## **NOTE**

Questions about accompanying **documentation** should be directed to Administrative and Customer Services Division, Electronic Products Development Branch, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 457-1326.

Questions about the **tape** should be directed to Marketing Services Office, Customer Services Center, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 457-4100.

Questions about the **subject matter** should be directed to Beth Eldridge, Demographic Surveys Division, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 457-3806.

#### **ABSTRACT**

Current Population Survey, April 1999: Food Security Supplement [machine-readable data file] / conducted by the U.S. Census Bureau for the Economic Research Service, U.S. Department of Agriculture. -Washington: Bureau of the Census [producer and distributor], 2001.

# Type of File:

Microdata; unit of observation is individuals within housing units.

## **Universe Description:**

The universe consists of all persons in the civilian noninstitutional population of the United States living in households. The probability sample selected to represent the universe consists of approximately 57,000 households.

## **Subject-Matter Description:**

Data are provided on labor force activity for the week prior to the survey. Comprehensive data are available on the employment status, occupation, and industry of persons 15 years old and over. Also shown are personal characteristics such as age, sex, race, marital status, veteran status, household relationship, educational background, and Hispanic origin.

The CPS Food Security Supplement was conducted by the U.S. Census Bureau for the Economic Research Serice (ERs) of the U.S. Department of Agriculture (USDA). Supplement questions were asked of all interviewed households, as appropriate. The supplement was intended to research the full range of severity of food insecurity and hunger as experienced in U.S. households.

Based on this research, the USDA has developed comprehensive food security measurement scales and food security status indicators, which are described in Attachment 3, Overview - Food Security Supplement. Please be advised, however, that responses to any of the supplement's individual items are not, taken alone and in themselves, meaningful measures of food insufficiency, food insecurity, or hunger, and should not be used as such.

#### Geographic Coverage:

States, regions and divisions are identified in their entirety. Within confidentiality restrictions; indicators are provided for consolidated metropolitan statistical areas (CMSA), 173 selected metropolitan statistical areas (MSA), 69 selected primary metropolitan statistical areas (PMSA), 217 counties, and 41 central cities in multicentral city metropolitan statistical areas or primary metropolitan statistical areas. Also within confidentiality restrictions, indicators are provided for metropolitan/nonmetropolitan, central city/balance metropolitan, MSA/CMSA size and MSA/PMSA size.

## **Technical Description:**

File Structure: Rectangular.

File Size: 134,951 logical records; 1,134 character logical record length.

File Sort Sequence: State rank by CMSA/MSA rank by household identification number by line number.

## **Reference Materials:**

Current Population Survey, Food Security Supplement Technical Documentation. Documentation contains this abstract, including ordering information, overview, definitions, questionnaire facsimiles, code lists, and record layouts of the file. One copy accompanies each file order. Additional copies are available from Marketing Services Office, Customer Services Center, Bureau of the Census, Washington, DC 20233.

# File Availability:

The file may be ordered from Marketing Services Office, Customer Services Center using the Customer Services order form on the following page. It is available on 9-track tape reel (ASCII or EBCDIC,labeled or unlabeled, 6250 bpi). The file can be made available on IBM 3480 compatible tape cartridge or CD-R (compact disc-recordable) in ASCII format. Also, it is available on the Internet at <a href="http://www.bls.census.gov/cps">http://www.bls.census.gov/cps</a>

# **Census Bureau Order Form**

Use this form to order CD-ROM's, tape-to-CD-ROM, customer products, technical documentation, computer tapes and cartridges, diskettes, and publications sold by Customer Services.

### **OVERVIEW**

## **Current Population Survey**

#### Introduction

The Current Population Survey (CPS) is the source of the official government statistics on employment and unemployment. The CPS has been conducted monthly for over 50 years. Currently, we obtain interviews from about 48,000 households monthly, scientifically selected on the basis of area of residence to represent the nation as a whole, individual states, and other specified areas. Each household is interviewed once a month for four consecutive months one year, and again for the corresponding time period a year later. This technique enables us to obtain reliable month-to-month and year-to-year comparisons at a reasonable cost while minimizing the inconvenience to any one household.

Although the main purpose of the survey is to collect information on the employment situation, a very important secondary purpose is to collect information on demographic characteristics such as age, sex, race, marital status, educational attainment, family relationship, occupation, and industry. From time to time, additional questions are included on health, education, income, and previous work experience. The statistics resulting from these questions serve to update similar information collected once every 10 years through the decennial census, and are used by government policymakers and legislators as important indicators of our nation's economic situation and for planning and evaluating many government programs.

The CPS provides current estimates of the economic status and activities of the population of the United States. Because it is not possible to develop one or two overall figures (such as the number of unemployed) that would adequately describe the whole complex of labor market phenomena, the CPS is designed to provide a large amount of detailed and supplementary data. Such data are made available to meet a wide variety of needs on the part of users of labor market information.

Thus, the CPS is the only source of monthly estimates of total employment (both farm and nonfarm); nonfarm self-employed persons, domestics, and unpaid helpers in nonfarm family enterprises; wage and salaried employees; and, finally, estimates of total unemployment.

It provides the only available distribution of workers by the number of hours worked (as distinguished from aggregate or average hours for an industry), permitting separate analyses of part-time workers, workers on overtime, etc. The survey is also the only comprehensive current source of information on the occupation of workers and the industries in which they work. Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons - whether married women with or without young children, disabled persons, students, older retired workers, etc., can be determined. Information on their current desire for work, their past work experience, and their intentions as to job seeking are also available.

For a more detailed discussion about the basic labor force data gathered on a monthly basis in the CPS survey, see "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of *Employment and Earnings* published by the Bureau of Labor Statistics.

## **CPS Sample Design**

The current CPS sample is selected based on 1990 census information. The first stage of the 1990 sample design created 2,007 geographic areas called primary sampling units (PSUs) in the entire United States. These PSUs were grouped into strata within each state. Some of these PSUs formed strata by themselves and were in sample with certainty, which is referred to as self-representing. Of the remaining nonself-representing PSUs, one PSU was selected from each stratum with the probability of selection proportional to the population of the PSU. A total of 754 PSUs were selected for sample containing 2,121 counties, minor civil divisions, and independent cities. The second stage of the sample design selected housing units within these PSUs.

Approximately 60,000 housing units are assigned for interview each month, of which about 50,500 are occupied and thus eligible for interview. The remainder are units found to be destroyed, vacant, converted to nonresidential use, containing persons whose usual place of residence is elsewhere, or ineligible for other reasons. Of the 50,500 occupied housing units, approximately 5 percent are not interviewed in a given month due to temporary absence (vacation, etc.), the residents are not found at home after repeated attempts, inability of persons contacted to respond, unavailability for other reasons, and refusals to cooperate. The interviewed households contain approximately 94,000 persons 15 years old and over, approximately 28,000 children 0-14 years old, and about 450 Armed Forces members living with civilians either on or off base within these households. A more precise explanation regarding the CPS sample design is provided in "Explanatory Notes and Estimates of Error: Household Data - Sampling" in any issue of *Employment and Earnings*.

# Relationship of Current Population Survey Files to Publications

Each month, a significant amount of information about the labor force is published by the Bureau of Labor Statistics in the *Employment and Earnings* and *Monthly Labor Review* reports.

As mentioned previously, the CPS also serves as a vehicle for supplemental inquiries on subjects other than employment, which are periodically added to the questionnaire. From the basic and supplemental data, the Bureau of the Census issues three series of publications under the general title Current Population Reports:

P-20 Population Characteristics

P-23 Special Studies

P-60 Consumer Income

All Current Population Reports, including the other series for population estimates and projections and special censuses, may be obtained by subscription from the U.S. Government Printing Office at 202-783-3238. Subscriptions are available as follows: Population Characteristics, Special Studies, and Consumer Income series (P-20, P-23, P-60) combined, \$101 per year (sold as a package only); Population Estimates and Projections, (P-25), \$27 per year. Single issues may be ordered separately; ordering information and prices are provided in the Bureau of the *Census Catalog and Guide*, the *Monthly Product Announcement* (MPA), and in *Census and You*. Selected reports also may be accessed on the INTERNET at http://www.census.gov/prod/www/subject.html#pop

## Geographic Limitations

The CPS sample was selected so that specific reliability criteria were met nationally, for each of the 50 States and for the District of Columbia. Since 1985, these reliability criteria have been maintained through periodic additions and deletions in the State samples. Estimates formed for geographic areas identified on the microdata file which are smaller than states are not as reliable.

## Weights

Under the estimating methods used in the CPS, all of the results for a given month become available simultaneously and are based on returns for the entire panel of respondents. The CPS estimation procedure involves weighting the data from each sample person. The base weight, which is the inverse of the probability of the person being in the sample, is a rough measure of the number of actual persons that the sample person represents. Almost all sample persons in the same state have the same base weight, but the weights across states are different. Selection probabilities may also differ for some sample areas due to field subsampling, which is done when areas selected for the sample contain many more households than expected. The base weights are then adjusted for noninterview, and the ratio estimation procedure is applied.

- 1. Noninterview adjustment. The weights for all interviewed households are adjusted to the extent needed to account for occupied sample households for which no information was obtained because of absence, impassable roads, refusals, or unavailability of the respondent for other reasons. This noninterview adjustment is made separately for clusters of similar sample areas that are usually, but not necessarily, contained within a state. Similarity of sample areas is based on Metropolitan Statistical Area (MSA) status and size. Within each cluster, there is a further breakdown by residence. Each MSA cluster is split by "central city" and "balance of the MSA". Each non-MSA cluster is split by "urban" and "rural" residence categories. The proportion of occupied sample households not interviewed fluctuates around 5 percent depending on weather, vacations, etc.
- 2. Ratio estimates. The distribution of the population selected for the sample may differ somewhat, by chance, from that of the population as a whole in such characteristics as age, race, sex, and state of residence. Because these characteristics are closely correlated with labor force participation and other principal measurements made from the sample, the survey estimates can be substantially improved when weighted appropriately by the known distribution of these population characteristics. This is accomplished through two stages of ratio adjustment as follows:
  - a. *First-stage ratio estimate*. The purpose of the first-stage ratio adjustment is to reduce the contribution to variance that results from selecting a sample of PSUs rather than drawing sample households from every PSU in the nation. This adjustment is made to the CPS weights in two race cells: black and nonblack; it is applied only to PSUs that are nonself-representing and for those states that have a substantial number of black households. The procedure corrects for differences that existed in each state cell at the time of the 1990 census between 1) the race distribution of the population in sample PSUs and 2) the race distribution of all PSUs (both 1 and 2 exclude self-representing PSUs).
  - b. Second-stage ratio estimate. This procedure substantially reduces the variability of estimates and corrects, to some extent, for CPS undercoverage. The CPS sample weights are adjusted to ensure that sample-based estimates of population match independent population controls. Three sets of controls are used:
    - 1) 51 state controls of the civilian noninstitutional population 16 years of age and older
    - 2) national civilian noninstitutional population controls for 14 hispanic and 5 nonhispanic age-sex categories

3) national civilian noninstitutional population controls for 66 white, 42 black, and 10 "other" agesex categories

The independent population controls are prepared by projecting forward the resident population as enumerated on April 1, 1990. The projections are derived by updating demographic census data with information from a variety of other data sources that account for births, deaths, and net migration. Estimated numbers of resident Armed Forces personnel and institutionalized persons reduce the resident population to the civilian noninstitutional population. Estimates of net census undercount, determined from the Post Enumeration Survey, are added to the population projections. Prior to January 1994, the projections were based on earlier censuses, and there was no correction for census undercount. A summary of the current procedures used to make population projections is given in "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of Employment and Earnings.

# Comparability of CPS From Microdata Files With Published Sources

Although total estimates of the population will equal published estimates, labor force estimates produced from a microdata file will not be directly comparable or identical with the published nonseasonally adjusted labor force data. The major reason for this is due to a final estimation procedure incorporated into the production of the published nonseasonally adjusted data. This procedure, known as a composite estimator, is a weighted average of two estimates for the current month for any particular item. The first estimate is the two-stage ratio estimate that includes all the estimation steps given above. The second estimate consists of the composite estimate for the preceding month to which has been added an estimate of the change from the preceding month, based on that part of the sample which is common to the two months (about 75 percent). This procedure is primarily used to increase the reliability of estimates of month-to-month change, although other reliability gains are also realized. As noted above, the composite estimation procedure does not affect estimates of the total population.

Another factor also inhibits microdata comparison with published labor force data. This is the seasonal adjustment that is applied to many published statistics. This adjustment is used to adjust for normal seasonal variations to help distinguish the underlying economic situation in month-to-month changes.

Shown below are data from January and July 1993 which demonstrate how estimates compiled using the final weights from the microdata file may differ from the published composited estimates, with and without seasonal adjustment. Note that the composite estimation procedure was not used for estimates published from January 1994 to May 1994. For a further description of both the composite estimator and seasonal adjustment, see "Explanatory Notes and Estimates of Error: Household Data - Estimating Methods (Composite Estimation Procedure)" and "Seasonal Adjustment" in any issue of Employment and Earnings.

#### **OVERVIEW**

## April 1999 Food Security Supplement

#### General

Census Bureau staff conducted the April 1999 Food Security Supplement as a supplement to that month's Current Population Survey (CPS). The CPS is a monthly labor force survey in which interviews are conducted in approximately 50,000 households across the Nation. April 1999 was the fifth time this survey was conducted. Previous collections were conducted in April 1995, September 1996, April 1997, and August 1998. Attachment 9 contains the Food Security supplement questions asked of all interviewed households in April 1999.

Attachment 2 comprises a description of the CPS entitled "Overview--Current Population Survey." A description of the April 1999 Food Security Supplement follows.

#### **Data Collection**

The food security questions were asked of all interviewed households, as appropriate. Items S1 through SP9 dealt with food spending and program participation. Items SS1 through SSH5A dealt with food sufficiency and food security (i.e., whether the household had enough and the kinds of food they wanted to eat and running short of money and trying to make their food or food money go further or cutting the size of or skipping meals and losing weight because there wasn't enough food). Items SC1 through SC4 dealt with coping strategies (i.e., getting food from friends, relatives, food pantries or soup kitchens). The last question, S10, asked for the minimum amount needed to spend on food to meet the needs of the household..

These items are being used by the supplement sponsor to produce a scaled measure of food insecurity. RESPONSES TO INDIVIDUAL ITEMS IN THIS SUPPLEMENT ARE NOT MEANINGFUL MEASURES OF FOOD INSUFFICIENCY AND SHOULD NOT BE USED IN SUCH A MANNER.

## **Data Processing**

The data processing involved editing the April supplement data. This process is described below.

**Edits and Allocations.** The data processing involved a consistency edit of all supplement items. The consistency edit ensured that the entries within an individual record followed the correct skip pattern. Items with missing entries were assigned values, if appropriate.

The values for each variable are defined in the supplement record layout (Attachment 8).

**Weighting.** There is a supplement weight associated with the April 1999 Food Security supplement. Use this weight for tallying the supplement items.

# **April 1999 CPS/Food Security Computer File**

**CPS Labor Force Data.** The April 1999 CPS file contains 134,951 records. Each record contains 1,134 characters. Attachment 8 contains the variable name, character size, location on record, universe, and the values of the variables.

The variable PRPERTYP (located in positions 161-162 on the CPS Basic Items Record Layout) determines the type of person as follows:

#### **PRPERTYP**

- 1 = Child household member (0-14 years old)
- 2 = Adult civilian household member (15+ years old)
- 3 = Adult Armed Forces household member (15+ years old)

The variable HRINTSTA (located in positions 57-58 on the CPS Basic Items Record Layout) determines the interview status of the household.

#### **HRINTSTA**

- 1 = Interview
- 2 = Type A Noninterview (These records represent households that were eligible for the April 1999 CPS interview but were not interviewed because no one was home, household members were temporarily absent, etc.)
- 3 = Type B Noninterview (These records represent sample addresses determined to be ineligible for the CPS by virtue of being vacant, demolished, nonresidential, etc.)
- 4 = Type C Noninterview (See explanation for Type B above)

By combining the values of PRPERTYP (1-3) and HRINTSTA (2-4) the number of records can be determined.

The values of PRPERTYP are:

# **Unweighted Counts**

| 1 | = | (Child)               | 26,763 |
|---|---|-----------------------|--------|
| 2 | = | (Adult Civilian, 15+) | 94,040 |
| 3 | = | (Adult, Armed Forces) | 375    |

## The values of HRINTSTA are:

| 2 | = | Type A Noninterview | 3,841 |
|---|---|---------------------|-------|
| 3 | = | Type B Noninterview | 9,449 |
| 4 | = | Type C Noninterview | 483   |

# **April 1999 Food Security Supplement Data**

The April 1999 supplement data for the household is located in character positions 857-1134. (See Attachment 8.)

# Tallying the April 1999 Food Security Supplement File

The April 1999 supplement universe represented the full CPS sample comprised of all interviewed CPS households.

# **Unweighted Counts**

Attachment 14 is a tally listing of unweighted counts. Use these counts to ensure that the file is being properly accessed.

## **GLOSSARY**

# **Current Population Survey**

**Age**-Age classification is based on the age of the person at his/her last birthday. The adult universe (i.e., population of marriageable age) is comprised of persons 15 years and over for CPS labor force data.

**Allocation Flag-**Each edited item has a corresponding allocation flag indicating the nature of the edit. See the attachment on allocation flags for more information. The second character of the item name is always "X".

**Armed Forces**-Demographic information for Armed Forces members (enumerated in off-base housing or on-base with their families) is included on the CPS data files. No labor force information is collected of Armed Forces members in any month. In March, supplemental data on income are included for Armed Forces members. This is the only month that non-demographic information is included for Armed Forces members.

### **Civilian Labor Force**-(See Labor Force.)

**Class of Worker**-This refers to the broad classification of the person's employer. These broad classifications for current jobs are:

- 1) Federal government
- 2) State government
- 3) Local government
- 4) Private industry (including self-employed, incorporated)
- 5) Self-employed (not incorporated)
- 6) Working without pay

**Domain**-The domain for an item is a list or range of its possible values. Note that all unedited items have possible values of -1 (blank), -2 (don't know), and -3 (refused). Since all items have these possible values, they are not shown as valid entries for each item.

**Duration of Unemployment**-Duration of unemployment represents the length of time (through the current survey week) during which persons classified as unemployed are continuously looking for work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the present period of seeking work.

**Earners, Number of**-The file includes all persons 15 years old and over in the household with \$1 or more in wages and salaries, or \$1 or more of a loss in net income from farm or nonfarm self-employment during the preceding year.

**Edited item**-An edited item is allocated or imputed by the processing system. In most cases this means allocating a value where the unedited item contains a value of blank, "don't know", or "refused". The second character of the item name is always "E".

An edited version of an item exists only if that item is processed through the edits. If the edits never deal with a particular item, then that item only has an unedited version.

Since the instrument enforces skip patterns and consistency between many items, the edits are left mainly with the job of allocating missing values. Also, since an interviewer is allowed to "back up" in the interview, there may be "off-path" items filled in the unedited data. The edits also blank these off-path items if an edited version of the items exists.

**Education-**(See Level of School Completed.)

**Employed**-(See Labor Force.)

**Family**-A family is a group of two persons or more (one of whom is the householder) residing together and related by birth, marriage, or adoption. All such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

**Family Household**-A family household is a household maintained by a family (as defined above), and may include among the household members any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives. (See the definition of Family).

**Family Weight**-This weight is used only for tallying family characteristics. In March, the weight on the family record is the March supplement weight of the householder or reference person.

**Final Weight**-Used in tabulating labor force items in all months, including March. The final weight is controlled to independent estimates for:

- 1) States
- 2) Origin, Sex, and Age
- 3) Age, Race, and Sex

This weight should not be used when tabulating March supplement data.

**Full-Time Worker**-Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full-time.

**Group Quarters**-Group quarters are noninstitutional living arrangements for groups not living in conventional housing units or groups living in housing units containing nine or more persons unrelated to the person in charge.

**Head Versus Householder**-Beginning with the March 1980 CPS, the Bureau of the Census discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder" and "family householder" are used.

**Highest Grade of School Attended-**(See Level of School Completed.)

**Hispanic Origin-**Persons of Hispanic origin in this file are determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents are asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Hispanic origin, in particular, are those who indicated that their origin was Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central or South American, or other Hispanic.

**Hours of Work**-Hours of work statistics relate to the actual number of hours worked during the survey week. For example, a person who normally works 40 hours a week but who is off on the Veterans Day holiday is reported as working 32 hours even though he is paid for the holiday.

For persons working in more than one job, the figures related to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

**Household**-A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as separate living quarters; that is, when the occupants do not live and eat with any other person in the structure, and when there is direct access from the outside or through a common hall. The count of households excludes persons living in group quarters, such as rooming houses, military barracks, and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

**Household Weight**-The household weight is used for tallying household characteristics. In March, the household weight is the March Supplement weight of the householder.

**Householder**-The householder refers to the person (or one of the persons) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid employees. If the house is owned or rented jointly by a married couple, the householder may be either the husband or the wife. The person designated as the householder is the "reference person" to whom the relationship of all other household members, if any, is recorded.

**Householder With No Other Relatives in Household**-A householder who has no relatives living in the household. This is the entry for a person living alone. Another example is the designated householder of an apartment shared by two or more unrelated individuals.

**Householder With Other Relatives (Including Spouse) in Household**-The person designated as householder if he/she has one or more relatives (including spouse) living in the household.

Industry, Occupation, and Class of Worker (I&O)-Current Job (basic data)-For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time job lasting two or more weeks or by the job (either full-time or part-time). The I & O questions are also asked of persons not in the labor force who are in the fourth and eighth months in sample and who have worked in the last five years.

**Job Seekers**-All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

Longitudinal Weight-Used for gross flows analysis. Only found on adult records matched from month to month.

**PEMLR-(Major Labor Force Recode)**-This classification is available for each civilian 15 years old and over according to his/her responses to the monthly (basic) labor force items.

**Labor Force**-Persons are classified as in the labor force if they are employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 15 and over. However, the official definition of the civilian labor force is age 16 and over.

# 1. Employed

Employed persons comprise (1) all civilians who, during the survey week, do any work at all as paid employees or in their own business or profession, or on their own farm, or who work 15 hours or more as unpaid workers on a farm in a business operated by a member of the family; and (2) all those who have jobs but who are not working because of illness, bad weather, vacation, or labor-management dispute, or because they are taking time off for personal reasons, whether or not they are seeking other jobs. These persons would have a Monthly Labor Force Recode (MLR) of 1 or 2 respectively in characters 180-181 of the person record which designates "at work" and "with a job, but not at work." Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey week. If they worked an equal number of hours at more than one job, they are counted at the job they held the longest.

#### 2. Unemployed

Unemployed persons are those civilians who, during the survey week, have no employment but are available for work, and (1) have engaged in any specific job seeking activity within the past 4 weeks such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) are waiting to be called back to a job from which they had been laid off; or (3) are waiting to report to a new wage or salary job within 30 days. These persons would have an MLR code of 3 or 4 in characters 180-181 of the person record. The unemployed includes job leavers, job losers, new job entrants, and job reentrants.

#### a. Job Leavers

Persons who quit or otherwise terminate their employment voluntarily and immediately begin looking for work.

#### b. Job Losers

Persons whose employment ends involuntarily, who immediately begin looking for work, and those persons who are already on layoff.

#### c. New Job Entrants

Persons who never worked at a full-time job lasting two weeks or longer.

#### d. Job Reentrants

Persons who previously worked at a full-time job lasting two weeks or longer but are out of the labor force prior to beginning to look for work.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job loser, job leaver, reentrant, and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over; the sum of the rates for the four groups thus equals the total unemployment rate.

## 3. Not in Labor Force

All civilians 15 years old and over who are not classified as employed or unemployed. These persons are further classified by major activity: retired, unable to work because of long-term physical or mental illness, and other. The "other" group includes, for the most part, students and persons keeping house. Persons who report doing unpaid work in a family farm or business for less than 15 hours are also classified as not in the labor force.

For persons not in the labor force, data on previous work experience, intentions to seek work again, desire for a job at the time of interview, and reasons for not looking for work are asked only in those households that are in the fourth and eighth months of the sample, i.e., the "outgoing" groups, those which had been in the sample for three previous months and would not be in for the subsequent month.

Persons classified as NILF have an MLR code of 5-7 in characters 180-181 of the person record.

**Layoff-**A person who is unemployed but expects to be called back to a specific job. If he/she expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

Level of School Completed/Degree Received-These data changed beginning with the January 1992 file. A new question, "What is the highest level of school ... has completed or the highest degree ... has received?" replaced the old "Highest grade attended" and "Year completed" questions. The new question provides more accurate data on the degree status of college students. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system.

**Looking for Work**-A person who is trying to get work or trying to establish a business or profession.

**Marital Status**-The marital status classification identifies four major categories: single (never married), married, widowed, and divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, civilian spouse present," "married, Armed Force spouse present," "married, spouse absent," "married, Armed Force spouse absent," and "separated." A person is classified as "married, spouse present" if the husband or wife is reported as a member of the household even though he or she may be temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as "separated" included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons permanently or temporarily estranged from their spouses because of marital discord.

For the purpose of this file, the group "other marital status" includes "widowed and divorced," "separated," and "other married, spouse absent."

**Month-In-Sample**-The term is defined as the number of times a unit is interviewed. Each unit is interviewed eight times during the life of the sample.

**Never Worked**-A person who has never held a full-time civilian job lasting two consecutive weeks or more.

**Nonfamily Householder**-A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

Nonworker-A person who does not do any work in the calendar year preceding the survey.

Nonrelative of Householder With No Own Relatives in Household-A nonrelative of the householder who has no relative(s) of his own in the household. This category includes such nonrelatives as a foster child, a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

Nonrelative of Householder With Own Relatives (Including Spouse)in Household-Any household member who is not related to the householder but has relatives of his own in the household; for example, a lodger, his spouse, and their son.

**Other Relative of Householder**-Any relative of the householder other than his spouse or child; for example, father, mother, grandson, daughter-in-law, etc.

Out Variable-An instrument-created item that stores the results of another item.

**Own Child**-A child related by birth, marriage, or adoption to the family householder.

**Part-Time, Economic Reasons**-The item includes slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also Full-Time Worker.)

**Part-Time, Other Reasons-**The item includes labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

**Part-Time Work**-Persons who work between 1 and 34 hours are designated as working "part-time" in the current job held during the reference week. For the March supplement, a person is classified as having worked part-time during the preceding calendar year if he worked less than 35 hours per week in a majority of the weeks in which he

worked during the year. Conversely, he is classified as having worked full-time if he worked 35 hours or more per week during a majority of the weeks in which he worked.

**Part-Year Work-**Part-year work is classified as less than 50 weeks' work.

**Population Coverage**-Population coverage includes the civilian population of the United States plus approximately 820,000 members of the Armed Forces in the United States living off post or with their families on post but excludes all other members of the Armed Forces. This file excludes inmates of institutions. The labor force and work experience data are not collected for Armed Forces members.

**Processing Recode**-An item calculated by the processing system from a combination of other items in the database. The second character of the item name is always "R".

**Race**-The population is divided into three groups on the basis of race: White, Black, and Other races. The last category includes Indians, Japanese, Chinese, and any other race except White and Black. In most of the published tables, "Other Races" are shown in total population.

**Reentrants**-Persons who previously worked at a full-time job lasting two weeks or longer but who are out of the labor force prior to beginning to look for work.

**Related Children**-Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. For each type of family unit identified in the CPS, the count of own children under 18 years old is limited to single (never married) children; however, "own children under 25" and "own children of any age," include all children regardless of marital status. The totals include never-married children living away from home in college dormitories.

**Related Subfamily**-A related subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the householder or spouse. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. The number of related subfamilies is not included in the number of families.

**School**-A person who spent most of his time during the survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

**Secondary Individual**-A secondary individual is a person in a household or group quarters such as a guest, roomer, boarder, or resident employee (excluding nonfamily households and inmates of institutions) who is not related to any other person in the household or group quarters.

**Self-Employed**-Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm.

**Stretches of Unemployment**-A continuous stretch is one that is not interrupted by the person getting a job or leaving the labor market to go to school, to keep house, etc. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the period of seeking work.

**Unable to Work**-A person is classified as unable to work because of long-term physical or mental illness, lasting six months or longer.

**Unedited item-**An item that is produced by the CAPI instrument, either collected during the interview or created by the CAPI instrument. The second character of the item name is always "U".

**Unemployed-**(See Labor Force.)

**Unpaid Family Workers**-Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by birth or marriage.

**Unrelated Individuals-**Unrelated individuals are persons of any age (other than inmates of institutions) who are not living with any relatives. An unrelated individual may be (1) a nonfamily householder living alone or with nonrelatives only, (2) a roomer, boarder, or resident employee with no relatives in the household, or (3) a group quarters member who has no relatives living with him/her. Thus, a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to anyone else in the housing unit, a maid living as a member of her employer's household but with no relatives in the household, and a resident staff member in a hospital living apart from any relatives are all examples of unrelated individuals.

**Unrelated Subfamily**-An unrelated subfamily is a family that does not include among its members the householder and relatives of the householder. Members of unrelated subfamilies may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of families. However, the number of such unrelated subfamilies became so small (37,000 in 1967) that beginning with the data for 1968 (and beginning with the census data for 1960) the Bureau of the Census includes persons in these unrelated subfamilies in the count of secondary individuals.

**Veteran Status**-If a male served at any time during the four major wars of this century, the code for the most recent wartime service is entered. The following codes are used:

- 0 Children under 15
- 1 Vietnam era
- 2 Korean
- 3 WWI
- 4 WWII
- 5 Other Service
- 6 Nonveteran

Wage and Salary Workers-Wage and salary workers receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit. Also included are persons who are self-employed in an incorporated business.

**Workers**-(See Labor Force--Employed.)

**Work Experience**-Includes those persons who during the preceding calendar year did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

**Year-Round Full-Time Worker**-A year-round full-time worker is one who usually worked 35 hours or more per week for 50 weeks or more during the preceding calendar year.

#### HOW TO USE THE RECORD LAYOUT

Data users familiar with the CPS data files in prior years will see many similarities between the format of this file and those files released before January 1994. As in the past, there are numeric locations on the file which correspond to each variable. There is only one record layout which contains the variables for children, adults, and armed forces members. In prior years, each type of person had a separate record layout.

## **Item Naming Conventions**

- Ë The first character of each variable name is one of the following:
  - H Household item
  - G Geography item
  - \* P Person item (includes adult items, child items, and armed forces items)
    - \* There is no need to distinguish adult, child, and armed forces items in the variable names in the new system. The recode **PRPERTYP** (located in positions 161-162) tells you what category the person is in.
- Ë The second character of each variable name is one of the following:
  - E Edited item
  - U Unedited item
  - X Allocation flag (see Attachment 16 for more information)
  - W Weight
  - R Recode
- Ë The remaining characters describe the variable.
- Each item has the same descriptive name but a number is added as the last digit. For example, Question 22A allows separate entries for up to 6 job search methods. The item names are **PELKM1** (this item is edited), **PULKM2**, (this item is unedited), **PULKM3**, etc. These items are located in positions 296-307 of the record layout.

### CHANGES TO CPS PUBLIC USE FILES EFFECTIVE SEPTEMBER 1995

Effective September 1995, a number of revisions were made to the CPS public use files. Most were related to the recent phase-in of a new sample based on the results of the 1990 Census. This phase-in was completed in June 1995. Part of this changeover was the use of new metropolitan area definitions based on the results of the 1990 Decennial Census in selecting the new sample. As such, beginning in September 1995, metropolitan area definitions effective June 30, 1993 will be identified subject to confidentiality restrictions on the CPS public use files. The new variables and their locations are given below.

Concurrent with this revision, several other changes were made to the CPS public use files. The most important of these was the creation of a new set of household identification numbers for the September forward files. Bureau of the Census confidentiality restrictions require that we preclude the possibility of matching any households from data files before and after the September 1995 date. In conjunction with this, the Bureau revised its sample household numbering scheme. These two considerations resulted in the creation of a 15 character household identification number. The location of this number is now in characters 1-15 (previously 1-12) of all non-March files and characters 344-358 (previously 320-331) on the March files.

Also, on non-March files, the following variables changed locations:

|          | Location |         |
|----------|----------|---------|
| Name     | Old      | New     |
|          |          |         |
| HUINTTYP | 13-14    | 16-17   |
| HULENSEC | 15-19    | 109-113 |

The other change involves the suppression of several 3-digit occupation codes. Specifically, Codes 003 and 016 (legislators and postmasters, respectively) are collapsed into Code 022, (managers and administrators, N.E.C.) Also, Code 179, (judges) was collapsed into Code 178, (lawyers). None of the changes affected any of the occupation recodes.

<sup>\*</sup>NOT ON THE MARCH 1995 FILE

# Basic Current Population Survey Record Layout

#### A1. HOUSEHOLD INFORMATION

NAME SIZE DESCRIPTION LOCATION

All items, except those with one character, also can have values of -1, -2, or -3 even if such values are not listed in the documentation. The meanings of these values are as follows:

-1 Blank or not in universe

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

- -2 Don't know
- -3 Refused

Most edited items (E or R) in the second character of the item name also can be blank. This means that the record was not in universe for that item.

|       |      | **************  * Additional valid entry for edited items:  *  * -1 (blank)  ***********************************   |                 |
| HES1A | 2    | These first questions are about all the places where (you/you and all the other members of your household) bought food last week. By last week, I mean from Sunday through Saturday. First, did you shop for food at a supermarket or grocery store last week? | 857-858         |
|       |      | EDITED UNIVERSE:   |                 |
|       |      | HRINTSTA = 1   |                 |
|       |      | VALID ENTRIES:   |                 |
|       |      | <ul><li>1 Yes</li><li>2 No</li><li>-2 Don't Know</li><li>-3 Refused</li></ul>  |                 |
| HES1B | 2    | Think about other places where people buy food, such as meat markets, produce stands, bakeries, warehouse clubs, and convenience stores. Did (you/anyone in your household) buy food from any stores such as these last week?                                  | 859-860         |
|       |      | EDITED UNIVERSE:   |                 |
|       |      | HES1A = 1, 2, -2,  or  -3  |                 |

#### SUPPLEMENT QUESTIONNAIRE

#### APRIL 1999 FOOD SECURITY SUPPLEMENT

Supt Supt Supt is a timer for the entire supplement.

POORCK NUMHOU = 1 and FAMINC = 1, 2, 3, 4 or 5 set POOR=1 else if

NUMHOU = 2 and FAMINC = 1, 2, 3, 4, 5, or 6 set POOR =1 else if

NUMHOU = 3 and FAMINC = 1, 2, 3, 4, 5, 6, or 7 set POOR=1 else if

NUMHOU = 4 and FAMINC = 1, 2, 3, 4, 5, 6, 7, or 8 set POOR=1 else if

NUMHOU = 5 and FAMINC = 1, 2, 3, 4, 5, 6, 7, 8, or 9 set POOR=1 else if

NUMHOU = 6 and FAMINC = 1, 2, 3, 4, 5, 6, 7, 8, 9, or 10 set POOR=1 else if

NUMHOU = 7 or 8 and FAMINC = 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 or 11 set POOR=1 else if

NUMHOU = 9 and FAMINC = 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, or 12 set POOR=1 else if

NUMHOU = 10-16 and FAMINC = 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 or 13 set POOR=1 else Set POOR = 2.

# I. FOOD COSTS AND PROGRAM PARTICIPATION

[LEAD] This month we are asking some questions about food used in your household and the ways you are managing to meet your food needs.

### I. FOOD EXPENDITURES

S1A If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

These first questions are about all the places at which you bought food last week. By last week, I mean from Sunday through Saturday.

First, did (you/anyone in your household) shop for food at a supermarket or grocery store last week?

<1> Yes <2> No

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SCOMPL If onpath entry, D or R in S1A then set SCOMPL=1 otherwise set SCOMPL=0

S1B If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

Think about other places where people buy food, such as meat markets, produce stands, bakeries, warehouse clubs, and convenience stores. Did (you/anyone in your household) buy food from any stores such as these last week?

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

If more than one hhmem=1 has an AGE equal to or greater than 6 fill with second option else fill with first option else fill with first option in first parenthetical.

If one or more hhmem=1 with AGE between 6 and 18 then fill second parenthetical with first option else fill with second option.

Last week, did (you/anyone in your household) buy food at a restaurant, fast food place, cafeteria, or vending machine? (Include any children who may have bought food at the school cafeteria/ ).

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

Did (you/anyone in your household) buy food from any other kind of place last week?

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SCKA If onpath entry of <2>, <D> or <R> in S1A, S1B, S1C and S1D then skip to S8 else go to Slead.

Slead Now I'm going to ask you about the ACTUAL amount you spent on food last week in all the places where you bought food. Then, since last week may have been unusual for you, I will ask about the amount you USUALLY spend.

<P> Proceed

SCKB If onpath entry of <1> in S1A then ask S2 else skip to SCKC.

Items S2 through S2COR go into making the out variable S2O. S2O is the amount spent at supermarkets and grocery stores (S1A=1) and it should be used as THE variable for supermarket amounts.

S2 If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

If POOR=2 then fill second parenthetical with first option else fill with second option.

How much did (you/your household) ACTUALLY spend at supermarkets and grocery stores last week (?/including any purchases made with food stamps?)

ENTER X IF RESPONDENT CAN ONLY GIVE RANGE

S2CK If entry of X in S2 goto S2CK1 else store entry in S2O. If S2O is between \$1.00 and \$450.00 go to S3 else if S2O is equal to D or R go to SCKC otherwise go to S2RC.

\$2CK1 \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*DO NOT READ TO RESPONDENT\*\*\*\*\*\*\*\*\*\*\*

Enter range reported by respondent

S2RG Add the entries in S2CK1 and divide by 2. Store the answer in S2O. If S2O is between \$1.00 and \$450.00 go to S3 otherwise go to S2RC.

| S2RC  | ***********DO NOT ASK THE RESPONDENT*************   |
|-------|---|
|       | AMOUNT SPENT RECORDED AS: (entry in S2O) IS THIS ENTRY CORRECT?   |
|       | <1> YES (go to S3)<br><2> NO (go to S2COR)  |
| S2COR | **************************************  |
|       | INCORRECT ENTRY WAS RECORDED AS: (entry in S2O) CORRECT ENTRY IS:   |
|       | \$00 (store entry in S2O)   |
|       | through S3COR go into making the out variable S3O. S3O is the amount spent at kets and grocery stores on NON-FOOD items. S3O is the variable you should use.  |
| S3    | If more than one hhmem=1 has an AGE equal to or greater than 10 fill first parenthetical with second option else fill with first.   |
|       | How much of the (fill with S2O) was for non-food items, such as pet food, paper products, detergents, or cleaning supplies?   |
|       | ENTER X IF RESPONDENT CAN ONLY GIVE RANGE   |
|       | <b>\$</b> .00   |
|       | Blind <d> or <r></r></d>  |
| S3CK  | If entry of X in S3 goto S3CK2 else store entry in S3O. Do not allow entry in S3O to be greater than entry in S2O. If S3O is between \$1.00 and \$100.00 or <d> or <r> go to SCKC otherwise go to S3RC.</r></d> |
| S3CK2 | **************************************  |
|       | Enter range reported by respondent  |
|       | 00 to00   |

Add the entries in S3CK2 and divide by 2. Store the answer in S3O. Do not allow entry in S3O to be greater than entry in S2O. If S3O is between \$1.00 and \$100.00 go to SCKC otherwise go to

S3RC.

\$3RC \*\*\*\*\*\*\*\*DO NOT ASK THE RESPONDENT\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

AMOUNT SPENT RECORDED AS: (entry in S3O) IS THIS ENTRY CORRECT?

<1> YES (go to SCKC)

<2> NO (go to S3COR)

INCORRECT ENTRY WAS RECORDED AS: (entry in S3O) CORRECT ENTRY IS:

 $_{\_}.00$  (store entry in S3O)

Do not allow entry in S3O to be greater than entry in S2O.

SCKC If onpath entry of <1> in S1B then ask S4 else skip to SCKD.

Items S4 through S4COR go into making the out variable S4O. S40 is the amount spent at stores such as meat markets, produce stands, bakeries, etc. S4O is the variable you should use for amount spent at meat markets, etc.

If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

If POOR=2 then fill second parenthetical with first option else fill with second option.

How much did (you/your household) spend at stores such as meat markets, produce stands, bakeries, warehouse clubs, and convenience stores last week (?/including any purchases made with food stamps?)

ENTER X IF RESPONDENT CAN ONLY GIVE RANGE

\$\_\_\_.00

Blind <D> or <R> go to SCKD

| S4CK  | If entry of X in S4 go to S4CK1 else store entry in S4O. If S4O is between \$1.00 and \$150.00 go to S5 else if S4O is D or R go to SCKD otherwise go to S4RC. |
|-------|--|
| S4CK1 | **************************************   |
|       | Enter range reported by respondent   |
|       | 00 to00  |
| S4RG  | Add the entries in S4CK1 and divide by 2. Store the answer in S4O. If S4O is between \$1.00 and \$150.00 go to S5 otherwise go to S4RC.                        |
| S4RC  | **************************************   |
|       | AMOUNT SPENT RECORDED AS: (entry in S4O) IS THIS ENTRY CORRECT?  |
|       | <1> Yes (go to S5)<br><2> No (go to S4COR)   |
| S4COR | **************************************   |
|       | INCORRECT ENTRY WAS RECORDED AS: (entry in S4O) CORRECT ENTRY IS:  |
|       | \$00 (store entry in S4O)  |
|       | hrough S5COR go into making the out variable S5O. Use S5O for the amount of NON-ms from meat markets, produce stands, bakeries, etc.                           |
| S5    | How much of the \$(fill with S4O) was for nonfood items, such as pet food, paper products, detergents, or cleaning supplies?                                   |

ENTER X IF RESPONDENT CAN ONLY GIVE RANGE

\$\_\_\_.00

Blind D or R

S5CK If entry of X in S5 goto S5CK1 else store entry in S5O. Do not allow entry in S5O to be greater than entry in S4O. If S5O is between \$1.00 and \$100.00 or D or R go to SCKD else go to S5RC

S5CK1

\*\*\*\*\*\*\*\*\*\*\*\*DO NOT ASK THE RESPONDENT\*\*\*\*\*\*\*\*\*\*

Enter range reported by respondent

\_\_\_.00 to \_\_\_.00

S5RG

Add the entries in S5CK1 and divide by 2. Store the answer in S5O. Do not allow entry in S5O to be greater than entry in S4O. If S5O is between \$1.00 and \$100.00 go to SCKD else go to S5RC.

S5RC

AMOUNT SPENT RECORDED AS: (entry in S50) IS THIS ENTRY CORRECT?

<1> Yes (go to SCKD)

<2> No (go to S5COR)

S5COR

INCORRECT ENTRY WAS RECORDED AS: (entry in S50) CORRECT ENTRY IS:

\$\_ \_ \_.00 (store entry in S5O)

Do not allow entry in S5O to be greater than entry in S4O.

SCKD

If entry of <1> in S1C then ask S6 else skip to SCKE

Items S6 through S6COR go into making the out variable S6O. Use S6O for the amount spent at fast food restaurants.

**S**6

If more than one hhmem=1 has an AGE equal to or greater than 10 fill with second option else fill with first option.

How much did (you/your household) spend for food at restaurants, fast food places, cafeterias, and vending machines last week?

ENTER X IF RESPONDENT CAN ONLY GIVE RANGE

\$\_\_\_.00

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

S6CK If entry of X in S6 goto S6CK1 else store entry in S6O. If S6O is between \$1.00 and \$200.00 or D or R go to SCKE else go to S6RC. \*\*\*\*\*\*\*\*\*\*DO NOT ASK THE RESPONDENT\*\*\*\*\*\*\*\*\*\* S6CK1 Enter range reported by respondent \_\_\_.00 to \_\_\_.00 S6RG Add the entries in S6CK1 and divide by 2. Store the answer in S6O. <2> Some months but not every month

<3> Only 1 or 2 months

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SSHM1 If only 1 HHMEM=1 and AGE>=18 in household fill with first option else fill with second option.

Now think about the last 30 days. During that time did (you/ you or other adults in your household) ever not eat for a whole day because there wasn't enough money for food?

<1> Yes

<2> No (SKIP TO SSH2CK)

Blind <D> or <R> skip to SSH2CK

SSHMF1 How many times did this happen in the last 30 days?

\_\_\_\_ times <1-30>

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

All responses go to SSH2CK

\_\_\_\_\_

SSH2CK If HHMEM=1 and AGE<=17 of anyone in the household go to SSH2 else skip to SC1.

-----

SSH2 If only one person with AGE<=17 then fill with first option else fill with second option.

The next questions are about (your child/ children living in the household who are under 18 years old).

In the last 12 months, since May of last year, did you ever cut the size of (your child's/ any of the children)'s meals because there wasn't enough money for food?

<1> Yes

<2> No (SKIP TO SSH3)

Blind <D> or <R> skip to SSH3

SSHF2 How often did this happen - almost every month, some months but not every month, or in only 1 or 2 months?

<1> Almost every month

<2> Some months but not every month

<3> Only 1 or 2 months

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SSHM2 Did this happen in the last 30 days?

<1> Yes

<2> No (SKIP TO SSH3)

Blind <D> or <R> skip to SSH3

SSHMF2 If only one person with AGE<=17 then fill with first option else fill with second option.

In the last 30 days, how many days did you cut the size of (your child's/the children's) meals because there wasn't enough money for food?

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

All responses go to SSH3

SSH3 If only one person with AGE<=17 then fill with first option else fill with second option.

In the last 12 months, (was your child/were the children) ever hungry but you just couldn't afford more food?

Blind <D> or <R> skip to SSH4

SSHM3 Did this happen in the last 30 days?

Blind <D> or <R> skip to SSH4

SSHMF3 If only one person with AGE<=17 then fill with first option else fill with second option.

In the last 30 days, how many days (was your child/ were the children) hungry but you just couldn't afford more food?

$$\underline{\hspace{1cm}}$$
 number of days  $<1-30>$ 

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SSH4 If only one person with AGE<=17 then fill with first option else fill with second option.

In the last 12 months, did (your child/ any of the children) ever skip a meal because there wasn't enough money for food?

<2> No (SKIP TO SSH5)

Blind <D> or <R> skip to SSH5

SSHF4 How often did this happen--almost every month, some months but not every month, or in only 1 or 2 months?

- <1> Almost every month
- <2> Some months but not every month
- <3> Only 1 or 2 months

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SSHM4 If only one person with AGE<=17 then fill with first option else fill with second option.

Now think about the last 30 days. Did (your child/ the children) ever skip a meal during that time because there wasn't enough money for food?

<2> No (SKIP TO SSH5)

Blind <D> or <R> skip to SSH5

SSHMF4 How many days did this happen in the last 30 days?

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

All responses go to SSH5

SSH5 If only one person with AGE<=17 then fill with first option else fill with second option.

In the last 12 months, since May of last year, did (your child/ any of the children) ever not eat for a whole day because there wasn't enough money for food?

Blind <D> or <R> skip to SC1

SSHM5 Did this happen in the last 30 days?

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

All responses go to SC1

SSH1A In the last 12 months, since last May, did you ever not eat for a whole day because there wasn't enough money for food?

Blind <D> or <R> skip to SSH2ACK

SSHF1A How often did this happen--almost every month, some months but not every month, or in only 1 or 2 months?

- <1> Almost every month
- <2> Some months but not every month
- <3> Only 1 or 2 months

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

\_\_\_\_\_

SSH2ACK If HHMEM=1 and AGE<=17 of anyone in the household go to SSH2A else skip to SC1.

-----

SSH2A If only one person with AGE<=17 then fill with first option else fill with NAME of HHMEM with AGE<=17 AND with birthday nearest to current date among all HHMEM with AGE<=17.

( /The next questions ask about a particular child living in the household; that is CHILD'S NAME).

In the last 12 months, was (your child/NAME) ever hungry but you just couldn't afford more food?

<1> Yes

<2> No (SKIP to SSH3A)

Blind <D> or <R> skip to SSH3A

SSH3A In the last 12 months, since May of last year, did you ever cut the size of (your child's/NAME's) meals because there wasn't enough money for food?

<1> Yes

<2> No (SKIP to SSH4A)

Blind  $\langle D \rangle$  or  $\langle R \rangle$  (SKIP to SSH4A)

SSHF3A How often did this happen - almost every month, some months but not every month, or in only 1 or 2 months?

<1> Almost every month

<2> Some months but not every month

<3> Only 1 or 2 months

Blind  $\langle D \rangle$  or  $\langle R \rangle$ 

SSH4A In the last 12 months, did (your child/ NAME) ever skip a meal because there wasn't enough money for food?

<1> Yes

<2> No (SKIP to SSH5A)

Blind <D> or <R> skip to SSH5A

| SSHF4A | How often did this happen - almost every month, some months but not every month, or in only 1 or 2 months?                               |

| S10   | If definite amount calculated in S8, fill first parenthetical with S8O else if range given in S8 fill with range calculated.  |
|       | You said that altogether your household usually spends (\$/ about \$ to \$) on food in an average week. This next question asks you to estimate the LOWEST amount of money that you would need to spend on food to meet the food needs of your household. |
|       | What is the LOWEST POSSIBLE amount that you could spend for food, per week or per month, and still provide a healthy, acceptable diet for your household ( /including any purchases made with food stamps)?   |
|       | <b>\$</b> _   |
|       | <1> Per week<br><2> Per month   |
|       | Blind <d> or <r></r></d>  |
|       | Use S10A and S10B here, not S10. S10A is the amount, S10B indicates "per week" or "per month".  |

### **ATTACHMENT 10**

# **INDUSTRY CLASSIFICATIONS**

# Industry Classification Codes for Detailed Industry (3-digit)

There are 236 categories for the employed, with 1 additional category for the experienced unemployed. These categories are aggregated into 51 detailed groups and 23 major groups (see pages 11-9 through 11-11).

(Numbers in parentheses are the 1987 SIC code equivalent; see Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, 1987. "Pt" means part, "n.e.c." means not elsewhere classified.)

These codes correspond to Items PEIO1ICD and PEIO2ICD located in the adults record layout. These codes are located in positions 436-438 and 446-448 in all months **except** March. In **March**, these codes correspond to Item A-IND, positions 103-105.

| Code  | Industry   |

### OCCUPATION CLASSIFICATIONS

## Occupational Classification Codes for Detailed Occupational Categories (3-digit)

There are 500 categories for the employed with 1 additional category for the experienced unemployed. These categories are aggregated into 46 detailed groups and 14 major groups (see pages 12-15 through 12-17).

The classification is developed from the 1980 Standard Occupational Classification. "n.e.c." is the abbreviation for not elsewhere classified.

These codes correspond to Items PEIO1OCD and PEIO2OCD located in the adults record layout. These codes are located in positions 439-441 and 449-451 in all months **except** March. In **March**, these codes correspond to Item A-OCC, positions 106-108.

| Code       | Occupation   |
|------------|--|
| 000-199    | MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS                        |
| 000-037    | EXECUTIVE, ADMINISTRATIVE, AND MANAGERIAL OCCUPATIONS                    |
| 000-003    | not used   |
| 004        | Chief executives and general administrators, public administration (112) |
| 005        | Administrators and officials, public administration (1132-1139)          |
| 006        | Administrators, protective services (1131)                               |
| 007        | Financial managers (122)   |
| 008        | Personnel and labor relations managers (123)                             |
| 009        | Purchasing managers (124)  |
| 010-012    | not used   |
| 013        | Managers, marketing, advertising, and public relations (125)             |
| 014        | Administrators, education and related fields (128)                       |
| 015        | Managers, medicine and health (131)                                      |
| 016<br>017 | not used   |
| 017        | Managers, food serving and lodging establishments (1351)                 |
| 018        | Managers, properties and real estate (1353)                              |
| 020        | Funeral directors (part 1359)<br>not used                                |
| 020        | Managers, service organizations, n.e.c. (127, 1352, 1354, part 1359)     |
| 021        | Managers and administrators, n.e.c. (121, 126, 132-1343, 136-139)        |
| 023-037    | Management Related Occupations   |
| 023-037    | Accountants and auditors (1412)  |
| 023        | Underwriters (1414)  |
| 025        | Other financial officers (1415, 1419)                                    |
| 026        | Management analysts (142)  |
| 027        | Personnel, training, and labor relations specialists (143)               |
| 028        | Purchasing agents and buyers, farm products (1443)                       |
| 029        | Buyers, wholesale and retail trade except farm products (1442)           |
| 030-032    | not used   |
| 033        | Purchasing agents and buyers, n.e.c. (1449)                              |
| 034        | Business and promotion agents (145)                                      |
| 035        | Construction inspectors (1472)   |
| 036        | Inspectors and compliance officers, except construction (1473)           |
| 037        | Management related occupations, n.e.c. (149)                             |
| 038-042    | not used   |

| Code           | Occupation   |

| Code                | Occupation   |
|---------------------|--|
| 553-558             | Supervisors, Construction Occupations                              |
| 553                 | Supervisors, brickmasons, stonemasons, and tile setters (6312)     |
| 554                 | Supervisors, carpenters and related workers (6313)                 |
| 555                 | Supervisors, electricians and power transmission installers (6314) |
| 556                 | Supervisors, painters, paperhangers, and plasterers (6315)         |
| 557                 | Supervisors, plumbers, pipefitters, and steamfitters (6316)        |
| 558                 | Supervisors, construction, n.e.c. (6311, 6318)                     |
| 559-562             | not used   |
| 563-599             | Construction Trades, Except Supervisors                            |
| 563                 | Brickmasons and stonemasons (part 6412, part 6413)                 |
| 564                 | Brickmason and stonemason apprentices (part 6412, part 6413)       |
| 565                 | Tile setters, hard and soft (part 6414, part 6462)                 |
| 566                 | Carpet installers (part 6462)                                      |
| 567                 | Carpet instances (part 6402)  Carpenters (part 6422)               |
| 568                 | not used   |
| 569                 | Carpenter apprentices (part 6422)                                  |
| 570-572             | not used   |
| 573                 | Drywall installers (6424)  |
| 574                 | not used   |
| 575                 | Electricians (part 6432)   |
| 576                 | Electrician apprentices (part 6432)                                |
| 577                 | Electrical power installers and repairers (6433)                   |
| 578                 | not used   |
| 579                 | Painters, construction and maintenance (6442)                      |
| 582                 | not used   |
| 583                 | Paperhangers (6443)  |
| 584                 | Plasterers (6444)  |
| 585                 | Plumbers, pipefitters, and steamfitters (part 645)                 |
| 586                 | not used   |
| 587                 | Plumber, pipefitter, and steamfitter apprentices (part 645)        |
| 588                 | Concrete and terrazzo finishers (6463)                             |
| 589                 | Glaziers (6464)  |
| 590-592             | not used   |
| 593                 | Insulation workers (6465)  |
| 594                 | Paving, surfacing, and tamping equipment operators (6466)          |
| 595<br><b>5</b> 0.5 | Roofers (6468)   |
| 596                 | Sheetmetal duct installers (6472)                                  |
| 597<br>500          | Structural metal workers (6473)                                    |
| 598                 | Drillers, earth (6474)   |
| 599                 | Construction trades, n.e.c. (6467, 6475, 6476, 6479)               |
| 600-612             | not used   |
| 613-617             | Extractive Occupations   |
| 613<br>614          | Supervisors, extractive occupations (632)                          |
| 615                 | Drillers, oil well (652) Explosives workers (653)                  |
| 616                 | Explosives workers (653) Mining machine operators (654)            |
| 617                 | Mining machine operators (634)  Mining occupations, n.e.c. (656)   |
| 618-627             | not used   |
| 628-699             | Precision Production Occupations                                   |
| 628                 | Supervisors, production occupations (67, 71)                       |
| 629-633             | not used   |
| 634-655             | Precision Metal Working Occupations                                |
| 634                 | Tool and die makers (part 6811)                                    |
| 635                 | Tool and die maker apprentices (part 6811)                         |
|                     | 111  |

| 636         Precision assemblers, metal (6812)           637         Machinists (part 6813)           638         not used           640-642         not used           643         Boilermakers (6814)           644         Precision grinders, filers, and tool sharpeners (6816)           645         Patternmakers and model makers, metal (6817)           646         Lay-out workers (6821)           647         Precious stones and metals workers (Jewelers) (6822, 6866)           648         not used           649         Engravers, metal (6823)           650-652         not used           653         Sheet metal worker spart 6824)           654         Sheet metal worker apprentices (part 6824)           655         Miscellaneous precision metal workers (6829)           656-659         Precision Woodworking Occupations           657         Patternmakers and model makers, wood (6831)           658         Furniture and wood finishers (6832)           659         Miscellaneous precision woodworkers (6839)           660-665         not used           666-674         Precision Textile, Apparel, and Furnishings Machine Workers           667         Tailors (part 6852)           678         Upholsterers (6853)   |
|--|
| 638         not used           639         Machinist apprentices (part 6813)           640-642         not used           643         Boilermakers (6814)           644         Precision grinders, filers, and tool sharpeners (6816)           645         Patternmakers and model makers, metal (6817)           646         Lay-out workers (6821)           647         Precious stones and metals workers (Jewelers) (6822, 6866)           648         not used           649         Engravers, metal (6823)           650-652         not used           653         Sheet metal worker (part 6824)           654         Sheet metal worker apprentices (part 6824)           655         Miscellaneous precision metal workers (6829)           656-659         Precision Woodworking Occupations           656         Patternmakers and model makers, wood (6831)           657         Cabinet makers and bench carpenters (6832)           658         Furniture and wood finishers (6835)           659         Miscellaneous precision woodworkers (6839)           660-651         not used           666-652         Precision Textile, Apparel, and Furnishings Machine Workers           667         Tailors (part 6852), part 7752)           668         Upholsterers   |

| 718        | not used  |
| 719-725    | Metal and Plastic Processing Machine Operators  |
| 719        | Molding and casting machine operators (7315, 7342, 7515, 7542)                        |
| 720-722    | not used  |
| 723        | Metal plating machine operators (7343, 7543)  |
| 724        | Heat treating equipment operators (7344, 7544)  |
| 725        | Miscellaneous metal and plastic processing machine operators (7349, 7549)             |
| 726-733    | Woodworking Machine Operators   |
| 726<br>727 | Wood lathe, routing, and planing machine operators (7431, 7432, 7631, 7632)           |
| 727        | Sawing machine operators (7433, 7633)   |
| 728<br>729 | Shaping and joining machine operators (7435, 7635)                                    |
| 730-732    | Nailing and tacking machine operators (7636)<br>not used                              |
| 730-732    | Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)                  |
| 734-737    | Printing Machine Operators  |
| 734-737    | Printing press operators (7443, 7643)   |
| 735        | Photoengravers and lithographers (6842, 7444, 7644)                                   |
| 736        | Typesetters and compositors (6841, 7642)  |
| 737        | Miscellaneous printing machine operators (6849, 7449, 7649)                           |
| 738-749    | Textile, Apparel, and Furnishings Machine Operators                                   |
| 738        | Winding and twisting machine operators (7451, 7651)                                   |
| 739        | Knitting, looping, taping, and weaving machine operators (7452, 7652)                 |
| 740-742    | not used  |
| 743        | Textile cutting machine operators (7654)  |
| 744        | Textile sewing machine operators (7655)   |
| 745        | Shoe machine operators (7656)   |
| 746        | not used  |
| 747        | Pressing machine operators (7657)   |
| 748        | Laundering and dry cleaning machine operators (6855, 7658)                            |
| 749        | Miscellaneous textile machine operators (7459, 7659)                                  |
| 750-752    | not used  |
| 753-779    | Machine Operators, Assorted Materials   |
| 753        | Cementing and gluing machine operators (7661)   |
| 754<br>757 | Packaging and filling machine operators (7462, 7662)                                  |
| 755<br>756 | Extruding and forming machine operators (7463, 7663)                                  |
| 756        | Mixing and blending machine operators (7664)  |
| 757        | Separating, filtering, and clarifying machine operators (7476, 7666, 7676)            |
|            |   |

| Code               | Occupation   |
|--------------------|--|
| 758                | Compressing and compacting machine operators (7467, 7667)                  |
| 759                | Painting and paint spraying machine operators (7669)                       |
| 760-762            | not used   |
| 763                | Roasting and baking machine operators, food (7472, 7672)                   |
| 764                | Washing, cleaning, and pickling machine operators (7673)                   |
| 765                | Folding machine operators (7474, 7674)                                     |
| 766                | Furnace, kiln, and oven operators, except food (7675)                      |
| 767                | not used   |
| 768                | Crushing and grinding machine operators (part 7477, part 7677)             |
| 769                | Slicing and cutting machine operators (7478, 7678)                         |
| 770-772            | not used   |

#### **ATTACHMENT 12**

### Specific Metropolitan Identifiers

The specific metropolitan identifiers on this file are based on the Office of Management and Budget's June 30, 1993 definitions. MSA's and PMSA's can be identified by using the FIPS MSA/PMSA code (List 3). Identification of individual central cities is based on acombination of codes (List 2). Individual central cities are identified by the appropriate central city code and the FIPS MSA/PMSA code. Some examples of the proper coding of specific metropolitan areas are given below:

| <u>AREA</u>                   | INDIVIDUAL CENTRAL CITY CODE (GEINDVCC) | FIPS<br>MSA/PMSA<br>CODE<br>(GEMSA) | FIPS<br>CMSA<br>CODE<br>(GECMSA) |
|-------------------------------|---|-------------------------------------|----------------------------------|
|                               | List 4                                  | List 2 or 3                         | List 1 or 2                      |
| Dallas-Fort Worth, TX CMSA    | N/C                                     | 1920 and 2800                       | 31                               |
| Fort Worth-Arlington, TX PMSA | N/C                                     | 2800                                | N/C                              |
| Fort Worth, TX Central City   | 1                                       | 2800                                | N/C                              |
| Phoenix, AZ MSA               | N/C                                     | 6200                                | N/C                              |
| Mesa, AZ Central City         | 2                                       | 6200                                | N/C                              |
| Burlington, VT MSA            | N/C                                     | 1305                                | N/C                              |
|                               |   |                                     |                                  |

N/C = No Code Required

### NOTE:

Many of the smaller metropolitan areas in sample do not contain central city/balance breakdowns and hence, are coded "not identifiable" in the household metropolitan statistical area residence status code (GEMSAST). It is recommended that this code in conjunction with the modified household metropolitan statistical area residence status code (GEMETSTA) be used for tallying metropolitan residence status for national and other grouped data. The GE in each variable name refers to Household Geographic.

### LIST 1: CMSA CODE (GECMSA)

| FIPS CODE<br>(GECMSA) | CMSA TITLE   |
|-----------------------|--|
| 07                    | Boston-Worcester-Lawrence, MA-NH-ME-CT   |
| 14                    | Chicago-Gary-Kenosha, IL-IN-WI (Kenosha, WI and Kankakee, IL PMSA's not in sample) |
| 21                    | Cincinnati-Hamilton, OH-KY-IN  |
| 28                    | Cleveland-Akron, OH  |
| 31                    | Dallas-Fort Worth, TX  |
| 34                    | Denver-Boulder-Greeley, CO   |
| 35                    | Detroit-Ann Arbor-Flint, MI  |
| 42                    | Houston-Galveston-Brazoria, TX   |
| 49                    | Los Angeles-Riverside-Orange County, CA  |
| 56                    | Miami-Fort Lauderdale, FL  |
| 63                    | Milwaukee-Racine, WI   |
| 70                    | New York-Northern New Jersey-Long Island, NY-NJ-CT-PA                              |
| 77                    | Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD                                 |
| 79                    | Portland-Salem, OR-WA  |
| 82                    | Sacramento-Yolo, CA  |
| 84                    | San Francisco-Oakland-San Jose, CA (Santa Cruz-Watsonville, CA PMSA not in sample) |
| 91                    | Seattle-Tacoma-Bremerton, WA (Bremerton, WA PMSA not in sample)                    |
| 97                    | Washington-Baltimore, DC-MD-VA-WV  |

See List 2 or 3 for identification information on all PMSA's in sample.

# Topcoding of Usual Hourly Earnings

This variable will be topcoded based on an individual's usual hours worked variable, if the individual's edited usual weekly earnings variable is \$999. The topcode is computed such that the product of usual hours times usual hourly earnings does not exceed an annualized wage of \$100,000 (\$1,923.07 per week). Below is a list of the appropriate topcodes.

| Hours | Topcode | Hours | Topcode | Hours | Topcode |
|-------|---------|-------|---------|-------|---------|
| 1     | None    | 34    | \$56.56 | 67    | \$28.70 |
| 2     | None    | 35    | \$54.94 | 68    | \$28.28 |
| 3     | None    | 36    | \$53.41 | 69    | \$27.87 |
| 4     | None    | 37    | \$51.97 | 70    | \$27.47 |
| 5     | None    | 38    | \$50.60 | 71    | \$27.08 |
| 6     | None    | 39    | \$49.30 | 72    | \$26.70 |
| 7     | None    | 40    | \$48.07 | 73    | \$26.34 |
| 8     | None    | 41    | \$46.90 | 74    | \$25.98 |
| 9     | None    | 42    | \$45.78 | 75    | \$25.64 |
| 10    | None    | 43    | \$44.72 | 76    | \$25.30 |
| 11    | None    | 44    | \$43.70 | 77    | \$24.97 |
| 12    | None    | 45    | \$42.73 | 78    | \$24.65 |
| 13    | None    | 46    | \$41.80 | 79    | \$24.34 |
| 14    | None    | 47    | \$40.91 | 80    | \$24.03 |
| 15    | None    | 48    | \$40.06 | 81    | \$23.74 |
| 16    | None    | 49    | \$39.24 | 82    | \$23.45 |

# COUNTRIES AND AREAS OF THE WORLD

# **Current Population Survey**

List A -- Alphabetical List of Countries and Areas of the World

If the specific country reported was not on the interviewer's list, or if the respondent did not know the specific country, the following codes for broad areas of the world were available for coding:

| Code | Name                                   |
|------|--|
| 1.10 | _                                      |
| 148  | Europe                                 |
| 245  | Asia                                   |
| 252  | Middle East                            |
| 304  | North America                          |
| 318  | Central America                        |
| 353  | Caribbean                              |
| 389  | South America                          |
| 468  | North Africa                           |
| 462  | Other Africa                           |
| 527  | Pacific Islands                        |
| 555  | Elsewhere (includes country not known) |

The countries (or areas) shown below were coded separately, if reported.

| Code | Name           | Code | Name              |
|------|----------------|------|-------------------|
| 200  | Afghanistan    | 213  | Iraq              |
| 60   | American Samoa | 119  | Ireland/Eire      |
| 375  | Argentina      | 214  | Israel            |
| 185  | Armenia        | 120  | Italy             |
| 501  | Australia      | 343  | Jamaica           |
| 102  | Austria        | 215  | Japan             |
| 130  | Azores         | 216  | Jordan            |
| 333  | Bahamas        | 427  | Kenya             |
| 202  | Bangladesh     | 217  | Korea/South Korea |
| 334  | Barbados       | 221  | Laos              |
| 103  | Belgium        | 183  | Latvia            |
| 310  | Belize         | 222  | Lebanon           |
| 300  | Bermuda        | 184  | Lithuania         |
| 376  | Bolivia        | 224  | Malaysia          |
| 377  | Brazil         | 315  | Mexico            |
| 205  | Burma          | 436  | Morocco           |
| 206  | Cambodia       | 126  | Netherlands       |
| 301  | Canada         | 514  | New Zealand       |
| 378  | Chile          | 316  | Nicaragua         |
| 207  | China          | 440  | Nigeria           |
| 379  | Colombia       | 142  | Northern Ireland  |
| 311  | Costa Rica     | 127  | Norway            |
| 337  | Cuba           | 229  | Pakistan          |
| 155  | Czech Republic | 253  | Palestine         |
| 105  | Czechoslovakia | 317  | Panama            |
| 106  | Denmark        | 385  | Peru              |

#### **ALLOCATION FLAGS**

# **Current Population Survey**

For every edited item, there is a corresponding allocation flag with the prefix "PX". The last six characters of the names are the same. For example, PXMLR is the allocation flag for PEMLR. All allocation flags have the following list of possible values.

- 00 VALUE NO CHANGE
- 01 BLANK NO CHANGE
- 02 DON'T KNOW NO CHANGE
- 03 REFUSED NO CHANGE
- 10 VALUE TO VALUE
- 11 BLANK TO VALUE
- 12 DON'T KNOW TO VALUE
- 13 REFUSED TO VALUE
- 20 VALUE TO LONGITUDINAL VALUE
- 21 BLANK TO LONGITUDINAL VALUE
- 22 DON'T KNOW TO LONGITUDINAL VALUE
- 23 REFUSED TO LONGITUDINAL VALUE
- 30 VALUE TO ALLOCATED VALUE LONG.
- 31 BLANK TO ALLOCATED VALUE LONG.
- 32 DON'T KNOW TO ALLOCATED VALUE LONG.
- 33 REFUSED TO ALLOCATED VALUE LONG.
- 40 VALUE TO ALLOCATED VALUE
- 41 BLANK TO ALLOCATED VALUE
- 42 DON'T KNOW TO ALLOCATED VALUE
- 43 REFUSED TO ALLOCATED VALUE
- 50 VALUE TO BLANK
- 52 DON'T KNOW TO BLANK
- 53 REFUSED TO BLANK

Source and Accuracy Statement for the April 1999 CPS Microdata File for Food Security

#### **SOURCE OF DATA**

The data for this survey came from the April 1999 Current Population Survey (CPS), conducted by the Census Bureau. The April survey uses two sets of questions, the basic CPS and the supplement.

<u>Basic CPS</u>. The monthly CPS collects primarily labor force data about the civilian noninstitutional population. Interviewers ask questions concerning labor force participation about each member 15 years old and over in every sample household.

<u>Sample Design</u>. The present CPS sample was selected from the 1990 Decennial Census files with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. To obtain the sample, the United States was divided into 2,007 geographic areas. In most states, a geographic area consisted of a county or several contiguous counties. In some areas of New England and Hawaii, minor civil divisions are used instead of counties. These 2,007 geographic areas were then grouped into 754 strata, and one geographic area was selected from each stratum. About 50,000 occupied households are eligible for interview every month out of these 754 areas. Interviewers are unable to obtain interviews at about 3,200 of these units. This occurs when the occupants are not found at home after repeated calls or are unavailable for some other reason.

<u>Sample Redesign</u>. Since the introduction of the CPS, the Census Bureau has redesigned the CPS sample several times. These redesigns have improved the quality and accuracy of the data and have satisfied changing data needs. The most recent changes were phased in and implementation was completed in July 1995.

**CPS April 1999 Supplement**. In addition to the basic CPS questions, interviewers asked supplementary questions in April 1999 about the type and amount of food families ate.

**Estimation Procedure**. This survey's estimation procedure adjusts weighted sample results to agree with independent estimates of the civilian noninstitutional population of the United States by age, sex, race, Hispanic lynon-Hispanic ancestry, and state of residence. The adjusted estimate is called the post-stratification ratio estimate. The independent estimates are calculated based on information from four primary sources:

- C The 1990 Decennial Census of Population and Housing.
- C An adjustment for undercoverage in the 1990 census.

<sup>&</sup>lt;sup>1</sup>Hispanics may be of any race.

- C Statistics on births, deaths, immigration, and emigration.
- C Statistics on the size of the armed forces.

The independent population estimates include some, but not all, of undocumented immigrants.

#### **ACCURACY OF THE ESTIMATES**

A sample survey estimate has two types of error: sampling and nonsampling. The accuracy of an estimate depends on both types of error. The nature of the sampling error is known given the survey design. The full extent of the nonsampling error, however, is unknown.

<u>Sampling Error</u>. Since the CPS estimates come from a sample, they may differ from figures from a complete census using the same questionnaires, instructions, and enumerators. This possible variation in the estimates due to sampling error is known as "sampling variability".

**Nonsampling Error**. All other sources of error in the survey estimates are collectively called nonsampling error. Sources of nonsampling error include the following:

- C Inability to get information about all sample cases.
- C Definitional difficulties.
- C Differences in interpretation of questions.
- C Respondent inability or unwillingness to provide correct information.
- C Respondent inability to recall information.
- C Errors made in data collection, such as recording and coding data.
- C Errors made in processing the data.
- C Errors made in estimating values for missing data.
- C Failure to represent all units with the sample (undercoverage).

Two types of nonsampling error that can be examined to a limited extent are nonresponse and coverage.

<u>Nonresponse</u>. The effect of nonresponse cannot be measured directly, but one indication of its potential effect is the nonresponse rate. For the April 1999 basic CPS, the nonresponse rate was 7.48%. The nonresponse rate for the supplement was an additional 11.2%, for a total supplement nonresponse rate of 17.8%.

Coverage. The concept of coverage in the survey sampling process is the extent to which the total population that could be selected for sample "covers" the survey's target population. CPS undercoverage results from missed housing units and missed people within sample households. Overall CPS undercoverage is estimated to be about 8 percent. CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. As described previously, ratio estimation to independent age-sex-race-Hispanic population controls partially corrects for the bias due to undercoverage. However, biases exist in the estimates to the

extent that missed people in missed households or missed people in interviewed households have different characteristics from those of interviewed people in the same age-sex-race-ancestry-state group.

| Table 1. CPS Coverage Ratios |       |       |       |       |       |            |       |  |
|------------------------------|-------|-------|-------|-------|-------|------------|-------|--|
|                              | Non-I | Black | Bla   | ack   | -     | All People |       |  |
| Age                          | M     | F     | M     | F     | M     | F          | Total |  |
| 0-14                         | 0.929 | 0.964 | 0.850 | 0.838 | 0.916 | 0.943      | 0.929 |  |
| 15                           | 0.933 | 0.895 | 0.763 | 0.824 | 0.905 | 0.883      | 0.895 |  |
| 16-19                        | 0.881 | 0.891 | 0.711 | 0.802 | 0.855 | 0.877      | 0.866 |  |
| 20-29                        | 0.847 | 0.897 | 0.660 | 0.811 | 0.823 | 0.884      | 0.854 |  |
| 30-39                        | 0.904 | 0.931 | 0.680 | 0.845 | 0.877 | 0.920      | 0.899 |  |
| 40-49                        | 0.928 | 0.966 | 0.816 | 0.911 | 0.917 | 0.959      | 0.938 |  |
| 50-59                        | 0.953 | 0.974 | 0.896 | 0.927 | 0.948 | 0.969      | 0.959 |  |
| 60-64                        | 0.961 | 0.941 | 0.954 | 0.953 | 0.960 | 0.942      | 0.950 |  |
| 65-69                        | 0.919 | 0.972 | 0.982 | 0.984 | 0.924 | 0.973      | 0.951 |  |
| 70+                          | 0.993 | 1.004 | 0.996 | 0.979 | 0.993 | 1.002      | 0.998 |  |
| 15+                          | 0.914 | 0.945 | 0.767 | 0.874 | 0.898 | 0.927      | 0.918 |  |
| 0+                           | 0.918 | 0.949 | 0.793 | 0.864 | 0.902 | 0.931      | 0.921 |  |

A common measure of survey coverage is the coverage ratio, the estimated population before post-stratification divided by the independent population control. Table 1 shows CPS coverage ratios for age-sex-race groups for a typical month. The CPS coverage ratios can exhibit some variability from month to month. Other Census Bureau household surveys experience similar coverage.

A Nonsampling Error Warning. Since the full extent of the nonsampling error is unknown, one should be particularly careful when interpreting results based on small differences between estimates. Even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test. Caution should also be used when interpreting results based on a relatively small number of cases. Summary measures probably do not reveal useful information when computed on a base<sup>2</sup> smaller than 75,000.

For additional information on nonsampling error including the possible impact on CPS data when known, refer to

Standard Errors and Their Use. The sample estimate and its standard error enable one to construct a confidence interval. A confidence interval is a range that would include the average result of all possible samples with a known probability. For example, if all possible samples were surveyed under essentially the same general conditions and the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

A particular confidence interval may or may not contain the average estimate derived from all possible samples. However, one can say with specified confidence that the interval includes the average estimate calculated from all possible samples.

Standard errors may be used to perform hypothesis testing. This is a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis is that two population parameters are different. An example of this would be comparing the percentages of Whites with a college education to the percentage of Blacks with a college education.

Tests may be performed at various levels of significance. A significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. For example, to conclude that two parameters are different at the 0.10 level of significance, the absolute value of the estimated difference between characteristics must be greater than or equal to 1.645 times the standard error of the difference.

The Census Bureau uses 90-percent confidence intervals and 0.10 levels of significance to determine statistical validity. Consult standard statistical textbooks for alternative criteria.

**Estimating Standard Errors**. To estimate the standard error of a CPS estimate, the Census Bureau uses replicated variance estimation methods. These methods primarily measure the magnitude of sampling error. However, they do measure some effects of nonsampling error as well. They do not measure systematic biases in the data due to nonsampling error. (Bias is the average of the differences, over all possible samples, between the sample estimates and the desired value.)

<u>Generalized Variance Parameters</u>. Consider all of the possible estimates of characteristics of the population that are of interest to data users. Now consider all of the subpopulations such as racial groups, age ranges, etc. Finally, consider every possible comparison or ratio combination. The list would be completely unmanageable. Similarly, a list of standard errors to go with every estimate would be unmanageable.

Through experimentation, we have found that certain groups of estimates have similar relationships between their variances and expected values. We provide a generalized method for calculating standard errors for any of the characteristics of the population of interest. The generalized method uses generalized variance parameters for groups of estimates. These parameters are in Table 2, for April supplement data, and Table 3, for basic CPS monthly labor force estimates.

<u>Standard Errors of Estimated Numbers</u>. The approximate standard error,  $s_x$ , of an estimated number from this this microdata file can be obtained using this formula:

$$s_x - \sqrt{ax^2 \% bx}$$
 (1)

Here x is the size of the estimate and a and b are the parameters in Table 2 or 3 associated with the particular type of characteristic. When calculating standard errors for numbers from cross-tabulations involving different characteristics, use the factor or set of parameters for the characteristic which will give the largest standard error.

For information on calculating standard errors for labor force data from the CPS which involve quarterly or yearly averages see "Explanatory Notes and Estimates of Error: Household Data" in *Employment and Earnings*, a monthly report published by the Bureau of Labor Statistics.

#### Illustration No. 1

Suppose you want to calculate the standard error and a 90 percent confidence interval of the number of unemployed females in the civilian labor force when the number of unemployed females in the civilian labor force is about 2,891,000. Use Formula (1) and the appropriate parameters from Table 3 to get:

| Number, x      | 2,891,000              |
|----------------|------------------------|
| a parameter    | -0.000018              |
| b parameter    | 2,957                  |
| Standard error | 92,000                 |
| 90% conf. int. | 2,740,000 to 3,042,000 |

where the standard error is calculated as

$$s_x$$
 '  $\sqrt{\$0.000018 \times 2,891,000^2 \% 2,957 \times 2,891,000}$  ' 92,000

The 90-percent confidence interval is calculated as  $2,891,000 \pm 1.645 \times 92,000$ .

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

<u>Standard Errors of Estimated Percentages</u>. The reliability of an estimated percentage, computed using sample data from both numerator and denominator, depends on both the size of the percentage and its base.

Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the parameter from Table 2 or 3 indicated by the numerator.

The approximate standard error,  $s_{x,p}$ , of an estimated percentage can be obtained by using the following formula:

$$s_{x,p} - \sqrt{\frac{b}{x} p (100 \& p)}$$
 (2)

Here x is the total number of people, families, households, or unrelated individuals in the base of the percentage, p is the percentage (0 # p # 100), and b is the parameter in Table 2 or 3 associated with the characteristic in the numerator of the percentage.

#### Illustration No. 2

In April 1999, of the 39,459,000 households in the United States that had children between 0 and 18 years of age, 32.6% reported running short of money and trying to make their food or food money go further. Using the appropriate parameter from Table 2 and Formula (2) gives

| Percentage, p  | 32.6         |
|----------------|--------------|
| Base, x        | 39,459,000   |
| b parameter    | 2,068        |
| Standard error | 0.34         |
| 90% conf. int. | 32.0 to 33.2 |

where the standard error is calculated as

$$s_{x,p}$$
 ,  $\sqrt{\frac{2,068}{39,459,000} \times 32.6 \times (100 \& 32.6)}$  , 0.34

The 90-percent confidence interval is calculated as  $32.6 \pm 1.645 \times 0.34$ .

**Standard Error of a Difference**. The standard error of the difference between two sample estimates is approximately equal to

$$s_{x \& y} \cdot \sqrt{s_x^2 \% s_y^2}$$
 (3)

where  $s_x$  and  $s_y$  are the standard errors of the estimates, x and y. The estimates can be numbers, percentages, ratios, etc. This will represent the actual standard error quite accurately for the difference between estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

For information on calculating standard errors for labor force data from the CPS which involve differences in consecutive quarterly or yearly averages, consecutive month-to-month differences in estimates, and consecutive year-to-year differences in monthly estimates see "Explanatory Notes and Estimates of Error: Household Data" in *Employment and Earnings*, a monthly report published by the Bureau of Labor Statistics.

#### Illustration No. 3

In April 1999, of the 39,459,000 households in the United States that had children between 0 and 18 years of age, 12,868,000 or 32.6% reported running short of money and trying to make their food or food money go further. Of the 65,573,000 households in the United States that did not have children between 0 and 18 years of age, 12,474,000 or 19.0% reported running short of money and trying to make their food or food money go further.

| Description    | X            | y            | difference   |
|----------------|--------------|--------------|--------------|
| Percentage, p  | 32.6         | 19.0         | 13.6         |
| Base, x        | 39,459,000   | 65,573,000   | -            |
| b parameter    | 2,068        | 2,068        | -            |
| Standard error | 0.34         | 0.22         | 0.40         |
| 90% conf. int. | 32.0 to 33.2 | 18.6 to 19.4 | 12.9 to 14.3 |

The standard error of the difference is calculated as

$$s_{x \& y} \cdot \sqrt{0.34^2 \% 0.22^2} \cdot 0.40$$

The 90-percent confidence interval for the estimated difference between the households is calculated as  $13.6 \pm 1.645 \times 0.40$ . Because this interval does not include zero, we can conclude with 90-percent confidence that the percentage of families with children who reported running out of money for food is

greater than the percentage of families without children who reported running out of money for food.

<u>Accuracy of State Estimates</u>. The redesign of the CPS following the 1980 census provided an opportunity to increase efficiency and accuracy of state data. All strata are now defined within state boundaries. The sample is allocated among the states to produce state and national estimates with the required accuracy while keeping total sample size to a minimum. Improved accuracy of state data was achieved with about the same sample size as in the 1970 design.

Since the CPS is designed to produce both state and national estimates, the proportion of the total population sampled and the sampling rates differ among the states. In general, the smaller the population of the state the larger the sampling proportion. For example, in Vermont approximately 1 in every 400 households is sampled each month. In New York the sample is about 1 in every 2,000 households. Nevertheless, the size of the sample in New York is four times larger than in Vermont because New York has a larger population.

<u>Computation of Standard Errors for State Estimates</u>. Standard errors for a state may be obtained by computing national standard errors, using formulas described earlier, and multiplying these by the appropriate f factor from Table 4. An alternative method for computing standard errors for a state is to multiple the a and b parameters in Table 2 or 3 by f<sup>2</sup> and then use these adjusted parameters in the standard error formulas.

#### Illustration No. 4

Suppose you want to calculate the standard error for the percentage of people 18 years old and over living in the state of New York who had completed a bachelor's degree or more. Suppose about 3,155,700 (23.1 percent) people had completed at least a bachelor's degree when there were about 13,684,000 people aged 18 and over living in New York. Following the first method mentioned above, use the appropriate parameter from Table 2 and Formula (2) to get:

| Percentage, p   | 23.1       |
|-----------------|------------|
| Base, x         | 13,684,000 |
| b parameter     | 2,369      |
| State factor, f | 0.89       |
| Standard error  | 0.55       |

Table 4 shows the f factor for New York to be 0.89. Thus, the standard error on the estimate of the percentage of people 18 and over in New York state who had completed college is approximately  $0.55 \times 0.89 = 0.49$ .

Following the alternative method mentioned above, obtain the needed state parameter by multiplying the parameter in table 3 by the  $f^2$  factor in Table 4 for the state of interest. For example, for educational attainment for total or white in New York this gives  $b = 2,369 \times 0.79 = 1,872$ . The standard error of the estimate of the percentage of people 18 and older in New York state who had

completed college can then be found by using formula (2), the base of 13,684,000 and the new b parameter, 1,872. This gives a standard error of 0.49.

<u>Comparability of Data</u>. Data obtained from the CPS and other sources are not entirely comparable. This results from differences in interviewer training and experience and in differing survey processes. This is an example of nonsampling variability not reflected in the standard errors. Therefore caution should be used when comparing results from different sources.

A number of changes were made in data collection and estimation procedures beginning with the January 1994 CPS. The major change was the use of a new questionnaire. The questionnaire was redesigned to measure the official labor force concepts more precisely, to expand the amount of data available, to implement several definitional changes, and to adapt to a computer-assisted interviewing environment. The April supplemental food security questions were also modified for adaptation to computer-assisted interviewing, although there were no changes in definitions and concepts. Due to these and other changes, one should use caution when comparing estimates from data collected before 1994 with estimates from data collected in 1994 and later.

Caution should also be used when comparing data from this microdata file, which reflects 1990 census-based population controls, with microdata files from 1993 and earlier years, which reflect 1980 census-based population controls. Although this change in population controls had relatively little impact on summary measures such as averages, medians, and percentage distributions, it did have a significant impact on levels. For example, use of 1990 based population controls results in about a 1 percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for data collected in 1994 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain subpopulation groups than for the total population.

Caution should also be used when comparing Hispanic estimates over time. No independent population control totals for people of Hispanic ancestry were used before 1985.

Based on the results of each decennial census, the Census Bureau gradually introduces a new sample design for the CPS. During this phase-in period, CPS data are collected from sample designs based on different censuses. While most CPS estimates were unaffected by this mixed sample, geographic estimates are subject to greater error and variability. Users should excercise caution when comparing estimates across years for metropolitan/nonmetropolitan categories.

<u>Technical Assistance</u>. If you require assistance or additional information, please contact the Demographic Statistical Methods Division via e-mail at DSMD\_S&A@ccmail.census.gov.

 Table 2. Standard Error Parameters for Food Security Supplement

| Characteristic                                    | Total or V | White | Black     | k      | Hispar    | nic    |
|---|------------|-------|-----------|--------|-----------|--------|
|   | a          | b     | a         | b      | a         | b      |

| Black   | - 0.000212 | 3,150          |  |
| Hispanic origin   | - 0.000102 | 3,576          |  |

<sup>&</sup>lt;sup>1</sup> For not in labor force characteristics, use the Not in Labor Force parameters.

NOTE: These parameters are to be applied to basic CPS monthly labor force estimates.

For foreign-born and noncitizen characteristics for Total and White, the a and b parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Blacks and Hispanics.

Multiply the a and b parameters by 1.5 when tabulating nonmetropolitan estimates.

# **USER NOTES**

This section will contain information relevant to the *Current Population Survey, April 1999, Food Security Supplement Public Use File* that becomes available after the file is released. The cover letter to the updated information should be filed behind this page.

#### **CURRENT POPULATION SURVEY**

#### FOOD SECURITY SUPPLEMENT, AUGUST 1999

#### User Note 1

## **Technical Description**

The file is in ASCII format and consists of 134,951 logical records. The length of each record is 1,134 characters. Each record represents one person in a surveyed household or one household that was eligible for the core labor-force survey but could not be interviewed or was found not to be eligible for the CPS. A subset of variables on each record contains data about the household of which the person is a part. These variables have the same value for all persons in the same interviewed household.

#### Contents of the Data File

The file includes data in three general categories:

- (1) Monthly labor force survey data and recodes, collected by the Census Bureau for the Bureau of Labor Statistics. These variables are described briefly in the data dictionary. For concepts and definitions underlying these data, users should refer to the technical documentation for the CPS monthly labor force data available from the Bureau of Labor Statistics. Included are geographic, demographic, income, and employment data which may be of interest to those analyzing the food security supplement.
- (2) Food Security Supplement data, collected by the Census Bureau for the United States Department of Agriculture. These data consist of answers by household respondents to questions about household food expenditures, use of food assistance programs, and experiences and behaviors related to food security, food insecurity, and hunger. All of the Food Security Supplement variables are household-level data except the supplement person weight, the food security status person weight, and the identifier for the focus child for individually referenced children in rotation 8.
- (3) Food security and hunger scale and status indicators calculated from the Food Security Supplement data by the Economic Research Service of the United States Department of Agriculture. These indicate the screening status of the household as well as continuous and categorical measures of food security status.

#### Contents of the Food Security Supplement

A facsimile of the Food Security Supplement questionnaire is also available on the ERS web site (address at end of this document). The major sections of the Food Security Supplement are as follows:

- (1) Food Spending and Program Participation (HES1 HESP9).
- (2) Food Sufficiency and Food Security (HESS1 HESSH5A). This section includes the 18 food security and hunger items which are used to calculate the household food security scale.

- (3) Ways of Avoiding or Ameliorating Food Deprivation Coping Strategies (HESC1 HESC4).
- (4) Minimum Food Spending Needed (HES10)

## **Changes from Previous Years' Food Security Supplements**

The 1999 Food Security Supplement was almost unchanged from 1998. (Note, however, that the 1998 and 1999 files differ substantially from 1995-1997 files, especially in regard to the order of the main food security items and screening of those items to reduce respondent burden. The main series of questions was reordered in 1998 to approximate the severity order of the items and renamed to reflect the new questionnaire structure. The reordering allowed insertion of two internal screens and a less stringent initial screen, which is described below.)

Other innovations in 1998 that were continued in 1999 included (1) the split ballot test of individually referenced questions (described below); (2) the expanded set of "how often did this occur?" follow-up questions to the main food security and hunger series; and (3) the final question which asks the respondent what would be the lowest amount their household could spend for food per week of per month and still provide a healthy acceptable diet.

Changes from 1998 include: (1) A series of questions on food spending at various kinds of places plus a follow-up asking asking about usual spending for food replaced the single "usual" household food expenditure question asked in 1998 and in rotations 1-7 of 1997. The 1999 series was similar to that used in 1996, and in rotation 8 in 1997. (2) A split ballot test of two forms of the USDA/NHANES food sufficiency questions (HESS1 and HESS1A/HESS1A1) replaced a different test carried out in 1998.

## Screening of the Food Security Supplement

The Food Security Supplement includes several screens to reduce respondent burden and to avoid embarrassing respondents by asking them questions which are inappropriate given other information which they have provided in the survey. Some of the screener variables use information from the monthly labor force core data as well as from the Food Security Supplement. Households with income above 185 percent of the poverty threshold for that household (HRPOOR=2, estimated from HUFAMINC and HRNUMHOU) who responded "no" to HES2 were skipped over the questions on participation in food assistance programs. Households with income above 185 percent of poverty who registered no indication of food stress on HES2, HESS1, or HESS1A/HESS1A1 were skipped over the rest of the "Food Sufficiency and Food Security" section and the "Ways of Avoiding or Ameliorating Food Deprivation" section. There are also two "internal" screeners in the main food security section (the questions which are used to calculate the household food security scale). This series of questions is divided into three blocks. After the first and second blocks, households which have registered no indication of food stress in the preceding block are skipped over the rest of the "Food Sufficiency and Food Security" section.

The screening rules that determine whether a household was asked the questions used to calculate the food security scale have varied somewhat during the first five years of fielding the Food Security Supplement. These different screening procedures biased estimated prevalences of food insecurity and hunger differently in each year. Adjustments must be made for these differences to compare prevalences of food security and hunger across years. This topic is discussed further below under the heading "Food Security Scales and Screener Variables."

Screeners also were applied based on whether the household included any children, so that households without children were not asked questions which refer specifically to children. This screener, as calculated at the time of the survey, classified as children all persons age 17 or younger. However, for processing and analyzing the food security data, persons who are household reference persons or spouses of household reference persons

(PERRP=1, 2, or 3) are not considered children even if they are age 17 or younger. The food security scale, status, and screener variables reflect this recoding, however the individual item responses are not recoded, and the user will need to recode these if they are to be analyzed or used to replicate scale scores.

# **Experimental, Individually-Referenced Questions**

Continuing the split-ballot test first conducted in 1998, households in HRMIS=8 were asked several food security questions referenced to the respondent or to a specific child in place of corresponding questions in other month-in-sample groups which referred either to all adults or all children in the household. Adult items which are normally asked of "you or other adults in the household" in multiple-adult households were referenced only to the respondent. Seclected items which are normally asked of "the children" in multiple-child households were asked of a specific focus child in these households. The selection of the focus child was randomized with respect to characteristics of interest based on which child's birthday was nearest to the date of interview. As a lead-in to the first such question, the respondent was advised, "The next questions ask about a particular child living in the household; that is (CHILD'S NAME)." In subsequent questions, the child's name was inserted as a referent. Because these questions refer to specific individuals, and not to the experience of all members of the household, it is not possible to calculate scale scores for these households which are precisely comparable with those of other households. For this reason, these households are assigned missing values on food security scale and status variables, and an adjusted set of weights is provided to account for their exclusion (see section on weighting below). The focus child in households in rotation 8 is identifed by the variable PRSCHILD.

## **Food Security Scales and Screener Variables**

The main purpose of the Food Security Supplement is to provide information about food security, food insecurity, and hunger in the nation's households. Several variables are provided in the data file which identify the food security status of each household during the previous 12 months. All of these variables are based on responses to a set of 18 items in the Supplement which are indicators of food insecurity and hunger. HRFS12M3 is the raw score -a count of the number of items affirmed by the household respondent. HRFS12M4 is the household food security scale score, a continuous score based on fitting the data to a single-parameter Rasch model. Computed values range from about 1 to 14. Scale scores for households that affirmed no items cannot be calculated within the Rasch model. These households are food secure, but the degree of their food security is not known, and may vary widely from household to household. They are assigned scale scores of -6 to remind users that they require special handling in analyses that assume linearity of the scale scores. HRFS12M1 is a categorical variable based on the scale score, which classifies households in three categories: food secure, food insecure without hunger, and food insecure with hunger. HRFS12M2 is the same as HRFS12M1 except that the food insecure with hunger category is subdivided to level 1 and level 2 hunger. The level 2 hunger category corresponds with the severe hunger category described in Household Food Security in the United States: Summary Report of the Food Security Measurement Project, published by the Food and Nutrition Service.

The food security variables described in the previous paragraph are based on the 18 food security indicator items as they were administered in the 1999 survey. A second set food security scale and status indicators are provided that are adjusted for inter-year differences in survey screening procedures. These "common-screen" variables are comparable to corresponding variables in earlier years' data, and prevalence estimates based on them are comparable across these years. The common-screen-based food security variables are HRFS12C3 (raw score), HRFS12C4 (Rasch-based scale score), HRFS12C1 (3-category food security status indicator), and HRFS12C2 (4-category food security status indicator). The common-screen food security variables are needed because the screening procedures used in administering the Food Security Supplements varied somewhat from year to year. In all years, households that were screened out after a few initial questions are classified as food secure. However,

comparisons across years of the item responses of households with identical responses to the preliminary screener variables show that some households that were screened out under more stringent screening rules would have been classified as food insecure (or, in a few cases, even as food insecure with hunger) if they had not been screened out. The screening procedures, therefore, bias prevalence estimates of food security and hunger downward, and the extent of the bias varies across years. To compare prevalence rates across years, it is essential to adjust the data from each year so that it matches, as nearly as possible, a common set of screening procedures. That is, negative responses must be imputed to households that would have been screened out at the initial screener in any year. For surveys prior to 1998, negative responses also must be imputed to "downstream" variables for households which would have been screened out at either of the internal screens which were first implemented in 1998.

Two screener status variables are provided. HRFS12MS refers to screening status under the screen that was actually applied when the survey was administered (the "maximum-sample screen.") The variable indicates whether the household was screened out at the initial screen (before the first of the 18 indicator items), or was screened out after the first or second blocks of items, or was not screened out and was asked all items. Households that were screened out after the first block, but without having given a valid response to any of the items in the block are coded as missing on HRFS12MS. Maximum-sample food security scale and status variables (HRFS12M1, HRFS12M2, HRFS12M3, HRFS12M4) for these households also are coded as missing.

HRFS12CS refers to screening status under the 1995-1999 common screen. Categories are the same as for the maximum-sample screen variable, and housholds that would have been screened out with no valid responses to any of the indicator items under the common screen are coded as missing. Common-screen food security scale and status variables (HRFS12C1, HRFS12C2, HRFS12C3, HRFS12C4) for these households are coded as missing.

# **Constructing Household Characteristics from Person Records**

To compute some household characteristics such as household size, presence of children, or presence of elderly, it is necessary to identify the records of all persons in the same household. Households are uniquely and completely identified by State of residence (GESTCEN), household identifier (HRHHID), and household serial suffix (HSERSUF). Sort records within households by PERRP if the household reference person record must be the first record in the household. To match to other months' CPS files, add the HRMIS variable to the household identification, adjusting one of the files for the difference in survey month.

# Weights - Estimating Population Distributions of Person and Household Characteristics

The CPS is a complex probability sample, and interviewed households as well as persons in those households are assigned weights so that the full interviewed sample represents the total national non-institutionalized population. Initial weights are assigned based on probability of selection into the sample, and weights are then adjusted iteratively to match population controls for selected demographic characteristics at State and national levels. There are three sets of household and person weights in this data file: (1) labor force survey weights, (2) Food Security Supplement weights, and (3) food security status weights.

The labor force survey weights, HWHHWGT for households and PWSSWGT for persons, are positive for persons in all interviewed households. These weights would be appropriate for analyzing whether households or persons who completed the supplement differed from those who declined to complete the supplement.

About ten percent of households completed the core labor force survey, but declined to complete the Food Security Supplement. The supplement weights, HHSUPWGT for households and PWSUPWGT for persons, are adjusted for supplement non-response so that the supplement respondents represent the national non-institutionalized

population. These weights are appropriate for estimating household distributions of variables in the food security supplement, except for food security status or analyses including the food security status variables.

The food security status of households in rotation 8 with more than one adult or more than one child cannot be determined in ways which are comparable with those of other households because of the experimental, individually referenced, questions administered to those households (described above). Adjusted weights, HHFSWGT and PWFSWGT, are provided for estimating food security and hunger prevalences and for analyses which include the food security scales or food security status variables. For households with one adult and not more than one child, these food security status weights are identical to their supplement weight counterparts. For households with more than one adult or more than one child, the food security status weights are zero in rotation 8 and adjusted by a factor of approximately 8/7 for households in rotations 1-7, so as to represent the same total population and number of households as the core weights and supplement weights do. This is a ratio adjustment, however, not an interative adjustment to match controls for subpopulations or State populations.

Household weights are attached to all person records in the household. To estimate household distributions, the sample must be limited to one record for each household. This is usually accomplished by limiting the sample to records of household reference persons (PERRP=1 or 2). Non-interview households and persons have negative weights (-1), and these also must be excluded from analyses.

#### **Further Information**

Information on the Federal Food Security Measurement Project, and on survey and measurement issues is available from:
