# Exhibit 300: Capital Asset Plan and Business Case Summary

## Part I:Summary Information And Justification (All Capital Assets)

## Section A: Overview (All Capital Assets)

1. Date of Submission: 9/10/2007

2. Agency: Department of Transportation 3. Bureau: Federal Railroad Administration

FRAXX014: Railroad Safety Information System (RSIS) 4. Name of this Capital Asset:

5. Unique Project (Investment) Identifier: (For IT investment only, see section 53. For all other, use agency ID system.)

021-27-01-19-01-1060-00

Mixed Life Cycle

6. What kind of investment will this be in FY2009? (Please NOTE: Investments moving to O&M in FY2009, with Planning/Acquisition activities prior to FY2009 should not select O&M. These investments should indicate their current

status.)

7. What was the first budget year this investment was FY2001 or earlier submitted to OMB?

8. Provide a brief summary and justification for this investment, including a brief description of how this closes in part or in whole an identified agency performance gap:

The Railroad Safety Information System (RSIS) is a database system that captures data on railroad accidents, injuries, highway-rail crossing collisions, railroad operation data, FRA-conducted railroad inspections, and maintenance of the highway-rail crossing site inventory. The purpose of RSIS is to provide government agencies, railroad labor and management, and the general public with information on railroad safety. RSIS collects and disseminates railroad accident and casualty statistics. RSIS also provides the railroads, labor organizations, and the public with railroad safety statistics and resource allocation tools for improving the warning systems for highway-rail crossings. Finally, RSIS provides the tools for resource allocation of FRA safety inspectors to ensure that high-risk aspects of the rail infrastructure are in compliance with Federal law and regulations.

RSIS is comprised of 3 major integrated sub-systems and a web component with a public domain and a secured private section as follows:

- 1) Railroad Accident/Incident Reporting System (RAIRS)
- 2) Railroad Inspection Reporting System (RIRS)
- 3) Highway-Rail Grade Crossing Inventory System (GCIS)

RAIRS provides for collection of reports, receipts control, keying (in some cases), and extensive validation and cross database validation and produces the safety statistics for the entire agency. This system is the scorecard for determining if the industry has become safer, or a railroad is safer, and provides a tool to focus FRA conducted inspections. Without RAIRS, the agency would have to rely on anecdotal information on rail related accidents and serious injuries. RIRS also provides for collection of reports, receipts control, and extensive validation and produces the best means of determining systemic problems that affect a large railroad over many states and regions. Without RIRS, many defective conditions, (e.g., deferred maintenance, improper repair orders, etc.) would not be known until a serious train accident occurred. The GCIS is a database that stores physical attributes and exposure (frequency of automobile traffic and number of trains per day) for the highway/rail intersections (crossings). The costs for RSIS are for mixed life cycle operations for the collection and validation of records. The FRA Capital Planning Working Group and Capital Planning Board reviewed and approved the investment for continuance, as part of FRA's Capital Planning Investment Control review cycles.

9. Did the Agency's Executive/Investment Committee Yes

approve this request?

a. If "yes," what was the date of this approval? 11/26/2006

10. Did the Project Manager review this Exhibit? Yes

11. Contact information of Project Manager?

Name Cisse, Pape Phone Number Redacted

pape.cisse@dot.gov

a. What is the current FAC-P/PM certification level of the **TBD** 

project/program manager?

Yes

12. Has the agency developed and/or promoted cost effective, energy-efficient and environmentally sustainable techniques or practices for this project?

Exhibit 300: FRAXX014: Railroad Safety Information System (RSIS) (Revision 12) a. Will this investment include electronic assets Yes (including computers)? b. Is this investment for new construction or major No retrofit of a Federal building or facility? (answer applicable to non-IT assets only) 1. If "yes," is an ESPC or UESC being used to help fund this investment? 2. If "yes," will this investment meet sustainable design principles? 3. If "yes," is it designed to be 30% more energy efficient than relevant code? 13. Does this investment directly support one of the PMA Yes initiatives? If "yes," check all that apply: Expanded E-Government a. Briefly and specifically describe for each selected This initiative supports the PMA goal of Expanded Ehow this asset directly supports the identified initiative(s)? Government by improving service to citizens and by (e.g. If E-Gov is selected, is it an approved shared service providing railroad safety datahouse functionality to other provider or the managing partner?) federal government agencies and the railroad industry. In that a significant amount of RSIS data is collected and accessed via the Internet, the program has promoted Government to Government, Government to Business, and Government to Citizen on-line communications on various railroad safety issues. 14. Does this investment support a program assessed using Yes the Program Assessment Rating Tool (PART)? (For more information about the PART, visit www.whitehouse.gov/omb/part.) a. If "yes," does this investment address a weakness No found during a PART review? b. If "yes," what is the name of the PARTed program? Federal Railroad Administration Railroad Safety Program c. If "yes," what rating did the PART receive? Moderately Effective 15. Is this investment for information technology? Yes If the answer to Question 15 is "Yes," complete questions 16-23 below. If the answer is "No," do not answer questions 16-23. For information technology investments only: 16. What is the level of the IT Project? (per CIO Council PM Level 1 Guidance) 17. What project management qualifications does the (1) Project manager has been validated as qualified for this Project Manager have? (per CIO Council PM Guidance) investment 18. Is this investment or any project(s) within this No investment identified as "high risk" on the Q4 - FY 2007 agency high risk report (per OMB Memorandum M-05-23) 19. Is this a financial management system? No a. If "yes," does this investment address a FFMIA compliance area? 1. If "yes," which compliance area: 2. If "no," what does it address? b. If "yes," please identify the system name(s) and system acronym(s) as reported in the most recent financial systems inventory update required by Circular A-11 section 52

20. What is the percentage breakout for the total FY2009 funding request for the following? (This should total 100%)

 Hardware
 5.000000

 Software
 3.000000

 Services
 87.000000

 Other
 5.000000

21. If this project produces information dissemination products for the public, are these products published to the

Yes

Internet in conformance with OMB Memorandum 05-04 and included in your agency inventory, schedules and priorities?

22. Contact information of individual responsible for privacy related questions:

Name Wissman, David

Phone Number Redacted

Title FRA Privacy Officer
E-mail david.wissman@dot.gov

23. Are the records produced by this investment appropriately scheduled with the National Archives and Records Administration's approval?

Yes

Question 24 must be answered by all Investments:

24. Does this investment directly support one of the GAO No High Risk Areas?

# Section B: Summary of Spending (All Capital Assets)

1. Provide the total estimated life-cycle cost for this investment by completing the following table. All amounts represent budget authority in millions, and are rounded to three decimal places. Federal personnel costs should be included only in the row designated "Government FTE Cost," and should be excluded from the amounts shown for "Planning," "Full Acquisition," and "Operation/Maintenance." The "TOTAL" estimated annual cost of the investment is the sum of costs for "Planning," "Full Acquisition," and "Operation/Maintenance." For Federal buildings and facilities, life-cycle costs should include long term energy, environmental, decommissioning, and/or restoration costs. The costs associated with the entire life-cycle of the investment should be included in this report.

Table 1: SUMMARY OF SPENDING FOR PROJECT PHASES (REPORTED IN MILLIONS) (Estimates for BY+1 and beyond are for planning purposes only and do not represent budget decisions)										
	PY-1 and earlier	PY 2007	CY 2008	BY 2009	BY+1 2010	BY+2 2011	BY+3 2012	BY+4 and beyond	Total	
Planning:	0.3	0.09	0.09	0.1	Redacted	Redacted	Redacted	Redacted	Redacted	
Acquisition:	1.24	0.239	0.241	0.556	Redacted	Redacted	Redacted	Redacted	Redacted	
Subtotal Planning & Acquisition:	1.54	0.329	0.331	0.656	Redacted	Redacted	Redacted	Redacted	Redacted	
Operations & Maintenance:	5.521	1.577	1.665	1.736	Redacted	Redacted	Redacted	Redacted	Redacted	
TOTAL:	7.061	1.906	1.996	2.392	Redacted	Redacted	Redacted	Redacted	Redacted	
	Government FTE Costs should not be included in the amounts provided above.									
Government FTE Costs	0.32	0.106	0.106	0.113	Redacted	Redacted	Redacted	Redacted	Redacted	
Number of FTE represented by Costs:	3	9	9	9	Redacted	Redacted	Redacted	Redacted	Redacted	

Note: For the multi-agency investments, this table should include all funding (both managing partner and partner agencies). Government FTE Costs should not be included as part of the TOTAL represented.

- 2. Will this project require the agency to hire additional No FTF's?
  - a. If "yes," How many and in what year?
- 3. If the summary of spending has changed from the FY2008 President's budget request, briefly explain those changes: Redacted

# Section C: Acquisition/Contract Strategy (All Capital Assets)

1. Complete the table for all (including all non-Federal) contracts and/or task orders currently in place or planned for this investment. Total Value should include all option years for each contract. Contracts and/or task orders completed do not need to be included.

Contracts/1	Contracts/Task Orders Table: * Costs in million										sts in millions				
Contract or Task Order Number			If so what is the date of the award? If not, what is the planned award date?	Start date of Contract/	End date of Contract/	Total Value of Contract/ Task Order (\$M)	Interagenc y	Is it performanc e based? (Y/N)	awarded? (Y/N)	What, if any, alternative financing option is being used? (ESPC, UESC, EUL, N/A)	Is EVM in the contract? (Y/N)	Does the contract include the required security & privacy clauses? (Y/N)	CO Contact	Contracting Officer Certificatio n Level (Level	If N/A, has the agency determined the CO assigned has the competenci es and skills necessary to support this acquisition ? (Y/N)
Redacted															

2. If earned value is not required or will not be a contract requirement for any of the contracts or task orders above, explain why:

3. Do the contracts ensure Section 508 compliance?

Yes

a. Explain why:

The RSIS contract has the standard provisions that software and web development are Section 508 compliant. Software designed to ensure 508 compatibility has also been used. All software development and upgrades include a section requiring the vendor to develop and test software to meet the current 508 standards. Software designed to review compliance with 508 will scan the web site. The scan will be performed by the FRA (government employee) web master/integrator.

4. Is there an acquisition plan which has been approved in accordance with agency requirements?

Yes

a. If "yes," what is the date?

8/30/2006

b. If "no," will an acquisition plan be developed?

1. If "no," briefly explain why:

## Section D: Performance Information (All Capital Assets)

In order to successfully address this area of the exhibit 300, performance goals must be provided for the agency and be linked to the annual performance plan. The investment must discuss the agency's mission and strategic goals, and performance measures (indicators) must be provided. These goals need to map to the gap in the agency's strategic goals and objectives this investment is designed to fill. They are the internal and external performance benefits this investment is expected to deliver to the agency (e.g., improve efficiency by 60 percent, increase citizen participation by 300 percent a year to achieve an overall citizen participation rate of 75 percent by FY 2xxx, etc.). The goals must be clearly measurable investment outcomes, and if applicable, investment outputs. They do not include the completion date of the module, milestones, or investment, or general goals, such as, significant, better, improved that do not have a quantitative or qualitative measure.

Agencies must use the following table to report performance goals and measures for the major investment and use the Federal Enterprise Architecture (FEA) Performance Reference Model (PRM). Map all Measurement Indicators to the corresponding "Measurement Area" and "Measurement Grouping" identified in the PRM. There should be at least one Measurement Indicator for each of the four different Measurement Areas (for each fiscal year). The PRM is available at www.egov.gov. The table can be extended to include performance measures for years beyond FY 2009.

Performance I	Performance Information Table											
Fiscal Year	Strategic Goal(s) Supported	Measurement Area	Measurement Category	Measurement Grouping	Measurement Indicator	Baseline	Target	Actual Results				
2006	Safety	Customer Results	Customer Benefit	Customer Impact or Burden	Increase number of rail defects found	292,653 rail defects found	298,500 rail defects found	313,589 rail defects found				
2006	Safety	Mission and Business Results	Transportation	Ground Transportation	Increase percent remediation actions taken	86% remediation actions taken	88% remediation actions taken	88.7% remediation actions taken				
2006	Organizational Excellence	Processes and Activities	Quality	Errors	Decrease number of errors found in data repository	120 errors found	108 error found	106 errors found

# Section E: Security and Privacy (IT Capital Assets only)

In order to successfully address this area of the business case, each question below must be answered at the system/application level, not at a program or agency level. Systems supporting this investment on the planning and operational systems security tables should match the systems on the privacy table below. Systems on the Operational Security Table must be included on your agency FISMA system inventory and should be easily referenced in the inventory (i.e., should use the same name or identifier).

For existing Mixed-Life Cycle investments where enhancement, development, and/or modernization is planned, include the investment in both the "Systems in Planning" table (Table 3) and the "Operational Systems" table (Table 4). Systems which are already operational, but have enhancement, development, and/or modernization activity, should be included in both Table 3 and Table 4. Table 3 should reflect the planned date for the system changes to be complete and operational, and the planned date for the associated C&A update. Table 4 should reflect the current status of the requirements listed. In this context, information contained within Table 3 should characterize what updates to testing and documentation will occur before implementing the enhancements; and Table 4 should characterize the current state of the materials associated with the existing system.

All systems listed in the two security tables should be identified in the privacy table. The list of systems in the "Name of System" column of the privacy table (Table 8) should match the systems listed in columns titled "Name of System" in the security tables (Tables 3 and 4). For the Privacy table, it is possible that there may not be a one-to-one ratio between the list of systems and the related privacy documents. For example, one PIA could cover multiple systems. If this is the case, a working link to the PIA may be listed in column (d) of the privacy table more than once (for each system covered by the PIA).

The questions asking whether there is a PIA which covers the system and whether a SORN is required for the system are discrete from the narrative fields. The narrative column provides an opportunity for free text explanation why a working link is not provided. For example, a SORN may be required for the system, but the system is not yet operational. In this circumstance, answer "yes" for column (e) and in the narrative in column (f), explain that because the system is not operational the SORN is not yet required to be published.

Please respond to the questions below and verify the system owner took the following actions:

- 1. Have the IT security costs for the system(s) been identified Yes and integrated into the overall costs of the investment:
- a. If "yes," provide the "Percentage IT Security" for the 5.000000 budget year:
- 2. Is identifying and assessing security and privacy risks a part Yes of the overall risk management effort for each system supporting or part of this investment.

3. Systems in Planning and Undergoing Enhancement(s), Development, and/or Modernization - Security Table(s):									
Name of System	Name of System  Agency/ or Contractor Operated System?  Planned Operational Date Planned Operational Date of Planned C&A update (for existing mixed life cycle systems) or Planned Completion Date (for new systems)								
Redacted									

4. Operational Systems - Security Table:										
Name of System	Agency/ or Contractor Operated System?	NIST FIPS 199 Risk Impact level (High, Moderate, Low)	Has C&A been Completed, using NIST 800-37? (Y/N)	Date Completed: C&A	What standards were used for the Security Controls tests? (FIPS 200/NIST 800-53, NIST 800-26, Other, N/A)	Date Complete(d): Security Control Testing	Date the contingency plan tested			
Redacted										

5. Have any weaknesses, not yet remediated, related to any of Yes the systems part of or supporting this investment been identified by the agency or IG?

a. If "yes," have those weaknesses been incorporated into Yes the agency's plan of action and milestone process?

6. Indicate whether an increase in IT security funding is requested to remediate IT security weaknesses?

Redacted

a. If "yes," specify the amount, provide a general description of the weakness, and explain how the funding request will remediate the weakness.

#### Redacted

7. How are contractor security procedures monitored, verified, and validated by the agency for the contractor systems above? Redacted

8. Planning & Operational Systems - Privacy Table:									
(a) Name of System (b) Is this a new system? (Y/N) (c) Is there at least one Privacy Impact Assessment (PIA) which covers this system? (Y/N) (d) Internet Link or Explanation (e) Is a System of Records Notice (SORN) required for this system? (Y/N)									
Railroad Safety Information System (RSIS) - Operational	No	No		No					
Railroad Safety Information System (RSIS) - Planning	No	No		No					

### Details for Text Options:

Column (d): If yes to (c), provide the link(s) to the publicly posted PIA(s) with which this system is associated. If no to (c), provide an explanation why the PIA has not been publicly posted or why the PIA has not been conducted.

Column (f): If yes to (e), provide the link(s) to where the current and up to date SORN(s) is published in the federal register. If no to (e), provide an explanation why the SORN has not been published or why there isn't a current and up to date SORN.

Note: Working links must be provided to specific documents not general privacy websites. Non-working links will be considered as a blank field.

# Section F: Enterprise Architecture (EA) (IT Capital Assets only)

In order to successfully address this area of the capital asset plan and business case, the investment must be included in the agency's EA and Capital Planning and Investment Control (CPIC) process and mapped to and supporting the FEA. The business case must demonstrate the relationship between the investment and the business, performance, data, services, application, and technology layers of the agency's EA.

1. Is this investment included in your agency's target Yes enterprise architecture?

a. If "no," please explain why?

2. Is this investment included in the agency's EA Transition Strategy?

Yes

a. If "yes," provide the investment name as identified in the Transition Strategy provided in the agency's most recent annual EA Assessment.

FRA Railroad Safety Information System (RSIS)

b. If "no," please explain why?

3. Is this investment identified in a completed (contains a target architecture) and approved segment architecture?

No

a. If "yes," provide the name of the segment architecture as provided in the agency's most recent annual EA Assessment.

1. Service Component Reference Model (SRM) Table: Identify the service components funded by this major IT investment (e.g., knowledge management, content management, customer relationship management tc.). Provide this information in the format of the following table. For detailed guidance regarding components, please refer to http://www.e Service Service Agency Agency FFA SRM Internal or BY Funding **FEA SRM FEA SRM** Component Component Component Component Service External Reused Name Reused UPI Percentage (d) Service Type Component (a) Description Name **Domain** Reuse? (c) (b) (b) Data Warehouse Defines the set Back Office Data Data Warehouse No Reuse of capabilities Services Management that support the archiving and storage of large olumes of data Software Support the Back Office Development Software No Reuse creation of both Development Services and Integration Development graphical and process . application or system software Data Mining Provide for the Rusiness Knowledge Data Mining No Reuse Discovery efficient Analytical discovery of Services non-obvious, valuable patterns and relationships within a large collection of data Ad Hoc Defines the set Business Reporting Ad Hoc No Reuse of capabilities Analytical that support the Services use of dynamic reports on an as needed basis Standardized / Defines the set Business Reporting Standardized / No Reuse Canned of capabilities Analytical Canned that support the Services use of preconceived or pre-written eports Program / Defines the set Business Management of Program / No Reuse 10 Project Management Project of capabilities for Management Processes Management Services the management and control of a particular effort . of an organization Defines the set Quality Ouality Business Management of No Reuse 20 of capabilities Management Management Processes Management intended to help Services determine the level that a product or service satisfies certain equirements Network Monitor and Business Organizational Network No Reuse Management maintain a Management Management Management communications Services network in order to diagnose problems, gather statistics, and provide general sage On Line Help Defines the set Customer Customer Online Help No Reuse of capabilities Services Initiated that provide an Assistance electronic interface to customer assistance No Reuse Information Defines the set Digital Asset Knowledge Information Retrieval of capabilities Services Management Retrieval that allow acces to data and information for use by an organization and its stakeholders Defines the set Digital Asset Information 25 Knowledge Information No Reuse of capabilities Management Sharing Services Sharing that support the

use of documents and

### 4. Service Component Reference Model (SRM) Table:

Identify the service components funded by this major IT investment (e.g., knowledge management, content management, customer relationship management

etc.). Provide this information in the format of the following table. For detailed guidance regarding components, please refer to http://www.egov.gov.								
Agency Component Name	Agency Component Description	FEA SRM Service Domain	FEA SRM Service Type	FEA SRM Component (a)	Service Component Reused Name (b)	Service Component Reused UPI (b)	Internal or External Reuse? (c)	BY Funding Percentage (d)
	data in a multi- user environment for use by an organization and its stakeholders							
Email	Support the transmission of memos and messages over a network.	Support Services	Collaboration	Email			No Reuse	2
Intrusion Prevention	Perform penetration testing and other measures to prevent unauthrized access to a government information system.	Support Services	Security Management	Intrusion Prevention			No Reuse	2
Virus Protection	Provide anti- virus service to prevent, detect, and remediate infection of government computing assets.	Support Services	Security Management	Virus Protection			No Reuse	2

- a. Use existing SRM Components or identify as "NEW". A "NEW" component is one not already identified as a service component in the FEA SRM.
- b. A reused component is one being funded by another investment, but being used by this investment. Rather than answer yes or no, identify the reused service component funded by the other investment and identify the other investment using the Unique Project Identifier (UPI) code from the OMB Ex 300 or Ex 53 submission.
- c. 'Internal' reuse is within an agency. For example, one agency within a department is reusing a service component provided by another agency within the same department. 'External' reuse is one agency within a department reusing a service component provided by another agency in another department. A good example of this is an E-Gov initiative service being reused by multiple organizations across the federal government.
- d. Please provide the percentage of the BY requested funding amount used for each service component listed in the table. If external, provide the percentage of the BY requested funding amount transferred to another agency to pay for the service. The percentages in the column can, but are not required to, add up to 100%.

# 5. Technical Reference Model (TRM) Table:

To demonstrate how this major IT investment aligns with the FEA Technical Reference Model (TRM), please list the Service Areas, Categories, Standards, and

Service Specifications supporting this IT investment.										
FEA SRM Component (a)	FEA TRM Service Area	FEA TRM Service Category	FEA TRM Service Standard	Service Specification (b) (i.e., vendor and product name)						
Ad Hoc	Component Framework	Data Management	Database Connectivity	Redacted						
Standardized / Canned	Component Framework	Data Management	Reporting and Analysis	Redacted						
Data Mining	Component Framework	Data Management	Reporting and Analysis	Redacted						
Intrusion Prevention	Component Framework	Security	Supporting Security Services	Redacted						
Virus Protection	Component Framework	Security	Supporting Security Services	Redacted						
Virus Protection	Component Framework	Security	Supporting Security Services	Redacted						
Email	Service Access and Delivery	Access Channels	Collaboration / Communications	Redacted						
Information Sharing	Service Access and Delivery	Access Channels	Other Electronic Channels	Redacted						
Online Help	Service Access and Delivery	Access Channels	Other Electronic Channels	Redacted						
Information Retrieval	Service Interface and Integration	Integration	Enterprise Application Integration	Redacted						
Information Sharing	Service Interface and Integration	Interoperability	Data Format / Classification	Redacted						
Standardized / Canned	Service Platform and Infrastructure	Database / Storage	Database	Redacted						
Data Recovery	Service Platform and Infrastructure	Database / Storage	Storage	Redacted						
Quality Management	Service Platform and Infrastructure	Delivery Servers	Web Servers	Redacted						
Program / Project Management	Service Platform and Infrastructure	Hardware / Infrastructure	Local Area Network (LAN)	Redacted						

## 5. Technical Reference Model (TRM) Table:

To demonstrate how this major IT investment aligns with the FEA Technical Reference Model (TRM), please list the Service Areas, Categories, Standards, and

Service	Specifications	supporting	this	ΙT	investment.

FEA SRM Component (a)	FEA TRM Service Area	FEA TRM Service Category	FEA TRM Service Standard	Service Specification (b) (i.e., vendor and product name)	
Intrusion Prevention	Service Platform and Infrastructure	Hardware / Infrastructure	Network Devices / Standards	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Network Devices / Standards	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Network Devices / Standards	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Peripherals	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Peripherals	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Servers / Computers	Redacted	
Email	Service Platform and Infrastructure	Hardware / Infrastructure	Servers / Computers	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Servers / Computers	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Servers / Computers	Redacted	
Network Management	Service Platform and Infrastructure	Hardware / Infrastructure	Servers / Computers	Redacted	
Software Development	Service Platform and Infrastructure	Software Engineering	Integrated Development Environment	Redacted	
Software Development	Service Platform and Infrastructure	Software Engineering	Integrated Development Environment	Redacted	
Data Warehouse	Service Platform and Infrastructure	Support Platforms	Platform Independent	Redacted	

- a. Service Components identified in the previous question should be entered in this column. Please enter multiple rows for FEA SRM Components supported by multiple TRM Service Specifications
- b. In the Service Specification field, agencies should provide information on the specified technical standard or vendor product mapped to the FEA TRM Service Standard, including model or version numbers, as appropriate.
- 6. Will the application leverage existing components and/or applications across the Government (i.e., FirstGov, Pay.Gov, etc)?
  - a. If "yes," please describe.

## Exhibit 300: Part II: Planning, Acquisition and Performance Information

# Section A: Alternatives Analysis (All Capital Assets)

Part II should be completed only for investments identified as "Planning" or "Full Acquisition," or "Mixed Life-Cycle" investments in response to Question 6 in Part I, Section A above.

In selecting the best capital asset, you should identify and consider at least three viable alternatives, in addition to the current baseline, i.e., the status quo. Use OMB Circular A-94 for all investments and the Clinger Cohen Act of 1996 for IT investments to determine the criteria you should use in your Benefit/Cost Analysis.

- 1. Did you conduct an alternatives analysis for this project? Yes
  - a. If "yes," provide the date the analysis was completed? 8/1/2003
- b. If "no," what is the anticipated date this analysis will be completed?
  - c. If no analysis is planned, please briefly explain why:

2. Alternative Analysis Results:								
	Use the results of your alternatives analysis to complete the following table:							
	Alternative Analyzed	Description of Alternative	Risk Adjusted Lifecycle Costs estimate	Risk Adjusted Lifecycle Benefits estimate				
	Redacted							

3. Which alternative was selected by the Agency's Executive/Investment Committee and why was it chosen?

#### Redacted

4. What specific qualitative benefits will be realized?

#### Redacted

- 5. Will the selected alternative replace a legacy system in-part No or in-whole?
- a. If "yes," are the migration costs associated with the migration to the selected alternative included in this investment, the legacy investment, or in a separate migration investment.
  - b. If "yes," please provide the following information:

List of Legacy Investment or Systems						
Name of the Legacy Investment of Systems	UPI if available	Date of the System Retirement				

## Section B: Risk Management (All Capital Assets)

You should have performed a risk assessment during the early planning and initial concept phase of this investment's life-cycle, developed a risk-adjusted life-cycle cost estimate and a plan to eliminate, mitigate or manage risk, and be actively managing risk throughout the investment's life-cycle.

1. Does the investment have a Risk Management Plan? Yes

a. If "yes," what is the date of the plan? 7/16/2007

b. Has the Risk Management Plan been significantly changed since last year's submission to OMB?

No

c. If "yes," describe any significant changes:

- 2. If there currently is no plan, will a plan be developed?
  - a. If "yes," what is the planned completion date?
  - b. If "no," what is the strategy for managing the risks?
- 3. Briefly describe how investment risks are reflected in the life cycle cost estimate and investment schedule:

The RSIS program management performed a comprehensive risk assessment of the program in May 2006 as part of the yearly planning and assessment of the investment life-cycle cost and schedule. The RSIS program management, in conjunction with the project manager, have determined that the overall risk rating of this investment is low and have developed a risk-adjusted life-cycle cost estimate of approximately 5% of the yearly budget. The risk management plan is updated periodically and all identified risks are quantified and ranked. Based on the probability of the risk occurring, the project cost is adjusted and

submitted for management approval. The risks are monitored throughout the investment lifecycle with a comprehensive yearly review and periodic updates are reflected in the risk management plan.

# Section C: Cost and Schedule Performance (All Capital Assets)

EVM is required only on DME portions of investments. For mixed lifecycle investments, O&M milestones should still be included in the table (Comparison of Initial Baseline and Current Approved Baseline). This table should accurately reflect the milestones in the initial baseline, as well as milestones in the current baseline.

- 1. Does the earned value management system meet the criteria in ANSI/EIA Standard-748?
- 2. Is the CV% or SV% greater than +/- 10%? (CV%= CV/EV x No 100; SV%= SV/PV x 100)
  - a. If "yes," was it the CV or SV or both?
  - b. If "yes," explain the causes of the variance:
  - c. If "yes," describe the corrective actions:
- 3. Has the investment re-baselined during the past fiscal year? No
- a. If "yes," when was it approved by the agency head?

## 4. Comparison of Initial Baseline and Current Approved Baseline

Complete the following table to compare actual performance against the current performance baseline and to the initial performance baseline. In the Current Baseline section, for all milestones listed, you should provide both the baseline and actual completion dates (e.g., "03/23/2003"/ "04/28/2004") and the baseline and actual total costs (in \$ Millions). In the event that a milestone is not found in both the initial and current baseline, leave the associated cells blank. Note that the 'Description of Milestone' and 'Percent Complete' fields are required. Indicate '0' for any milestone no longer active.

Milestone Number	Description of Milestone	Initial Ba	Initial Baseline		Current	urrent Baseline		Current Baseline Variance		
		Planned Total Cost Completion Date (\$M)		Completion Date (mm/dd/yyyy)		Total Cost (\$M)		Schedule (# days)	Cost (\$M)	Percent Complete
		(mm/dd/yyy	(mm/dd/yyyy)	Estimated	Planned	Actual	Planned	Actual	(# days)	
Redacted
