

Grain: World Markets and Trade

Brazilian Corn Exports Soar as Chinese Exports Vanish

Brazil has replaced China as a major corn exporter. Rising Brazilian corn exports have been fueled largely by unusually strong demand from the EU-27, caused by two consecutive small wheat and coarse grain crops. The EU-27 has already licensed 6.8 million tons of corn imports, which are expected to come mostly from Brazil. Production in Brazil is growing faster than consumption. High world prices and expanding domestic demand have encouraged more area (25 percent in 3 years) and greater yield efficiencies.

At the same time, Chinese exports have steadily dropped from 15.2 million tons in 2002/03 to 500,000 tons in the current year. Explosive economic growth and rising disposable incomes have led to increased meat consumption and corn use for feeding. Recent government actions to curb food price inflation--cancellation of VAT rebates for exports and initiation of an export tax together with the lack of export quotas for 2008--have severely limited corn exports.

Continued limitations on Chinese exports tighten available world supplies, indirectly opening market opportunities for Brazil. However, infrastructure and high freight costs may constrain exports in the short term.

WHEAT: WORLD MARKETS AND TRADE

MONTHLY HIGHLIGHTS:

Brazil will likely import 90 percent of its wheat from Argentina from January through June, keeping with historical trends. Brazil is not expected to be greatly affected by Argentina's recent decision to delay export loadings until April 8, 2008. The Government of Brazil (GOB) has removed the 10 percent import tariff on 1.0 million tons of non-Mercosur wheat until June 30, 2008. Notably, the GOB did not remove the Merchant Marine tax which adds 25 percent to the cost of freight on non-Mercosur wheat imports.

Argentina's exports to Brazil are expected at 3.3 million tons for January through June, leaving 400,000 tons to be supplied by other countries. Despite the lower import tax, U.S. wheat is still \$100 per ton CIF more expensive than Argentine wheat. Brazil appears to have its import requirements covered through the middle of April and due to record high prices might shift some of its purchases into the next trade year.

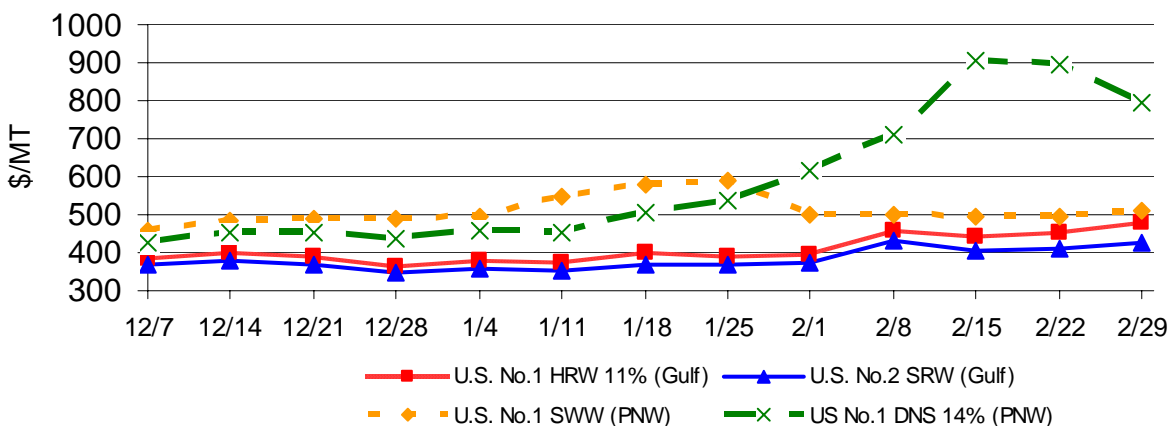

Brazil's Wheat Imports Likely to Remain on Track Through the End of June 2007/08

PRICES:

Domestic: For February, wheat prices were up broadly, led by HRS, which peaked at \$904 per ton! Demand remained strong for all classes with new sales to the Mediterranean area and the Middle East. For the month, Hard Red Winter (HRW) was up \$84 per ton, Hard Red Spring (HRS) jumped \$176, Soft Red Winter (SRW) climbed \$54, and Soft White (SWW) was up \$12.

TRADE CHANGES IN 2007/2008

Selected Exporters

- **Argentina** is down 500,000 tons to 10.0 million based on announced changes to export registration procedures.
- **Brazil** is up 260,000 tons to 300,000 due to strong shipments to Morocco and India.
- **United States** is raised 500,000 tons to 33.5 million, the highest in over 10 years, as sales and shipments to most markets continue despite high prices.

Selected Importers

- **India** is down 200,000 tons to 1.8 million on higher than expected old crop production.
- **Turkmenistan** is up 150,000 tons to 175,000, the largest in over a decade, because of larger purchases from Kazakhstan.
- **Yemen** is down 200,000 tons to 1.9 million on expectations of smaller purchases due to high prices during the second half of the year.

COARSE GRAINS: WORLD MARKETS AND TRADE

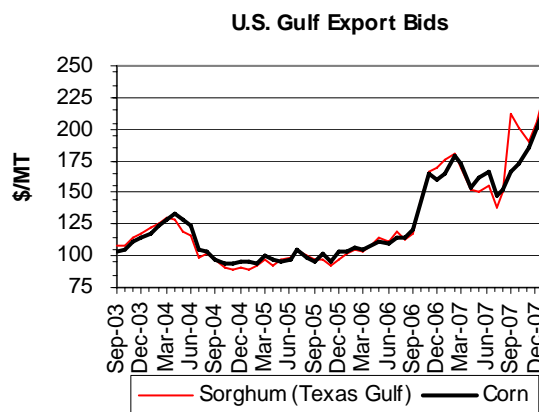

PRICES:

Domestic: U.S corn export prices averaged \$226 per ton in February, up over \$6 from January. Demand for feed grains and tight supplies have kept corn prices strong. Sorghum prices averaged \$227 per ton, down \$4 from January. Prices remain firm due to continued demand from the EU-27.

TRADE CHANGES IN 2007/2008

Selected Exporters

- **China corn** is cut in half to 500,000 tons, the lowest since 1995/96. Recent reports indicate that new sales are not being permitted as the government seeks to ensure grain supplies are sufficient to meet domestic demand and to control food price inflation.
- **Brazil corn** is boosted by 1.5 million tons to a record 10.5 million. Continued new-crop sales to the EU-27 have given Brazil extraordinary market opportunities.
- **India corn** is raised 200,000 tons to 700,000 based on reports of shipments to Southeast Asia.
- **Australia sorghum** is up 200,000 tons to 250,000 on an expected record crop (2.5 million tons).

Selected Importers

- **EU-27 corn** is boosted by 500,000 tons to 10.5 million, the highest in over 20 years, based on sales and shipments from Brazil and reports of pending new-crop sales from Argentina.
- **Malaysia corn** is down by 200,000 tons to 2.5 million. Although a recovery in livestock production is expected this year, trade data for the prior year showed a slowing of feed grain demand (imports were lowered by 300,000 tons).
- **Mexico corn** is cut by 500,000 tons to 9.7 million based on the pace of purchases and shipments. Although the final provisions of NAFTA were expected to result in a surge of corn imports from the United States, that has not yet happened. Cracked corn imports are down year-to-year as expected, but dried distillers grains are up.

-
- **Uruguay corn** is raised by 200,000 tons to 300,000 based on strong border trade with Paraguay in the first quarter of the trade year.
 - **China barley** imports are down 100,000 tons to 1.2 million due to higher production. (Exports were raised 90,000 tons to 100,000 on increased shipments to Saudi Arabia and Japan).
 - **EU-27 sorghum** is up 300,000 tons to 4.3 million based on the pace of import licenses and expected shipments from Argentina and Brazil.

OTHER NOTES

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye

are Oct/Sept; and rice is calendar year. For a complete list of local marketing years, please see the FAS website (<http://www.fas.usda.gov/psdonline/psdAvailability.aspx>).

EU Consolidation: The trade figures starting from 1999/00 represent EU-27 and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria and Romania, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.
