 percent or more. However, small foundations also distributed at rates of 3.3 percent or less, well below the required amount, more frequently than larger-sized foundations.

Data Sources and Limitations

The statistics presented in this article are based on a sample of Tax Year 2004 Forms 990-PF that were filed with the Internal Revenue Service. Organizations having accounting periods beginning in 2004 (and therefore ending between December 2004 and November 2005) that filed returns in Calendar Years 2005 and 2006 that posted to the IRS Business Master File during those years were included in the sample. Some part-year returns were included in the samples for organizations that changed their accounting periods, or filed initial or final returns. Approximately 69 percent of the domestic private foundations in the sample had accounting periods covering Calendar Year 2004 or, in some cases, part-year periods that ended in December 2004.

The 2004 sample was stratified based on both the size of fair market value of total assets and the type of organization (either a private foundation or an IRC section 4947(a)(1) nonexempt charitable trust). All returns filed by nonexempt charitable trusts were selected for inclusion in the study. The private foundation sample was designed to provide reliable estimates of total assets and total revenue. To accomplish this, 100 percent of returns filed for foundations with fair market asset value of \$10 million or more were included in the samples, since these organizations represented the vast majority of financial activity. Approximately 8 percent of all

foundations reported \$10 million or more in fair market value of total assets for 2004 and were selected at a rate of 100 percent. The remaining foundation population was randomly selected for the sample at various rates of less than 100 percent, depending on asset size. The realized sampling rates for each asset-size category are included in Figure J. Figure K shows the magnitude of sampling error for selected items for Tax Year 2004, measured by coefficients of variation.

Efforts were made to verify that organizations selected into the sample were properly classified as foundations or trusts. The relatively few foundations in the sample that were incorrectly selected as trusts were ultimately treated as foundations for these statistics, and the relatively few trusts incorrectly sampled as foundations were also reclassified. However, the weights used for these organizations were based on the original sample selection classification.

There were 7,805 foundation returns in the sample selected from a population of 80,570. The population of charitable trusts selected for Tax Year 2004 was 3,646. The difference between the actual population of Forms 990-PF records that posted to the IRS Business Master File during 2005 and 2006 and the estimated population of Forms 990-PF as published in this article, results from sample code changes and the effects of returns that were “rejected” from the sample as part of the editing process. For example, foreign returns and duplicate filings by a single organization were included in the IRS counts of the actual population of Forms 990-PF filed, but were rejected from the SOI estimates.

The data presented were obtained from returns as originally filed with IRS. In most cases, changes

made to the original return because of administrative processing or audit procedures were not captured in the statistics. Changes made based on taxpayer amendment were captured, if available. The data were subject to comprehensive testing and correction procedures in order to ensure statistical reliability and validity. A general discussion of the reliability of estimates based on samples, methods for evaluating both the magnitude of sampling and nonsampling error, and the precision of sample estimates can be found in the general Appendix to this issue of the *SOI Bulletin*.

Explanation of Terms

The following explanations describe terms as they applied to private foundations:

Charitable Trust—A charitable trust, also referred to as a “nonexempt” charitable trust, is defined in Internal Revenue Code section 4947(a)(1) as an organization (1) that is not considered tax-exempt under section 501(a); (2) that has exclusively charitable interests; and (3) that has amounts in trust for which donors are allowed to claim a tax deduction for charitable contributions.

Nonexempt charitable trusts that are not publicly supported are subject to the excise tax provisions that apply to private foundations and are required to file Form 990-PF. (“Publicly supported” nonexempt charitable trusts are required to file Form 990, *Return of Organization Exempt From Income Tax*.) Nonexempt charitable trusts that are treated as private foundations must pay an annual tax on income (usually from investments) that is not distributed for charitable purposes, and they must report such income and tax on Form 1041, *U.S. Fiduciary Income Tax Return*.

Disbursements for Charitable Purposes—These disbursements are outlays made exclusively in support of a foundation’s tax-exempt purpose and include grants paid and operating and administrative expenses. They were the largest component of “qualifying distributions” for Tax Year 2004. The total of disbursements for charitable purposes was reported on Form 990-PF, Part I, line 26, column (d).

Disqualified Person—In general, a disqualified person is a substantial contributor; a foundation manager; a person who owns more than 20 percent of a corporation, partnership, trust, or unincorporated enterprise that is itself a substantial contributor; or a family member of a disqualified person.

Distributable (Payout) Amount—This is the minimum payout amount that is required to be dis-

tributed by nonoperating foundations by the end of the tax year that follows the tax year for which the return was filed. For example, foundations were required to distribute their Tax Year 2004 amounts before the end of Tax Year 2005. Failure to distribute income within this period results in a 15-percent excise tax on the undistributed portion. The distributable amount equals 5 percent of the net value of noncharitable-use assets, called the “minimum investment return,” minus the excise tax on net investment income, plus or minus other adjustments, either allowed or required (see Net Adjustments to Distributable Amount in this section).

Minimum Investment Return—The minimum investment return is used as the base for calculating the “distributable amount.” This is the aggregate fair market value of assets not used for charitable purposes, less both the indebtedness incurred to acquire these assets and the cash held for charitable activities, multiplied by 5 percent. Minimum investment return was reported on Form 990-PF, Part X, line 6.

Net Adjustments to Distributable Amount—The “distributable amount” is increased by recoveries of amounts previously treated as qualifying distributions. Additionally, certain organizations with governing instruments that require the accumulation of income are instructed to deduct the accumulated income from their distributable amounts. These adjustments are allowed only for foundations organized before May 27, 1969, whose governing instrument requires such accumulation because State Courts would not allow the organization to change the governing instrument. Recoveries on amounts treated as qualifying distributions and the deduction for accumulated income were reported on Form 990-PF, Part XI, lines 4 and 6, respectively.

Net Investment Income—This equals gross investment income less allowable deductions. Interest, dividends, capital gain net income, rents, payments with respect to securities loans (as defined in Code section 512(a)(5)), and royalties are included in net investment income. Any investment income derived from unrelated trade or business activities, and therefore subject to the “unrelated business income” tax and reported on Form 990-T, *Exempt Organization Business Income Tax Return*, is excluded. Net investment income was reported on Form 990-PF, Part I, line 27b, column (b).

Net Value of Noncharitable-Use Assets—An asset is considered a noncharitable-use asset if it is

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

not used in carrying out a charitable, educational, or other similar function which relates directly to the tax-exempt status of the foundation. Examples include the fair market values of securities and rental property owned by the foundation for investment purposes. For purposes of calculating the “minimum investment return,” valuation methods for noncharitable-use assets reported in this section differ from those used to report the end-of-year fair market values for all assets in Part II. The average, rather than end-of-year, fair market values of cash and securities that were not used or held for use for charitable purposes during the tax year, is derived and used in this calculation. With certain exceptions, other assets included in this calculation are valued annually, but not necessarily based on the end-of-year value.

The fair market values of noncharitable-use assets may reflect reductions due to certain characteristics associated with those assets, such as lack of marketability or blockage. The net value of noncharitable-use assets is reduced by acquisition indebtedness and cash deemed held for charitable purposes; the latter reduction is generally limited to 1.5 percent of noncharitable-use assets less acquisition indebtedness. Thus, the net value of noncharitable-use assets, which was reported on Form 990-PF, Part X, line 5 as an element of the “minimum investment return” calculation, differed from the balance sheet-derived fair market value of total assets, as reported on Part II, line 16, column (c), which equaled the total end-of-year value for all assets held by the foundation.

Nonoperating Foundations and Charitable Trusts—These are organizations that generally carried on their charitable activities in an indirect manner by making grants to other organizations directly engaged in charitable activities, in contrast to operating foundations that engaged in charitable activities themselves. However, for Tax Year 2004, some nonoperating foundations may have been actively involved in charitable programs of their own, in addition to making grants.

For example, a foundation initially organized as operating that was unable to meet the operating foundation requirements for Tax Year 2004 could have continued its direct charitable activities. Such an organization could have directed expenditures made for these direct charitable activities, as well as expenditures made for the disbursement of contributions, gifts, and grants and other indirect charitable activities, toward meeting the required distribution

requirement. An organization’s status as a nonoperating foundation was indicated on Form 990-PF, Part VII, line 9.

Operating Foundations and Charitable Trusts—These organizations generally expended their incomes for direct, active involvement in a tax-exempt activity, such as operating a library or museum, or conducting scientific research. Operating foundations were exempted from the income distribution requirement and related excise taxes that were applicable to their nonoperating counterparts. To qualify as an operating foundation for 2004, the organization had to meet both an “income test” and one of three other tests: an “assets test,” an “endowment test,” or a “support test.”

A foundation could qualify as operating under the income requirement if it spent at least 85 percent of the lesser of its “minimum investment return” or “adjusted net income” on the direct, active conduct of tax-exempt, charitable activities (as opposed to the payout of grants in support of such programs). Adjusted net income represented the amount of income from charitable functions, investment activities, set-asides, unrelated business activities, and short-term capital gains that exceeded the cost incurred in earning the income and was calculated in Part I, Column (c) of Form 990-PF for operating foundations.

To meet the assets test, a foundation had to directly use 65 percent or more of its assets for the active conduct of charitable activities. To meet the endowment test, a foundation had to regularly make distributions for the active conduct of charitable activities in an amount not less than two-thirds of its “minimum investment return.” To meet the support test, a foundation had to regularly receive substantially all of its support (other than from gross investment income) from the public or from five or more qualifying exempt organizations, and (a) no more than 25 percent of its support (other than from gross investment income) from any one such qualifying exempt organization; and (b) no more than 50 percent of its support from gross investment income.

Individual taxpayers could deduct contributions to operating foundations on their individual income tax returns; the deduction could not exceed 50 percent of a donor’s “adjusted gross income” (as opposed to 30 percent for contributions to nonoperating foundations).

While most operating foundations paid the excise tax on net investment income, some operating

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

foundations were exempt from this tax under section 4940(d)(2) of the Internal Revenue Code. In order to be exempt from the Tax Year 2004 excise tax on net investment income, an operating foundation was required to (1) maintain public support for a minimum of 10 taxable years; (2) maintain a governing body at all times that is broadly representative of the general public and that is comprised of no more than 25-percent disqualified individuals; and (3) at no time during the year include a disqualified individual as an officer of the foundation. An organization's status as an operating foundation was indicated on Form 990-PF, Part VII, line 9.

Private Foundation—A private foundation is defined in Internal Revenue Code section 501(c)(3) as a nonprofit organization with a narrow source of funds that operated or supported educational, scientific, charitable, religious, and other programs dedicated to improving the general welfare of society. A private foundation was an organization that qualified for tax-exempt status under Code section 501(c)(3) but was not (1) a church, school, hospital, or medical research organization; (2) an organization with broad public support in the form of contributions or income from tax-exempt activities; (3) an organization that was operated by, or in connection with, any of the above described organizations; or (4) an organization that conducted tests for public safety.

The primary difference between a private foundation and other organizations exempt under 501(c)(3) was the source of the organization's funding. An individual, a family, or a corporation typically funded foundations, while most other tax-exempt organizations received funds from a large number of sources among the general public.

Qualifying Distributions—Qualifying distributions include disbursements for charitable purposes (grants, direct expenditures to accomplish charitable purposes, and charitable-purpose operating and administrative expenses); amounts paid to acquire assets used directly to accomplish tax-exempt functions; charitable program-related investments; and amounts set aside for future charitable projects. Qualifying distributions may be credited against a foundation's obligation to pay out its "distributable amount." Total qualifying distributions were reported on Form 990-PF, Part XII, line 4.

Set-Asides—Amounts set-aside for specific charitable purposes can be treated as qualifying dis-

tributions only if the foundation establishes to the satisfaction of the IRS that the amount will be paid for the specific project within 60 months from the date of the first set-aside and if the foundation meets either the suitability test or the cash distribution test. To meet the suitability test, a foundation must receive prior approval from the IRS and must demonstrate that the project can be better accomplished by a set-aside than by an immediate payment of funds. To meet the cash distribution test under IR Code section 4942(g)(2)(B)(ii), a foundation must attach a distribution schedule to its annual return for the year of the set-aside and for each subsequent year until the set-aside amount has been distributed. Set-asides were reported on Form 990-PF, Part XII, lines 3a and 3b.

Total Assets—Total assets are the sum of all assets reported in the foundation's balance sheet, shown at both book value and fair market value. Total assets were reported on Form 990-PF, Part II, line 16, columns (a) beginning-of-year book value, (b) end-of-year book value, and (c) end-of-year fair market value.

Total Revenue—This is the sum of gross contributions, gifts, and grants received; interest on savings and temporary cash investments; dividends and interest from securities; net gain (or loss) from sales of assets (mostly investment assets, but also charitable-use assets); gross rents and royalties; gross profit (or loss) from business activities; and other income (such as royalty income, program-related investment income, interest earned on assets used for charitable purposes, and imputed interest on distributions deferred interest). Total revenue items, which included both investment and charitable-use items, were reported on Form 990-PF, Part I, line 12, column (a).

Undistributed Income—This is the portion of the required "distributable amount" still undistributed after the sum of current-year qualifying distributions and any excess distributions carried over from prior years are subtracted. This item was reported on Form 990-PF, Part XIII, line 6f, column (d). Under IRC section 4942, nonoperating private foundations that did not pay out an amount equal to the Tax Year 2004 "distributable amount" by the end of Tax Year 2005 were subject to an excise tax on the undistributed amount. The initial tax on undistributed income, which is automatically imposed, equals 15 percent of the undistributed amount and is reported on Form 4720.

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

N/A—Not applicable.

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] The data shown in columns 18 and 19 are based on the amount of contributions, gifts, and grants that foundations actually disbursed for charitable purposes for 2004 using the cash receipts and disbursement method of accounting. These amounts differ somewhat from those reported as contributions, gifts, and grants paid shown in the income statement because foundations may use either the cash receipts and disbursement or the accrual method of accounting.

NOTE: Detail may not add to totals because of rounding.

Domestic Private Foundations and Charitable Trusts

Statistics of Income Bulletin | Fall 2007

Table 2. Domestic Section 4947(a)(1) Charitable Trusts Treated as Foundations: Number and Selected Financial Data, by Type of Charitable Trust and Size of Fair Market Value of Total Assets, Tax Year 2004

N/A—Not applicable.

[1] The data shown in columns 18 and 19 are based on the amount of contributions, gifts, and grants that charitable trusts actually disbursed for charitable purposes for 2004 using the cash receipts and disbursement method of accounting. These amounts differ somewhat from those reported as contributions, gifts, and grants paid shown in the income statement because charitable trusts may use either the cash receipts and disbursement or the accrual method of accounting.

[2] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

*Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] The data in this row are based on the amount of contributions, gifts, and grants paid as reported on the income statement portion of the return. These amounts differ somewhat from the contributions, gifts, and grants paid in columns 18 and 19 of Table 1, which are calculated using the cash receipts and disbursement method of accounting.

[2] This category is included with investments in Tables 1 and 2. However, Tables 3 and 4 show total noncash investments to more closely match Form 990-PF.

NOTE: Detail may not add to totals because of rounding.

[1] The data in this row are based on the amount of contributions, gifts, and grants paid as reported on the income statement portion of the return. These amounts differ somewhat from the contributions, gifts, and grants paid in columns 18 and 19 of Table 2, which are calculated using the cash receipts and disbursement method of accounting.

[2] This category is included with investments in Tables 1 and 2. However, Tables 3 and 4 show total noncash investments to more closely match Form 990-PF.

[3] Less than \$500.

NOTE: Detail may not add to totals because of rounding.
