U.S. Possessions Corporation Returns, 1987

By John J. Bradford*

U.S. corporations are allowed a credit for the full amount of U.S. tax liability on certain income derived from sources in the U.S. possessions. For 1987, approximately \$2.8 billion was claimed as possessions tax credit on U.S. corporate income tax returns. This amount was more than 14 percent greater than the 1985 amount. There were 516 active possessions corporations for 1987, representing a decrease of 13 percent from 1985, the most recent prior year for which statistics were compiled.

The vast majority of possessions corporations conducted business in Puerto Rico. For 1987, nearly 97 percent of all U.S. possessions corporations operated in Puerto Rico and virtually all of the total possessions tax credit was claimed by these companies. Figure A shows the number of corporations reporting business activity in each possession [1].

Figure A
Possessions Corporations Filing a Form 5735 in
Support of Possessions Tax Credit Claimed,
1987

[Money amounts are in thousands of dollars]

U.S. possession	Number of corporations	Possessions tax credit		
Total	442	\$2,775,463		
Puerto Rico	428	2,754,054		
U.S. Virgin Islands	3	2,885		
Guam	8	5,705		
Other	3	12,820		

As in past years, manufacturing companies claimed the bulk of the credit. These corporations represented 419 of the 516 possessions corporations. For 1987, almost 97 percent of the total possessions tax credit was claimed by manufacturers. Corporations in the chemicals and allied

products industry claimed the largest share, almost 57 percent, though they represented only 18 percent of all possessions corporations.

BACKGROUND

The main elements of the possessions corporation system of taxation were adopted with the Revenue Act of 1921. These provisions were enacted primarily to help U.S. corporations compete with foreign firms in the Philippines, which was a U.S. possession until 1946. An exemption from taxation on all income derived from sources outside the United States was granted to those corporations which met two gross income tests. First, the corporation had to derive at least 80 percent of its gross income from U.S. possessions. Second, 50 percent or more of the corporation's gross income had to come from the active conduct of trade or business in these possessions. For a corporation to qualify for this exemption, these conditions had to be met on an aggregate basis for the year of the exemption and the previous 2 years.

The Tax Reform Act of 1976 created a new section 936 of the Internal Revenue Code for the possessions corporation system of taxation. The new section significantly modified the previous provisions. Before the changes, a possessions corporation was allowed an exemption from U.S. taxation on all income derived from sources outside the United States. The 1976 Act granted a tax credit only on (1) income from the active conduct of trade or business in a possession and (2) "qualified possessions source investment income (see "Explanations of Selected Terms")." This new statute was enacted entirely for the benefit of Puerto Rico [2].

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) significantly altered the manner of determining

^{*}Foreign Returns Analysis Section. Prepared under the direction of Chris Carson, Chief.

the taxable income of a possessions corporation by adding a new subsection (h) to section 936. This subsection provided that, in general, income of the possessions corporation from "intangibles," such as patents and copyrights, would be taxable to the U.S. shareholders. The purpose was to "lessen the abuse caused by taxpayers claiming tax-free income generated by intangibles developed outside of Puerto Rico [3]." However, the section also allowed for an election out of the general rule if the corporation demonstrated that it had a significant business presence in a possession with respect to a specific product or type of service. To demonstrate a significant business presence, a corporation had to satisfy either a value-added test or a direct labor test [4]. Eligible corporations could choose to allocate income between the possessions corporation and the U.S. parent through either the cost sharing or profit-split method [5].

With the Tax Reform Act of 1986, several modifications were made to the possessions provisions. One of the most important changes increased to 75 percent the required percentage of the corporation's income which had to come from the active conduct of trade or business in the particular possession. Also, the U.S. Virgin Islands was added to the list of eligible U.S. possessions. Congress retained the possessions tax credit provisions despite recommendations from both the Treasury Department and the President that it be replaced with a wage credit. The wage credit would have operated by granting a tax credit for a fixed dollar amount per hour worked by each employee.

Since 1948, Puerto Rico has provided its own tax incentives to companies involved in manufacturing and other business activities. The Government of the Commonwealth grants partial exemptions from income tax and other taxes for specified periods of time. However, in addition to its income tax, Puerto Rico imposes a "tollgate tax" on dividends paid out of Puerto Rican source earnings and profits to a U.S. or foreign parent corporation. Most countries impose similar taxes. This withholding rate ranges from a high of 25 percent to a low of 5 percent [6].

A corporation can elect the status of a possessions corporation by filing a Form 5712, Election to be Treated as a Possessions Corporation under Section 936. The election is valid for 10 years and cannot be revoked. For each year that the election is valid, the corporation must file a Form 5735, Computation of Possessions Corporation Tax Credit Allowed Under Section 936, even if no

possessions credit is claimed. In general, the term "possessions corporations" refers to all corporations which made the election and filed a Form 1120.

DATA HIGHLIGHTS

For 1987, there were 516 active possessions corporations, a decrease from the 594 corporations for 1985. The reduction in the number of possessions corporations may be a reflection of the uncertainty of the fate of the possessions provisions during the negotiations of the Tax Reform Act of 1986. In addition, mergers and acquisitions may have accounted for some of the difference.

The estimated reduction in U.S. tax liability as a result of the possessions tax credit for 1987 was approximately \$2.4 billion. This amount was less than the total possessions tax credit claimed because possessions corporations could not claim certain other tax benefits which would have otherwise been available to them [7]. As a result of the possessions credit total U.S. income tax liability of possessions corporations amounted to only \$30.2-million, although these companies generated netincome of almost \$7.1 billion. Most of these taxes were attributed to income derived from sources outside of the possessions.

Of the 516 possessions corporations which filed Forms 1120 for 1987, 452 claimed the possessions credit. As for the 64 corporations which claimed no possessions credit for 1987, the bulk of these, 55, had no taxable income. Forty of those corporations reported losses and, therefore, claimed no credit. Although the number of corporations which have claimed the possessions credit has declined over the years, the amount of the credit has increased steadily (Figure B).

Figure B
Corporations Claiming the Possessions Tax Credit,
1983-1987
[Money amounts are in billions of dollars]

Year	Number of corporations	Possessions tax credit
· · · · · · · · · · · · · · · · · · ·		
1983	553	\$2.0
1985	510	2.4
1987	452	2.8

Table 1 includes balance sheet and income statement data for all active possessions corporations. For 1987, 419 of the 516 possessions corporations reported a

manufacturing business activity. The predominance of manufacturing firms in Puerto Rico reflects the incentives which the Commonwealth has enacted to attract manufacturers. Under Puerto Rico's Industrial Incentive Act, most U.S. corporations which have established manufacturing subsidiaries on the island have been granted exemptions, up to 100 percent, from Puerto Rican taxes. For 1987, all Puerto Rican corporations paid an average of 3.7 percent of their earnings in taxes to the Commonwealth [8].

The industrial classification with the largest number of possessions corporations was chemicals and allied products, with 93 companies or approximately 18 percent of the total. These companies, which are predominantly drug manufacturers, also reported 56 percent of the income subject to tax and claimed 57 percent of the tax benefits claimed by all possessions corporations. This is a reflection of the rapid growth of the chemical industry in Puerto Rico during the 1970's [9]. For 1985, there were 109 possessions corporations in the chemicals and allied products industry and these companies claimed 48 percent of the tax benefits.

For 1987, the second largest industrial classification was electrical and electronic equipment. These 74 companies claimed approximately 16 percent of the total possessions tax credit. Figure C shows the percentages of corporations and possessions tax credit by industry for 1987.

For possessions corporations as a whole, average net income (less deficit) increased more than 51 percent from 1985 to 1987, to almost \$13.7 million. Similarly, average asset size grew almost 38 percent to \$64 million. These increases are reflections of the economic recovery of the mid-1980's which had spread to U.S. possessions. Earlier in the decade, the economic recession had been particularly hard on Puerto Rico. However, from 1985 to 1987, the Gross National Product (GNP) of Puerto Rico grew by more than 14 percent [10]. This compares favorably to the 12.7 percent GNP growth rate for the United States [11].

The largest corporations (as classified by size of assets) claimed the bulk of the possessions tax credit. The largest 20 corporations (less than 4 percent of all possessions corporations) claimed 48 percent of the total credit amount. Furthermore, the largest 50 corporations (ap-

proximately 10 percent of the total) claimed 66 percent of the credit.

EMPLOYMENT DATA

The stated objective of the possessions tax credit provisions was to provide jobs to the U.S. possessions by attracting employment-producing investment from U.S. firms. Unemployment has been a chronic problem in Puerto Rico, where the unemployment rate has not fallen below 10 percent since 1950 and has averaged more than twice the rate of the United States [12].

An examination of Federal unemployment insurance tax returns (Forms 940) for possessions corporations involved in manufacturing industries provides an indication of how the provisions have aided the Puerto Rican economy [13]. A total of 100,916 workers were employed by manufacturing possessions corporations for 1987, compared to 122,471 employed by all manufacturing firms in Puerto Rico. The average annual wages for employees of manufacturing possessions corporations amounted to \$17,818. This compares to an average annual wage of \$11,173 for all production workers in the Commonwealth [14].

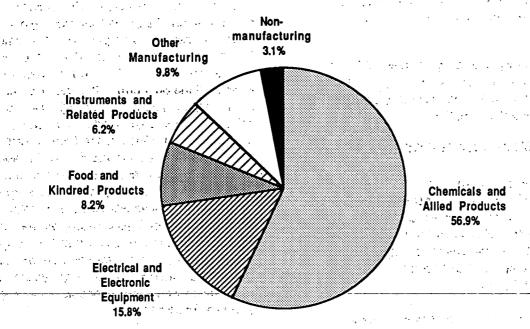

Table 2 presents tax benefit, employment, and compensation information classified by industry for Puerto Rican manufacturing corporations for which Federal unemployment data were available. Chemical companies, particularly drug manufacturers, claimed the highest amount of tax benefits per worker employed. Drug companies received nearly \$71,000 in tax benefits per worker and all chemical companies averaged more than \$65,000. For all possessions corporations, the average tax benefit per employee was \$16,835, about \$1,000 less than the average wage (\$17,818).

SUMMARY

Though the number of corporations claiming the possessions tax credit continued to decline for 1987, the amount of the credit continued to increase. For 1987, U.S. corporations claimed approximately \$2.8 billion as possessions tax credit, resulting in a net reduction of U.S. tax liability of more than \$2.4 billion.

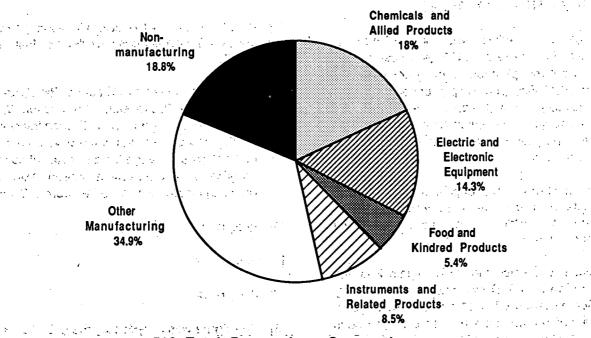

Puerto Rico remained the most common business location for possessions corporations to conduct business, with 97 percent of the total. Nearly 100 percent of the tax credit was claimed by these corporations.

Total Credit \$2.8 Billion

Percentage of Possessions Corporations by Industry, 1987

300

5 5 516 Total Possessions Corporations

As in past years, manufacturing companies claimed the bulk of the credit. These corporations represented 419 of the 516 possessions corporations. For 1987, almost 97 percent of the total possessions tax credit was claimed by manufacturers. Corporations in the chemicals and allied products industry claimed the largest share, almost 57 percent, though they represented only 18 percent of possessions corporations.

Possessions corporations employed over 100,000 people for 1987, a 3 percent increase from 1985. The average tax benefit per worker for manufacturing possessions companies amounted to \$16,835.

EXPLANATION OF SELECTED TERMS

Qualified Gross Income in Current Year -- The sum of gross income (gross receipts minus cost of sales and operations) from the active conduct of a trade or business in the possessions, the net gain (or loss) from the sale or exchange of assets used by a possessions corporation in the active conduct of business, and "qualified possessions source investment income."

Qualified Possessions Source Investment Income -- Non-business income derived from the possession in which the possession had its trade or business and which was attributable to the investment of funds derived from such trade or business.

DATA SOURCES AND LIMITATIONS

The statistics in this article were compiled from all returns filed through June 1989 by U.S. possessions corporations with accounting periods ending between July 1987 and June 1988. Because 100 percent of the returns filed were prescribed for inclusion in the sample, the statistics are not subject to sampling error. General information regarding nonsampling error may be found in the Appendix to this report.

Information from Forms 1120 for possessions corporations was transferred from the annual Corporation Statistics of Income study. Additional data items from Forms 5712, 5735, and 940 were later obtained.

The statistics in this article may differ slightly from the data presented in the U.S. Department of the Treasury report, *The Operation and Effect of the Possessions Corporation System of Taxation* for 1987. These differences are due to minor revisions made to the underlying data by

the Office of Tax Analysis for estimates made in its report to Congress.

NOTES AND REFERENCES

- The estimated reduction in U.S. tax liability was calculated by obtaining the "qualified taxable income" of each possessions corporation. This amount was found on Line 10 of the Form 5735. If the corporation did not file a Form 5735, then the sum of "taxable income" (Line 30, Form 1120) was used as a proxy. From these figures, an approximation of the accelerated depreciation deduction was calculated and subtracted. Once this reduced taxable income was obtained, it was multiplied by the appropriate tax rate. For 1987, an additional consideration had to be made for the change in the corporate tax structure which was effective July 1, 1987. Credits for taxes paid to possessions Governments (such as Puerto Rican income taxes and the "tollgate" tax) were estimated and subtracted from the tax liability since, in the absence of the possessions tax credit. these taxes would be creditable under the foreign tax credit provisions.
- [2] For the purposes of the possessions tax credit provisions, the eligible U.S. possessions include Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, the Northern Marianas, and other smaller U.S. territories.

- [10] Economic Report to the Governor, Puerto Rico Planning Board, 1990. The statistics in this source were based on calendar year 1987 while the Statistics of Income figures were based on corporations with accounting periods ending between July, 1987 and June, 1988.
- [11] U.S. Bureau of Economic Analysis, Survey of Current Business, July, 1988.
- [12] Tax Analysts, *Tax Notes*, Volume 36, number 10, September 7, 1987, p. 945.
- [13] Possessions corporations outside of the manufacturing sector were not included in this analysis because they were presumed to pay income taxes to Puerto Rico at a rate at least equal to the effective U.S. corporate rate. In the absence of the possessions provisions, these non-manufacturing companies would be eligible for a foreign tax credit for the amount of these taxes. Therefore, U.S. tax liability would be effectively nullified for these corporations in the absence of the possessions provisions.

²Gross compensation of employees is computed by multiplying total wages by 1.235. The additional 23.5 percent reflects employer paid non-payroll costs (such as social security payments) and is supplied by the Office of Tax Analysis.

by the Office of Tax Analysis.

3 To calculate the tax benefit, the qualified possessions source income of each corporation was multiplied by the appropriate corporate tax rate. Credits for taxes paid to possessions governments (such as Puerto Rican income taxes and the "tollgate" tax on dividends) were estimated and subtracted from this amount. The resulting figure was the estimated reduction in U.S. tax liability.
