Closed committee deliberations: On September 15, 1997, from 10 a.m. to 10:30 a.m., the meeting will be closed to permit discussion and review of trade secret and/or confidential information (5 U.S.C. 552b(c)(4)). FDA regrets that it was unable to publish this notice 15 days prior to the September 15 and 16, 1997, General Hospital and Personal Use Devices Panel of the Medical Devices Advisory Committee meeting. Because the agency believes there is some urgency to bring this issue to public discussion and qualified members of the General Hospital and Personal Use Devices Panel of the Medical Devices Advisory Committee were available at this time, the Commissioner concluded that it was in the public interest to hold this meeting even if there was not sufficient time for the customary 15-day public notice.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: August 19, 1997.

Michael A. Friedman,

Deputy Commissioner for Operations.

Title of Proposal: The 1998 American Housing Survey—Metropolitan Sample.

Description of the need for the information and proposed use: The 1998 American Housing Survey—Metropolitan Sample (AHS-MS) provides a periodic measure of the size and composition of the housing inventory in selected metropolitan areas. Title 12, United States Code, Sections 1701Z-1, 1701Z-2(g), and 1701Z-10a mandates the collection of this information.

The 1998 survey is similar to previous AHS-MS surveys and collects data on subjects such as the amount and types of changes in the inventory, the physical condition of the inventory, the characteristics of the occupants, the persons eligible for and beneficiaries of assisted housing by race and ethnicity, and the number and characteristics of vacancies.

Policy analysts, program managers, budget analysts, and Congressional staff use AHS data to advise executive and legislative branches about housing conditions and the suitability of policy initiatives. Academic researchers and private organizations also use AHS data in efforts of specific interest and concern to their respective communities.

The Department of Housing and Urban Development (HUD) needs the AHS data for two important uses.

1. With these data, policy analysts can monitor the interaction among housing needs, demand and supply, as well as changes in housing conditions and costs, to aid in the development of housing policies and the design of housing programs appropriate for
