**(2) Datum** Please identify the method and datum that was used in determining the latitude and longitude locations. *(Please check the boxes that apply.)*

(a). Method used to determine latitude and longitude

- (i) Maps on Us (Website: [www.mapsonus.com](http://www.mapsonus.com))  (vi) Unknown  
 (ii) U.S. Census Bureau TIGER Map Service (Website: [www.census.gov](http://www.census.gov))  
 (iii) Global Positioning System (GPS)  
 (iv) U.S. Geological Survey MapFinder (Website: [www.usgs.gov](http://www.usgs.gov))  
 (v) Other \_\_\_\_\_

(b). If method is (iii), (iv), or (v) then indicate datum:

- Datum:  (i) NAD27 (North American Datum 1927)  (ii) NAD83 (North American Datum 1983)  (v) Unknown  
 (iii) WGS84 (World Geodetic Survey 1984)  (iv) Other \_\_\_\_\_

### II. Productive Capacity

**Annual Productive Capacity** Report the maximum amount of coal that your mining operation could have produced during the year with the existing mining equipment in place, assuming that the labor and materials sufficient to utilize the equipment were available, and that the market existed for the maximum coal production.

### III. Coal Beds Mined

**A. Coal Bed(s) Mined** Report the coal bed name, average thickness, percentage of mined coal, and coal rank for each bed mined in the reporting year. Please exclude partings of 1 inch or thicker from reported average coal bed thicknesses.

Note: Coal mined from the same bed should usually be reported on one line. An exception is made if the same bed was mined in different pits or sections and if average thicknesses in those locations differ by 20% or more. If so, please report separately the average thickness, percentage, and rank of the coal bed in the different mining locations. See instructions section G. for Classification Codes. If more space is needed, please use page 4.

**Note: Coal production percentage by coal bed (Column 3) should add up to 100.**

For EIA Use Only	(1) Name of Coal Bed	(2) Average Thickness (inches)	(3) Percentage of Production (%)	(4) Coal Classification Code

### IV. Recoverable Reserves

**A. Recoverable Reserves** - Enter the tonnage representing remaining coal reserves at this mine at the end of the reporting year that you estimate can be recovered (mined) in the future. Exclude coal left in place after mining. Report to the level of accuracy known, assuming today's prices and equipment currently owned and operable.

**Note: If your recoverable reserves quantity increased or decreased more than 40% from last year's response, please explain in the remarks section.**

**B. Recovery Percentage** - Enter the recovery rate used to estimate reserves at this mine. Report mining recovery rate to the nearest whole percent. Note: Movable coal tonnage times mining recovery rate should equal recoverable coal reserves.

### V. Dispositions of Coal During the Reporting Calendar Year

This section requests information on sales and transfers of the coal produced at this mine, and on the amount of coal consumed to operate this mine or preparation plant. For purposes of this section, a sale of coal to a party unrelated to the seller in an arm's-length transaction is considered **Open Market**. All other sales or transfers of coal are considered **Captive Market**. The information reported in this section should reflect the condition of the coal as of its disposition. For **Open Market** sales, please calculate Total Revenue using the actual **FOB Rail/Barge** sales prices on a first-sale basis. For **Captive Market** sales or transfers, please calculate Total Value using the actual accounting values recorded by your company for this coal.

	Quantity	Total Revenue/Value
<b>A. 1. Open Market</b> sales of coal to all buyers (e.g., other coal mining companies, wholesale or retail coal dealers or brokers, employees, and all consumers).		
<b>B. Captive Market</b> sales of coal to, or transfers of coal for the use of, the parent company or another subsidiary of the parent company.		
<b>C. Coal Consumed To Operate This Mine and Preparation/Tipple Plant.</b> (Please exclude coal consumed to generate electricity that is sold to the grid.)		
<b>D. Beginning Coal Stocks.</b> Please report the amount of coal stocks held at this mine at the beginning of the reporting year. Include adjustments. <b>Do not include pit inventory in coal stocks.</b> Coal stocks are defined to be coal that has been mined and stored awaiting shipment or transfer to a user. Pit inventory is coal in place which has been surveyed or prepared for mining.		
<b>E. Ending Coal Stocks.</b> Please report the amount of coal stocks held at this mine at the end of the reporting year. <b>Do not include pit inventory in coal stocks.</b> Follow definitions in D above.
