### Preface

The *Supplement* is a major data resource on our nation's social insurance and welfare programs. The majority of the data concern the Old-Age, Survivors, and Disability Insurance programs, known collectively as Social Security, and the Supplemental Security Income program. The *Supplement* has been published annually since 1940. Decisions affecting the future of Social Security are facilitated by the availability of relevant data over a long period. The data provide a base for research, policy analysis, and proposals for changing the programs.

In addition to meeting the Social Security Administration's (SSA's) information needs, the *Supplement* strengthens the agency's ability to respond to requests for program data from congressional committees, government agencies at all levels, and the research community. One of our most important goals is to provide clear and meaningful program data. For this reason, we have repackaged the all-in-one Table 5.A1 into smaller, more manageable statistical tables so that it is easier to locate data on specific beneficiary populations.

The *Supplement* is prepared by SSA staff from various components throughout the agency. I would also like to express my thanks to the many people in other federal agencies for their contributions. The inside cover includes a list of the agencies and persons contributing to this edition.

General questions or comments about this report are welcome and should be directed to Rona M. Blumenthal at 410-965-0163 or rona.m.blumenthal@ssa.gov. For specific questions about the data, please call the contact listed on each table.

This report is available on our Web site at www.ssa.gov/policy. For additional copies of the report, please telephone 202-358-6274 or e-mail ores.publications@ssa.gov.

Susan Grad Acting Associate Commissioner for Research, Evaluation, and Statistics

December 2002

# **Contents**

- vi **Abbreviations**
- ix List of Tables
- 1 Highlights and Trends
- 9 Social Security
- 18 Supplemental Security Income

### **Health Care**

- 38 Medicare
- 52 Medicaid

## Other Social Insurance and Veterans 'Benefits

- 58 Unemployment Insurance
- 61 Workers' Compensation
- 63 Temporary Disability Insurance

# Social Security (OASDI)

### **Program Trends**

- In December 2001, 45.9 million persons were receiving Social Security benefits, an increase of 463,000 (1.0 percent) since December 2000. Seventy percent were retired workers and their spouses and children, and 15 percent were survivors of deceased workers. Fifteen percent were disabled workers and their spouses and children.
- Seventy-one percent of the 28.8 million retired workers received reduced benefits because of entitlement prior to full retirement age. Relatively more women (75 percent) than men (68 percent) received reduced benefits.
- The number of persons aged 65 or older receiving Social Security benefits rose from 31.7 million in 1996 to 32.9 million in 2001 (4.0 percent). Beneficiaries aged 85 or older increased at a greater rate during the 5-year period (11.5 percent) from 3,672,000 in 1996 to 4,095,000 in 2001. In 2001, 39,100 centenarians were receiving Social Security.
- More than 19 million women aged 65 or older were receiving benefits in December 2001. Seven million (36.8 percent) were entitled solely to a retired-worker benefit, and 5.6 million (29.2 percent) were dually entitled to a retired-worker benefit and a wife's or widow's benefit. About 6.5 million (34.0 percent) were receiving wife's or widow's benefits only.
- Almost 3 million children under age 18 were receiving benefits, including 1,346,000 children of deceased workers, 1,385,400 children of disabled workers, and 262,500 children of retired workers.
- In December 2001, 6,215,000 beneficiaries were receiving payments on the basis of disability—
   5,274,200 disabled workers, 736,500 disabled adult children, and 204,200 disabled widows and widowers. In addition, 156,900 spouses and 1,424,200 minor and student children of disabled workers were receiving benefits.

- The leading causes of disability for disabled workers were mental disorders other than mental retardation (28 percent), and musculoskeletal conditions (24 percent). About 10 percent had circulatory conditions and an additional 10 percent had diseases of the nervous system and sense organs.
- Average monthly benefits for December 2001, including the 2.6 percent COLA increase, were \$874 for retired workers, \$814 for disabled workers, and \$841 for nondisabled widows and widowers. Among retired workers, benefits averaged \$985 for men and \$756 for women. For disabled workers, average benefits were \$914 for men and \$688 for women.
- Average monthly family benefits for December 2001 were \$1,569 for a widowed mother or father and children; \$1,369 for a disabled worker, wife, and children; and \$1,712 for a retired worker, wife, and children.
- Total OASDI benefit payments for calendar year 2001 were \$431.9 billion. Payments from the OASI trust fund were \$372.3 billion—an increase of 5.6 percent from the \$352.7 billion paid in 2000.
- Benefit payments from the DI trust fund, from which benefits are paid to disabled workers, their spouses, and children, increased by 8.4 percent from \$55.0 billion in 2000 to \$59.6 billion in 2001.
- OASDI benefit awards in calendar year 2001 totaled 4,162,000, including 1,779,200 to retired workers, 425,200 to their spouses and children and 839,700 to survivors of insured workers. Benefits were awarded to 691,300 disabled workers and 426,500 of their spouses and children.

# **Supplemental Security Income**

### **Program Trends**

- In December 2001, 6,688,500 persons received federally administered SSI payments—86,800 more than the previous year. Of the total, 1,995,200 (30 percent) were aged 65 or older; 3,811,500 (57 percent) were blind or disabled aged 18-64; and 881,800 (13 percent) were blind or disabled under age 18.
- The number of blind or disabled aged 18-64 rose by 67,500 (1.8 percent) between December 2000 and December 2001, while the number under age 18 increased by 35,100 (4.1 percent).
- During 2001, 770,500 persons were awarded federally administered payments, a increase of 3.1 percent from the previous year. Of the 2001 awards, 502,800 went to blind or disabled recipients aged 18-64, 157,000 to those blind or disabled under age 18, and 110,800 to recipients aged 65 or older.
- Total SSI payments were \$33.1 billion in 2001, up 4.7 percent from 2000. Federal SSI payments in 2001 were \$28.7 billion (an increase of 5.2 percent over the previous year). Federally administered state supplementation totaled \$3.5 billion and state-administered supplementation \$895.0 million, increasing by 2.3 percent and 0.2 percent, respectively from the previous year's totals.
- In 2001, the leading causes of disability among the blind or disabled between the ages of 18 and 64, and those under age 18 were mental disorders and mental retardation. Among disabled recipients between the ages of 18 and 64, 25 percent had mental retardation as the primary diagnosis, and 35 percent were diagnosed with another mental disorder. These conditions were also the most frequent diagnoses for blind or disabled under age 18.

# Social Security (Old-Age, Survivors, and Disability Insurance)

The Old-Age, Survivors, and Disability Insurance (OASDI) program provides monthly benefits to qualified retired and disabled workers and their dependents, and to survivors of insured workers. Eligibility and benefit amounts are determined by the worker's contributions to Social Security. Benefits are paid as an earned right to workers, their families and their survivors. There is no means test to qualify for benefits.

At the end of December 2001, 45.9 million people were receiving benefits at a rate exceeding \$36 billion each month (\$432 billion annually). According to the latest Social Security Trustees Report, these cash benefits comprised 4½ percent of the nation's gross domestic product. During the same year, approximately 153 million employees and self-employed workers, along with employers, contributed more than \$516 billion to the OASDI trust funds—through which contributions are credited and benefits are paid.

Social Security benefits are essential to the economic well-being of millions of individuals. Social Security pays benefits to more than 90 percent of those 65 or older. It is the major source of income (providing 50 percent or more of total income) for 64 percent of the beneficiaries. It contributes 90 percent or more of income for almost one-third of the beneficiaries, and is the only source of income for 20 percent of them (see Charts 1–4 at the end of this section).

### **Contributions and Trust Funds**

A person contributes to Social Security either through payroll taxes or self-employment taxes under the Federal Insurance Contributions Act (FICA) or the Self-Employed Contributions Act (SECA). Employers match the employee contribution, while self-employed workers pay an amount equal to the combined employer-employee contributions. (Self-employed workers receive a special tax deduction to ease the impact of paying the higher rate.) There is a maximum yearly amount of earnings subject to OASDI taxes, \$84,900 in 2002. There is no upper limit on taxable earnings for Medicare Hospital Insurance. Employees whose contributions exceed the maximum taxable amount because they worked for more than one employer can receive refunds of excess FICA payments when they file their tax returns.

Taxes are allocated to the Old-Age (Retirement) and Survivors Insurance (OASI), the Disability Insurance (DI), and the Hospital Insurance (HI) Trust Funds. In addition to the taxes on covered earnings, OASI and DI trust fund revenues include interest on trust fund securities, income from taxation of OASI and DI benefits, certain technical transfers, and gifts or bequests. By law, the OASI and DI trust funds may only be disbursed for:

- 1. Monthly benefits for workers and their families.
- Vocational rehabilitation services for disabled beneficiaries.
- 3. Administrative costs (currently less than 1 percent of expenditures).
- 4. The lump-sum death payment to eligible survivors.

Revenue received from FICA payments is transferred to the U.S. Treasury. FICA revenue in excess of outlays is used to purchase special interest-bearing Treasury bonds. These securities remain assets of the trust funds until needed to cover Social Security costs.

# **Structure and Organization**

The OASDI program is administered by the Social Security Administration (SSA), which became an independent agency in 1995. The Commissioner of Social Security serves a 6-year term following appointment by the President and confirmation by the Senate. A bipartisan Social Security Advisory Board serves to review existing laws and policies and commissions studies and issues recommendations intended to anticipate changing circumstances. The President appoints three of the seven board members and Congress appoints the other four members.

The Social Security Administration is headquartered in Baltimore, Maryland. Major headquarter components include the National Computer Center that contains SSA's mainframe computers that drive our systems, much of the executive staff for policy, programs and systems as well as field support components. SSA's field structure is divided into 10 geographic regions containing over 1,300 field installations in communities throughout the country. Office sizes range from large urban offices with 50 or more employees to remote resident stations staffed by one or two individuals. Each region is headed by a Regional Commissioner, and staffed with specialists to handle regional administrative tasks and to assist field offices with operational issues. In addition, there are teleservice centers servicing all regions. While physically located within the various regions, each teleservice center manages the public's Social Security business from throughout the nation using state of the art communications systems. Seven program service centers provide service and support for the field offices in some aspects of Social Security's workloads.

**Tables 2.F1–2.F11** provide SSA administrative data on the agency's national workforce (**Tables 2.F1–2.F3**), claims workloads (**Tables 2.F4–2.F6**), delivery of services (**Table 2.F7**), and its hearings and appeals operations (**Tables 2.F8–2.F11**).

# **Significant Program Changes**

Program changes occur through legislation or (in areas where authority is delegated to the Commissioner) through regulation.

# Elimination of Annual Earnings Test for Persons Reaching Full Retirement Age

Public Law 106-182, The Senior Citizen's Freedom to Work Act of 2000, enacted April 7, 2000 eliminated the earnings test beginning with the month a beneficiary attains full retirement age (FRA). Elimination of this earnings test is effective for taxable years ending after December 31, 1999.

The earnings limit that applies in the year of attainment of FRA is based on the limits previously established for persons at FRA through age 69—\$25,000 in 2001, and \$30,000 in 2002. Benefits are withheld at the rate of \$1 for every \$3 of earnings above these exempt amounts. In determining earnings for purposes of the annual earnings test under this legislation, only earnings before the month of attainment of FRA will be considered. The legislation also permits retired workers to earn delayed retirement credits for any months between the attainment of full retirement age and age 70 for which the worker requests that benefits not be paid.

Public Law 106-182 did not change the annual exempt amount for beneficiaries who are under FRA throughout the year, which continued to be pegged to increases in the average wage. This amount increased from \$10,680 in 2001 to \$11,280 in 2002. Withholding for beneficiaries subject to this earnings test is at \$1 for each \$2 of earnings over the exempt amounts.

### **Work Incentives Improvement Act**

The Ticket to Work and Work Incentives Improvement Act, Public Law 106-170, was enacted on December 17, 1999. This legislation provides major enhancements to SSA's programs that assist disabled beneficiaries who attempt to return to work. It provides beneficiaries more choices in vocational rehabilitation services, and offers expanded health care for beneficiaries who are no longer eligible for cash benefits due to work. Effective October 1, 2000, the Act offers extended Medicare coverage to beneficiaries who return to work, and offers buy-in for Medicaid coverage.

The Ticket to Work provisions of this legislation are being phased in over a 3-year period that began January 1, 2001. The Ticket to Work will emphasize and encourage rehabilitation efforts and will reimburse private employment service providers for their services to beneficiaries attempting to return to work. These providers are called Employment Networks. Most disability beneficiaries will receive a Ticket that they may use to obtain vocational rehabilitation, job training, or other support services.

Individuals may take their ticket to any of the Employment Networks that offer services in their communities. By the end of 2002, SSA expects to have distributed tickets to beneficiaries in 33 states and the District of Columbia. In 2003, tickets will be distributed in the remaining 17 states, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands. Also beginning January 1, 2001, former beneficiaries may have their benefits resumed if their work activity ends within 5 years of the month their benefits stopped and they are still disabled

# Regulatory Increases in Substantial Gainful Activity and in Trial Work Period Amounts

Effective July 1, 1999, the Social Security Administration raised from \$500 to \$700 the amount of monthly earnings for a nonblind disabled individual to be considered engaging in substantial gainful activity (SGA). Effective January 1, 2001, the top SGA level was raised to \$740 per month, with the provision that ongoing SGA levels will be automatically adjusted annually based on increases in the national average wage index. Effective January 1, 2002, the level is \$780 per month.

The SGA threshold is part of the definition of disability that requires an individual to be unable to engage in substantial gainful activity to be eligible for benefits. Earnings of more than the top SGA level will ordinarily demonstrate that an individual is engaged in SGA. Earnings of less than \$780 per month will ordinarily demonstrate that an individual is not engaged in SGA.

A different definition of SGA applies to blind persons receiving Social Security disability benefits. Increases in the SGA amount for blind individuals have long been pegged to increases in the national average wage index and thus were not affected by the 1999 or subsequent rule changes. The level for blind individuals increased from \$1,240 in 2001 to \$1,300 in 2002.

New rules also affect the trial work period (TWP). The TWP allows disability beneficiaries to test their ability to work for at least 9 months. During the TWP, beneficiaries may earn any amount and still receive full benefits. The monthly level at which earnings count toward the 9-month TWP was raised from \$200 to \$530 effective January 1, 2001, with future increases pegged to the national average wage index. Effective January 1, 2002, the level is \$560. After completion of 9 trial work months, the SGA level is used to determine whether earnings are substantial or not. If earnings fall below the SGA level, full benefits generally continue. If earnings are higher than the SGA level, cash benefits are usually suspended while medical benefits continue.

**Table 2.A30** provides related historical data on disability program earnings guidelines, including reference to recent changes in thresholds for determining SGA.

# **Coverage and Financing**

In 2001, about 153 million persons worked in employment or self-employment covered under the OASDI program. In recent years, coverage has become nearly universal for work performed in the United States, including American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Approximately 96 percent of the American workforce are covered by OASDI. Workers excluded from coverage fall into five major categories:

- 1. Civilian federal employees hired before January 1, 1984,
- 2. Railroad workers (who are covered under the railroad retirement system, which is coordinated with Social Security),
- 3. Certain employees of state and local governments who are covered under their employers' retirement systems,
- Domestic workers and farm workers whose earnings do not meet certain minimum requirements (workers in industry and commerce are covered regardless of the amount of earnings), and
- 5. Persons with very low net earnings from self-employment, generally under \$400 annually.

**Table 2.A1** outlines the history of coverage provisions and **table 2.A2** provides a history of provisions regarding noncontributory wage credits, mostly for military service.

For most employees, taxes are withheld from wages beginning with the first dollar earned. The exceptions are domestic employees, election workers, and agricultural workers. In 2002, a domestic employee must earn \$1,300 from any single employer in a calendar year before FICA is withheld. Most election workers must earn \$1,200 in 2002 before FICA is withheld. Most agricultural workers wages are covered if the employer pays more than \$2,500 in total wages in a year or if the individual worker earns over \$150 in a year from a single employer.

Employees, their employers, and the self-employed each pay taxes on earnings in covered employment and self-employment up to an annual maximum taxable amount for OASDI. There is no upper limit on taxable earnings for Medicare Hospital Insurance (HI). The OASDI maximum taxable amount—\$84,900 in 2002—is updated automatically each year in relation to increases in the national average annual wage. The current FICA tax rate applicable to both employees and employers is 6.2 percent for OASDI (5.30 percent for OASI and 0.9 percent for DI), and 1.45 percent for HI.

See **Table 2.A3** for annual amounts of maximum taxable earnings and contribution rates. **Table 2.A4** shows historical annual maximum amounts of contributions by employees and self-employed persons.

A self-employed person pays the combined employeeemployer rate of 12.4 percent for OASDI and 2.9 for HI under the Self-Employment Contributions Act (SECA). Two deduction provisions reduce the SECA and income tax liability of self-employed persons. The intent of these provisions is to treat the self-employed in much the same manner as employees and employers are treated for purposes of FICA and income taxes. The first provision allows a deduction from net earnings from self-employment equal to the amount of net earnings before the deduction, times one-half the SECA tax rate. The effect of this deduction is intended to be analogous to the treatment of the FICA tax paid by the employer, which is disregarded as remuneration to the employee for FICA and income tax purposes. The second provision allows an income tax deduction, equal to one-half of the amount of the SECA tax paid. which is designed to reflect the income tax deductibility of the employer's share of the FICA tax.

**Table 2.A5** describes income tax credits for 1984–1989 intended to cushion the impact of increases in FICA and SECA taxes enacted in 1983. The SECA tax credits were replaced, effective 1990, by the deduction provisions described above. **Table 2.A6** outlines the history of provisions regarding appropriations from general revenues and interfund borrowing.

### **Insured Status**

To become eligible for his or her benefit and benefits for family members or survivors, a worker must earn a minimum number of credits based on work in covered employment or self-employment. These credits are described as quarters of coverage. In 2002, a quarter of coverage (QC) is credited for each \$870 in annual covered earnings, up to a maximum of four QCs for the year. Earnings of \$3,480 or more in 2002 will give the worker four QCs regardless of when the money is actually earned or paid during the year. The amount of earnings required for a QC is adjusted automatically each year in proportion to increases in the average wage level.

### **Fully Insured**

Eligibility for most types of benefits requires that the worker be fully insured. To be fully insured a worker must have a number of QCs at least equal to the number of calendar years elapsing between age 21 (or 1950 if later) and the year in which he or she reaches age 62, becomes disabled, or dies—whichever occurs first. Under this requirement, workers who reach age 62 in 1991 or later need the maximum number of 40 QCs to be fully insured. For workers who become disabled or die before age 62, the number of QCs needed for fully insured status depends on their age at the time the worker is disabled or dies. A minimum of 6 QCs is required regardless of age.

### **Currently Insured**

If a worker dies before achieving fully insured status, benefits can still be paid to qualified survivors if the worker was "currently insured" at the time of death. (In the case of a young worker, survivors benefits are potentially payable to a worker's children and to a widow(er) with children in care.) To be currently insured, the worker must have earned 6 QCs in the 12 quarters before death (that is, 6 of the last 13 quarters, including the quarter in which death occurred).

### **Disability Insured**

To qualify for disability benefits, a nonblind worker must have recent work activity as well as being fully insured. Under the test involving recent work experience, a nonblind worker older than age 31 must have earned at least 20 QCs among the 40 calendar quarters ending with the quarter in which the disability began. Workers disabled at ages 24 through 30 must have earned QCs in one-half of the calendar quarters elapsing between age 21 and the calendar quarter in which the disability began. Workers under age 24 need 6 QCs in the 12-quarter period ending with the quarter of disability onset. Workers who qualify for benefits based on blindness need only be fully insured.

**Table 2.A7** summarizes the basic provisions concerning insured status.

# **International Agreements**

The President is authorized to enter into international Social Security agreements (also called "totalization" agreements) to coordinate the U.S. Old-Age, Survivors, and Disability Insurance (OASDI) program with comparable programs of other countries. The United States currently has Social Security agreements in effect with 20 countries.

Social Security Agreements and Effective Dates

| Australia2 | 2002 | Italy          | 1978 |
|------------|------|----------------|------|
| Austria1   | 991  | Korea          | 2001 |
| Belgium1   | 984  | Luxembourg     | 1993 |
| Canada1    | 984  | Netherlands    | 1990 |
| Chile2     | 2001 | Norway         | 1984 |
| Finland1   | 992  | Portugal       | 1989 |
| France1    | 988  | Spain          | 1988 |
| Germany1   | 979  | Sweden         | 1987 |
| Greece1    | 994  | Switzerland    | 1980 |
| Ireland1   | 993  | United Kingdom | 1985 |

International Social Security agreements have two main purposes. First, they eliminate dual Social Security coverage, the situation that occurs when a person from one country works in another country and is required to pay Social Security taxes to both countries on the same earnings. Each agreement includes rules that assign a worker's coverage to only one country.

The second goal of the agreement is to help fill gaps in benefit protection for workers who have divided their careers between the United States and another country. Such workers may fail to qualify for Social Security benefits from one or both countries because they have not worked long enough to meet minimum eligibility requirements. Under an agreement, these workers and their family members may qualify for a partial U.S. benefit based on "totalized" (that is, combined) credits from both countries. Similarly, workers may qualify for partial benefits from the foreign country based on totalized credits.

**Table 5.M1** shows the number of beneficiaries receiving totalization payments and their average benefits.

# Benefit Computation and Automatic Adjustment Provisions

The primary insurance amount (PIA) is the monthly benefit amount payable to the worker upon retirement at full retirement age or upon entitlement to disability benefits. The PIA is also the base figure from which monthly benefit amounts payable to the worker's family members or survivors are determined. The PIA is derived from the worker's annual taxable earnings, averaged over a period that encompasses most of the worker's adult years. Until the late 1970s, the average monthly wage (AMW) was the earnings measure generally used. For workers first eligible for benefits after 1978, average indexed monthly earnings (AIME) have replaced the AMW as the usually applicable earnings measure. The PIA computation based on AIME currently involves the following three steps:

1. Indexing of earnings. The worker's annual taxable earnings after 1950 are updated, or indexed, to reflect the general earnings level in the indexing year—the second calendar year before the year in which the worker is first eligible; that is, first reaches age 62, becomes disabled, or dies. Earnings in years after the indexing year are not indexed but instead are counted at their actual value. A worker's earnings for a given year are indexed by multiplying them by the following ratio (indexing factor): The average wage in the national economy for the indexing year, divided by the corresponding average wage figure for the year to be indexed.

**Table 2.A8** shows the indexing factors applicable to the earnings of workers who were first eligible in 1989–2002. **Table 2.A9** shows indexed earnings for workers first eligible in 1995–2002 who had maximum taxable earnings in each year after 1950. For a detailed description of an AIME computation, see Appendix D, "Computing a Retired-Worker Benefit."

2. Determining AIME. The period used to calculate AIME equals the number of full calendar years elapsing between age 21 (or 1950, if later) and the year of first eligibility, usually excluding the lowest 5 years. Workers disabled before age 47 have from zero to 4 excluded years from the computation. At an absolute minimum, 2 years are used to compute AIME. The actual years used in the computation (the "computation years") are the years of highest indexed earnings after 1950, including any years before age 22 or after age 61 as well as the year of disability or death. AIME is calculated as the sum of indexed earnings in the computation period, divided by the number of months in that period.

**Table 2.A10** provides a historical outline of provisions related to AIME and AMW, and describes variations in the number of dropout years. **Tables 2.A15** and **2.A16** describe AMW benefit computations based on the worker's nonindexed earnings after 1936 and 1950, respectively. (Very few persons currently being awarded benefits have PIAs computed under these old-start or new-start computation methods. These methods, particularly the new-start method shown in Table 2.A16, are more frequently applicable in earnings recomputations for workers who reached age 62 before 1979.)

- 3. Computing the PIA. The formula used to compute the PIA from AIME is weighted to provide a higher PIA-to-AIME ratio for workers with comparatively low earnings. The formula applies declining percentage conversion rates to three AIME brackets. For workers who reach age 62, become disabled, or die in 2002, the formula provides a PIA equal to the sum of:
  - 90 percent of the first \$592 of AIME, plus
  - 32 percent of the next \$2,975 of AIME, plus
  - 15 percent of AIME over \$3,567.

Beginning with the first year of eligibility, the PIA is increased by cost-of-living adjustments (COLAs).

**Table 2.A11** shows the PIA formula and first applicable COLA for workers first eligible in 1979 or later.

The dollar amounts defining the AIME brackets are referred to as "bend points." These bend points (as described in Table 2.A11) are updated automatically each year in proportion to increases in the national average wage level. This automatic adjustment ensures that benefit levels for successive generations of eligible workers will keep up with rising earnings levels, thereby assuring consistent rates of earnings replacement from one generation of beneficiaries to the next.

The benefit formula applicable to a worker depends on the year of eligibility (or death) rather than on the year benefits are first received. Thus the PIA of a worker retiring at age 65 in 2002 is calculated using the benefit formula that applies to all workers first eligible in 1999 (the "year of attainment" of age 62). The PIA derived from that formula is then increased by the COLAs effective for December, 1999, 2000, and 2001 to obtain the PIA effective at age 65. Subsequent recomputations of the worker's benefit, including additional earnings not originally considered, delayed retirement credits or additional COLA increases, all refer to the basic computation that originally applied, based on the year of attainment.

Beginning in 1981, benefits have been rounded to the next lower ten cents at each step in the computation. The final benefit payment is rounded to the next lower dollar amount (if not already an even dollar). Prior to 1981, benefits were paid in ten-cent increments after rounding up to the next dime in each computation step.

A cost-of-living increase in benefits generally is established each year if the consumer price index for urban wage earners and clerical workers (CPI-W), prepared by the Department of Labor, indicates a percentage increase (after rounding) of at least 0.1 percent between two specified guarters. The arithmetical mean of the CPI-W for July, August, and September in the year of determination is compared with the arithmetical mean of the CPI-W for the later of (a) July, August, and September in the year in which the last effective cost-of-living increase was established or (b) the 3 months of the calendar guarter in which the effective month of the last general benefit increase occurred. The percentage increase in the CPI-W, rounded to the nearest 0.1 percent, represents the size of the increase in benefits, effective for December of the year in which the determination is made.

Under certain conditions, depending on the size of the combined OASDI trust funds relative to estimated disbursements, the applicability and size of a cost-of-living adjustment may be determined under an alternative method, called the "stabilizer provision." In no case, however, are benefits reduced below the level of benefits in the year of determination. Historically, this provision has never been triggered.

Table 2.A18 presents a history of provisions relating to the automatic adjustment of benefits, including a description of the stabilizer provision. In addition, the Table includes a summary history and description of provisions relating to the annual automatic adjustment of (1) the maximum amount of taxable and creditable earnings, (2) the dollar amount needed to establish a quarter of coverage, (3) the bend points defining the AIME brackets in the PIA formula and the PIA brackets in the maximum family benefit formula, and (4) the exempt amounts under the earnings (retirement) test. All of these adjustments are linked to increases in the level of the national average annual wage, rather than to increases in the CPI. Table 2.A19 illustrates the cumulative effect of statutory and automatic increases in benefits for workers who have been in benefit status over varying time periods.

### **Alternative PIA Computation Provisions**

Special minimum PIA. Workers with low earnings but steady attachment to the workforce over most of their adult years may qualify for monthly benefits based on the special minimum PIA computation. This computation does not depend on the worker's average earnings, but on the number of coverage years—years in which the worker had earnings equal to or above a specified amount. The level of the special minimum PIA is the same for workers having the same number of coverage years, regardless of age or year of first eligibility. Increases in the special minimum PIA are linked to cost-of-living adjustments (COLAs).

See **Table 2.A12** for additional information on the special minimum PIA.

Windfall Elimination Provision (WEP). The WEP affects persons who receive a pension based on noncovered work after 1956 and Social Security benefits. First eligibility for the noncovered pension and Social Security benefits must be after December 31, 1985 for WEP to apply. WEP reduces the Social Security PIA upon which SSA benefits are based and affects all benefits paid on that record, except survivors. The WEP reduction ceases when entitlement to the pension payment ends, the wage earner dies, or the wage earner earns a total of 30 years of substantial Social Security earnings. The WEP reduction amount is never more than one-half of the noncovered pension.

A WEP PIA is generally based on 40 percent of the first bend point instead of 90 percent as with the regular PIA:

Example: A retired worker with a noncovered pension of \$2,000 a month and less than 20 years of covered employment attains age 62 in 2002.

Normal PIA, based on AIME of \$800.

 $$592 \times .90 = $532.80$ 

 $$208 \times .32 = $66.56$ 

PIA = \$599.30

WEP PIA, based on AIME of \$800.

 $$592 \times .40 = $236.80$ 

 $$208 \times .32 = $66.56$ 

PIA = \$303.30

If a worker has more than 20 years of substantial covered earnings, the WEP PIA begins to increase. With the 21st year of substantial covered earnings, the first bend point percentage is increased by 5 percentage points. This rate of increase applies for each additional year of substantial covered earnings, through the 30th year of substantial earnings at which point WEP no longer applies. After 23 years of substantial coverage, for example, the first bend point percentage would be 55 percent. Thirty years of substantial earnings would yield a first bend point percentage of 90 percent (the normal percentage of the first bend point).

Examples of pensions subject to WEP are U.S. Civil Service Retirement System annuities, retirement benefits based on foreign earnings, and state and local pensions based on noncovered earnings.

**Table 2.A11.1** provides more detail about the WEP computation and contains the amounts of substantial earnings for years after 1990. Substantial earnings for earlier years are listed in **Table 2.A12**.

Family maximum provisions. Monthly benefits payable to the worker and family members or to the worker's survivors are subject to a maximum family benefit amount. The family maximum level for retired-worker families or survivor families usually ranges from 150 percent to 188 percent of the worker's PIA. The maximum benefit for disabled-worker families is the smaller of 85 percent of AIME (or 100 percent of PIA, if larger) or 150 percent of the PIA.

Like the formula for determining the PIA, the maximum family benefit formula applicable to a worker depends on the year of first eligibility (that is, the year of attainment of age 62, onset of disability, or death). Once the worker's maximum family benefit amount for the year of first eligibility is determined, it is updated in line with the COLAs.

For information on family maximum provisions, as described here, see **Table 2.A13** (comparison of family maximums to the PIAs on which they are based), and **Table 2.A14** (disability family maximums). **Table 2.A17** shows the maximum family benefit amounts applicable in cases of first eligibility before 1979.

## **Benefit Types and Levels**

### **Retired and Disabled Workers**

The full retirement age (FRA) is the earliest age at which an unreduced retirement benefit is payable (sometimes referred to as the "normal retirement age"). The age for full retirement benefits is scheduled to rise gradually from age 65 to age 67, with the first incremental increase affecting workers who reached age 62 in the year 2000. Workers over age 62 who retire before FRA can receive reduced benefits. The monthly rate of reduction from the full retirement benefit (that is, the PIA) is 5/9 of 1 percent a month for the first 36 months immediately preceding FRA. The reduction rate is 5/12 of 1 percent a month for any additional months. The maximum overall reduction for early retirement will have risen from 20 percent to 30 percent by 2022, when age 67 becomes the full retirement age.

If a disabled worker receives a reduced retirement benefit for months before disability entitlement, the disability benefit is reduced by the number of months for which he or she received the reduced benefit.

For workers who postpone their retirement beyond the full retirement age, benefits are increased for each month of nonpayment beyond that age and age 70. This increase is called a "delayed retirement credit," and is potentially available for any or all months following attainment of the full retirement age (maximum of 60 months for persons who attained age 65 prior to 2003). The annual rate of increase for delayed retirement credits is 7 percent for workers who reach age 62 in 2001 and 2002, and will eventually rise to 8 percent for workers reaching age 62 in 2005 or later.

### Spouses and Children of Workers

Spouses receive 50 percent of the worker's PIA (regardless of the worker's actual benefit amount), if the spouse has attained the full retirement age at entitlement to spousal benefits. The spouse of a retired or disabled worker can elect monthly benefits as early as age 62. These benefits are reduced at the rate of 25/36 of 1 percent a month for the first 36 months immediately preceding FRA and 5/12 of 1 percent for each additional month. The maximum overall reduction for early retirement will have risen from 25 percent to 35 percent by 2022, when age 67 becomes the full retirement age (FRA) for spouses attaining age 62 in that year.

Children of retired or disabled workers are also eligible to receive monthly benefits. The term "child" refers to a child under the age of 18, a child aged 18–19 attending elementary or secondary school full time, or to an adult child, aged 18 or older, who was disabled prior to age 22. In addition, young spouses (that is, those under the age of 62) who care for a worker's entitled child may also be eligible. For purposes of defining young spouses' benefits, the term

"child" refers to a child under age 16, or to an adult child of the worker who was disabled prior to age 22. Children of retired or disabled workers can receive up to 50 percent of the worker's PIA, as can young spouses. (The benefit of a young spouse is not reduced for age.) Monthly benefits payable to the spouse and children of a retired or disabled worker are limited to a family maximum amount, as discussed earlier.

Benefits are payable to unmarried divorced spouses of retirement age who were married at least 10 years to the worker. A divorced spouse benefit is excluded from family maximum provisions. Divorced spouses age 62 or older and divorced for 2 or more years (after marriage of 10 or more years) may be independently entitled on the record of the ex-spouse if the ex-spouse could be entitled if he or she applied.

#### **Survivors Benefits**

Widows and widowers of fully insured workers are eligible for unreduced benefits at full retirement age (FRA), currently age 65. As with retired workers and spouses, widow(er)s' FRA will gradually increase to age 67. Widows and widowers can elect reduced monthly benefits at age 60 or, if disabled, as early as age 50. Surviving divorced spouses can also receive benefits if married to the worker for at least 10 years and not remarried before age 60 (age 50 if disabled).

For survivors whose full benefit retirement age is 65, the monthly rate of reduction for the first 60 months immediately preceding FRA is 19/40 of 1 percent of the worker's PIA, with a maximum reduction of 28.5 percent at age 60. For survivors whose full benefit retirement age is over 65, the amount of reduction for each month prior to FRA is adjusted accordingly to ensure that the maximum reduction at age 60 remains 28.5 percent of the worker's PIA.

Benefits for widows and widowers are increased if the deceased worker delayed retirement beyond the FRA. In these cases, the survivor benefits include any delayed retirement credits the deceased worker had earned. Conversely, if the worker had elected early retirement, widow(er)s' benefits are limited for widow(er)s first entitled to survivors benefits at age 62 or later. For these beneficiaries, the benefit is the higher of 82.5 percent of the worker's PIA or the amount the worker would be receiving if still alive. Disabled widow(er)s ages 50–60 receive the age 60 widow's rate (71.5 percent of PIA) regardless of their age at the time of entitlement.

Children of deceased workers and mothers and fathers under FRA are eligible to receive monthly benefits up to 75 percent of the worker's PIA if the worker died either fully or currently insured. Mothers and fathers must be caring for the worker's entitled child who is either under age 16 or disabled. A dependent parent aged 62 or older is eligible for monthly benefits equal to 82.5 percent of the worker's PIA. Each of two dependent parents can qualify for benefits

equal to 75 percent of the deceased worker's PIA. Monthly benefits payable to survivors are reduced to conform to the family maximum benefit payable on the deceased worker's account. Benefits for a surviving divorced spouse, however, are disregarded when computing the maximum family benefit.

See Table 2.A20 for more information on the increases in the full (or normal) retirement age for workers. **Table 2.A21** describes age-related reductions for dependent beneficiaries, as does Table 2.A22 (widow(er)s). Additionally, Tables 2.A23 and 2.A24 show the history of legislation relating to special monthly benefits payable to certain persons born before January 2, 1900. Table 2.A25 summarizes the history of certain OASDI benefits other than monthly benefit payments. Table 2.A26 presents illustrative monthly benefit amounts for selected beneficiary families, based on hypothetical earnings histories representing five different earnings levels. Table 2.A27 shows minimum and maximum monthly benefits payable to retired workers retiring at age 62 in various years beginning with 1957 (the first full year benefits became available at age 62). Table 2.A28 shows minimum and maximum monthly benefits payable to retired workers retiring at age 65 in various years beginning with 1940.

#### **Provisions for Railroad Retirement Board Beneficiaries**

The OASDI tables do not include a number of persons receiving Railroad Retirement benefits who would be eligible for Social Security benefits had they applied. The reason they have not applied is that receipt of a Social Security benefit would reduce their Railroad Retirement benefit by a like amount. The number of persons is not available, but is estimated to be less than 100,000.

The Railroad Retirement Act of 1974, effective January 1, 1975, provided that the regular annuity for employees with 10 or more years of railroad service who retired after December 31, 1974, will consist of two components.

Public Law 107-90 (the 2001 amendments to the Railroad Retirement Act of 1974) effective January 1, 2002 revised the railroad service work requirement. The railroad service work requirement is 10 or more years of railroad service or, effective January 1, 2002, have at least 5 years of railroad service after December 31, 1995. The two components are unchanged:

 Tier 1. A basic Social Security level component equivalent to what would be paid under the Social Security Act on the basis of the employee's combined railroad and nonrailroad service, reduced by the amount of any monthly benefit under OASDI actually paid on the basis of nonrailroad work; and  Tier 2. A "private pension" component payable over and above the Social Security equivalent, calculated on the basis of the number of years of railroad service.

# Effect of Current Earnings on Benefits

Beneficiaries under the full retirement age (FRA) with earnings in excess of certain exempt amounts may have all or part of their benefits withheld as a result of the annual earnings test (AET) provisions of the Social Security Act. For those at or above FRA, however, there have been recent changes to AET provisions. Amendments in 1996 eased the impact of AET provisions, while changes in 2000 removed the AET altogether for beneficiaries aged 65 or older. Public Law 104- 121, enacted March 29, 1996, substantially raised the exempt amounts under the annual earnings test for persons who have reached full retirement age. These amounts are \$12,500 in 1996; \$13,500 in 1997; \$14,500 in 1998; \$15,500 in 1999; \$17,000 in 2000; \$25,000 in 2001; and \$30,000 in 2002. Benefits are withheld at the rate of \$1 in benefits for every \$3 of earnings above the FRA exempt amount.

Public Law 106-182, enacted April 7, 2000, eliminated the earnings test beginning with the month a beneficiary reaches FRA. The annual earnings test that applies in the year one attains FRA is based on the more generous annual limits established under P.L. 104-121 (including the \$1 for \$3 withholding rate). After 2002, the annual exempt amount will be indexed to the growth in average wages. In determining annual earnings for purposes of the annual earnings test, only earnings before the month of attainment of FRA will be counted.

Public Laws 104-121 and 106-182 did not change the annual exempt amount for beneficiaries who are under FRA throughout the year. This annual amount continues to be pegged to increases in average wages. The amount was \$10,680 in 2001, and is \$11,280 in 2002. When the annual earnings limit affects working beneficiaries under FRA, benefits are withheld at the rate of \$1 for every \$2 of earnings above the exempt amount.

Individuals have the option to receive reduced benefits under a monthly earnings test if it is to their advantage to do so. This option is usually exercised in the first year of retirement, because in that year the monthly test permits payment for some months even if the annual earnings limit is greatly exceeded. Under the monthly test, beneficiaries receive a full monthly benefit for months in which they do not earn over an amount equal to 1/12 of the annual earnings limit. The monthly earnings test is applied to the self-employed based on hours they work instead of monthly earnings. Generally, beneficiaries are eligible for the monthly earnings test in only one year.

**Table 2.A29** provides historical detail on the retirement test.

Beneficiaries entitled on the basis of their own disability—disabled workers, disabled adult children, and disabled widow(er)s—are not subject to the earnings test. Substantial earnings by disabled beneficiaries, however, may indicate that they are able to do work which constitutes substantial gainful activity (SGA) and are therefore no longer disabled. Although other factors are considered, numerical earnings thresholds are used in a determination of SGA.

**Table 2.A30** provides historical thresholds for determining substantial gainful activity (SGA).

### **Taxation of Benefits**

Up to 85 percent of Social Security benefits may be subject to federal income tax depending on the beneficiary's income, marital status, and filing status. The definition of income for this provision is as follows: Adjusted gross income (before Social Security or Railroad Retirement benefits are considered), plus tax-exempt interest income, with further modification of adjusted gross income in some cases involving certain tax provisions of limited applicability among the beneficiary population; plus one-half of Social Security and Tier 1 Railroad Retirement benefits.

For married beneficiaries filing jointly with adjusted gross income under \$32,000 a year, no Social Security benefits are subject to taxation. If adjusted gross income exceeds \$32,000 but is under \$44,000, the amount of benefits included in gross income is the lesser of one-half of income over \$32,000. If a couple's adjusted gross income exceeds \$44,000, the amount of benefits included in gross income is 85 percent of income over \$44,000 plus the lesser of \$6,000 or one-half of benefits. However, no more than 85 percent of benefits are subject to income tax. The income thresholds for single beneficiaries are \$25,000 and \$32,000.

If members of a married couple are filing separately, they do not have a minimum threshold if they lived together any time during the tax year. The amount of benefits included in gross income is the lesser of 85 percent of Social Security or Tier 1 Railroad Retirement benefits, or 85 percent of all income as defined above. Like all matters dealing with tax liability, taxation of Social Security benefits fall under the jurisdiction of the Internal Revenue Service.

**Table 2.A31** shows the history of provisions related to taxation of Social Security benefits. **Table 2.A32** offers examples to illustrate when benefits are taxable and the amount subject to taxation.

# **Supplemental Security Income**

The Supplemental Security Income (SSI) program, provides income support to persons aged 65 or older, blind or disabled adults, and blind or disabled children. Eligibility requirements and federal payment standards are nationally uniform. The 2002 federal SSI benefit rate for an individual living in his or her own household and with no other countable income is \$545 monthly; for a couple (with both husband and wife eligible), the SSI benefit rate is \$817 monthly.

Payments under SSI began in January 1974. It replaced the former federal-state adult assistance programs in the 50 states and the District of Columbia. Under SSI each eligible person is provided a monthly cash payment based on a statutory federal benefit rate. Since 1975, these rates have been increased by the same percentage, as the cost-of-living increases in OASDI benefits. If an individual or couple is living in another person's household and is receiving both food and shelter from the person in whose household they are living, the federal benefit rate is reduced by one-third. This is done instead of determining the actual dollar value of the in-kind support and maintenance.

For institutionalized persons, the eligibility requirements and payment standards depend on the type of institution. With some exceptions, inmates of public institutions are ineligible for SSI. For persons institutionalized for a complete calendar month, a maximum federal SSI payment of \$30 per month applies where (1) the institution receives a substantial part of the cost of the person's care from the Medicaid program, or (2) recipients under age 18 whose private health insurance is making payments to the institution,. Other eligible persons in institutions may receive up to the full federal benefit rate.

The federal payment is based on the individual's countable income. The first \$20 monthly in OASDI benefits or other earned or unearned income is not counted. Also excluded is \$65 monthly of earnings plus one-half of any earnings above \$65. For example, a person living in his or her own household, whose sole income is a \$200 monthly OASDI benefit, would receive \$365 in federal SSI payments:

\$545 - (\$200 - \$20) = (\$545 - \$180) = \$365.

A person whose income consists of \$500 in gross monthly earnings would receive \$337.50 in federal SSI payments:

\$545 - ((\$500 - \$85) / 2) = \$207.50 countable earnings FBR \$545 -\$207.50 = \$337.50 federal SSI

Individuals generally are not eligible for SSI if they have resources in excess of \$2,000 (or \$3,000 for a couple). Certain resources are excluded, most commonly a home, an automobile, and household goods and personal effects of reasonable value. States have the option to supplement the federal SSI payment for all or selected categories of persons, regardless of previous state program eligibility.

CONTACT: Lenna D. Kennedy (410) 965-9846.

# **SSI: History Of Provisions**

Act

# **Basic Eligibility Requirements**

#### 1972

Public Law 92-603, enacted October 30

An individual may qualify for payments on the basis of age, blindness, or disability.

Aged: Any person aged 65 or older.

**Blind**: Any person with 20/200 or less vision in the better eye with the use of correcting lenses, or with tunnel vision of 20 degrees or less. An individual transferred from a state Aid to the Blind (AB) program is eligible if he/she received such state aid in December 1973 and continues to meet the October 1972 state definition of blindness.

**Disabled**: Any person unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment expected to result in death or that has lasted or can be expected to last for a continuous period of at least 12 months. For a child under age 18, eligibility is based on disability of severity comparable with that of an adult. An individual transferred from a state Aid to the Permanently and Totally Disabled (APTD) program to SSI is also eligible if he/she received such state aid in December 1973 and continues to meet the October 1972 state definition of disability.

# 1973

Public Law 93-233, enacted December 31

Only persons who had received APTD before July 1973 and were on the rolls in December 1973 may receive SSI on the basis of the state definition of disability; those who became eligible for state aid from July to December 1973 must meet the federal definition of disability.

# 1980

Public Law 96-265, enacted June 9

A disabled recipient who loses federal SSI eligibility because of earnings at the substantial gainful activity level may continue to receive a special benefit under section 1619 and retain eligibility for Medicaid under title XIX of the Social Security Act. This special benefit status may continue as long as the recipient has the disabling impairment and meets all nondisability SSI eligibility criteria. States have the option of supplementing this special benefit.

This provision of the law was in effect from January 1, 1981, through December 31, 1983. Beginning in January 1984, under a 1-year demonstration project, this provision was continued for persons already eligible for either regular SSI payments or special monthly benefits.

## 1984

Public Law 98-460, enacted October 9

The special benefit and Medicaid provisions of the 1980 legislation were extended through June 30, 1987 (retroactive to January 1, 1984).

# 1986

Public Law 99-643, enacted November 10

The special benefit and Medicaid provisions of the 1980 amendments are made permanent. The provisions were amended effective July 1, 1987, with significant modifications to simplify administration and to allow free movement between regular SSI disability payments and either the special cash benefit or Medicaid eligibility under section 1619. The distinction between a disabled person eligible for regular SSI payments and one eligible for 1619(a) is that the latter has several months with gross earnings above the SGA level. Previously, section 1619(a) status required completion of a trial work period and the determination that the work was SGA.

## 1996

Public Law 104-193, enacted August 22

For individuals under age 18, the "comparable severity" standard is eliminated and replaced with a requirement that a child be considered disabled if he/she has a medically determinable impairment that results in "marked and severe functional limitations," and meets the

existing statutory duration requirement. The law also eliminates references to "maladaptive behaviors" in the Listing of Impairments for children, and discontinues the use of individualized functional assessments for children.

SSI eligibility is prohibited for an individual in any month during which such an individual is a fugitive felon, fleeing prosecution, or violating state or federal conditions of probation or parole. In addition, SSI eligibility is prohibited for 10 years for those convicted of fraudulently claiming residence to obtain benefits simultaneously in two or more states.<sup>a</sup>

# Other Eligibility Provisions

# Citizenship and Residence

#### 1972

Public Law 92-603, enacted October 30

The individual must reside within one of the 50 states or the District of Columbia and be a citizen or an alien lawfully admitted for permanent residence or permanently residing in the United States under color of law. Persons living outside the United States for an entire calendar month lose their eligibility for such a month.

## 1976

Public Law 94-241, enacted March 24

Eligibility for SSI is extended to residents of the Northern Mariana Islands, effective January 9, 1978.

#### 1980

Public Law 96-265, enacted June 9

The income and resources of the immigration sponsors of aliens applying for SSI are considered in determining eligibility for and the amount of payment. After allowances for the needs of the sponsor and his/her family, the remainder is deemed available for the support of the alien applicant for a 3-year period after admission to the United States for permanent residence. This provision does not apply to those who become blind or disabled after admission, to refugees, or to persons granted political asylum. (See "Deeming of Income and Resources" on page 30 for subsequent changes to sponsor-to-alien deeming provisions.)

# 1989

Public Law 101-239, enacted December 19

SSI eligibility is continued for a disabled or blind child who was receiving SSI benefits while living in the United States and is now living with a parent who is a member of the U.S. armed forces assigned to permanent duty ashore outside the United States, but not where the parent is stationed in Puerto Rico or the territories and possessions of the United States.

# 1993

Public Law 103-66, enacted August 10

Above provision made applicable where the parent is a member of the U.S. armed forces and stationed in Puerto Rico or the territories and possessions of the United States.

#### 1996

Public Law 104-193, enacted August 22

Prohibits SSI eligibility for anyone who is not a U.S. citizen or national unless they are in a "qualified alien" category and meet one of certain exceptions such as lawful permanent residents who earn or can be credited with 40 qualifying quarters of earnings, certain refugee type categories eligible for up to 5 years of time-limited eligibility, or active duty U.S. military or veterans and their spouses and children. Extends eligibility for aliens receiving SSI as of August 22, 1996 (the enactment date of the law) for 1 year after the enactment date for those aliens found ineligible under the new standards.

<sup>&</sup>lt;sup>a</sup> This last provision was repealed in 1999 by Public Law 106-169 and replaced with a provision providing for nonpayment of benefits for up to 24 months for making false or misleading statements regarding material facts.

Public Law 104-208, enacted September 30

Amends Public Law 104-193 to add to the list of "qualified aliens" certain noncitizens (and their children) who have been battered or subjected to extreme cruelty by a spouse or parent or a member of the spouse's or parent's family living in the same household.

# 1997

Public Law 105-18, enacted June 12

Public Law 105-33, enacted August 5

Extends eligibility for aliens receiving SSI as of August 22, 1996, until September 30, 1997, for those found ineligible under the new alien standards of Public Law 104-193.

Further amends Public Law 104-193 to add Cuban and Haitian entrants, and the child of a parent who has been battered or subjected to extreme cruelty, to the list of qualified aliens. Provides that Cuban and Haitian entrants and Amerasian immigrants qualify for time limited eligibility, and increases the time limit from 5 to 7 years for all time-limited categories. Additional exceptions are added for qualified aliens: (1) lawfully residing in the United States and receiving SSI benefits on August 22, 1996; and (2) lawfully residing in the United States on August 22, 1996 and meeting the definition of blind or disabled in the Social Security Act.

Certain noncitizen American Indians are excepted from the alien nonpayment provisions of Public Law 104-193.

Extends eligibility for "nonqualified aliens" receiving SSI as of August 22, 1996, until September 30, 1998.

## 1998

Public Law 105-306, enacted October 28

Permanently extends eligibility of all remaining "nonqualified aliens" who were receiving SSI benefits when Public Law 104-193 was enacted on August 22, 1996.

## 2000

Public Law 106-386, enacted October 28

Noncitizens, regardless of their immigration status, may be eligible for SSI to the same extent as refugees, if they are determined to be victims of "severe forms of trafficking in persons."

## Other Benefits

#### 1980

Public Law 96-272, enacted June 17

SSI applicants and recipients are not required as a condition of eligibility to elect to receive Veterans Administration pensions under the Veterans and Survivors' Pension Improvement Act of 1978 if the state of residence lacks a medically needy program under title XIX.

# **Drug Addiction and Alcoholism (DA&A)**

# 1972

Public Law 92-603, enacted October 30

Any disabled individual who has been medically determined to be an alcoholic or drug addict must accept appropriate treatment, if available, in an approved facility and demonstrate compliance with conditions and requirements for treatment.

SSI payments are required to be made through a representative payee—another person or public or private agency designated by SSA to manage the recipient's benefit on his/her behalf.

# 1994

Public Law 103-296, enacted August 15

Any individual who is receiving SSI based on a disability where drug addiction or alcoholism is a contributing factor material to the finding of disability must comply with the DA&A treatment requirements. The individual must accept appropriate treatment when it is available and comply with the conditions and terms of treatment. Instances of noncompliance with the requirements result in progressively longer payment suspensions. Before payments can resume, the individual must demonstrate compliance for specific periods; 2 months, 3 months, and 6 months, respectively, for the first, second, third and subsequent instances of noncompliance. An individual who is not in compliance with the DA&A treatment require-

ments for 12 consecutive months shall not be eligible for payments; however, this does not prevent such individuals from reapplying and again becoming eligible for payments.

SSI disability payments based on DA&A are also limited to a total of 36 benefit months (beginning March 1995) regardless of whether appropriate treatment is available. Months for which benefits are not due and received do not count towards the 36-month limit.

Payments based on DA&A must be made to a representative payee. Preference is required to be given to community based nonprofit social service agencies and federal, state, or local government agencies in representative payee selection. These agencies when serving as payees for individuals receiving payments based on DA&A may retain the lesser of 10 percent of the monthly benefit or \$57 (indexed to the consumer price index (CPI)) as compensation for their services.

Establishment of one or more referral and monitoring agencies for each state is required.

#### 1996

Public Law 104-121, enacted March 29

An individual is not considered disabled if DA&A is a contributing factor material to a finding of disability.

Applies DA&A representative payee requirements enacted under Public Law 103-296 to disabled SSI recipients who have a DA&A condition and are incapable of managing their benefits. In addition, these recipients shall be referred to the appropriate state agency administering the state plan for substance abuse treatment.

# Institutionalization

#### 1972

Public Law 92-603, enacted October 30

An individual who is an inmate of a public institution is ineligible for SSI payments unless the institution is a facility approved for Medicaid payments and is receiving such payments on behalf of the person. Under *regulations*, the Medicaid payment must represent more than 50 percent of the cost of services provided by the facility to the individual.

#### 1976

Public Law 94-566, enacted October 20

An inmate of a publicly operated community residence serving no more than 16 persons may, if otherwise eligible, receive SSI.

## 1983

Public Law 98-21, enacted April 20

Payments may be made to persons who are residents of public emergency shelters for the homeless for a period of up to 3 months in any 12-month period.

#### 1986

Public Law 99-643, enacted November 10

Effective July 1, 1987, disabled or blind recipients who were receiving special SSI payments or had special SSI recipient status under section 1619 in the month preceding the first full month of institutionalization, may receive payments based on the full federal benefit rate for the initial 2 full months of institutionalization, if they reside in certain public medical, psychiatric or Medicaid facilities, or in private Medicaid facilities.

#### 1987

Public Law 100-203, enacted December 22

Effective January 1, 1988, payments may be made to persons who are residents of public emergency shelters for the homeless, for up to 6 months in a 9-month period.

Effective July 1, 1988, continued payment of SSI benefits for up to 3 months is permitted, at the rate that was applicable in the month prior to the first full month of institutionalization, for individuals whose expected institutional stay on admission is not likely to exceed 3 months, as certified by a physician, and for whom the receipt of benefits is necessary to maintain living arrangements to which they may return.

Public Law 104-193, enacted August 22

Effective December 1996, institutionalized children under age 18 whose private health insurance is making payments to the institution may receive no more than \$30 per month in federal SSI.

# **Vocational Rehabilitation and Treatment**

## 1972

Public Law 92-603, enacted October 30

Blind or disabled individuals receiving federal SSI benefits who are under age 65, must be referred to the state agency providing services under the Vocational Rehabilitation Act and must accept the services offered. States are reimbursed for the cost of services.

#### 1976

Public Law 94-566, enacted October 20

Blind or disabled children under age 16 must be referred to the state agency administering crippled children's services or to another agency designated by the state. States are reimbursed for the cost of services.

Of funds provided for these services, at least 90 percent must be used for children under age 6 or for those who have never attended public schools.

#### 1980

Public Law 96-265, enacted June 9

Disabled SSI recipients who medically recover while enrolled in approved vocational rehabilitation programs of state VR agencies, may continue to receive benefits during their participation in such programs if the Commissioner of Social Security determines that continuation in the program will increase the probability that they leave the rolls permanently.

#### 1981

Public Law 97-35, enacted August 13

Funding no longer provided under title XVI for medical, social, developmental and rehabilitative services to disabled or blind children.

Reimbursement for the cost of rehabilitation services will be made if the services result in the recipient's return to work.

#### 1984

Public Law 98-460, enacted October 9

Authorizes the reimbursement of states for the cost of VR services provided to individuals who (1) continue to receive benefits after medical recovery because they are participating in a state VR program or (2) refuse, without good cause, to continue in or cooperate with the VR program in which they had been participating.

#### 1987

Public Law 100-203, enacted December 22

Provision for continuation of payments to SSI recipients who have medically recovered while enrolled in an approved vocational rehabilitation program extended to blind SSI recipients.

#### 1990

Public Law 101-508, enacted November 5

Reimbursement authorized for the cost of vocational rehabilitation services provided in months in which the individual was not receiving federal SSI payments, if:

- SSI recipient status for Medicaid eligibility purposes was retained under work incentive provisions, or
- Benefits were in suspense<sup>b</sup> status (for a reason other than cessation of disability or blindness), or
- Federally administered state supplementation was received.

Becipients who have lost eligibility for SSI benefits for fewer than 13 consecutive months are in suspended payment status.

Extends the provision providing for benefit continuation to SSI recipients who medically recover while participating in a state VR program to include SSI recipients participating in a non-state VR program.

#### 1999

Public Law 106-170, enacted December 17

Establishes a Ticket to Work and Self-Sufficiency program which will provide SSI (and OASDI) disability beneficiaries with a ticket that can be used to obtain vocational rehabilitation services, employment services, or other support services, from an employment network of their choice.

# **Continuing Disability Reviews and Eligibility Redeterminations**

#### 1994

Public Law 103-296, enacted August 15

During each of fiscal years 1996, 1997, and 1998, requires SSA to conduct continuing disability reviews (CDRs) on a minimum of 100,000 SSI recipients. In addition, during the same period, requires SSA to redetermine the SSI eligibility of at least one-third of all childhood SSI recipients who reach age 18 after April 1995 during the 1-year period following attainment of age 18. Redeterminations for persons turning age 18 could count toward the 100,000 CDR requirement.

# 1996

Public Law 104-193, enacted August 22

Repeals the requirement that SSA redetermine the eligibility of at least one-third of all child-hood SSI recipients who reach age 18 after April 1995 during the 1-year period following attainment of age 18.

Requires a CDR:

- At least once every 3 years for SSI recipients under age 18 who are eligible by reason of an impairment which is likely to improve, and
- Not later than 12 months after birth for recipients whose low birth weight is a contributing factor material to the determination of their disability.

Requires eligibility redetermination for all childhood SSI recipients eligible for the month before the month in which they attain age 18.

Requires redetermination of eligibility for children considered disabled based on an individual functional assessment and/or consideration of maladaptive behavior.

Requires the representative payee of a childhood disability recipient whose continuing eligibility is being reviewed to present evidence that the recipient is receiving treatment which is considered medically necessary and available for the condition which was the basis for providing SSI benefits.

## 1997

Public Law 105-33, enacted August 5

Modifies provision of Public Law 104-193 to extend from 12 to 18 months the period for redetermining the disability of children under age 18 under the new childhood disability standard.

Modifies provision of Public Law 104-193 to permit SSA to schedule a CDR for a disabled child for whom low birth weight is a contributing factor material to the determination of disability, at a date after the child's first birthday if the Commissioner determines the impairment is not expected to improve within 12 months of the child's birth.

Modifies provision of Public Law 104-193 to provide SSA the authority to make redeterminations of disabled childhood recipients who attain age 18, more than 1 year after the date such recipient attains age 18.

#### 1999

Public Law 106-170, enacted December 17

Prohibits the initiation of a CDR during the period that a recipient is "using a ticket" under the Ticket to Work program.

# **Deeming of Income and Resources**

#### 1972

Public Law 92-603, enacted October 30

Deeming occurs when the income and resources of certain family members living in the same household with the SSI recipient are considered in determining the amount of the SSI payment. These family members are the ineligible spouse of an adult recipient and the ineligible parents of a child recipient under age 21.

After deduction of personal allocations for the spouse (or parents) and for ineligible children in the home, and after application of income exclusions, any remaining income of the spouse (or parents) is added to the income of the eligible person.

#### 1980

Public Law 96-265, enacted June 9

Children aged 18 or older are not subject to parental deeming.

Sponsor's income and resources deemed to an alien for 3 years.

#### 1989

Public Law 101-239, enacted December 19

Disabled children receiving home care services under state Medicaid programs, who are ineligible for SSI because of deeming of parental income, and who received SSI benefits limited to \$30 while in a medical treatment facility, may receive the \$30 monthly allowance that would be payable if the recipient were institutionalized.

## 1993

Public Law 103-152, enacted November 24

Sponsor-to-alien deeming period extended from 3 years to 5 years, effective January 1, 1994, through September 30, 1996.

Considers an ineligible spouse or parent who is absent from the household due to active military service to be a member of the household for deeming purposes.

## 1996

Public Law 104-193, enacted August 22

Deeming of income and resources from an immigration sponsor to a noncitizen continues until citizenship, with exceptions for those who earn, or can be credited with, 40 qualifying quarters of earnings. Effective for those whose sponsor signs a new legally enforceable affidavit of support.

Public Law 104-208, enacted September 30

Amends Public Law 104-193 to add two exceptions to the sponsor-to-alien deeming:

- Provides that if the noncitizen is indigent and would be unable to obtain food and shelter without SSI benefits even after receiving support from the sponsor, then only the amount of income and resources actually provided by the sponsor will be counted for a 12-month period after a determination of indigence; and
- Provides that in certain cases, deeming would not apply for a 12-month period (with some options for extension) if the noncitizen (or his/her children) has been battered, or subjected to extreme cruelty by family members.

# 1997

Public Law 105-33, enacted August 5

Amends Public Law 104-208 to add an additional exception to sponsor-to-alien deeming when the parent of a noncitizen has been battered or subjected to extreme cruelty by family members.

# **Federal Benefit Payments**

# **Federal Benefit Rates**

Basic benefit standards are used in computing the amount of federal SSI payments. Benefit levels differ for individuals and couples living in households and for persons in Medicaid institutions. Individuals or couples living in their own households receive the full federal benefit. If an individual or couple is living in another person's household and receiving support and

maintenance there, the federal benefit is reduced by one-third. The federal benefit rates for persons in households are increased annually to reflect increases in the cost of living. Legislation affecting the level of federal benefit rates since the inception of the SSI program are summarized in table 2.B1.

# Windfall Offset

#### 1980

Public Law 96-265, enacted June 9

Offset (by reduction of retroactive Social Security benefits) to prevent persons whose initial OASDI payment is retroactive from receiving more in total benefits for the same period than if they were paid the benefits when regularly due.

## 1984

Public Law 98-617, enacted November 8

Offset provision expanded to allow for reduction of retroactive SSI benefits and to apply in cases of OASDI benefit reinstatement.

# **Proration of Benefit**

#### 1982

Public Law 97-248, enacted September 3

Benefit for first month of eligibility to be prorated by the number of days in the month for which an application has been filed and there is eligibility.

# 1996

Public Law 104-193, enacted August 22

Changes the effective date of an SSI application to the first day of the month following the date on which the application was filed or on which the individual first becomes eligible, whichever is later. This, in effect, eliminates prorated payments in initial claims.

# **Retrospective Monthly Accounting**

## 1981

Public Law 97-35, enacted August 13

Changes the method of computing the SSI benefit to one under which the benefit amount is computed on a monthly basis and is based on income and other characteristics in the previous (or second previous) month.

## 1984

Public Law 98-369, enacted July 18

Changes the method of computing the SSI benefit to persons receiving title II payments. The effect of the increased title II income at the time of the cost-of-living increase is not delayed as it otherwise would be.

#### 1987

Public Law 100-203, enacted December 22

Provides an exception to retrospective monthly accounting so that amounts received under Aid to Families With Dependent Children (AFDC), foster care, refugee cash assistance, Cuban-Haitian entrant assistance, or general and child welfare assistance provided by the Bureau of Indian Affairs are counted only in the month received.

# 1993

Public Law 103-66, enacted August 10

Changes the method of computing the SSI benefit to persons receiving the value of the onethird reduction. The effect of the increased value at the time of the cost-of-living increase is not delayed as it otherwise would be. Effective January 1995.

## **Uncashed Checks**

# 1981

Public Law 97-35, enacted August 13

States that have federally administered supplements to be credited their share of SSI checks that remain unnegotiated for 180 days.

Public Law 100-86, enacted August 10

SSI checks now unnegotiable after 1 year. States are credited their share of SSI checks after 1 year rather than 180 days.

# **Rounding of Payment Amounts**

#### 1982

Public Law 97-248, enacted September 3

Cost-of-living adjustments in the federal SSI benefit and income eligibility levels are to be rounded to the next lower whole dollar, after the adjustment is calculated. Subsequent cost-of-living adjustments will be calculated on the previous year's benefit standard before rounding.

# Penalties Resulting in Nonpayment of Benefits for False or Misleading Statements

#### 1999

Public Law 106-169, enacted December 14

Provides for the nonpayment of OASDI and SSI benefits (6, 12, and 24 months, respectively, for the first, second, and third or subsequent violations) for individuals found to have made a statement or representation of material fact for use in determining eligibility for benefits that the individual knew, or should have known, was false or misleading or omitted a material fact.

#### **Exclusions from Income**

#### **General Exclusions**

#### 1972

Public Law 92-603, enacted October 30

The first \$60 of earned or unearned income per calendar quarter for an individual or couple; the next \$195 and one-half the remainder of quarterly earned income. Unearned income includes Social Security benefits, other government or private pensions, veterans' benefits, and workers' compensation.

# 1981

Public Law 97-35, enacted August 13

The first \$20 of earned or unearned income per month for an individual or couple; the next \$65 and one-half the remainder of monthly earned income. Unearned income includes Social Security benefits, other government or private pensions, veterans' benefits, and workers' compensation.

# 2000

Public Law 106-554, enacted December 21

Earnings of persons defined as Social Security statutory employees are treated as selfemployment income for SSI purposes.

# Special Exclusions

# 1972

Public Law 92-603, enacted October 30

Any amount of tax rebate issued to an individual by any public agency that is based on either real property or food purchase taxes.

Grants, scholarships, and fellowships used to pay tuition and fees at an educational institution.

Income required for achieving an approved self-support plan for blind or disabled persons.

Work expenses of blind persons.

For blind persons transferred from state programs to SSI, income exclusions equal to the maximum amount permitted as of October 1972 under the state programs.

Irregularly or infrequently received income totaling \$60 or less of unearned income and \$30 of earned income in a calendar quarter.

Payment for foster care of ineligible child residing in recipient's home through placement by a public or private nonprofit child care agency.

One-third of any payment received from an absent parent for the support of a child eligible for SSI.

Certain earnings of a blind or disabled child under age 22 regularly attending an educational institution.

State or local government cash payments based on need and designed to supplement SSI payments.

#### 1976

Public Law 94-331, enacted June 30

Disaster assistance from income for 9 months and application of one-third reduction for 6 months for certain victims of disasters occurring between January 1, 1976 and December 31, 1976.

Public Law 94-566, enacted October 20

Any assistance based on need (including vendor payments) made to or on behalf of SSI recipients, which is paid and wholly funded by state or local governments.

The value of assistance provided under certain federal housing programs.

# 1977

Public Law 95-113, enacted September 29

Food stamps, federally donated food, and the value of free or reduced price food for women and children under the Child Nutrition Act and National School Lunch Act.

Public Law 95-171, enacted November 12

Provisions for exclusions for support and maintenance under the Disaster Relief and Emergency Assistance Act of 1974 extended on a permanent basis. Effective January 1, 1978.

# 1980

Public Law 96-222, enacted April 1

Earned income tax credit treated as earned income (temporarily excluded from 1975 through 1980).

Public Law 96-265, enacted June 9

Remunerations received in sheltered workshops and work activity centers are considered earned income and qualify for earned income exclusions.

Impairment-related work expenses paid by the individual (including cost for attendant care, medical equipment, drugs, and services necessary to control an impairment) are deducted from earnings when determining if an individual is engaging in substantial gainful activity. Impairment-related work expenses are excluded in calculating income for benefit purposes if initial eligibility for benefits exists on the basis of countable income without applying this exclusion.

#### 1981

Public Law 97-35, enacted August 13

Modifies provision under which irregularly or infrequently received income is excluded to conform to change from quarterly to monthly accounting; amounts excludable: \$20 or less of unearned income and \$10 of earned income in a month.

## 1982

Public Law 97-377, enacted December 21

From December 18, 1982, to September 30, 1983, certain home energy assistance payments are excluded if a state agency certified that they are based on need.

## 1983

Public Law 97-424, enacted January 6

Support or maintenance assistance (including home energy assistance) provided in kind by a nonprofit organization or in cash or in kind by certain providers of home energy is excluded if the state determines that the assistance is based on need. Provision is applicable through September 1984.

Certain home energy assistance payments are excluded if a state agency certified that the assistance is based on need. Provision is applicable through June 1985.

#### 1984

Public Law 98-369, enacted July 18

The 1983 provisions for support and maintenance and home energy assistance continue to October 1, 1987.

#### 1986

Public Law 99-498, enacted October 17

Educational assistance used for educational expenses under the Higher Education Act of 1965 as amended.

## 1987

Public Law 100-203, enacted December 22

The 1983 provisions for support and maintenance and home energy assistance made permanent.

Death payments (for example, proceeds from life insurance) from SSI income determinations to the extent they were spent on last illness and burial.

Modifies the 1982 resource exclusion for burial funds to extend the exclusion to any burial fund of \$1,500 or less maintained separately from all other assets, thereby allowing the interest on the funds to be excluded from income if retained in the fund.

## 1988

Public Law 100-383, enacted August 10

Restitution payments made to Japanese internees and relocated Aleutians.

#### 1989

Public Law 101-239, enacted December 19

Interest on agreements representing the purchase of an excluded burial space.

Payments from the Agent Orange Settlement.

Value of a ticket for domestic travel received as a gift and not cashed.

# 1990

Public Law 101-508, enacted November 5

Earned income tax credit (including the child health insurance portion).

Payments received from a state-administered fund established to aid victims of crime.

Impairment-related work expenses excluded from income in determining initial eligibility for benefits.

Payments received as state or local government relocation assistance.

Payments received under the Radiation Exposure Compensation Act.

Redefines as earned income, royalties earned in connection with any publication of the individual's work, and honoraria received for services rendered (previously defined as unearned income).

## 1993

Public Law 103-66, enacted August 10

Hostile fire pay to members of the uniformed services.

Payments received as state or local government relocation assistance made permanent.

## 1994

Public Law 103-286, enacted August 1

Payments to victims of Nazi persecution.

#### 1998

Public Law 105-285, enacted October 27

Funds made available to an SSI recipient by a state or local government or a nonprofit organization as part of the Individual Development Account demonstration project.

# SSI: History of Provisions

Public Law 105-306, enacted October 28

In-kind gifts to children with life-threatening conditions by tax-exempt organizations not converted to cash.

The first \$2,000 annually of cash gifts by tax-exempt organizations to, or for the benefit of, individuals under age 18 with life-threatening conditions.

Public Law 105-369, enacted November 12

Payments made under the Ricky Ray Hemophilia Relief Fund Act of 1998.

## 2000

Public Law 106-554, enacted December 21

Interest on funds deposited in an Individual Development Account.

Any adjustments made to prior payments from other federal programs to account for the error in the computation of the consumer price index during 1999.

# 2001

Public Law 107-16, enacted June 7

The refundable child tax credit is excluded in determining eligibility for means-tested programs, including SSI.

#### Resources

## 1972

Public Law 92-603, enacted October 30

Countable resources limited to \$1,500 or less for an individual and to \$2,250 or less for a couple.

#### 1984

Public Law 98-369, enacted July 18

Limit on countable resources raised by \$100 a year for individuals and \$150 a year for couples, beginning in calendar year 1985 through 1989. The respective limits would become \$2,000 for an individual and \$3,000 for a couple in 1989 and thereafter.

## 1999

Public Law 106-169, enacted December 14

Includes generally in the countable resources of an individual the assets of a trust which could be used for the benefit of the individual or spouse.

#### **General Exclusions**

#### 1972

Public Law 92-603, enacted October 30

A home of reasonable value—established *by regulation* as not exceeding a fair-market value of \$25,000 (\$35,000 in Alaska and Hawaii).

Personal effects and household goods of reasonable value established by *regulation* as not exceeding a total market value of \$1,500.

An automobile of reasonable value—established *by regulation* as not exceeding a market value of \$1,200.

An automobile may be excluded, regardless of value, if the individual's household uses it for employment or medical treatment, or if it is modified to be operated by or for transportation of a handicapped person.

Life insurance with face value of \$1,500 or less.

## 1976

Public Law 94-569, enacted October 20

The recipient's home, regardless of value, is excluded from consideration in determining resources.

#### 1977

Public Law 95-171, enacted November 12

Assistance received under the Disaster Relief and Emergency Assistance Act of 1974 for 9 months following receipt.

Reasonable value for an automobile increased *by regulation* to \$4,500 of current-market value; personal goods and household effects increased to \$2,000 of equity value.

#### 1982

Public Law 97-248, enacted September 3

The value, within prescribed limits, of a burial space for the recipient, spouse, and immediate family is excluded. In addition, \$1,500 each (less the value of already excluded life insurance and any amount in an irrevocable burial arrangement) may be set aside for the burial of the recipient and spouse, if held in separately identifiable burial funds and if inclusion of any of the burial funds in countable resources would cause the resource limit to be exceeded.

#### 1984

Public Law 98-369, enacted July 18 The unspent portion of any retroactive title II or title XVI payment is excluded for 6 months following its receipt, and the individual must be given written notice of the time limit on the exclusion.

# 1985

Regulations permit exclusion, regardless of value, of an automobile needed for essential transportation or modified for a handicapped person. The \$4,500 current market value limit applies only if no automobile could be excluded based on the nature of its use.

#### 1987

Public Law 100-203, enacted December 22

Provides for suspension of the 1980 transfer of assets provision, in any month that it is determined that undue hardship would result.

Real property that cannot be sold for the following reasons: it is jointly owned; its sale would cause the other owner(s) undue hardship due to loss of housing; its sale is barred by a legal impediment; or, the owner's reasonable efforts to sell have been unsuccessful.

Temporarily extends the 1984 exclusion of retroactive title II and title XVI benefits from 6 months to 9 months (the longer exclusion applies to benefits paid in fiscal years 1988 and 1989).

Allows the exclusion of burial funds, as described above, regardless of whether or not counting any portion of those funds would result in excess resources.

## 1988

Public Law 100-707, enacted November 23

Removes the time limit for exclusion of disaster assistance.

# Special Exclusions

## 1972

Public Law 92-603, enacted October 30

Assets of a blind or disabled individual that are necessary to an approved plan of self-support.

Tools and other property essential to self-support (PESS), within reasonable limits. Shares of nonnegotiable stock in regional or village corporations held by natives of Alaska.

For persons transferred from state programs to SSI, resource exclusions equal to the maximum amount permitted as of October 1972 under the state program.

#### 1988

Public Law 100-383, enacted August 10 Restitution payments made to Japanese internees and relocated Aleutians.

# 1989

Public Law 101-239, enacted December 19

Specifies that no limitation can be placed on property essential to self-support used in a trade or business, or by an individual as an employee (including the tools of a tradesperson and the machinery and livestock of a farmer).

Payments from the Agent Orange Settlement.

| 1 | q | a | U |
|---|---|---|---|
| • | J | J | v |

Public Law 101-508, enacted November 5

Earned income tax credit excluded for the month following the month the credit is received.

Payments received from a state-administered fund established to aid victims of crime excluded for a 9-month period. Individual not required to file for such benefits.

Payments received as state or local government relocation assistance excluded for a 9-month period. (The provision expired 3 years after its effective date.)

Payments received under the Radiation Exposure Compensation Act.

#### 1993

Public Law 103-66, enacted August 10

Makes permanent the 9-month exclusion of payments received as state or local government relocation assistance.

#### 1994

Public Law 103-286, enacted August 1

Payments to victims of Nazi persecution.

#### 1996

Public Law 104-193, enacted August 22

Dedicated financial institution accounts required to be established for large past-due benefits for disabled individuals under age 18 with a representative payee.

# 1998

Public Law 105-285, enacted October 27

Funds made available to an SSI recipient by a state or local government or a nonprofit organization as part of the Individual Development Account demonstration project.

Public Law 105-306, enacted October 28

In-kind gifts to children with life-threatening conditions by tax-exempt organizations not converted to cash.

The first \$2,000 annually of cash gifts by tax-exempt organizations to, or for the benefit of, individuals under age 18 with life-threatening conditions.

Public Law 105-369, enacted November 12

Payments made under the Ricky Ray Hemophilia Relief Fund Act of 1998.

# 2000

Public Law 106-554, enacted December 21

Funds deposited by an individual in an Individual Development Account and the interest on those funds.

#### 2001

Public Law 107-16, enacted June 7

The refundable child tax credit in the month of receipt and in the following month.

#### **Transfer-of-Assets Penalties**

# 1980

Public Law 96-611, enacted December 28 1988 Assets transferred for less than fair market value for the purpose of establishing eligibility for benefits under the Social Security Act are counted as resources for 24 months after transfer.

Public Law 100-360, enacted July 1

Removes the transfer-of-assets penalty for transfers made July 1, 1988, or later.

# 1999

Public Law 106-169, enacted December 14

Provides a penalty under the SSI program for the disposal of resources at less than fair market value. The penalty is a loss of benefits for up to 36 months. A formula is provided to determine the number of months.

# Presumptive and Emergency Payments and Interim Assistance Reimbursement

# **Presumptive Payments**

# 1972

Public Law 92-603, enacted October 30

A person applying on the basis of disability who meets all other criteria of eligibility, and is likely to be disabled, may receive payments for 3 months pending the disability determination.

#### 1976

Public Law 94-569, enacted October 20

Presumptive payment provision was extended to persons applying on the basis of blindness.

#### 1990

Public Law 101-508, enacted November 5

Extends the period for receipt of payments to 6 months.

# **Emergency Advance Payments**

#### 1972

Public Law 92-603, enacted October 30

Any applicant who can be presumed to meet the criteria of eligibility, but has not yet been determined eligible, and who is faced with a financial emergency may receive an immediate cash advance of up to \$100.

## 1987

Public Law 100-203, enacted December 22

Increases the maximum emergency advance payment amount to the maximum amount of the regular federal SSI monthly benefit rate, plus, if any, the federally administered state supplementary payment.

## 1996

Public Law 104-193, enacted August 22

Applicants who have a financial emergency may receive an emergency advance payment in the month of application, which, effective with this law, is always prior to the first month of eligibility. These advance payments are recouped by proportional reductions in the recipient's first 6 months of SSI benefits.

# Interim Assistance Reimbursement

# 1974

Public Law 93-368, enacted August 7

SSA may enter into agreements with the states to repay them directly for assistance payments made to an SSI applicant while his/her claim is being adjudicated. The repayment is made from the first check due to the individual. This legislation expires June 30, 1976.

## 1976

Public Law 94-365, enacted July 14

The authority to repay the state for interim assistance is made permanent.

#### 1987

Public Law 100-203, enacted December 22

Extends interim assistance reimbursement to situations in which payments are made by states or political subdivisions to persons whose SSI payments were suspended or terminated and who subsequently are found to be eligible for such benefits. Also clarifies that the payment from which the interim assistance reimbursement is paid must be the first payment of benefits relating to the interim period.

# **Medicaid Eligibility**

#### 1972

Public Law 92-603, enacted October 30

States can provide Medicaid coverage to all recipients of SSI payments. Alternatively, they can limit coverage by applying more restrictive criteria from the state Medicaid plan in effect on January 1, 1972.

States can accept SSA determination of eligibility, or make their own determination.

#### 1976

Public Law 94-566, enacted October 20

Preserves the Medicaid eligibility of recipients who become ineligible for cash SSI payments due to the cost-of-living increases in Social Security benefits.

## 1980

Public Law 96-265, enacted June 9

Blind or disabled recipients under age 65 no longer eligible for either regular or special SSI payments because of their earnings may retain SSI recipient status for Medicaid eligibility purposes under the following conditions: (1) they continue to have the disabling impairment, (2) they meet all nondisability eligibility criteria except for earned income, (3) they would be seriously inhibited from continuing employment without Medicaid services, and (4) their earnings are insufficient to provide a reasonable equivalent of SSI payments and Medicaid.

In states that do not provide Medicaid coverage categorically to all SSI recipients, qualification for Medicaid benefits depends on the state's specific eligibility and program requirements.

The Medicaid provision of the 1980 legislation was in effect from January 1, 1981, through December 31, 1983. Under a 1-year demonstration project, beginning January 1, 1984, this provision was continued for persons already eligible for regular or special SSI payments or for retention of Medicaid eligibility.

#### 1984

Public Law 98-460, enacted October 9

Medicaid provision of 1980 legislation extended through June 30, 1987 (retroactive to January 1, 1984).

#### 1986

Public Law 99-272, enacted April 7

Restores Medicaid eligibility for some disabled widow(er)s who became ineligible for SSI when their title II benefits increased in 1984 because of a change in the Social Security disabled widow(er)s benefits reduction factor.

Public Law 99-643, enacted November 10

The SSI recipient status for Medicaid eligibility provision of the 1980 amendments is made permanent.

Effective July 1, 1987, certain expenses are excluded from earnings when determining sufficiency of earnings to establish SSI recipient status eligibility for Medicaid purposes:

- Impairment-related work expenses of disabled persons,
- · Work expenses of blind persons,
- · Income required for achieving an approved self-support plan, and
- The value of publicly funded attendant care services.

Effective July 1, 1987, preserves the Medicaid eligibility of recipients who become ineligible for SSI payments because of entitlement to, or an increase in, Social Security disabled adult child benefits on or after the effective date.

Effective July 1, 1987, requires all states to provide Medicaid coverage for recipients in special SSI status (either receiving special SSI payments or in the special recipient status described for 1980) if they received Medicaid coverage the month before special SSI status.

Public Law 100-203, enacted December 22

Effective July 1, 1988, restores or preserves the Medicaid eligibility of persons aged 60 or older who are eligible for Social Security benefits as widows or widowers (but not eligible for Medicare) and who become ineligible for SSI payments or state supplementation because of the receipt of old-age or survivors insurance benefits under Social Security.

# 1990

Public Law 101-508, enacted November 5

Age limit for retention of SSI recipient status for Medicaid eligibility purposes (1980 and subsequent work incentive provisions, above) is eliminated.

Preserves the Medicaid eligibility of SSI recipients who become ineligible for payments when they become entitled to Social Security disabled widow(er)s benefits following the revised definition used for their disability.

#### 1997

Public Law 105-33, enacted August 5

Requires states to continue Medicaid coverage for disabled children who were receiving SSI payments as of August 22, 1996 and would have continued to be eligible for such payments except that their eligibility terminated because they did not meet the revised SSI childhood disability standard established under Public Law 104-193.

# State Supplementation

#### 1972

Public Law 92-603, enacted October 30

States are given the option of providing supplementary payments both to recipients transferred from the state program and to those newly eligible for SSI.

States may either administer the payments themselves or have the Social Security Administration make payments on their behalf. When state supplementary payments are federally administered, the Social Security Administration makes eligibility and payment determinations for the state and assumes administrative costs.

"Hold harmless" protection, which limits a state's fiscal liability to its share of OAA, AB, and APTD expenditures for calendar year 1972, is provided to states electing federal administration of their supplementary plans. This provision applies only to supplementary payments that do not, on the average, exceed a state's "adjusted payment level." (The adjusted payment level is the average of the payments that individuals with no other income received in January 1972; it may include the bonus value of food stamps. Adjustments are provided for payments that had been below state standards.)

#### 1973

Public Law 93-66, enacted July 9

Provision is made for mandatory state supplementation as assurance against reduction of income for persons who received state assistance in December 1973 and were transferred to SSI. These supplementary payments must equal the difference between (1) the amount of the state assistance payment that the individual received in December 1973 plus other income and (2) his/her federal SSI payment plus other income.

# 1976

Public Law 94-585, enacted October 21

After June 30, 1977, when the federal SSI payment level is increased by a cost-of-living increase, such an increase will be excluded in calculating the "hold harmless" amount.

Requires states to maintain state supplementation payments at the level of December 1976 ("maintenance of payments") or to continue to pay in supplements the same total annual amounts ("maintenance of expenditures") when the federal SSI payment level is increased and thereby pass through any increases in federal benefits without reducing state supplements.

Public Law 97-248, enacted September 3

Begins a 3-year phase out of "hold harmless" protection. Effective with fiscal year 1985, Wisconsin and Hawaii (the only remaining "hold harmless" states) assumed the full cost of their supplementary payments.

#### 1983

Public Law 98-21, enacted April 20

Federal pass-through law is adjusted (1) by substituting the state supplementary payment levels in effect in March 1983 for those in effect in December 1976 as the levels that states must maintain in complying with the pass-through requirements, and (2) with regard to the \$20 (individual) and \$30 (couple) increase in the federal SSI standard in July 1983, by requiring states to pass through only as much as would have been required if the SSI cost-of-living adjustment had been made in July 1983.

# 1987

Public Law 100-203, enacted December 22

Provides for federal administration of state supplements to residents of medical institutions.

Provides for required pass through of \$5 increase in federal rate for persons whose care in institutions is paid in substantial part by Medicaid.

#### 1993

Public Law 103-66, enacted August 10

Requires states to pay fees for federal administration of their state supplementation payments. The fees are \$1.67 for each monthly supplementary payment in fiscal year 1994, \$3.33 in fiscal year 1995, and \$5.00 in fiscal year 1996. Fees for subsequent fiscal years will be \$5.00 or another amount determined by the Commissioner to be appropriate. The Commissioner may charge the states additional fees for services they request that are beyond the level customarily provided in administering state supplementary payments.

#### 1997

Public Law 105-33, enacted August 5

Revises the schedule of per-payment fees for federal administration of state supplementation for fiscal years 1998 (\$6.20) through 2002 (\$8.50) and provides a formula for determining the fee beyond fiscal year 2002.

## 1999

Public Law 106-170, enacted December 17

A state which has an agreement with SSA to administer its supplementation payments, must remit both payments and fees prior to the SSI payment date.

# 2000

Public Law 106-554, enacted December 21

Changes the effective date of above provision from 2009 to 2001.

# **Overpayment Recovery**

#### 1984

Public Law 98-369, enacted July 18

Limits the rate of recovering overpayments from monthly payments to the lesser of: (1) the monthly payment, or (2) 10 percent of a recipient's monthly income. Permits a higher or lower adjustment at the request of the recipient subject to the agreement of the Commissioner. The limit does not apply if fraud, willful misrepresentation, or concealment of material information was involved on the part of the recipient or spouse in connection with the overpayment.

Waives recovery of certain overpayments due to amount of excess resources of \$50 or less.

Provides temporary authority for the recovery of overpayments from tax refunds.

#### 1988

Public Law 100-485, enacted October 13

Grants permanent authority to recover overpayments from tax refunds.

Public Law 105-306, enacted October 28

Authorizes SSA to collect SSI overpayments by offsetting Social Security benefits, with a maximum monthly offset of no more than 10 percent of the Social Security benefit.

## 1999

Public Law 106-169, enacted December 14

Makes representative payees liable for an SSI overpayment caused by a payment made to a recipient who has died, and requires SSA to establish an overpayment control record under the representative payee's Social Security number.

Requires SSA to recover SSI overpayments from SSI lump-sum amounts by withholding at least 50 percent of the lump-sum payment or the amount of the overpayment, whichever is less.

Extends all of the debt collection authorities currently available for the collection of overpayments under the OASDI program to the SSI program.

CONTACT: Lenna D. Kennedy (410) 965-9846.

# **Medicare**

The following are brief summaries of complex subjects. They should be used only as overviews and general guides to the Medicare and Medicaid programs. The views expressed herein do not necessarily reflect the policies or legal positions of the Centers for Medicare & Medicaid Services or the Department of Health and Human Services (HHS). These summaries do not render any legal, accounting, or other professional advice, nor are they intended to explain fully all of the provisions or exclusions of the relevant laws, regulations, and rulings of the Medicare and Medicaid programs. Original sources of authority should be researched and utilized.

# Overview

Title XVIII of the Social Security Act, designated "Health Insurance for the Aged and Disabled," is commonly known as Medicare. As part of the Social Security Amendments of 1965, the Medicare legislation established a health insurance program for aged persons to complement the retirement, survivors, and disability insurance benefits under Title II of the Social Security Act.

When first implemented in 1966, Medicare covered most persons age 65 or older. In 1973, the following groups also became eligible for Medicare benefits: persons entitled to Social Security or Railroad Retirement disability cash benefits for at least 24 months, most persons with endstage renal disease (ESRD), and certain otherwise noncovered aged persons who elect to pay a premium for Medicare coverage. The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (Public Law 106-554) allowed persons with Amyotrophic Lateral Sclerosis (Lou Gehrig's Disease) to waive the 24-month waiting period.

Medicare has traditionally consisted of two parts: Hospital Insurance (HI), also known as Part A, and Supplementary Medical Insurance (SMI), also known as Part B. A new, third part of Medicare, sometimes known as Part C, is the Medicare+Choice program, which was established by the Balanced Budget Act (BBA) of 1997 (Public Law 105-33) and which expanded beneficiaries' options for participation in private-sector health care plans. When Medicare began on July 1, 1966, approximately 19 million people enrolled. In 2002, over 40 million people are enrolled in one or both of Parts A and B of the Medicare program, and 5 million of them have chosen to participate in a Medicare+Choice plan.

# Coverage

HI is generally provided automatically, and free of premiums, to persons age 65 or older who are eligible for Social Security or Railroad Retirement benefits, whether they have claimed these monthly cash benefits or not. Also, workers and their spouses with a sufficient period of Medi-

care-only coverage in federal, state, or local government employment are eligible beginning at age 65. Similarly, individuals who have been entitled to Social Security or Railroad Retirement disability benefits for at least 24 months, and government employees with Medicare-only coverage who have been disabled for more than 29 months, are entitled to HI benefits. HI coverage is also provided to insured workers with ESRD (and to insured workers' spouses and children with ESRD), as well as to some otherwise ineligible aged and disabled beneficiaries who voluntarily pay a monthly premium for their coverage. In 2001, the HI program provided protection against the costs of hospital and specific other medical care to almost 40 million people (34 million aged and 6 million disabled enrollees). HI benefit payments totaled \$141.2 billion in 2001.

The following health care services are covered under Medicare's HI program:

- Inpatient hospital care coverage includes costs of a semi-private room, meals, regular nursing services, operating and recovery rooms, intensive care, inpatient prescription drugs, laboratory tests, X-rays, psychiatric hospitals, inpatient rehabilitation, and longterm care (LTC) hospitalization when medically necessary, as well as all other medically necessary services and supplies provided in the hospital. An initial deductible payment is required of beneficiaries who are admitted to a hospital, plus copayments for all hospital days following day 60 within a benefit period (described later).
- Skilled nursing facility (SNF) care is covered by HI only if it follows within 30 days (generally) of a hospitalization of 3 days or more and is certified as medically necessary. Covered services are similar to those for inpatient hospital but also include rehabilitation services and appliances. The number of SNF days provided under Medicare is limited to 100 days per benefit period (described later), with a copayment required for days 21–100. HI does not cover nursing facility care if the patient does not require skilled nursing or skilled rehabilitation services.
- Home health agency (HHA) care is covered by both HI and SMI. The BBA transferred from HI to SMI those home health services furnished on or after January 1, 1998 that are unassociated with a hospital or skilled nursing facility stay. HI will continue to cover the first 100 visits following a 3-day hospital stay or a skilled nursing facility stay; SMI covers any visits thereafter. Home health care under HI and SMI has no copayment and no deductible.

HHA care, including care provided by a home health aide, may be furnished part-time by a HHA in the residence of a home-bound beneficiary if intermittent or part-time skilled nursing and/or certain other therapy or rehabilitation

care is necessary. Certain medical supplies and durable medical equipment (DME) may also be provided, though beneficiaries must pay a 20-percent coinsurance for DME, as required under SMI of Medicare. There must be a plan of treatment and periodical review by a physician. Full-time nursing care, food, blood, and drugs are not provided as HHA services.

• Hospice care is a service provided to terminally ill persons with life expectancies of 6 months or less who elect to forgo the standard Medicare benefits for treatment of their illness and to receive only hospice care for it. Such care includes pain relief, supportive medical and social services, physical therapy, nursing services, and symptom management. However, if a hospice patient requires treatment for a condition that is not related to the terminal illness, Medicare will pay for all covered services necessary for that condition. The Medicare beneficiary pays no deductible for the hospice program, but does pay small coinsurance amounts for drugs and inpatient respite care.

An important HI component is the benefit period, which starts when the beneficiary first enters a hospital and ends when there has been a break of at least 60 consecutive days since inpatient hospital or skilled nursing care was provided. There is no limit to the number of benefit periods covered by HI during a beneficiary's lifetime; however, inpatient hospital care is normally limited to 90 days during a benefit period, and copayment requirements (detailed later) apply for days 61–90. If a beneficiary exhausts the 90 days of inpatient hospital care available in a benefit period, he or she can elect to use days of Medicare coverage from a non-renewable "lifetime reserve" of up to 60 (total) additional days of inpatient hospital care. Copayments are also required for such additional days.

All citizens (and certain legal aliens) age 65 or older, and all disabled persons entitled to coverage under HI, are eligible to enroll in the SMI program on a voluntary basis by payment of a monthly premium. Almost all persons entitled to HI choose to enroll in SMI. In 2001, the SMI program provided protection against the costs of physician and other medical services to almost 38 million people (33 million aged and 5 million disabled). SMI benefits totaled \$99.7 billion in 2001.

The SMI program covers the following services and supplies:

 Physicians' and surgeons' services, including some covered services furnished by chiropractors, podiatrists, dentists, and optometrists. Also covered are the services provided by these Medicare-approved practitioners who are not physicians: certified registered nurse anesthetists, clinical psychologists, clinical social workers (other than in a hospital or skilled nursing facility), physician assistants, and nurse

- practitioners and clinical nurse specialists in collaboration with a physician.
- Services in an emergency room or outpatient clinic, including same-day surgery, and ambulance services.
- · Home health care not covered under HI.
- Laboratory tests, X-rays, and other diagnostic radiology services, as well as certain preventive care screening tests.
- Ambulatory surgical center services in a Medicareapproved facility.
- Most physical and occupational therapy and speech pathology services.
- Comprehensive outpatient rehabilitation facility services, and mental health care in a partial hospitalization psychiatric program, if a physician certifies that inpatient treatment would be required without it.
- Radiation therapy, renal (kidney) dialysis and transplants, heart, lung, heart-lung, liver, pancreas, and bone marrow transplants, and, as of April 2001, intestinal transplants.
- Approved durable medical equipment for home use, such as oxygen equipment and wheelchairs, prosthetic devices, and surgical dressings, splints, and casts.
- Drugs and biologicals that cannot be self-administered, such as hepatitis B vaccines and immunosuppressive drugs (certain self-administered anticancer drugs are covered).

To be covered, all services must be either medically necessary or one of several prescribed preventive benefits. SMI services are generally subject to a deductible and coinsurance (see next section). Certain medical services and related care are subject to special payment rules, including deductibles (for blood), maximum approved amounts (for Medicare-approved physical, speech, or occupational therapy services performed after 2002 in settings other than hospitals), and higher cost-sharing requirements (such as those for outpatient treatments for mental illness).

It should be noted that some health care services are not covered by Medicare. Non-covered services include long-term nursing care, custodial care, and certain other health care needs, such as dentures and dental care, eyeglasses, hearing aids, and most prescription drugs. These services are not a part of the Medicare program unless they are a part of a private health plan under the Medicare+Choice program.

Medicare+Choice (Part C) is an expanded set of options for the delivery of health care under Medicare. While all Medicare beneficiaries can receive their benefits through the original fee-for-service (FFS) program, most beneficiaries enrolled in both HI and SMI can choose to participate in a Medicare+Choice plan instead. Organiza-

tions that seek to contract as Medicare+Choice plans must meet specific organizational, financial, and other requirements. Following are the primary Medicare+Choice plans:

- Coordinated care plans, which include health maintenance organizations (HMOs), provider-sponsored organizations (PSOs), preferred provider organizations (PPOs), and other certified coordinated care plans and entities that meet the standards set forth in the law.
- Private, unrestricted FFS plans, which allow beneficiaries to select certain private providers. For those providers who agree to accept the plan's payment terms and conditions, this option does not place the providers at risk, nor does it vary payment rates based on utilization.
- Medical savings account (MSA) plans, which provide benefits after a single high deductible is met. Medicare makes an annual deposit to the MSA, and the beneficiary is expected to use the money in the MSA to pay for medical expenses below the annual deductible.

Except for MSA plans, all Medicare+Choice plans are required to provide at least the current Medicare benefit package, excluding hospice services. Plans may offer additional covered services and are required to do so (or return excess payments) if plan costs are lower than the Medicare payments received by the plan. There are some restrictions as to who may elect an MSA plan, even when enrollment is no longer limited to a certain number of participants.

# Program Financing, Beneficiary Liabilities, and Provider Payments

All financial operations for Medicare are handled through two trust funds, one for the HI program and one for the SMI program. These trust funds, which are special accounts in the U.S. Treasury, are credited with all receipts and charged with all expenditures for benefits and administrative costs. The trust funds cannot be used for any other purpose. Assets not needed for the payment of costs are invested in special Treasury securities. The following sections describe Medicare's financing provisions, beneficiary cost-sharing requirements, and the basis for determining Medicare reimbursements to health care providers.

# **Program Financing**

The HI program is financed primarily through a mandatory payroll tax. Almost all employees and self-employed workers in the United States work in employment covered by the HI program and pay taxes to support the cost of benefits for aged and disabled beneficiaries. The HI tax rate is 1.45 percent of earnings, to be paid by each employee and a matching amount by the employer for each employee, and 2.90 percent for self-employed persons. Beginning in 1994, this tax is paid on all covered wages and self-

employment income without limit. (Prior to 1994, the tax applied only up to a specified maximum amount of earnings.) The HI tax rate is specified in the Social Security Act and cannot be changed without legislation.

The HI trust fund also receives income from the following sources: (1) a portion of the income taxes levied on Social Security benefits paid to high-income beneficiaries; (2) premiums from certain persons who are not otherwise eligible and choose to enroll voluntarily; (3) reimbursements from the general fund of the U.S. Treasury for the cost of providing HI coverage to certain aged persons who retired when the HI program began and thus were unable to earn sufficient quarters of coverage (and those federal retirees similarly unable to earn sufficient quarters of Medicare-qualified federal employment); (4) interest earnings on its invested assets; and (5) other small miscellaneous income sources. The taxes paid each year are used mainly to pay benefits for current beneficiaries.

The SMI program is financed through premium payments (\$58.70 per beneficiary per month in 2003) and contributions from the general fund of the U.S. Treasury. Beneficiary premiums are generally set at a level that covers 25 percent of the average expenditures for aged beneficiaries. Therefore, the contributions from the general fund of the U.S. Treasury are the largest source of SMI income. The SMI trust fund also receives income from interest earnings on its invested assets, as well as a small amount of miscellaneous income. Beneficiary premiums and general fund payments are redetermined annually, to match estimated program costs for the following year.

Capitation payments to Medicare+Choice plans are financed from the HI and SMI trust funds in proportion to the relative weights of HI and SMI benefits to the total benefits paid by the Medicare program.

# **Beneficiary Payment Liabilities**

Fee-for-service beneficiaries are responsible for charges not covered by the Medicare program and for various cost-sharing aspects of both HI and SMI. These liabilities may be paid (1) by the Medicare beneficiary; (2) by a third party, such as an employer-sponsored retiree health plan or private "Medigap" insurance; or (3) by Medicaid, if the person is eligible. The term "Medigap" is used to mean private health insurance that pays, within limits, most of the health care service charges not covered by Parts A or B of Medicare. These policies, which must meet federally imposed standards, are offered by Blue Cross and Blue Shield (BC/BS) and various commercial health insurance companies.

For beneficiaries enrolled in Medicare+Choice plans, the beneficiary's payment share is based on the cost-sharing structure of the specific plan selected by the beneficiary, since each plan has its own requirements. Most plans have lower deductibles and coinsurance than are required of fee-for-service beneficiaries. Such beneficiaries pay the

monthly Part B premium and may, depending on the plan, pay an additional plan premium.

For hospital care covered under HI, a fee-for-service beneficiary's payment share includes a one-time deductible amount at the beginning of each benefit period (\$840 in 2003). This deductible covers the beneficiary's part of the first 60 days of each spell of inpatient hospital care. If continued inpatient care is needed beyond the 60 days, additional coinsurance payments (\$210 per day in 2003) are required through the 90<sup>th</sup> day of a benefit period. Each HI beneficiary also has a "lifetime reserve" of 60 additional hospital days that may be used when the covered days within a benefit period have been exhausted. Lifetime reserve days may be used only once, and coinsurance payments (\$420 per day in 2003) are required.

For skilled nursing care covered under HI, Medicare fully covers the first 20 days of SNF care in a benefit period. But for days 21–100, a copayment (\$105 per day in 2003) is required from the beneficiary. After 100 days of SNF care per benefit period, Medicare pays nothing for SNF care. Home health care has no deductible or coinsurance payment by the beneficiary. In any HI service, the beneficiary is responsible for fees to cover the first 3 pints or units of non-replaced blood per calendar year. The beneficiary has the option of paying the fee or of having the blood replaced.

There are no premiums for most people covered by the HI program. Eligibility is generally earned through the work experience of the beneficiary or of his or her spouse. However, most aged people who are otherwise ineligible for premium-free HI coverage can enroll voluntarily by paying a monthly premium, if they also enroll in SMI. For people with fewer than 30 quarters of coverage as defined by SSA, the 2003 HI monthly premium rate is \$316; for those with 30 to 39 quarters of coverage, the rate is reduced to \$174. Voluntary coverage upon payment of the HI premium, with or without enrolling in SMI, is also available to disabled individuals for whom cash benefits have ceased due to earnings in excess of those allowed for receiving cash benefits.

For SMI, the beneficiary's payment share includes the following: one annual deductible (currently \$100); the monthly premiums; the coinsurance payments for SMI services (usually 20 percent of the medically allowed charges); a deductible for blood; certain charges above the Medicare-allowed charge (for claims not on assignment); and payment for any services that are not covered by Medicare. For outpatient mental health treatment services, the beneficiary is liable for 50 percent of the approved charges.

#### **Provider Payments**

For HI, before 1983, payments to providers were made on a reasonable cost basis. Medicare payments for most inpatient hospital services are now made under a reimbursement mechanism known as the prospective payment system (PPS). Under PPS, a specific predetermined amount is paid for each inpatient hospital stay, based on each stay's diagnosis-related group (DRG) classification. In some cases the payment the hospital receives is less than the hospital's actual cost for providing the HI-covered inpatient hospital services for the stay; in other cases it is more. The hospital absorbs the loss or makes a profit. Certain payment adjustments exist for extraordinarily costly inpatient hospital stays. Payments for skilled nursing care and home health care are made under separate prospective payment systems. Payments for inpatient rehabilitation and psychiatric care are currently reimbursed on a reasonable cost basis, but prospective payment systems are expected to be implemented in the near future, as required by the BBA.

For SMI, before 1992, physicians were paid on the basis of reasonable charge. This amount was initially defined as the lowest of (1) the physician's actual charge; (2) the physician's customary charge; or (3) the prevailing charge for similar services in that locality. Beginning January 1992, allowed charges were defined as the lesser of (1) the submitted charges, or (2) the amount determined by a fee schedule based on a relative value scale (RVS). Payments for DME and clinical laboratory services are also based on a fee schedule. Most hospital outpatient services are reimbursed on a prospective payment system, and home health care is reimbursed under the same prospective payment system as HI.

If a doctor or supplier agrees to accept the Medicare-approved rate as payment in full ("takes assignment"), then payments provided must be considered as payments in full for that service. The provider may not request any added payments (beyond the initial annual deductible and coinsurance) from the beneficiary or insurer. If the provider does not take assignment, the beneficiary will be charged for the excess (which may be paid by Medigap insurance). Limits now exist on the excess that doctors or suppliers can charge. Physicians are "participating physicians" if they agree before the beginning of the year to accept assignment for all Medicare services they furnish during the year. Since Medicare beneficiaries may select their doctors, they have the option to choose those who participate.

Medicare payments to Medicare+Choice plans are based on a blend of local and national capitated rates, generally determined by the capitation payment methodology described in section 1853 of the Social Security Act. Actual payments to plans vary based on demographic characteristics of the enrolled population. New "risk adjusters" based on demographics and health status are currently being phased in to better match Medicare capitation payments to the expected costs of individual beneficiaries.

# **Claims Processing**

Medicare's HI and SMI fee-for-service claims are processed by nongovernment organizations or agencies that

contract to serve as the fiscal agent between providers and the federal government. These claims processors are known as intermediaries and carriers. They apply the Medicare coverage rules to determine the appropriateness of claims.

Medicare intermediaries process HI claims for institutional services, including inpatient hospital claims, SNFs, HHAs, and hospice services. They also process outpatient hospital claims for SMI. Examples of intermediaries are BC/BS (which utilize their plans in various states) and other commercial insurance companies. Intermediaries' responsibilities include the following:

- Determining costs and reimbursement amounts.
- · Maintaining records.
- · Establishing controls.
- Safeguarding against fraud and abuse or excess use
- · Conducting reviews and audits.
- · Making the payments to providers for services.
- Assisting both providers and beneficiaries as needed.

Medicare carriers handle SMI claims for services by physicians and medical suppliers. Examples of carriers are the BS plans in a state, and various commercial insurance companies. Carriers' responsibilities include the following:

- · Determining charges allowed by Medicare.
- · Maintaining quality-of-performance records.
- Assisting in fraud and abuse investigations.
- · Assisting both suppliers and beneficiaries as needed.
- Making payments to physicians and suppliers for services that are covered under SMI.

Peer review organizations (PROs) are groups of practicing health care professionals who are paid by the federal government to generally oversee the care provided to Medicare beneficiaries in each state and to improve the quality of services. PROs educate other health care professionals and assist in the effective, efficient, and economical delivery of health care services to the Medicare population. The ongoing effort to combat monetary fraud and abuse in the Medicare program was intensified after enactment of the Health Insurance Portability and Accountability Act of 1996 (Public Law 104-191), which created the Medicare Integrity Program. Prior to this 1996 legislation, CMS was limited by law to contracting with its current carriers and fiscal intermediaries to perform payment safeguard activities. The Medicare Integrity Program provided CMS with stable, increasing funding for payment safeguard activities, as well as new authorities to contract with entities to perform specific payment safeguard functions.

## Administration

Department of Health and Human Services has the overall responsibility for administration of the Medicare program. Within DHHS, responsibility for administering Medicare rests with CMS. SSA assists, however, by initially determining an individual's Medicare entitlement, by withholding Part B premiums from the Social Security benefit checks of beneficiaries, and by maintaining Medicare data on the master beneficiary record, which is SSA's primary record of beneficiaries. The Internal Revenue Service in the Department of the Treasury collects the HI payroll taxes from workers and their employers.

A Board of Trustees, composed of two appointed members of the public and four members who serve by virtue of their positions in the federal government, oversees the financial operations of the HI and SMI trust funds. The Secretary of the Treasury is the managing trustee. The Board of Trustees reports to Congress on the financial and actuarial status of the Medicare trust funds on or about the first day of April each year.

State agencies (usually State Health Departments under agreements with CMS) identify, survey, and inspect provider and supplier facilities and institutions wishing to participate in the Medicare program. In consultation with CMS, these agencies then certify the facilities that are qualified.

# **Data Summary**

The Medicare program covers 95 percent of our nation's aged population, as well as many people who are on Social Security because of disability. In 2001, HI covered about 40 million enrollees with benefit payments of \$141.2 billion, and SMI covered about 38 million enrollees with benefit payments of \$99.7 billion. Administrative costs were about 2 percent of HI and about 2 percent of SMI disbursements for 2001. Total disbursements for Medicare in 2001 were \$241 billion.

Note: Medicare enrollment data are based on estimates prepared for the 2002 annual report of the Medicare Board of Trustees to Congress (available on the Internet at www.cms.hhs.gov/publications/trusteesreport/). Medicare benefits, administrative costs, and total disbursements for 2001 are actual amounts for the calendar year, as reported by the Department of the Treasury.

# **Medicare: History of Provisions**

Note: These summaries of public law were selected based on general interest and are not intended to include or explain fully all of the provisions and exclusions of the Medicare program.

Act '

1972

1980

1982

1983

#### **Insured Status**

| Entitlement to | 114-1    | I          | D £:4-   |
|----------------|----------|------------|----------|
| Entitioment to | HOSDITAL | incliranco | RANATITE |
|                |          |            |          |

1965 Individual aged 65 or older entitled to monthly benefits under the Social Security or Railroad Retirement program, or aged 65 before 1968, or 3 quarters of coverage (QC) after 1965 and

before attainment of age 65.

1967 3 QC for each year after 1966 and before attainment of age 65.

Disabled individual, under age 65, entitled to disability benefits for 24 consecutive months under the Social Security or Railroad Retirement program (excludes spouses and children of disabled individuals). Individual under age 65 who has end stage renal disease (ESRD) and who is either fully or currently insured, or is entitled to monthly benefits under the Social Security or Railroad Retirement program or is the spouse or dependent child of such an insured individual or beneficiary. Entitlement begins on the first day of the third month following the initiation of a course of renal dialysis and ends with the 12th month following the month in which either the dialysis terminates or the individual has a renal transplant.

Individual aged 65 or older enrolled in the SMI program who is not otherwise entitled to HI benefits, upon voluntary participation with payment of Hospital Insurance premium.

Individual who would be entitled to monthly benefits under the Social Security or Railroad Retirement program if application were made.

Disabled individual under age 65 entitled to disability benefits for at least 24 months, not necessarily consecutive, under the Social Security or Railroad Retirement program.

Medicare coverage extended for up to 36 months for disabled individuals whose disability continues, but whose monthly benefit ceased because they engaged in substantial gainful activity.

Second waiting period eliminated if a former disabled-worker beneficiary becomes entitled again within 5 years (7 years for disabled widows and widowers and disabled children aged 18 or older).

Federal employees covered under HI based on QC for earnings as federal employees and/ or based on deemed QC for earnings as federal employees before 1983.

Employees of nonprofit organizations, effective Jan. 1, 1984.

1986 Mandatory coverage for state and local government employees not covered under Social

Security and hired after Mar. 31, 1986.

1987 Second waiting period eliminated if a former disabled beneficiary becomes entitled again (no

time limit).

1989 Disabled individuals under age 65 who are no longer entitled to Social Security disability

benefits because their earnings exceeded the substantial gainful activity level have the

option to purchase Medicare coverage by paying the HI and SMI premiums.

**2000** The 24-month waiting period (otherwise required for an individual to establish Medicare

eligibility on the basis of a disability) is waived for persons with amyotrophic lateral sclerosis,

effective July 1, 2001.

<sup>\*</sup>Act refers to legislation enacted in the year shown.

|                                 | HI and SMI                                                                                                                                                                                                                                                                |  |  |
| 1965                            | Requires that Medicare be secondary payer to benefits provided by liability insurance policies or under no-fault insurance.                                                                                                                                               |  |  |
| 1981                            | Requires that Medicare be secondary payer to employer-based group health plans for beneficiaries entitled to Medicare solely due to end stage renal disease (ESRD) for up to 12 months.                                                                                   |  |  |
| 1982                            | For workers and their spouses aged 65-69, Medicare is the secondary payer when benefits are provided under an employer-based group health plan (applicable to employers with 20 or more employees who sponsor or contribute to the group plan).                           |  |  |
|                                 | Health maintenance organizations (HMOs) will be authorized as providers of benefits. The Secretary of HHS must certify the prospective payment mechanism for HMOs before implementation.                                                                                  |  |  |
| 1984                            | Medicare secondary payer provisions are extended to spouses aged 65-69 of workers under age 65 whose employer-based group health plan covers such spouses.                                                                                                                |  |  |
|                                 | For HMOs, includes medical and other health services furnished by clinical psychologists.                                                                                                                                                                                 |  |  |
| 1985                            | Provides payment for liver transplant services.                                                                                                                                                                                                                           |  |  |
| 1986                            | Extends the working age secondary payer provision to cover workers and their spouses beyond age 69.                                                                                                                                                                       |  |  |
|                                 | For HMOs that offered organ transplants as a basic health service on Apr. 15, 1985, such services may be offered from Oct. 1, 1985, through Apr. 1, 1988.                                                                                                                 |  |  |
|                                 | For disabled individuals who are covered by employer-based health plans (with at least 100 employees), Medicare is the secondary payer, effective for 1987-1991.                                                                                                          |  |  |
| 1987                            | Requires HMOs/competitive medical plans that cease to contract with Medicare to provide or arrange supplemental coverage of benefits related to preexisting conditions for the lesser of 6 months or the duration of an exclusion period.                                 |  |  |
|                                 | Specifies in law that in order to be eligible for home health care, a Medicare beneficiary must have a restricted ability to leave the home, requiring the assistance of another or the aid of a supportive device (such as crutches, a cane, a wheelchair, or a walker). |  |  |
|                                 | Clarifies that the secondary payer provision for disabled individuals covered under employer-based health plans for employers with at least 500 employees applies to employers who are government entities.                                                               |  |  |
| 1990                            | Requires that Medicare be the secondary payer to employer-based group health plans for beneficiaries entitled to Medicare solely due to ESRD for up to 18 months (extended from 12 months), effective Feb. 1, 1991, to Jan. 1, 1996.                                      |  |  |
|                                 | The secondary payer provision for disabled beneficiaries covered under large employer plans (see 1986.); effective through Sept. 30, 1995.                                                                                                                                |  |  |

plans is effective through Sept. 30, 1998.

The secondary payer provision for disabled beneficiaries covered under large employer

The secondary payer provision for beneficiaries with ESRD applies to all beneficiaries with end stage renal disease, not only those entitled to Medicare solely on the basis of it. The extension to include the first 18 months of an individual's entitlement on the basis of ESRD is effective through Sept. 30, 1998.

1997

Established an expanded set of options for the delivery of health care under Medicare, referred to as Medicare+Choice. All Medicare beneficiaries can receive their Medicare benefits through the original fee-for-service program. In addition, most beneficiaries can choose instead to receive their Medicare benefits through one of the following Medicare+Choice plans: (1) coordinated care plans (such as HMOs, provider-sponsored organizations, and preferred provider organizations); (2) Medical Savings Account (MSA)/ High Deductible plans (through a demonstration available for up to 390,000 beneficiaries); or (3) private fee-for-service plans. Except for MSA plans, all Medicare+Choice plans are required to provide the current Medicare benefit package (excluding hospice services) and any additional health services required under the adjusted community rate (ACR) process. MSA plans provide Medicare benefits after a single high deductible is met, and enrollees receive an annual deposit in their Medical Savings Account. Transition rules for current Medicare HMO program also provided.

The provision making Medicare the secondary payer for disabled beneficiaries covered under large employer plans, previously scheduled to expire Sept. 30, 1998, made permanent.

The provision making Medicare secondary payer for the first 12 months of entitlement due to ESRD, which had been extended on a temporary basis (through Sept. 30, 1998) to include the first 18 months of entitlement, has been extended, permanently, to include the first 30 months of entitlement on the basis of ESRD.

# **Hospital Insurance**

1965

In each benefit period, inpatient hospital services, 90 days. Includes semiprivate accommodations, operating room, hospital equipment (including renal dialysis), laboratory tests and X-ray, drugs, dressings, general nursing services, and services of interns and residents in medical osteopathic or dentistry training. Inpatient psychiatric hospital care limited to 190-day lifetime maximum. Outpatient hospital diagnostic services. Post-hospital extended-care services, 100 days (including physical, occupational, and speech therapy). Post-hospital home health services, 100 visits. Deductible and coinsurance provisions (see Table 2.C1).

1967

Lifetime reserve of 60 additional days of inpatient hospital services. Outpatient hospital diagnostic services transferred to SMI.

1972

Services of interns and residents in podiatry training.

1980

Unlimited home health visits in a year. Requirement for prior hospitalization eliminated. Home health services provided for up to 4 days a week and up to 21 consecutive days.

Alcohol detoxification facility services.

1981

Part A coinsurance is based on the deductible for the calendar year in which services are received rather than the deductible in effect at the time the beneficiary's spell of illness began, starting in 1982.

Alcohol detoxification facility services eliminated.

1982

Beneficiaries expected to live 6 months or less may elect to receive hospice care benefits instead of other Medicare benefits. May elect maximum of two 90-day and one 30-day hospice care periods, effective Nov. 1, 1983, to Oct. 1, 1986.

1984

For durable medical equipment provided by home health agencies, the payment amount is reduced from 100 percent of costs to 80 percent of reasonable charges.

## **Medicare: History of Provisions**

1986 Set the Part A deductible for 1987 at \$520 with resulting increases in cost sharing. Increased

the Part A deductible annually by the applicable percentage increase in the hospital

prospective payment rates.

Hospice care benefit (enacted in 1982) made permanent.

1987 Specifies in law that in order to be eligible for home health care, a Medicare beneficiary must

have a restricted ability to leave the home, requiring the assistance of another or the aid of a

supportive device (such as crutches, a cane, a wheelchair, or a walker).

Enrollee pays annual hospital deductible (set at \$560 for 1989) and Medicare pays balance

of covered charges, regardless of the number of days of hospitalization (except for psychiatric hospital care, which is still limited by 190-day lifetime maximum).

The number of days in a skilled nursing facility changed to 150 per year. Deletes the

requirement for a prior hospital stay of 3 or more consecutive days.

Expands home health care to provide care for less than 7 days per week and up to 38 consecutive days.

Hospice care extended beyond 210 days when beneficiary is certified as terminally ill.

All 1988 provisions became effective Jan. 1, 1989.

The spell of illness and benefit period coverage of laws prior to 1988 return to the determination of inpatient hospital benefits in 1990 and later. After the deductible is paid in benefit period, Medicare pays 100 percent of covered costs for the first 60 days of inpatient hospital care. Coinsurance applies for the next 30 days in a benefit period.

The requirement for a prior hospital stay of 3 or more consecutive days is reinstated for skilled nursing facility services. Coverage returns to 100 days post-hospital care per spell of illness with a daily coinsurance rate in effect for days 21 through 100.

Home health services return to a limit of 21 consecutive days of care. Provision providing for home health care for fewer than 7 days per week continued due to a court decision.

Hospice care is returned to a lifetime limit of 210 days.

Hospice care is extended beyond 210 days when beneficiary is certified as terminally ill.

Home health services not associated with a hospital or skilled nursing facility stay for individuals enrolled in both HI and SMI are transferred from the HI program to the SMI program, effective January 1998. The HI program will continue to cover the first 100 visits following a hospital stay of at least 3 consecutive days or a skilled-nursing facility stay. The cost to the SMI trust fund of the transferred services will phase in over a 6-year period (that is, the HI trust fund will transfer funds to the SMI trust fund during that period).

Limits on the number of hours and days that home health care can be provided have been clarified. "Part time" now defined as skilled nursing and home health aide services (combined) furnished any number of days per week, for less than 8 hours per day and 28 or fewer hours per week. "Intermittent" now defined as skilled nursing care provided for fewer than 7 days each week, or less than 8 hours each day (combined) for 21 days or less.

Hospice benefit periods are restructured to include two 90-day periods, followed by an unlimited number of 60-day periods.

Medicare coverage provided for a number of prevention initiatives, most of which covered under SMI program. HI program affected mainly by two of the initiatives: (1) annual prostate cancer screening for male beneficiaries aged 50 or older, effective Jan. 1, 2000; and (2) colorectal screening procedures, including fecal-occult blood tests and flexible sigmoidoscopies, for beneficiaries age 50 or older, colonoscopy for beneficiaries at high risk for colorectal cancer, and other procedures, including screening barium enemas under certain circumstances.

1989

1988

1990

The homebound benefit is clarified to specify that benficiaries who require home health services may attend adult day-care for therapeutic, psychosocial, or medical treatment and still remain eligible for the home health benefit. Homebound beneficiaries may also attend religious services without being disqualified from receiving home health benefits.

Effective July 1, 2001, the 24-month waiting period (otherwise required for an individual to establish Medicare eligibility on the basis of a disability) is waived for persons with amyotrophic lateral sclerosis. The entitlement to Medicare begins with the first month of the Social Security Administration's determination of eligibility for Disability Insurance benefits.

There were no changes in 2001 affecting beneficiaries.

# **Supplementary Medical Insurance**

1965

Physician and surgeon services. In-hospital services of anesthesiologists, pathologists, radiologists, and psychiatrists. Limited dental services. Home health services, 100 visits in calendar year. Other medical services including various diagnostic tests, limited ambulance services, prosthetic devices, rental of durable medical equipment used at home (including equipment for dialysis), and supplies used for fractures. For deductible and coinsurance provisions, see Table 2.C1.

Beginning in 1966, the beneficiary pays a \$50 deductible, with a 3-month carryover provision.

1967

Outpatient hospital diagnostic services transferred from HI. Includes physical therapy services in a facility. Purchase of durable medical equipment.

1972

Physical therapy services furnished by a therapist in his or her office or individual's home (calendar year limit of \$100). Chiropractor services (limited to manual manipulation of the spine). Outpatient services include speech pathology services furnished in, or under arrangements with, a facility or agency. Services of a doctor of optometry in furnishing prosthetic lenses.

Beginning in 1973, the beneficiary pays a \$60 deductible.

1977

Services in rural health clinics.

1980

Home health services. Deductible applicable to home health services is eliminated, effective July 1, 1981.

Facility costs of certain surgical procedures performed in freestanding ambulatory surgical centers.

Increase in annual limit for outpatient therapy from \$100 to \$500.

Recognizes comprehensive outpatient rehabilitation facilities as Medicare providers.

Beginning in 1982, the beneficiary pays a \$75 deductible, with the carryover provision eliminated.

1984

Hepatitis B and pneumococcal vaccines and blood clotting factors and necessary supplies are included as Part B benefits. Debridement of mycotic toenails is limited.

For outpatient physical therapy services, includes services of a podiatrist. For outpatient ambulatory surgery, includes services of a dentist and podiatrist furnished in his or her office.

Includes vision care services furnished by an optometrist.

For occupational therapy services, includes services furnished in a skilled nursing facility (when Part A coverage has been exhausted), in a clinic, rehabilitation agency, public health agency, or by an independently practicing therapist.

Includes outpatient (in addition to previously covered inpatient) immunosuppressive drugs for 1 year after covered transplant.

Includes occupational therapy services provided in certain delivery settings.

For ambulatory surgical procedures performed in ambulatory surgical centers, hospital outpatient departments, and certain physician offices, the Part B coinsurance and deductible are no longer waived.

1987

Increases the maximum payment for mental health services and includes outpatient mental health services provided by ambulatory hospital-based or hospital-affiliated programs under the supervision of a physician.

Services provided by clinical social workers when furnished by risk-sharing health maintenance organizations/competitive medical plans, physician assistants in rural health manpower shortage areas, clinical psychologists in rural health clinics and community mental health centers, and certified nurse-midwives.

Coverage of outpatient immunosuppresive drugs (see 1986) is broadened/clarifed to include prescription drugs used in immunosuppressive therapy.

Specifies in law that in order to be eligible for home health care, a Medicare beneficiary must have a restricted ability to leave the home, requiring the assistance of another or the aid of a supportive device (such as crutches, a cane, a wheelchair, or a walker).

Beginning Jan. 1, 1990, the beneficiary pays a \$75 deductible and 20-percent coinsurance, but once out-of-pocket expenses for the deductible and coinsurance exceed \$1,370, Medicare pays 100 percent of allowable charges for remainder of year.

Beginning in 1991, Medicare pays 50 percent of the cost of outpatient prescription drugs above \$600. When fully implemented in 1993, Medicare will pay 80 percent of prescription drug costs above a deductible that assumes that 16.8 percent of Part B enrollees will exceed the deductible.

Certain prescription drugs administered in an outpatient or home setting, including immunosuppressive drugs (previously covered for 1 year after a covered transplant), home intravenous drugs, and certain others, will be covered in 1990 under a new prescription drug provision.

Provisions enacted in 1988 and to begin in 1990 and 1991 are repealed and benefits are restored to levels in effect prior to Jan. 1, 1989.

Limits on mental health benefits eliminated in 1990. Coverage extended to services of clinical psychologists and social workers.

The annual payment limits of \$500 per beneficiary for outpatient physical therapy services and outpatient occupational therapy services, each, are raised to \$750, for 1990 and later. (See 1980.)

Beginning in 1991, routine mammography screenings are covered.

The Part B deductible is set at \$100 in 1991 and subsequent years.

Beginning in 1992, physicians' services are reimbursed on a fee-schedule basis.

Includes coverage of oral, self-administered anticancer drugs.

Lengthens the coverage period for immunosuppressive drugs after a transplant to 18 months in 1995, 24 months in 1996, 30 months in 1997, and 36 months thereafter. (See 1986).

The annual payment limits of \$750 per beneficiary for outpatient physical therapy services and outpatient occupational therapy services, each, are raised to \$900 for 1994 and later. (See 1989.)

Home health services not associated with a hospital or skilled nursing facility stay for individuals enrolled in both HI and SMI are transferred from the HI program to the SMI program, effective January 1998. The HI program will continue to cover the first 100 visits following a hospital stay of at least 3 consecutive days or a skilled nursing facility stay. The

cost to the SMI Trust Fund of the transferred services will phase in over a 6-year period, while the cost of the home health services will phase into the SMI premium over 7 years.

1988

1989

1990

1993

Coverage provided for a number of prevention initiatives, including (1) annual screening mammograms for female beneficiaries age 40 or older, with SMI deductive waived; (2) screening pap smear and pelvic exam (including clinical breast exam) every 3 years or annually for beneficiaries at higher risk, with SMI deductible waived; (3) annual prostate cancer screening for male beneficiaries aged 50 or older, effective Jan. 1, 2000; (4) colorectal screening procedures, including fecal-occult blood tests and flexible sigmoidoscopies, for beneficiaries aged 50 or older, colonoscopy for beneficiaries at high risk for colorectal cancer, and other procedures, including screening barium enemas under certain circumstances; (5) diabetes outpatient self-management training in nonhospital-based programs (previously covered in hospital-based programs only) and blood glucose monitors and testing strips for all diabetics (previously provided for insulin-dependent diabetics only), effective July 1, 1998; (6) procedures to identify bone mass, detect bone loss, or determine bone quality for certain qualified beneficiaries, at frequencies determined by the Secretary of HHS, effective July 1, 1998.

Beginning January 1999, an annual beneficiary limit of \$1,500 will apply to all outpatient physical therapy services, except for services furnished by a hospital outpatient department. A separate \$1,500 limit will also apply to outpatient occupational therapy services, except for services furnished by hospital outpatient departments. Beginning with 2002, these caps will be increased by the percentage increase in the Medical Economic Index. (See 1993.)

The coverage period for immunosuppressive drugs after a transplant is lengthened to 44 months, for individuals who exhaust their 36 months of coverage in 2000. For those exhausting their 36 months of coverage in 2001, at least 8 more months will be covered. (The Secretary of HHS will specify the increase, if any, beyond 8 months.) For those exhausting their 36 months of coverage in 2002, 2003, or 2004, the number of additional months may be more or less than 8. (The Secretary will specify the increase for each of these years.) (See 1993.)

The annual payment limits of \$1,500 per beneficiary for outpatient physical services and outpatient occupational therapy services, each, for services furnished by independent practitioners (that is, not by a hospital outpatient department), are suspended for 2000 and 2001. (See 1997.)

Coverage for screening pap smears and pelvic exams (including a clinical breast exam) is provided every 2 years (increased from every 3 years) beginning July 1, 2001. (Annual coverage continues for beneficiaries at higher risk, and SMI deductible continues to be waived.) (See 1997.)

Annual coverage of glaucoma screenings is provided for certain high-risk beneficiaries, effective Jan. 1, 2002.

Screening colonoscopies are covered for all beneficiaries, not just those at high risk, beginning July 1, 2001. For persons not at high risk, a screening colonoscopy is covered 10 years after a previous one, or 4 years after a screening flexible sigmoidoscopy. (See 1997.)

Coverage is provided for medical nutrition therapy services under certain circumstances for beneficiaries who have diabetes or a renal disease, effective Jan. 1, 2002.

The amount of a beneficiary's copayment for a procedure in a hospital outpatient department is limited, beginning April 1, 2001, to the hospital inpatient deductible applicable for that year. Also, the Secretary of HHS must reduce the effective copayment rate for outpatient services to a maximum rate of 57 percent in 2001 (for services received after April 1); 55 percent in 2002 and 2003; 50 percent in 2004; 45 percent in 2005; and 40 percent in 2006 and later.

Time and budget limitations are removed on the coverage of immunosuppresive drugs, making coverage of these drugs a permanent benefits for beneficiaries who have received a covered organ transplant. (See 1999.)

The annual payment limits of \$1,500 per beneficiary for outpatient physical therapy services and outpatient occupational therapy services, each, for services provided by independent

1999

practitioners (that is, not by a hospital outpatient department), which were suspended for 2000 and 2001, are also suspended for 2002. (See 1999.)

The homebound benefit is clarified to specify that benficiaries who require home health services may attend adult day-care for therapeutic, psychosocial, or medical treatment and still remain eligible for the home health benefit. Homebound beneficiaries may also attend religious services without being disqualified from receiving home health benefits.

Effective July 1, 2001, the 24-month waiting period (otherwise required for an individual to establish Medicare eligibility on the basis of a disability) is waived for persons with amyotrophic lateral sclerosis. The entitlement to Medicare begins with the first month of the Social Security Administration's determination of eligibility for Disability Insurance benefits.

There were no changes in 2001 affecting beneficiaries.

# **Medicare Financing**

# **Hospital Insurance Taxes**

See Table 2.A3.

# **Appropriations from General Revenues**

1965 For HI costs attributable to transitionally insured beneficiaries.

For HI costs attributable to noncontributory wage credits granted for military service prior to 1957 (see Table 2.A2).

For the SMI program, an amount equal to participant premiums.

**1972** For cost of SMI not met by enrollee premiums.

1982 For HI costs attributable to beneficiaries having transitional entitlement based on Medicare-

qualified federal employment.

1983 For HI taxes on noncontributory wage credits granted for military service (a) from the

inception of HI program through 1983 and (b) on a current basis, annually, beginning in 1984

(see Table 2.A2).

# **Participant Premiums**

See also Table 2.C1.

**1965** SMI enrollee premium rate (originally \$3 per month) to be established annually such as to

pay one-half of program costs.

1972 SMI enrollee premium rate increase limited to rate of increase in OASDI cash benefits.

HI premium (originally \$33 per month) to be established annually. Only individuals not otherwise entitled to HI but desiring voluntary participation need to pay the HI premium.

SMI enrollee premiums for July 1983, to Dec. 31, 1983, frozen at premium level of June 30,

1983. Premiums for Jan. 1, 1984, to Dec. 31, 1985, set to cover 25 percent of aged program

costs.

SMI enrollee premiums for Jan. 1, 1986, to Dec. 31, 1987, will be set to cover 25 percent of aged program costs. Increases in the SMI premium may not exceed the dollar amount of the

aged program costs. Increases in the SMI premium may not exceed the dollar amount of the Social Security cost-of-living adjustment.

For calculating the amount of SMI premium surcharge for individuals from age 65 up to age 70 not previously enrolled in SMI, the number of years an individual did not enroll because of

coverage by employer group health insurance will not be taken into account.

Extends through calendar year 1988 the requirement that SMI premiums be set to cover 25 percent of aged program costs and that increases in the SMI premium may not exceed the

dollar amount of the Social Security cost-of-living adjustment.

| Premium-paying individuals who do not purchase Part A coverage within a specific time after becoming eligible because of age are subject to a 10-percent penalty for each 12 months they are late in enrolling. There is a cutoff on the length of time these individuals will have to pay an enrollment penalty. The 10-percent premium penalty would be limited to twice the number of years enrollment was delayed. Therefore, if enrollment were delayed 1 year, the penalty would be assessed for 2 years. Individuals in this category and already enrolled will have the length of time the higher premium was paid credited to them. |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Extends through calendar year 1989 the provisions requiring that the SMI premium be set to cover 25 percent of aged program costs, prohibiting any increase in the premium if there is no Social Security cost-of-living adjustment, and continuing to hold beneficiaries harmless                                                                                                                                                                                                                                                                                                                                                           |

Increases in the SMI premium may not exceed the dollar amount of the Social Security cost-of-living adjustments for 1989 and beyond.

from Social Security check reductions as a result of a premium increase.

or-living adjustification 1909 and beyond.

1989 Extends through calendar year 1990 the requirement that SMI premiums be set to cover 25

percent of aged program costs.

**1990** The SMI premium are \$29.90 in 1991; \$31.80 in 1992; \$36.60 in 1993; \$41.10 in 1994; and

\$46.10 in 1995.

1993 SMI enrollee premiums for Jan. 1, 1996, to Dec. 31, 1998, will be set to cover 25 percent of

aged program costs.

1997 The SMI premium is permanently set at 25 percent of program costs.

**Income from Taxation of OASDI Benefits** 

1993 The additional income tax revenues resulting from the increase in the taxable percentage

applicable to OASDI benefits (an increase from 50 percent to 85 percent, see Table 2.A31)

are transferred to the HI Trust Fund.

**Interfund Borrowing** 

1981 See Table 2.A6.1983 See Table 2.A6.

# Medicaid

The following are brief summaries of complex subjects. They should be used only as overviews and general guides to the Medicare and Medicaid programs. The views expressed herein do not necessarily reflect the policies or legal positions of the Centers for Medicare & Medicaid Services or the Department of Health and Human Services (HHS). These summaries do not render any legal, accounting, or other professional advice, nor are they intended to explain fully all of the provisions or exclusions of the relevant laws, regulations, and rulings of the Medicare and Medicaid programs. Original sources of authority should be researched and utilized.

# Overview

Title XIX of the Social Security Act is a federal/state entitlement program that pays for medical assistance for certain individuals and families with low incomes and resources. This program, known as Medicaid, became law in 1965 as a cooperative venture jointly funded by the federal and state governments (including the District of Columbia and the Territories) to assist states in furnishing medical assistance to eligible needy persons. Medicaid is the largest source of funding for medical and health-related services for America's poorest people.

Within broad national guidelines established by federal statutes, regulations, and policies, each state

(1) establishes its own eligibility standards; (2) determines the type, amount, duration, and scope of services; (3) sets the rate of payment for services; and (4) administers its own program. Medicaid policies for eligibility, services, and payment are complex and vary considerably, even among states of similar size or geographic proximity. Thus, a person who is eligible for Medicaid in one state may not be eligible in another state, and the services provided by one state may differ considerably in amount, duration, or scope from services provided in a similar or neighboring state. In addition, state legislatures may change Medicaid eligibility and/or services during the year.

# Basis of Eligibility and Maintenance Assistance Status

Medicaid does not provide medical assistance for all poor persons. Under the broadest provisions of the federal statute, Medicaid does *not* provide health care services even for very poor persons *unless* they are in one of the groups designated below. Low income is only one test for Medicaid eligibility for those within these groups; their resources also are tested against threshold levels (as determined by each state within federal guidelines).

States generally have broad discretion in determining which groups their Medicaid programs will cover and the financial criteria for Medicaid eligibility. To be eligible for federal funds, however, states are *required* to provide Med-

icaid coverage for certain individuals who receive federally assisted income-maintenance payments, as well as for related groups not receiving cash payments. In addition to their Medicaid programs, most states have additional "state-only" programs to provide medical assistance for specified poor persons who do not qualify for Medicaid. Federal funds are *not* provided for state-only programs. The following enumerates the mandatory Medicaid "categorically needy" eligibility groups for which federal matching funds are provided:

- Individuals are generally eligible for Medicaid if they meet the requirements for the Aid to Families with Dependent Children (AFDC) program that were in effect in their state on July 16, 1996, or—at state option—more liberal criteria.
- Children under age 6 whose family income is at or below 133 percent of the federal poverty level (FPL).
- Pregnant women whose family income is below 133
  percent of the FPL (services to these women are limited to those related to pregnancy, complications of
  pregnancy, delivery, and postpartum care).
- Supplemental Security Income (SSI) recipients in most states (some states use more restrictive Medicaid eligibility requirements that pre-date SSI).
- Recipients of adoption or foster care assistance under Title IV of the Social Security Act.
- Special protected groups (typically individuals who lose their cash assistance due to earnings from work or from increased Social Security benefits, but who may keep Medicaid for a period of time).
- All children born after September 30, 1983 who are under age 19, in families with incomes at or below the FPL.
- Certain Medicare beneficiaries (described later).

States also have the *option* of providing Medicaid coverage for other "categorically related" groups. These optional groups share characteristics of the mandatory groups (that is, they fall within defined categories), but the eligibility criteria are somewhat more liberally defined. The broadest optional groups for which states will receive federal matching funds for coverage under the Medicaid program include the following:

- Infants up to age 1 and pregnant women not covered under the mandatory rules whose family income is no more than 185 percent of the FPL (the percentage amount is set by each state).
- Children under age 21 who meet the AFDC income and resources requirements that were in effect in their state on July 16, 1996.

- Institutionalized individuals eligible under a "special income level" (the amount is set by each state—up to 300 percent of the SSI federal benefit rate).
- Individuals who would be eligible if institutionalized, but who are receiving care under home and community-based services waivers.
- Certain aged, blind, or disabled adults who have incomes above those requiring mandatory coverage, but below the FPL.
- · Recipients of state supplementary income payments.
- Certain working-and-disabled persons with family income less than 250 percent of the FPL who would qualify for SSI if they did not work.
- TB-infected persons who would be financially eligible for Medicaid at the SSI income level if they were within a Medicaid-covered category (however, coverage is limited to TB-related ambulatory services and TB drugs).
- Certain uninsured or low-income women who are screened for breast or cervical cancer through a program administered by the Centers for Disease Control. The Breast and Cervical Cancer Prevention and Treatment Act of 2000 (Public Law 106-354) provides these women with medical assistance and follow-up diagnostic services through Medicaid.
- "Optional targeted low-income children" included within the state Children's Health Insurance Program (SCHIP) established by the Balanced Budget Act (BBA) of 1997 (Public Law 105-33).
- · "Medically needy" persons (described below).

The medically needy (MN) option allows states to extend Medicaid eligibility to additional persons. These persons would be eligible for Medicaid under one of the mandatory or optional groups, except that their income and/or resources are above the eligibility level set by their state. Persons may qualify immediately or may "spend down" by incurring medical expenses that reduce their income to or below their state's MN income level.

Medicaid eligibility and benefit provisions for the medically needy do not have to be as extensive as for the categorically needy, and may be quite restrictive. Federal matching funds are available for MN programs. However, if a state elects to have a MN program, there are federal requirements that certain groups and certain services must be included; that is, children under age 19 and pregnant women who are medically needy must be covered, and prenatal and delivery care for pregnant women, as well as ambulatory care for children, must be provided. A state may elect to provide MN eligibility to certain additional groups and may elect to provide certain additional services within its MN program. As of August 2002, thirty-six states have elected to have a MN program and are providing at least some MN services to at least some MN beneficiaries. All remaining states utilize the "special income level" option to extend Medicaid to the "near poor" in medical institutional settings. The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193)— known as the "welfare reform" bill—made restrictive changes regarding eligibility for SSI coverage that impacted the Medicaid program. For example, legal resident aliens and other qualified aliens who entered the United States on or after August 22, 1996 are ineligible for Medicaid for 5 years. Medicaid coverage for most aliens entering before that date and coverage for those eligible after the 5-year ban are state options; emergency services, however, are mandatory for both of these alien coverage groups. For aliens who lose SSI benefits because of the new restrictions regarding SSI coverage, Medicaid can continue only if these persons can be covered for Medicaid under some other eligibility status (again with the exception of emergency services, which are mandatory). Public Law 104-193 also affected a number of disabled children, who lost SSI as a result of the restrictive changes; however, their eligibility for Medicaid was reinstituted by Public Law 105-33, the BBA.

In addition, welfare reform repealed the open-ended federal entitlement program known as Aid to Families with Dependent Children (AFDC) and replaced it with Temporary Assistance for Needy Families (TANF), which provides states with grants to be spent on time-limited cash assistance. TANF generally limits a family's lifetime cash welfare benefits to a maximum of 5 years and permits states to impose a wide range of other requirements as well—in particular, those related to employment. However, the impact on Medicaid eligibility is not expected to be significant. Under welfare reform, persons who would have been eligible for AFDC under the AFDC requirements in effect on July 16, 1996 generally will still be eligible for Medicaid. Although most persons covered by TANF will receive Medicaid, it is not required by law.

Title XXI of the Social Security Act, known as the state Children's Health Insurance Program (SCHIP), is a new program initiated by the BBA. In addition to allowing states to craft or expand an existing state insurance program, SCHIP provides more federal funds for states to expand Medicaid eligibility to include a greater number of children who are currently uninsured. With certain exceptions, these are low-income children who would not qualify for Medicaid based on the plan that was in effect on April 15, 1997. Funds from SCHIP also may be used to provide medical assistance to children during a presumptive eligibility period for Medicaid. This is one of several options from which states may select to provide health care coverage for more children, as prescribed within the BBA's Title XXI program.

Medicaid coverage may begin as early as the third month prior to application—*if* the person would have been eligible for Medicaid had he or she applied during that time. Medicaid coverage generally stops at the end of the month

in which a person no longer meets the criteria of any Medicaid eligibility group. The BBA allows states to provide 12 months of continuous Medicaid coverage (without reevaluation) for eligible children under the age of 19.

The Ticket to Work and Work Incentives Improvement Act of 1999 (Public Law 106-170) provides or continues Medicaid coverage to certain disabled beneficiaries who work despite their disability. Those with higher incomes may pay a sliding scale premium based on income.

# Scope of Medicaid Services

Title XIX of the Social Security Act allows considerable flexibility within the states' Medicaid plans. However, some federal requirements are mandatory if federal matching funds are to be received. A state's Medicaid program *must* offer medical assistance for certain *basic* services to most categorically needy populations. These services generally include the following:

- · Inpatient hospital services.
- · Outpatient hospital services.
- · Prenatal care.
- · Vaccines for children.
- Physician services.
- · Nursing facility services for persons aged 21 or older.
- · Family planning services and supplies.
- · Rural health clinic services.
- Home health care for persons eligible for skilled nursing services.
- Laboratory and x-ray services.
- · Pediatric and family nurse practitioner services.
- · Nurse-midwife services.
- Federally qualified health-center (FQHC) services, and ambulatory services of an FQHC that would be available in other settings.
- Early and periodic screening, diagnostic, and treatment (EPSDT) services for children under age 21.

States may also receive federal matching funds to provide certain *optional* services. Following are the most common of the 34 currently approved optional Medicaid services:

- · Diagnostic services.
- · Clinic services.
- Intermediate care facilities for the mentally retarded (ICFs/MR).
- · Prescribed drugs and prosthetic devices.
- Optometrist services and eveglasses.
- · Nursing facility services for children under age 21.
- · Transportation services.
- Rehabilitation and physical therapy services.
- Home and community-based care to certain persons with chronic impairments.

The BBA included a state option known as Programs of All-inclusive Care for the Elderly (PACE). PACE provides an alternative to institutional care for persons aged 55 or older who require a nursing facility level of care. The PACE team offers and manages all health, medical, and social services and mobilizes other services as needed to provide preventative, rehabilitative, curative, and supportive care. This care, provided in day health centers, homes, hospitals, and nursing homes, helps the person maintain independence, dignity, and quality of life. PACE functions within the Medicare program as well. Regardless of source of payment, PACE providers receive payment only through the PACE agreement and must make available all items and services covered under both Titles XVIII and XIX, without amount, duration, or scope limitations and without application of any deductibles, copayments, or other cost sharing. The individuals enrolled in PACE receive benefits solely through the PACE program.

# **Amount and Duration of Medicaid Services**

Within broad federal guidelines and certain limitations, states determine the amount and duration of services offered under their Medicaid programs. States may limit, for example, the number of days of hospital care or the number of physician visits covered. Two restrictions apply: (1) limits must result in a sufficient level of services to reasonably achieve the purpose of the benefits; and (2) limits on benefits may not discriminate among beneficiaries based on medical diagnosis or condition.

In general, states are required to provide comparable amounts, duration, and scope of services to all categorically needy and categorically related eligible persons. There are two important exceptions: (1) Medically necessary health care services that are identified under the EPSDT program for eligible children, and that are within the scope of mandatory or optional services under federal law, must be covered even if those services are not included as part of the covered services in that state's Plan; and (2) states may request "waivers" to pay for otherwise uncovered home and community-based services (HCBS) for Medicaid-eligible persons who might otherwise be institutionalized. As long as the services are cost effective. states have few limitations on the services that may be covered under these waivers (except that, other than as a part of respite care, states may not provide room and board for the beneficiaries). With certain exceptions, a state's Medicaid program must allow beneficiaries to have some informed choices among participating providers of health care and to receive quality care that is appropriate and timely.

# **Payment for Medicaid Services**

Medicaid operates as a vendor payment program. States may pay health care providers directly on a fee-for-service basis, or states may pay for Medicaid services

through various prepayment arrangements, such as health maintenance organizations (HMOs). Within federally imposed upper limits and specific restrictions, each state for the most part has broad discretion in determining the payment methodology and payment rate for services. Generally, payment rates must be sufficient to enlist enough providers so that covered services are available at least to the extent that comparable care and services are available to the general population within that geographic area. Providers participating in Medicaid must accept Medicaid payment rates as payment in full. States must make additional payments to qualified hospitals that provide inpatient services to a disproportionate number of Medicaid beneficiaries and/or to other low-income or uninsured persons under what is known as the "disproportionate share hospital" (DSH) adjustment. During 1988-1991, excessive and inappropriate use of the DSH adjustment resulted in rapidly increasing federal expenditures for Medicaid. Under legislation passed in 1991, 1993, and again within the BBA of 1997, the federal share of payments to DSH hospitals was somewhat limited. However, the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000 (Public Law 106-554) increased DSH allotments for 2001 and 2002 and made other changes to DSH provisions that resulted in increased costs to the Medicaid program.

States may impose nominal deductibles, coinsurance, or copayments on some Medicaid beneficiaries for certain services. The following Medicaid beneficiaries, however, must be excluded from cost sharing: pregnant women, children under age 18, and hospital or nursing home patients who are expected to contribute most of their income to institutional care. In addition, all Medicaid beneficiaries must be exempt from copayments for emergency services and family planning services.

The federal government pays a share of the medical assistance expenditures under each state's Medicaid program. That share, known as the Federal Medical Assistance Percentage (FMAP), is determined annually by a formula that compares the state's average per capita income level with the national income average. States with a higher per capita income level are reimbursed a smaller share of their costs. By law, the FMAP cannot be lower than 50 percent or higher than 83 percent. In 2002, the FMAPs varied from 50 percent in eleven states to 76.09 percent in Mississippi, and averaged 57 percent overall. The BBA also permanently raised the FMAP for the District of Columbia from 50 percent to 70 percent and raised the FMAP for Alaska from 50 percent to 59.8 percent through 2000. The BIPA of 2000 further adjusted Alaska's FMAP to a higher level for 2001–2005. The federal government pays states a higher share for children covered through the SCHIP program. This "enhanced" FMAP averages about 70 percent for all states, compared to the general Medicaid average of 57 percent.

The federal government also reimburses states for 100 percent of the cost of services provided through facilities of the Indian Health Service, provides financial help to the twelve states that furnish the highest number of emergency services to undocumented aliens, and shares in each state's expenditures for the administration of the Medicaid program. Most administrative costs are matched at 50 percent, although higher percentages are paid for certain activities and functions, such as development of mechanized claims processing systems.

Except for the SCHIP program, the Qualifying Individuals (QI) program (described later), and DSH payments, federal payments to states for medical assistance have no set limit (cap). Rather, the federal government matches (at FMAP rates) state expenditures for the mandatory services, as well as for the optional services that the individual state decides to cover for eligible beneficiaries, and matches (at the appropriate administrative rate) all necessary and proper administrative costs. The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (as incorporated into Public Law 106-113, the appropriations bill for the District of Columbia for fiscal year 2000) increased the amount that certain states and the territories can spend on DSH and SCHIP payments, respectively. The BIPA set upper payment limits for inpatient and outpatient services provided by certain types of facilities.

## **Summary and Trends**

Medicaid was initially formulated as a medical care extension of federally funded programs providing cash income assistance for the poor, with an emphasis on dependent children and their mothers, the disabled, and the elderly. Over the years, however, Medicaid eligibility has been incrementally expanded beyond its original ties with eligibility for cash programs. Legislation in the late 1980s assured Medicaid coverage to an expanded number of low-income pregnant women, poor children, and to some Medicare beneficiaries who are not eligible for any cash assistance program. Legislative changes also focused on increased access, better quality of care, specific benefits, enhanced outreach programs, and fewer limits on services.

In most years since its inception, Medicaid has had very rapid growth in expenditures. This rapid growth has been due primarily to the following factors:

- The increase in size of the Medicaid-covered populations as a result of federal mandates, population growth, and the earlier economic recession. In recent years Medicaid enrollment has declined somewhat.
- The expanded coverage and utilization of services.
- The DSH payment program, coupled with its inappropriate use to increase federal payments to states.
- The increase in the number of very old and disabled persons requiring extensive acute and/or long-term health care and various related services.

- The results of technological advances to keep a greater number of very low-birth-weight babies and other critically ill or severely injured persons alive and in need of continued extensive and very costly care.
- The increase in drug costs and the availability of new expensive drugs.
- The increase in payment rates to providers of health care services, when compared to general inflation.

As with all health insurance programs, most Medicaid beneficiaries incur relatively small average expenditures per person each year, and a relatively small proportion incurs very large costs. Moreover, the average cost varies substantially by type of beneficiary. National data for 1999 (excluding Hawaii), for example, indicate that Medicaid payments for services for 20.5 million children, who constitute 51 percent of all Medicaid beneficiaries, average about \$1,170 per child (a relatively small average expenditure per person). Similarly, for 8.4 million adults, who comprise 20 percent of beneficiaries, payments average about \$1,935 per person. However, certain other specific groups have much larger per-person expenditures. Medicaid payments for services for 4.1 million aged, constituting 10 percent of all Medicaid beneficiaries, average about \$10,335 per person; for 7.3 million disabled, who comprise 18 percent of beneficiaries, payments average about \$9,000 per person. When expenditures for these high- and lower-cost beneficiaries are combined, the 1999 payments to health care vendors for 40 million Medicaid beneficiaries average \$3,825 per person.

Long-term care is an important provision of Medicaid that will be increasingly utilized as our nation's population ages. The Medicaid program paid for over 40 percent of the total cost of care for persons using nursing facility or home health services in 2000. National data for 1999 (excluding Hawaii) show that Medicaid payments for nursing facility services (excluding ICFs/MR) totaled \$33.1 billion for more than 1.6 million beneficiaries of these services—an average expenditure of \$20,690 per nursing home beneficiary. The national data also show that Medicaid payments for home health services totaled \$2.9 billion for more than 800,000 beneficiaries—an average expenditure of \$3,625 per home health care beneficiary. With the percentage of our population who are elderly or disabled increasing faster than that of the younger groups, the need for long-term care is expected to increase.

Another significant development in Medicaid is the growth in managed care as an alternative service delivery concept different from the traditional fee-for-service system. Under managed care systems, HMOs, prepaid health plans (PHPs), or comparable entities agree to provide a specific set of services to Medicaid enrollees, usually in return for a predetermined periodic payment per enrollee. Managed care programs seek to enhance access to quality care in a cost-effective manner. Waivers may provide the states with greater flexibility in the design and implementa-

tion of their Medicaid managed care programs. Waiver authority under sections 1915(b) and 1115 of the Social Security Act is an important part of the Medicaid program. Section 1915(b) waivers allow states to develop innovative health care delivery or reimbursement systems. Section 1115 waivers allow statewide health care reform experimental demonstrations to cover uninsured populations and to test new delivery systems without increasing costs. Finally, the BBA provided states a new option to use managed care. The number of Medicaid beneficiaries enrolled in some form of managed care program is growing rapidly, from 14 percent of enrollees in 1993 to 57 percent in 2001.

More than 40 million persons received health care services through the Medicaid program in fiscal year (FY) 1999 (the last year for which beneficiary data are available). In FY 2001, total outlays for the Medicaid program (federal and state) were \$227.8 billion, including direct payment to providers of \$162.6 billion, payments for various premiums (for HMOs, Medicare, etc.) of \$37.6 billion, payments to disproportionate share hospitals of \$15.9 billion, and administrative costs of \$11.7 billion. Outlays under the SCHIP program in FY 2001 were \$3.8 billion. With no changes to either program, expenditures under Medicaid and SCHIP are projected to reach \$394 billion and \$7.2 billion, respectively, by FY 2007.

## The Medicaid-Medicare Relationship

Medicare beneficiaries who have low incomes and limited resources may also receive help from the Medicaid program. For such persons who are eligible for *full* Medicaid coverage, the Medicare health care coverage is supplemented by services that are available under their state's Medicaid program, according to eligibility category. These additional services may include, for example, nursing facility care beyond the 100-day limit covered by Medicare, prescription drugs, eyeglasses, and hearing aids. For persons enrolled in both programs, any services that are covered by Medicare are paid for by the Medicare program before any payments are made by the Medicaid program, since Medicaid is always the "payer of last resort."

Certain other Medicare beneficiaries may receive help with Medicare premium and cost-sharing payments through their state Medicaid program. Qualified Medicare Beneficiaries (QMBs) and Specified Low-Income Medicare Beneficiaries (SLMBs) are the best-known categories and the largest in numbers. QMBs are those Medicare beneficiaries who have resources at or below twice the standard allowed under the SSI program, and incomes at or below 100 percent of the FPL. For QMBs, Medicaid pays the Hospital Insurance (HI) and Supplementary Medical Insurance (SMI) premiums and the Medicare coinsurance and deductibles, subject to limits that states may impose on payment rates. SLMBs are Medicare beneficiaries with resources like the QMBs, but with incomes that are higher, though still less than 120 percent of the FPL. For SLMBs,

the Medicaid program pays only the SMI premiums. A third category of Medicare beneficiaries who may receive help consists of disabled-and-working individuals. According to the Medicare law, disabled-and-working individuals who previously qualified for Medicare because of disability, but who lost entitlement because of their return to work (despite the disability), are allowed to purchase Medicare HI and SMI coverage. If these persons have incomes below 200 percent of the FPL but do not meet any other Medicaid assistance category, they may qualify to have Medicaid pay their HI premiums as Qualified Disabled and Working Individuals (QDWIs).

For Medicare beneficiaries with incomes that are above 120 percent and less than 175 percent of the FPL, the BBA establishes a capped allocation to states, for each of the 5 years beginning January 1998, for payment of all or some of the Medicare SMI premiums. These beneficiaries are known as Qualifying Individuals (QIs). Unlike QMBs and SLMBs, who may be eligible for other Medicaid benefits in addition to their QMB/SLMB benefits, the QIs cannot be otherwise eligible for medical assistance under a state plan. The payment of this QI benefit is 100 percent federally funded, up to the state's allocation.

When all these categories are taken into account, Medicaid is estimated to provide some level of supplemental health coverage for about 6.5 million Medicare beneficiaries.

Note: Medicaid data are based on the projections of the Mid-Session Review of the President's Fiscal Year 2003 Budget and are consistent with data received from the states on the Forms HCFA-2082, HCFA-37, and HCFA-64.

# **Unemployment Insurance**

Through federal and state cooperation, unemployment insurance programs are designed to provide benefits to regularly employed members of the labor force who become involuntarily unemployed and who are able and willing to accept suitable employment. Workers in all 50 states, the District of Columbia, Puerto Rico, and the Virgin Islands are covered under unemployment insurance programs.

To induce states to enact unemployment insurance laws, the Social Security Act of 1935 provided a tax offset incentive. A uniform national tax was imposed on payrolls of industrial and commercial employers who employed eight or more workers in 20 or more weeks in a calendar year. Employers who paid taxes to a state with an approved unemployment insurance law could credit (offset) up to 90 percent of the state tax against the federal tax. This insured that employers in states without an unemployment insurance law would not have an advantage competing with similar businesses in states with such a law because they would still be subject to the federal payroll tax, and their employees would not be eligible for benefits.

In addition, the Social Security Act authorized grants to states to meet the costs of administering the state systems. By July 1937, all 48 states, the then territories of Alaska and Hawaii, and the District of Columbia had passed unemployment insurance laws. Later, Puerto Rico adopted its own program, which was incorporated in 1961 into the federal-state system. A similar program for workers in the Virgin Islands was added in 1978.

If employers are to receive an offset against federal taxes and if states are to receive federal grants for administration, federal law requires state unemployment insurance programs to meet certain requirements. These requirements are intended to assure that a state participating in the program has an unemployment insurance system that is fairly administered and financially secure.

One requirement is that all contributions collected under state laws be deposited in the unemployment trust fund of the U.S. Treasury Department. The fund is invested as a whole, but each state has a separate account to which its deposits and its share of interest on investments are credited. At any time, a state may withdraw money from its account in the trust fund, but only to pay benefits. Thus, unlike the situation in the majority of states having workers' compensation and temporary disability insurance laws, unemployment insurance benefits are paid exclusively through a public fund. Private plans cannot be substituted for the state plan.

Aside from federal standards, each state has major responsibility for the content and development of its unemployment insurance law. The state itself decides the amount and duration of benefits (except for certain federal requirements concerning Federal-State Extended Bene-

fits), the contribution rates (with limitations), and, in general, the eligibility requirements and disqualification provisions. The states also directly administer the programs collecting contributions, maintaining wage records (where applicable), taking claims, determining eligibility, and paying benefits to unemployed workers.

### Coverage

Originally, coverage had been limited to employment covered by the Federal Unemployment Tax Act (FUTA), which relates primarily to industrial and commercial workers in private industry. However, several federal laws added substantially to the number and types of workers protected under the state programs, such as the Employment Security Amendments of 1970 and the Unemployment Compensation Amendments of 1976.

Private employers in industry and commerce are subject to the law if they have one or more individuals employed on 1 day in each of 20 weeks during the current or preceding year, or if they paid wages of \$1,500 or more during any calendar quarter in the current or preceding year.

Agricultural workers are covered on farms with a quarterly payroll of at least \$20,000 or employing 10 or more employees in 20 weeks of the year. Domestic employees in private households are subject to FUTA if their employer pays wages of \$1,000 or more in a calendar quarter. Excluded from coverage are workers employed by their families and the self-employed.

Before 1976, employment in state and local governments and nonprofit organizations were exempt from FUTA. However, as a result of federal legislation enacted in 1976, most employment in these groups must now be covered by state law as a condition for securing federal approval of the state law. Under this form of coverage, local government and nonprofit employers have the option of making contributions as under FUTA or of reimbursing the state for benefit expenditures actually made. Elected officials, legislators, members of the judiciary, and the state National Guard are still excluded, as are employees of nonprofit organizations that employ fewer than four workers in 20 weeks in the current or preceding calendar year. Many states have extended coverage beyond that provided by federal legislation.

Through special federal legislation, federal civilian employees and ex-servicemembers of the armed forces were brought under the unemployment insurance system. Benefits for those persons are financed through federal funds but are administered by the states and paid in accordance with the provisions of the state laws. A separate unemployment insurance law enacted by Congress covers railroad workers.

Amendments to FUTA made in 2000 added Indian tribes to the set of entities for whom coverage is required, although they are not liable for FUTA taxes. As a result, workers performing services for tribes are now potentially eligible to receive Unemployment Insurance benefits. Coverage is required when service is performed for any Indian tribe, band, nation, or other organized group community which is recognized as eligible for federal assistance because of their status as Indians. The same permissible exclusion from coverage that are applicable to other governmental entities also apply to services performed for Indian tribes. If an Indian tribe fails to make payments to states as required, the tribe loses its FUTA exemption and may lose coverage.

## **Eligibility for Benefits**

Unemployment benefits are available as a matter of right (without a means test) to unemployed workers who have demonstrated their attachment to the labor force by a specified amount of recent work or earnings in covered employment. All workers whose employers contribute to or make payments in lieu of contributions to state unemployment funds, federal civilian employees, and ex-service-members are eligible if they are involuntarily unemployed, able to work, available for work, and actively seeking work. Workers must also meet the eligibility and qualifying requirements of the state law and be free from disqualifications. Workers who meet these eligibility conditions may still be denied benefits if they are found to be responsible for their own unemployment.

#### **Work Requirements**

A worker's monetary benefit rights are based on his or her employment in covered work over a prior reference period called the "base period," and these benefit rights remain fixed for a "benefit year." In most states, the base period is the first 4 quarters of the last 5 completed calendar quarters preceding the claim for unemployment benefits

#### **Benefits**

Under all state laws, the weekly benefit amount—that is, the amount payable for a week of total unemployment—varies with the worker's past wages within certain minimum and maximum limits. In most states, the formula is designed to compensate for a fraction of the usual weekly wage, normally about 50 percent, subject to specified dollar maximums.

Three-fourths of the laws use a formula that computes weekly benefits as a fraction of wages in one or more quarters of the base period. Most commonly, the fraction is taken of wages in the quarter during which wages were highest because this quarter most nearly reflects full-time work. In most of these states, the same fraction is used at

all benefit levels. The other laws use a weighted schedule that gives a greater proportion of the high-quarter wages to lower paid workers than to those earning more.

Each state establishes a ceiling on the weekly benefit amount and no worker may receive an amount larger than the ceiling. The maximum may be either a fixed dollar amount or a flexible amount. Under the latter arrangement, which has been adopted in 35 jurisdictions, the maximum is adjusted automatically in accordance with the weekly wages of covered employees.

Twelve states provide additional allowances for certain dependents. They all include children under ages 16, 18, or 19 (and, generally, older if incapacitated); 8 states include a nonworking spouse; and 2 states consider other dependent relatives. The amount allowed per dependent varies considerably by state but generally is \$24 or less per week and, in the majority of states, the amount is the same for each dependent.

All but 12 states require a waiting period of 1 week of total unemployment before benefits can begin. Four states pay benefits retroactively for the waiting period if unemployment lasts a certain period or if the employee returns to work within a specified period.

Except for two jurisdictions, states provide a statutory maximum duration of 26 weeks of benefits in a benefit year. However, jurisdictions vary the duration of benefits through various formulas.

#### **Extended Benefits**

In the 1970s, a permanent federal-state program of Extended Benefits (EB) was established for workers who exhaust their entitlement to regular state benefits during periods of high unemployment. The program is financed equally from federal and state funds. Employment conditions in an individual state trigger Extended Benefits. This happens when the unemployment rate among insured workers in a state averages 5 percent or more over a 13week period, and is at least 20 percent higher than the rate for the same period in the 2 preceding years. If the insured unemployment rate reaches 6 percent, a state may by state law disregard the 20-percent requirement in initiating Extended Benefits. Once triggered, Extended Benefit provisions remain in effect for at least 13 weeks. When a state's benefit period ends, Extended Benefits to individual workers also end, even if they have received less than their potential entitlement and are still unemployed. Further, once a state's benefit period ends, another statewide period cannot begin for at least 13 weeks.

State law determines most eligibility conditions for Extended Benefits and the weekly benefit payable. However, under federal law a claimant must have had 20 weeks in full-time employment (or the equivalent in insured wages) and must meet special work requirements. A worker who has exhausted his or her regular benefits is eligible for a 50-percent increase in duration of benefits for a

#### **Unemployment Insurance**

maximum of 13 weeks of Extended Benefits. There is, however, an overall maximum of 39 weeks of regular and Extended Benefits. Extended Benefits are payable at the same rate as the weekly amount under the regular state program.

Prior to the 1992 legislation, the EB program was based on the insured unemployment rate (IUR)—the number of unemployed workers receiving benefits in a state as a percentage of the number of persons in unemployment—insurance covered employment in that state. By definition, the IUR does not include workers who have exhausted their benefits but are still unemployed.

The 1992 legislation (P.L. 102-318) provided states the option of adopting an additional formula for triggering the permanent Extended Benefits program. Effective March 1993, states had the option of amending their laws to use alternative total unemployment rate triggers in addition to the current insured unemployment rate triggers. Under this option, Extended Benefits would be paid when (1) the state's seasonally adjusted total unemployment rate for the most recent 3 months is at least 6.5 percent, and (2) that rate is at least 110 percent of the state average total unemployment rate in the corresponding 3-month period in either of the 2 preceding years.

States triggering on to the Extended Benefits program under other triggers would provide the regular 26 weeks of unemployment benefits in addition to 13 weeks of Extended Benefits, (which is the same number of weeks of benefits provided previously). In addition, states that have chosen the total unemployment rate option will also amend their state laws to add an additional 7 weeks of Extended Benefits (for a total of 20 weeks) where the total unemployment rate is at least 8 percent and is 110 percent of the state's total unemployment rate for the same 3 months in either of the 2 preceding years. As of April 13, 2002, extended Benefits were payable for 13 weeks in Alaska, Idaho, Oregon, and Washington.

# Workers' Compensation

Workers' compensation was the first form of social insurance to develop widely in the United States. It is designed to provide cash benefits and medical care when employees suffer work-related injuries or illnesses, and survivor's benefits to the dependents of workers whose deaths result from a work-related incident. In exchange for receiving benefits, workers who receive workers' compensation are generally not allowed to bring a tort suit against their employers for damages of any kind.

The federal government was the first to establish a workers' compensation program, covering its civilian employees with an act that was passed in 1908 to provide benefits for workers engaged in hazardous work. The remaining federal workforce was covered in 1916. Nine states enacted workers' compensation laws in 1911. By 1920, all but seven states and the District of Columbia had workers' compensation laws.

Today each of the 50 states, the District of Columbia, Puerto Rico, and the Virgin Islands has its own program. The federal government covers its employees through its own program. It also administers the Longshore and Harbor Workers' Compensation Act, enacted in 1927, which covers longshore and harbor workers throughout the United States.

Coal miners suffering from pneumoconiosis, or black lung disease, are covered by the Black Lung Benefits Act of 1972, with the initial benefits enacted as part of the Coal Mine Health and Safety Act of 1969. Under this program, monthly cash benefits are payable to miners disabled by black lung disease and to their dependents or survivors. Medical benefits are also payable on the basis of a diagnosis of pneumoconiosis.

The Energy Employees Occupational Illness Compensation Program Act of 2000 instituted a new program that covers employees, contractors, and sub-contractors of the U.S. Department of Energy (DOE) for exposure to beryllium and the contraction of chronic beryllium disease. In addition, employees of private companies providing beryllium to DOE are covered. Employees' survivors also receive cash benefits.

This same act also covers employees disabled or killed by cancers that developed after beginning employment at a DOE or an atomic weapons facility, as long as the cancer was at least "as likely as not" related to this employment, subject to a number of guidelines relating to radiation exposure, type of cancer, and other relevant factors. It also provides benefits for silica-related diseases and to uranium miners and their survivors who have received lump-sum payments under the Radiation Exposure Compensation Act, and establishes an Office of Worker Advocacy in the Department of Energy to deal with other claims of work-related occupational disease.

### Coverage

In 2000, state and federal workers' compensation laws covered about 123.7 million employees. Covered payroll in 2000—that is, total wages paid to covered workers—was \$4.3 trillion.

Common exemptions from coverage are domestic service, agricultural employment, small employers, and casual labor. However, 39 programs have some coverage for agricultural workers, and 25 programs have some coverage for domestic workers.

Many programs exempt employees of nonprofit, charitable, or religious institutions. The coverage of state and local public employees differs widely from one state program to another.

Two other major groups outside the coverage of workers' compensation laws are railroad employees engaged in interstate commerce and seamen in the U.S. Merchant Marine. Those workers have health insurance and short-term and long-term cash benefit plans that cover disabilities whether or not the conditions are work-related. In addition, under federal laws they retain the right to bring tort suits against their employers for negligence in the case of work-related injuries or illness.

The programs are compulsory for most private employment, except in Texas, where it is elective. If Texas employers reject it, they lose the customary common-law defenses against suits by employees in private industry.

#### **Benefits**

The benefits provided under workers' compensation include periodic cash payments and medical services to the worker during the period of disablement for the disabling condition. They also include death and funeral benefits to the workers' survivors. Lump-sum settlements are permitted under most programs.

Approximately three-fourths of all workers' compensation cases involve only medical benefits. Cash wage replacement benefits are categorized according to the duration and severity of the worker's disability.

#### **Temporary and Permanent Total Disability**

A large majority of compensation cases involving cash payments involve temporary total disability. That is, employees are unable to work at all while they are recovering from the injury but they are expected to recover. When workers' lost time exceeds the waiting period (3 to 7 days, depending on the state) they receive a percentage of their weekly wages—typically two-thirds—up to a maximum weekly amount. The maximum generally being set at some percentage of the states average weekly wage, ranging from 66-2/3 percent to 200 percent, but typically 100 percent.

In some cases, workers return to work prior to the date they reach maximum medical improvement and thus have reduced responsibilities and an accompanying lower salary. In those cases, they receive temporary partial disability benefits.

After the date of maximum medical improvement, if a disability is severe enough, the worker receives permanent total disability benefits. Very few workers' compensation cases are found to have permanent total disabilities.

## **Permanent Partial Disability**

If the permanent disability of a worker is only partial and may or may not lessen work ability, permanent partial disability benefits are payable. The system for determining benefits in these cases is very complex and varies significantly across jurisdictions. Some states provide benefits based on an impairment rating scheme. The level of impairment, often expressed as a percentage of total disability, is used to determine the benefit amount. Some states provide benefits based on the loss of earning capacity. They use impairment ratings with modifications based on vocational factors, such as the worker's education, job experience, and age. Other states use systems that attempt to compensate workers for actual lost wages.

#### **Death Benefits**

Generally, compensation is related to earnings and to the number of dependents payable to the survivors of workers who die from a work-related illness or injury. Benefits are capped in 26 states.

#### **Medical Benefits**

All compensation acts require that medical aid be furnished to workers suffering from a work-related injury or illness without delay, whether or not the condition entails work interruption. This care includes first-aid treatment, physician services, surgical and hospital services, nursing, medical drugs and supplies, appliances, and prosthetic devices. Care is typically provided with no co-payment from the worker. A few state laws contain provisions for nominal contributions by the covered employee for hospital and medical benefits.

## **Financing**

Workers' compensation programs are financed almost exclusively by employers and are based on the principle that the cost of work-related accidents is a business expense. Depending on state laws, employers can purchase insurance from a private carrier or state fund, or they can self-insure. No program relies on general taxing power to finance workers' compensation. Employers in most programs are permitted to carry insurance against work accidents with commercial insurance companies or to qualify as self-insurers by giving proof of financial ability to carry

their own risk. In seven jurisdictions, however, commercial insurance is not allowed. In four of these areas, including Puerto Rico and the Virgin Islands, employers must insure with an exclusive state fund, and in three others, they must either insure with an exclusive state insurance fund or self-insure. In 19 jurisdictions, state funds have been established that compete with private insurance carriers. Federal employees are provided protection through a federally financed and operated system.

## Workers' Compensation Program Summary

Benefit payments under workers' compensation programs increased 6.4 percent in 2000 to \$45.9 billion, from the 1999 amount of \$43.1 billion. As a percentage of covered wages, however, benefits fell 1.3 percent from 1.08 to 1.06.

In 2000, medical benefits accounted for \$20.0 billion, and wage loss compensation for \$25.9 billion. The latter amount includes payments to disabled workers and the survivors of deceased workers.

The \$45.9 billion for workers' compensation benefit payments in 2000 includes over \$930 million in benefits for the Black Lung program. (See Tables 9.B1–9.B3.)

The employers' cost of providing workers' compensation coverage generally varies according to risk, industrial classification, and experience rating. Nationally, in 2000, such costs were approximately 1.25 percent of covered payroll, or about \$442 for each of the 123.7 billion protected employees.

The year 2000 is the eighth year in a row that benefits relative to covered wages declined. It is the seventh consecutive year that employer costs declined relative to covered wages.

# **Temporary Disability Insurance**

Five states, Puerto Rico, and the railroad industry have social insurance programs that partially compensate for the loss of wages caused by temporary nonoccupational disability or maternity. Those programs are known as temporary disability insurance (TDI) because the duration of the payments is limited.

Federal law does not provide for a federal-state system of short-term disability comparable to the federal-state system of unemployment insurance. However, the Federal Unemployment Tax Act (FUTA) was amended in 1946 to permit states where employees made contributions under the unemployment insurance program to use some or all of these contributions for the payment of disability benefits (but not for administration). Three of the nine states that could have benefited by this provision for initial funding for TDI took advantage of it: California, New Jersey, and Rhode Island. The first state law was enacted by Rhode Island in 1942, followed by legislation in California and the railroad industry in 1946, New Jersey in 1948, and New York in 1949. Then came a hiatus of two decades before Puerto Rico and Hawaii passed laws in 1968 and 1969. respectively.

The five state temporary disability insurance laws and the Puerto Rico law cover most commercial and industrial wage and salary workers in private employment if the employer has at least one worker. In no state is coverage under TDI identical with that of the unemployment insurance program. Principal occupational groups excluded are domestic workers, family workers (parent, child, or spouse of the employer), government employees, and the self-employed. State and local government employees are included in Hawaii, and the other state programs generally provide elective coverage for some or all public employees.

Agricultural workers are covered to varying degrees in California, Hawaii, New Jersey, and Puerto Rico, but they are not covered in other jurisdictions. The California law permits self-employed individuals to elect coverage on a voluntary basis. Workers employed by railroads, railroad associations, and railroad unions are covered by TDI under the national system included in the Railroad Unemployment Insurance Act.

The methods used for providing this protection vary. In Rhode Island, the coverage is provided through an exclusive, state-operated fund into which all contributions are paid and from which all benefits are disbursed. In addition, covered employers may provide supplemental benefits in any manner they choose. The railroad program is also exclusively publicly operated in conjunction with its unemployment insurance provisions.

In California, New Jersey, and Puerto Rico, coverage is provided through a state-operated fund, but employers are permitted to "contract out" of the state fund by purchasing group insurance from commercial insurance companies, by self-insuring, or by negotiating an agreement with a union or employees' association. Coverage by the state fund is automatic unless or until an employer or the employees take positive action by substituting a private plan that meets the standards prescribed in the law and is approved by the administering agency. Premiums (in lieu of contributions) are then paid directly to the private plan, and benefits are paid to the workers affected.

The Hawaii and New York laws require employers to provide their own disability insurance plans for their workers by setting up an approved self-insurance plan, by an agreement with employees or a union establishing a labor-management benefit plan, or by purchasing group insurance from a commercial carrier. In New York, the employer may also provide protection through the State Insurance Fund, which is a state-operated competitive carrier. Both Hawaii and New York operate special funds to pay benefits to workers who become disabled while unemployed or whose employers have failed to provide the required protection. In other jurisdictions, benefit payments for the disabled unemployed are made from the regular state-operated funds.

## **Eligibility for Benefits**

To qualify for benefits, a worker must fulfill certain requirements regarding past earnings or employment and must be disabled as defined in the law. In addition, claimants may be disqualified if they received certain types of income during the period of disability.

#### **Earnings or Employment Requirements**

A claimant must have a specified amount of past employment or earnings to qualify for benefits. However, in most jurisdictions with private plans, the plans either insure workers immediately upon their employment or, in some cases, require a short probationary period of employment, usually from 1 to 3 months. Upon cessation of employment after a specified period, workers generally lose their private plan coverage and must look to a state-created fund for such protection.

#### **Disability Requirements**

The laws generally define disability as inability to perform regular or customary work because of a physical or mental condition. Stricter requirements are imposed for disability during unemployment in New Jersey and New York. All the laws pay full benefits for disability due to pregnancy.

## **Disqualifying Income**

All the laws restrict payment of disability benefits when the claimant is also receiving workers' compensation payments. However, the statutes usually contain some exceptions to this rule (for example, if the workers' compensation is for partial disability or for previously incurred work disabilities).

The laws differ with respect to the treatment of sick leave payments. Rhode Island pays disability benefits in full even though the claimant draws wage continuation payments. New York deducts from the benefits any payment from the employer or from a fund contributed to by the employer, except for benefits paid pursuant to a collective bargaining agreement. In California, New Jersey, and Puerto Rico, benefits plus paid sick leave for any week during disability may not exceed the individual's weekly earnings before their disablement. Railroad workers are not eligible for TDI benefits while they receive sick leave pay.

In all seven TDI systems, as with unemployment insurance, weekly benefit amounts are related to a claimant's previous earnings in covered employment. In general, the benefit amount for a week is intended to replace at least one-half the weekly wage loss for a limited time. All the laws, however, specify minimum and maximum amounts payable for a week. The maximum duration of benefits varies from 26 to 52 weeks. Hawaii, New York, and Puerto Rico provide for benefits of a uniform duration of 26 weeks for all claimants; California and the railroad program have maximum benefit periods of 52 weeks; New Jersey, 26 weeks; and Rhode Island, 30 weeks. Under the railroad program, duration of benefits varies from 26 weeks to 52 weeks, based on the total number of years of employment in the industry. In the other jurisdictions, limited pre-disability "base period" wages reduce benefit duration. A noncompensable waiting period of a week or 7 consecutive days of disability (4 days for railroad workers) is generally required before the payment of benefits for subsequent weeks.

The statutory provisions described above govern the benefits payable to employees covered by the state-operated plans. In those states where private plans are permitted to participate, those provisions represent standards against which the private plan can be measured (in accordance with provisions in the state law).

## Financing and Administration

Under each of the laws, except for that governing the railroad program, employees may be required to contribute to the cost of the temporary disability benefit. In five of the jurisdictions (all but California and Rhode Island), employers are also required to contribute. In general, the government does not contribute.

Five of the seven TDI programs are administered by the same agency that administers unemployment

insurance. Under those five programs, the unemployment insurance administrative machinery is used to collect contributions, to maintain wage records, to determine eligibility, and to pay benefits to workers under the state-operated funds. The New York law is administered by the state Workers' Compensation Board, and the Hawaii law is administered separately in the Department of Labor and Industrial Relations.

By way of contrast, claims in New York and Hawaii are filed with and paid by the employer, the insurance carrier, or the union health and welfare fund that is operating the private plan. The state agency limits its functions with respect to employed workers to exercising general supervision over private plans, to setting standards of performance, and to adjudicating disputed claims arising between claimants and carriers. A similar situation applies to claimants under private plans in California, New Jersey, and Puerto Rico.

## **Black Lung Benefits**

The Black Lung benefit program established by the Federal Coal Mine Health and Safety Act of 1969 provides monthly benefit payments to coal miners totally disabled as a result of pneumoconiosis, to the widows of coal miners who died as a result of pneumoconiosis, and to their dependents. The Social Security Administration (SSA) was responsible for the payment and administration of these Part B benefits (miner, survivor, and dependent) with respect to claims filed through June 30, 1973 (and certain survivor cases, before December 31, 1973).

On October 1, 1997, responsibility for maintenance and payment of Part B was transferred from SSA to the Department of Labor (DOL); SSA, however, maintains responsibility for conducting formal hearings necessary to resolve contested issues with respect to Part B claims. Only data on these Part B claims are reported on in this Supplement. Part C claims are reported in the OWCP Annual Report to Congress, U.S. Department of Labor, Office of Workers' Compensation Programs.

Under the Black Lung Benefits Act of 1972, DOL was assigned jurisdiction over Part C benefits, generally claims filed July 1, 1973 and later. Different financing provisions are applicable to these claims.

Under the law, the basic Black Lung benefit rate is 37-1/2 percent of the monthly pay rate for federal employees in the first step of grade GS-2. The basic rate to a miner or widow may be increased according to the number of qualified dependents—50 percent of the basic benefit rate if one dependent qualifies, 75 percent for two dependents, and 100 percent for three or more dependents.

Since Black Lung payments are tied directly to federal employee salary scales, increases are automatically payable when federal salaries are increased.

Reflecting a 3.6 percent adjustment, monthly benefit rates effective January 1, 2001 are:

Miner or widow \$518.50

Miner or widow and one dependent \$777.80

Miner or widow and 2 dependents \$907.40

Miner or widow and 3 or more dependents

(family benefit) \$1,037.00

If a miner or surviving spouse is receiving workers' compensation, unemployment compensation, or disability insurance payments under state law, the Black Lung benefit is offset by the amount being paid under these other programs.

Under the 1972 amendments to the law, payments were extended to full orphans, parents, brothers, and sisters of deceased miners. Under earlier law, survivor payments were limited to widows and their dependent children (if the miner and spouse were both deceased, no benefits were payable to surviving children). The 1972

amendments also expanded coverage to include surface as well as underground coal miners.

Significant program data under Part B in 2001 included the following:

- Between December 2000 and 2001, the total number of Black lung beneficiaries dropped from 89,400 to 79,500. The beneficiaries included 9,800 miners, 55,400 widows, and 14,300 dependents.
- Total annual payments declined from \$509.3 million in 2000 to \$470.4 million in 2001.
- The average monthly benefit for miners and their dependents for December 2001 was \$668.90 and \$508.20 for widows and their dependents.
- Ninety-seven percent of miners and widows were aged 65 or older in 2001.
- Seventy-three percent of all Black Lung beneficiaries resided in five states in 2001: Pennsylvania, West Virginia, Kentucky, Virginia, and Ohio.

## **Veterans' Benefits**

A variety of programs and benefits are available to servicemembers and veterans of military service: disability payments, educational assistance, health care, vocational rehabilitation, survivor and dependents benefits, special loan programs, and hiring preference for certain jobs. Most of the veterans programs are administered by the Department of Veterans Affairs.

## **Monetary Benefits**

Two major cash benefit programs are available for veterans. The first program provides benefits to veterans with service-connected disabilities and, on the veteran's death, benefits are paid to the eligible spouse and children. These benefits are not means tested—that is, they are payable regardless of other income or resources. The second program provides benefits to needy veterans who have non-service-connected disabilities. These benefits are means tested.

## Compensation for Service-connected Disabilities

The disability compensation program pays monthly benefits to veterans whose disabilities resulted from injury or disease incurred while in, or aggravated by, active military duty, whether in wartime or peacetime. Individuals discharged or separated from military service under dishonorable conditions are not eligible for compensation payments. The amount of monthly compensation depends on the degree of disability, rated as the percentage of normal function lost. Payments in 2002 range from \$103 a month for a 10-percent disability to \$2,163 a month for total disability. Veterans who have at least a 30-percent service-connected disability are entitled to an additional dependent's allowance. The amount is based on the number of dependents and degree of disability.

# Pension for Non-service-connected Disabilities

Monthly benefits are provided to wartime veterans with limited income and resources who are totally and permanently disabled because of a condition not attributable to their military service. To qualify for these pensions, a veteran must have served in one or more of the following designated war periods: The Mexican Border Period, World War I, World War II, the Korean Conflict, the Vietnam Era, or the Gulf War. The period of service must have lasted at least 90 days, and the discharge or separation cannot have been dishonorable.

Effective December 1, 2001, maximum benefit amounts for non-service-connected disabilities range from \$796 per month for a veteran without a dependent spouse or child to \$1,575 per month for a veteran who is in need of regular aid and attendance and who has one dependent.

For each additional dependent child, the pension is raised by \$136 per month.

#### **Benefits for Survivors**

The dependency and indemnity compensation (DIC) program provides monthly benefits to the surviving spouse, children (under age 18, disabled, or students), and certain parents of service persons or veterans who die as the result of an injury or disease incurred while in or aggravated by active duty or training, or from a disability otherwise compensable under laws administered by the Department of Veterans Affairs.

Dependency and indemnity compensation payments may also be made if the veteran were receiving, or was entitled to receive, compensation for a service-connected disability at the time of death, and if certain conditions as to the severity of the disability are met.

Eligibility for survivor benefits based on a non-service-connected death of a veteran with a service-connected disability requires a marriage of at least a 1-year duration before the veteran's death. A surviving spouse is generally required to have lived continuously with the veteran from marriage until his or her death. Eligibility for benefits generally ends with the spouse's remarriage.

The monthly benefit amount payable to surviving spouses of veterans, who died before January 1, 1993, depends on the last pay rate of the deceased service person or veteran. In 2002, for pay grades E-1 through E-6, a flat monthly rate of \$935 is paid to surviving spouses. Monthly benefits for grades E-7 through E-9 range between \$967 and \$1,066. For veterans who died after January 1, 1993, surviving spouses receive a flat \$935 a month. An additional \$204 a month will be paid to supplement the basic rate if the deceased veteran had been entitled to receive 100-percent service-connected compensation for at least 8 years immediately preceding death. The amounts payable to eligible parents are lower and depend on: (1) the number of parents eligible, (2) their income, and (3) their marital status.

# Pensions for Non-service-connected Death

Pensions are paid based on need to surviving spouses and dependent children (under age 18, disabled or students) of deceased veterans of the wartime periods specified in the disability pension program. For a pension to be payable, the veteran generally must have met the same service requirements established for the non-service- connected disability pension program, and the surviving spouse must meet the same marriage requirements as under the dependency and indemnity compensation program.

The pension amount depends on the composition of the surviving family and the physical condition of the surviving spouse. In 2002, pensions range from \$534 a month for a surviving spouse without dependent children to \$1,018 a month for a spouse who is in need of regular aid and attendance and who has a dependent child. The pension is raised by \$136 a month for each additional dependent child.

# Hospitalization and Other Medical Care

The Department of Veterans Affairs provides a nationwide system of health care through a system of hospitals and community-based outpatient clinics to eligible veterans.

# **Enrollment - Provisions of Hospitalization and Outpatient Medical Care to Veterans**

To receive health care, veterans generally must be enrolled with the VA and may apply for enrollment at any time. Veterans do not have to be enrolled if they (1) have a service-connected disability of 50 percent or more; (2) want care for a disability which the military determined was incurred or aggravated in the line of duty but which VA has not yet rated during the 12-month period following discharge; or (3) want care for a service-connected disability.

Enrolled veterans and those not subject to enrollment are eligible to receive comprehensive medical benefits, which includes basic and preventive care.

#### **Eligibility Requirements**

Basic eligibility for hospital care and outpatient medical services are based on a veteran's character of discharge from active military service. Veterans discharged prior to September 7, 1980 for other than dishonorable conditions have basic eligibility for care. However, veterans discharged after September 7, 1980, must have completed 24 consecutive months of active duty service. Reservists who were called or ordered to active duty may also be eligible for care as a veteran if they complete the full period for which they were called or ordered to active duty. The 24month minimum service time requirement does apply to veterans who were discharged for reasons of early-out under Title 38, U.S.C. 1173, discharged for a disability incurred or aggravated in the line of duty, awarded VA compensation or is in need of care for an adjudicated serviceconnected disability.

#### **Care for Dependents and Survivors**

The dependents and survivors of certain veterans may be eligible for medical care under the Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA) if not eligible for medical care under Tricare or Medicare. Tricare (formerly known as CHAMPUS) is the health program administered by the Department of Defense for dependents of active duty personnel and military retirees and their dependents.

Beneficiaries covered by CHAMPVA may be treated at Department facilities when space is available. Usually, however, the person with CHAMPVA coverage is treated at a community hospital of his or her choice. The Department of Veterans Affairs pays for a part of the bill and the beneficiary is responsible for any required co-payment.

#### **Nursing Home Care**

A veteran seeking nursing home care must meet the established eligibility requirements for admission to a Department of Veterans Affairs (VA) nursing home. The Veterans Millennium Health Care and Benefits Act, Public Law 106-117 passed by Congress on November 30, 1999, made amendments to the original authority for nursing home placement. The new law requires that VA—

- Provide nursing home care to any veteran in need of such care for a service-connected disability;
- Provide nursing home care to any veteran who is in need of such care and who has a service-connected disability rated at 70 percent or greater;
- Provide nursing home care, either directly or through contracts when clinically indicated for eligible veterans;
- Facilities to determine the need for nursing home care based on a comprehensive interdisciplinary assessment.

#### **Other Medical Benefits**

Other Department of Veterans Affairs programs and medical benefits are available to certain veterans. Veterans do not need to be enrolled in the VA health care system to be eligible for any of the following benefits; however, there may be restrictions: domiciliary care, alcohol and drug dependency treatment; prosthetic appliances; modification in certain veterans home when so ordered by his or her physician, subject to cost limitations; compensation and pension examinations; care as part of a VA approved research project; readjustment counseling and treatment for Vietnam veterans; sexual trauma counseling for veterans suffering from trauma of a sexual nature during active military service; counseling; vocational rehabilitation counseling; special registry examinations and dental care.

#### **Educational Assistance**

The post-Vietnam Veterans' Educational Assistance Program (VEAP) is a voluntary contributory matching program for persons entering service after December 31, 1976. To be eligible, the servicemember must have initially contributed to VEAP before April 1, 1987. The Montgomery GI Bill-Active Duty program provides education benefits for individuals entering military service after June 30, 1985, and for certain other individuals. Service members entering active duty have their basic pay reduced \$100 a month for

#### **Veterans' Benefits**

the first 12 months of their service unless they specifically elect not to participate. An educational assistance program is also available for individuals who enter the Selected Reserve after June 30, 1985.

The Department of Veterans Affairs also pays educational assistance for dependents if a veteran is permanently and totally disabled from a service-related cause, or dies as a result of service, or while completely disabled from service-related causes.

## **Temporary Assistance for Needy Families**

On August 22, 1996, The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) became law. This comprehensive, bipartisan legislation changed the nation's welfare system into one requiring work in exchange for time-limited assistance. It created the Temporary Assistance for Needy Families (TANF) program, which replaced the Aid to Families with Dependent Children (AFDC), Emergency Assistance (EA), and Job Opportunities and Basic Skills Training (JOBS) programs. The law marks the end of federal entitlement to assistance. In TANF, states and territories operate programs, and Indian tribes have the option to run their own programs. States, territories, and tribes each receive a block grant allocation, and states must maintain a historical level of state spending known as maintenance of effort. The basic block grant provides states and tribes \$16.5 billion in federal funds each year, through 2002. This amount covers benefits, administrative expenses, and services targeted to needy families.

The 1996 law offers states great flexibility in designing individual state TANF programs. Unless expressly provided under the statute, the federal government may not regulate the conduct of states.

States may use TANF funds in any manner "reasonably calculated to accomplish the purposes of TANF." The purposes are assisting needy families so that children can be cared for in their own homes; reducing dependency of needy parents by promoting job preparation, work, and marriage; preventing out-of-wedlock pregnancies, and encouraging the formation and maintenance of two-parent families.

## **Highlights**

#### **Work Requirements**

With few exceptions, recipients must work as soon as job ready, or no later than 2 years after coming on assistance. In fiscal year 1997, each state had to ensure that 25 percent of all families in the state were engaged in work activities. This percentage increased to 50 percent in FY 2002. Minimum participation rates for two-parent families started at 75 percent in FY 1997 and increased to 90 percent. (If a state reduces its caseload, without restricting eligibility, it can receive a caseload reduction credit. This credit reduces the minimum participation rates the state must achieve.) During 1997 and 1998, single parents had to participate in work activities for at least 20 hours per week; by FY 2000, they had to participate at least 30 hours per week. Two-parent families had to participate in work activities for at least 35 or 55 hours per week. depending upon the circumstances. Failure to participate in work requirements can result in a reduction or a termination of benefits to the family. However, states cannot penalize

single parents with a child under 6 for failing to meet work requirements if they cannot obtain child care. A state may exempt single parents with children under the age of 1 from the work requirements and disregard these individuals in the calculation of participation rates for up to 12 months.

#### **Work Activities**

Activities that count towards a state's participation rates are unsubsidized or subsidized employment, on-the-job training, work experience, community service, job search, vocational training, job skills training related to work, or education directly related to work; satisfactory secondary school attendance; and providing child care services to individuals who are participating in community service. However, no more than 12 months of vocational training, no more than 6 total weeks of job search, and no more than 4 consecutive weeks of job search may count. Further, effective in FY 2000, no more than 30 percent of those meeting the participation rates may count toward the work requirement on the basis of participation in vocational training or by being a teen parent in secondary school.

#### **Five-Year Time Limit**

Families with an adult who has received federally funded assistance for a total of 5 years (or less at state option) are not eligible for cash aid under the TANF program. States may extend assistance beyond 60 months to up to 20 percent of their caseload. They may also elect to provide assistance to families beyond 60 months using state-only funds, or they may provide services to families that reach the time limit using Social Services Block Grants.

## State Maintenance of Effort Requirements

The TANF block grant program has an annual costsharing requirement, referred to as "maintenance of effort," or MOE. Every fiscal year each state must spend a certain minimum amount of its own money to help eligible families in ways that are consistent with the purposes of the TANF program. The required MOE amount is based on an "applicable percentage" of the state's (non-federal) expenditures on AFDC and the AFDC-related programs in 1994. The applicable percentage depends on whether the state meets its minimum work participation rate requirements for that fiscal year. A state that does not meet the required minimum work participation rate requirements must spend at least 80 percent of the amount it spent in 1994. A state that meets its minimum work participation rate requirements must spend at least 75 percent of the amount it spent in 1994.

In addition to the federal TANF block grant funding, needy states with economic problems may request federal

funds from the Contingency Fund. The Contingency Fund has a more rigorous MOE requirement.

#### **Additional Funding**

Bonuses to reward high performance and reduce outof-wedlock births.—Through FY 2003, \$1 billion is available to states for high performance bonuses for achieving program goals, such as moving welfare recipients into jobs. There is a separate \$100 million annual appropriation for bonuses to the 5 states that have the greatest success in reducing their of out-of-wedlock birth rates, while also reducing their abortion rates.

Contingency fund, supplemental grants, and loans.— There is a contingency fund of \$2 billion available over 5 years to states experiencing economic downturns. There are a separate \$800 million fund available over 4 years to provide supplemental grants for states with high population growth and historically low welfare spending and a \$1.7 billion federal loan fund.

#### **Penalties**

The Department of Health and Human Services (HHS) may reduce s state's block grant if it fails to do any of the following:

- Satisfy work requirements. A penalty of 5 percent accrues in the first year. The penalty amount increases 2 percent per year for each consecutive failure. The penalty is adjusted based on degree of failure. The maximum penalty is 21 percent.
- Comply with 5-year limit on assistance. Failure to comply results in a 5 percent penalty.
- Meet the state's basic maintenance of effort requirements. The penalty is based on the amount of the state's under-spending. The state also loses its Welfare-to-Work funds.
- Meet the State's Contingency Fund MOE requirement. The penalty is a reduction of the State's Federal TANF grant by the amount of Contingency Funds received and not remitted.
- Reduce recipient grants for refusing to participate in work activities without good cause. A penalty of between 1 percent and 5 percent is assessed based on the degree of noncompliance. Maintain assistance when a single custodial parent with a child under six cannot obtain child care. Failure to comply results in a penalty of 5 percent.
- Submit required data reports. A penalty of 4 percent accrues.
- Comply with paternity establishment and child support enforcement requirements. Failure to comply results in a penalty of up to 5 percent.
- Participate in the Income and Eligibility Verification System. A penalty of up to 2 percent accrues.

- Repay a federal loan on time. The penalty will be based on the amount unpaid.
- Use funds appropriately. Misuse of funds can result in states being penalized for the amount misused. If this misuse is found to be intentional, an additional penalty of 5 percent will be assessed.
- Replace federal penalty reductions with additional state funds. This provision results in a penalty of up to 2 percent and requires states to contribute state funds to make up for any reductions in federal funds due to penalties.

The total penalty assessed against a state in a given year may not exceed 25 percent of a state's block grant allotment. In some situations, states may avoid penalties: (1) if they demonstrate that they had reasonable cause for failing to meet the program requirements or (2) if they develop a corrective compliance plan, receive approval of their plan, and correct or discontinue the violation.

### **Personal Employability Plans**

States must make an initial assessment of a recipient's skills. States may develop personal responsibility plans for each recipient to identify the education, training, and job placement services needed to move into the workforce.

# Teen Parent Live-At-Home and Stay-In-School Requirement

Unmarried minor parents must participate in educational and training activities and live with a responsible adult or in an adult-supervised setting in order to receive assistance. States are responsible for assisting in locating adult-supervised settings for teens who cannot live at home.

#### State Plans

HHS reviews state plans for completeness only. States must allow for a 45-day comment period on the state plan by local governments and private organizations and consult with them. The state plan must have "objective criteria" for eligibility and benefits that are "fair" and "equitable." The plan must explain appeal rights.

#### **Job Subsidies**

The law allows states to create jobs by taking money that is now used for welfare checks and using it to create community service jobs, provide income subsidies, or provide hiring incentives for potential employers.

#### **Waivers**

States that received approval for welfare reform waivers before January 1,1997, have the option to operate their cash assistance program under some or all of these waivers, until the waivers expire.

#### **Effective Dates**

States had until July 1, 1997, to submit state plans and begin implementing TANF, although they had the option to implement earlier.

HHS published final regulations covering the state TANF programs on April 12, 1999. These regulations took effect October 1, 2000.

### Tribal Programs

Federally recognized Indian tribes may apply directly to HHS to operate a TANF block grant program. Eligible tribes include the federally recognized tribes in the lower 48 states and 13 designated entities in Alaska (that is, the 12 Alaska Native regional nonprofit associations and Matlakatla). TANF allotments for Indian tribes are based upon previous state expenditures of federal dollars in AFDC, Emergency Assistance (EA), and JOBS on tribal members in fiscal year 1994. Tribal TANF programs could be implemented as early as July 1, 1997. Like states, Indian tribes can use their TANF funding in any manner reasonably calculated to accomplish the purposes of TANF. They have broad flexibility to determine eligibility, method of assistance, and benefit levels. Unlike state plans, the federal government approves tribal plans. Tribes and HHS must reach agreement on time limits, work requirements, and minimum participation rates.

In addition to authorizing tribes to administer TANF, PRWORA replaced the former tribal JOBS program with the Native Employment Works (NEW) program. The NEW program provides funding for tribes and inter-tribal consortia to design and administer tribal work activities that meet the unique employment and training needs of their populations while allowing tribes and states to provide other TANF services.

HHS published final regulations for the tribal TANF and NEW programs on February 18, 2000.

CONTACT: Bettie McClure (202) 401-5032.

## **Food Stamps**

The Food Stamp program provides a means for persons with no or little income to obtain a nutritionally adequate diet. The program issues monthly allotments of coupons that are redeemable at retail food stores, or provides benefits through electronic benefit transfer (EBT). Eligibility and allotments are based on household size, income, assets, and other factors.

Households without income receive an amount equal to 100 percent of the June monthly cost of the Thrifty Food Plan (TFP—a nutritionally adequate diet) for a reference family of four adjusted for household size and economies of scale. This amount is updated every October for the new fiscal year to account for food price increases.

As of October 2002, an eligible four-person household in the continental United States with no income receives \$465 per month in food stamps. Households with income receive food stamps valued at the difference between the maximum allotment and 30 percent of their income, after certain allowable deductions.

To qualify for food stamps, a household must have:

- 1. Less than \$2,000 in disposable assets (\$3,000, if one member is aged 60 or older or is disabled),
- 2. Gross income below 130 percent of the poverty guidelines for the household size, and
- 3. Net income of less than 100 percent of the poverty guidelines allowable deductions.

Households with a person aged 60 or older or a disabled person receiving either Supplemental Security Income (SSI), Social Security (OASDI), state general assistance, or veterans' disability benefits (or interim disability assistance pending approval of any of the above programs) may have gross income exceeding 130 percent of the poverty guidelines if the income is lower than 100 percent of the poverty guidelines allowable deductions.

One- and two-person households that meet the applicable standard receive at least \$10 a month in food stamps.

All households in which all members receive Temporary Assistance for Needy Families (TANF) or SSI are categorically eligible for food stamps.

Net income is computed by subtracting the following deductions from monthly gross income:

- 1. Twenty percent of earned income.
- Standard deduction of \$134 for fiscal year 2002 for households with one to four members, \$147 for households with five members, and \$168 for households with six or more members.
- 3. Amount paid for dependent care (up to \$200 a month for each child under age 2 and \$175 for all other dependents) while the dependent's caretaker is working or looking for work.

- 4. Out-of-pocket medical expenses in excess of a \$35 deductible for a person aged 60 or older or a disabled person. If more than one person in the household is aged or disabled, \$35 is subtracted once before deducting combined medical expenses.
- 5. Legally owed child support payments.
- 6. Excess shelter expenses, which is total shelter costs including utilities minus 50 percent of income after all the above deductions have been subtracted. Effective October 1, 2002, the limit was \$367. The limit does not apply to households with an aged or disabled member.

Households are certified to receive food stamps for varying lengths of time, depending on their income sources and individual circumstances. Recertification is required at least annually. Households whose sole income is from SSI payments or Social Security benefits are certified for a 12-month period, although states may request a waiver allowing for a 24-month certification period for these households. Households must report monthly income or expense changes of \$25 or more or other changes in circumstances that would affect eligibility.

Families with income or food loss resulting from disaster situations such as tornadoes or floods may be eligible for food stamps for up to 1 month if they meet the special disaster income and asset limits.

Special provisions allow the homeless, drug addicts, alcoholics, blind, or disabled residents in certain group living arrangements, residents of shelters for battered spouses and children, and persons aged 60 or older to use their coupons for meals prepared at a nonprofit facility. The elderly and homeless may also use their coupons to purchase concession-priced meals from authorized restaurants.

Households with members who are elderly (aged 60 or older), disabled, or lack transportation to the food stamp office may be certified for food stamps through a telephone interview or a home visit.

Initiated on a pilot basis in 1961, the Food Stamp program was formally established by the Food Stamp Act of 1964, with 22 states operating 43 projects, serving 350,000 people. The Food Stamp Act of 1977, as amended (P.L. 95-113), has been extended to all 50 states, the District of Columbia, Guam, and the Virgin Islands. Authorization for this program extends through September 30, 2002. (Since July 1982, Puerto Rico receives a block grant for nutrition assistance rather than participating in the Food Stamp program.)

The Food Stamp program is administered nationally by the Food and Nutrition Service of the Department of Agriculture (USDA) and operates through local welfare offices and the nation's food marketing and banking systems. Since August 1, 1980, persons receiving or applying for SSI payments have been permitted to apply for food

stamps through local Social Security district offices. The federal government, through general revenues, pays the entire cost of the food stamp benefits, but federal and state agencies share administrative costs.

An average of 18.9 million persons per month participated in the Food Stamp program each month during the first eight months of fiscal year 2002 (the period from October 2001 through May 2002). The average monthly value of food stamps per person was about \$79.75 and the total value of benefits issued during the first eight months of the year was \$12.1 billion. Total federal government costs for this program were \$13.1 billion.

## **History of Provisions**

The Food Stamp Act of 1984 (P.L. 88-525) established the Food Stamp Program. Originally, participants were required to purchase food stamp coupons. The difference between the face value of the coupons and the amount the participant paid was known as the "bonus value". The amount paid for coupons varied according to household income.

Amendments to the 1964 Act, enacted in 1971 (P.L. 91-671), established uniform national eligibility standards and uniform national benefit levels, required family allotments large enough to purchase a nutritionally adequate diet, provided free food stamps to the poorest recipients, required automatic cost-of-living increases in food stamp allotments, and established work-registration requirements for able-bodied adult household members up to age 65 (except students and those needed at home to care for children under age 18).

The Agriculture and Consumer Protection Act of 1973 (P.L. 93-86) expanded the program (while phasing out the family food distribution program), provided for semi-annual allotments of coupon adjustments, and broadened the categories of persons eligible to participate. This legislation extended the program nationwide, requiring all states to participate in the Food Stamp program.

The Food and Agricultural Act of 1977 (P.L. 95-113) made sweeping changes to the Food Stamp Program. It eliminated the purchase requirement and allowed households to receive only the bonus portion of their coupon allotments. Deductions from income were limited to a standard deduction, a 20-percent earnings deduction, and a combined excess shelter and child-care deduction. The poverty guidelines became the new eligibility limits and, for the first time, households receiving Aid to Families with Dependent Children (AFDC) or SSI payments were required to meet asset and income limits. The work registration requirements were tightened for students and for caretakers, whose children now had to be under age 12. Parents of children aged 12 or older were required to register for work. However, the age at which the registration exemption for older persons became effective was lowered from age 65 to age 60.

The Food Stamp Act Amendments of 1979 (P.L. 96-58) provided a medical deduction to elderly and disabled persons, removed the limit on their shelter deduction, and tightened fraud provisions.

Legislation enacted in 1980 provided for an annual, rather than semi-annual, adjustment to benefit levels and the amount of the standard deduction. This legislation also restricted student eligibility.

The Omnibus Budget Reconciliation Act (P.L. 97-35) and the Food Stamp and Commodity Distribution Amendments of 1981 (P.L. 97-98) mandated further changes in the Food Stamp program. For the first time, a gross income eligibility standard was applied to all households not containing an aged or disabled person. The earnings deduction was lowered to 18 percent. The updates to the TFP to account for inflation were postponed until October 1982 and the deduction limits were postponed until July 1983. For new participants, benefits for the first month were prorated from the day the application was filed. Boarders and persons who take part in strikes were excluded from the program and the definition of what constitutes a household was tightened. Provisions facilitating claims and overpayment collection and fraud recovery were also enacted.

The program in Puerto Rico was replaced by a block grant. Monthly reporting/retrospective accounting systems were made mandatory for all states effective October 1983. Households composed solely of all aged or disabled persons, as defined above, were exempted from the monthly reporting requirements, and migrant households were exempted from both requirements.

Further revisions were made by the Food Stamp Amendments of 1982 (P.L. 97-252). The maximum allotment was reduced from 100 percent to 99 percent of the TFP and adjustments to the standard and shelter deductions were delayed until October 1, 1983. (P.L. 98-473 restored maximum food stamp allotments to the full cost of the TFP beginning November 1, 1984.) A net income limit for nonelderly and non-disabled households was added to the existing gross income limit. Benefit computations and adjustments were rounded down to the nearest dollar, and new restrictions were placed on the use of the Standard Utility Allowance for the excess shelter expense deduction. At the same time, the definition of disability for food stamp purposes was expanded to include those persons receiving certain veterans' payments, and annual cost-of-living adjustments to SSI payments and Social Security benefits were not counted in determining food stamp amounts for 3 months.

The Food Stamp program authorization was extended for 5 years by the Food Security Act of 1985 (P.L. 99-198). Among the revisions enacted, the definition of disability for food stamp purposes was again extended to include recipients of state supplementary SSI payments, government disability benefits, and Railroad Retirement disability payments.

Households in which all members receive AFDC or SSI were made categorically eligible for food stamps. The earned income, childcare, excess shelter cost deductions, and asset limits were increased as of May 1986. Portions of the income received under the Job Training Partnership Act were now considered countable income. Further, all states were required to implement an employment and training program for food stamp recipients by April 1987.

The Hunger Prevention Act of 1988 (P.L. 100-435) made several changes in the program. It raised the maximum food stamp allotments and established allotments as specified percents of the TFP as of the preceding June. For fiscal year 1989, the allotments were 100.65 percent of the TFP for June 1988; for fiscal year 1990, they were 102.05 percent of the TFP for June 1989; and for fiscal years 1991 and on, they are to be 103.00 percent of the TFP.

Other provisions of the 1988 legislation required states to institute prospective budgeting for households not required to report monthly and retrospective budgeting for households reporting monthly. It extended disability status to individuals who receive interim assistance pending the receipt of Supplemental Security Income, Social Security, or state disability payments, and allowed the elderly, disabled, and those without transportation to apply for food stamps via telephone interviews. It required states to process Food Stamp applications jointly with AFDC and general assistance applications. It raised the dependent-care deduction from \$160 per household to \$160 per dependent. It made permanent an amendment in the Homeless Eligibility Clarification Act that exempts residents of shelters from ineligibility as residents of institutions.

Several provisions of the 1988 legislation also affect persons in farming. Households with farm income and expenses were given the option of averaging irregular farm-related expenses and farm income over 12 months and excluding as resources the value of farm land, equipment, and supplies for a period of 1 year after a household member ceases to be self-employed in farming.

The Mickey Leland Memorial Domestic Hunger Relief Act of 1990 (P.L. 101-624) reauthorized the Food Stamp program and the Nutrition Assistance Program in Puerto Rico with no major changes through fiscal year 1995.

Legislation enacted in 1992 prevented a one-time decrease of food stamp allotments for the year beginning October 1, 1992, even though the cost of the TFP had declined slightly.

The Omnibus Budget Reconciliation Act of 1993 (Mickey Leland Childhood Hunger Relief Act, P.L. 103-66) made a number of program revisions including the following.

- The earnings of elementary or high school students who were aged 21 or younger were disregarded.
- Households that had breaks in participation of less than a month were allowed to receive a full month's benefit for the period of the break.

- The children of drug addicts and alcoholics living in treatment centers were permitted to qualify for food stamps.
- Food stamp households participating in demonstration projects were permitted to accumulate up to \$10,000 in resources.
- The shelter cap was raised to \$231 beginning July 1, 1994, then to \$247 beginning October 1995, and was to be eliminated entirely on January 1, 1997.
- The deduction for care of a child or other dependent was raised to \$200 per month for a child under age 2, and \$175 per month for all other dependents, effective September 1, 1994.
- State agencies were given the option to provide deductions for legally binding child support payments made to persons outside the household, effective September 1, 1994. This deduction became mandatory October 1, 1995.
- The definition of a food stamp household was simplified to allow adult siblings who lived together and adult children who lived with their parents to form separate households if they purchased or prepared food separately.
- The amount of the Fair Market Value of a house-hold's first vehicle that is excluded from the asset test was increased from \$4,500 to \$4,550, effective September 1, 1995. The limit was to have been raised to \$5,000, effective October 1, 1996, and indexed thereafter.

Legislation enacted in 1994 primarily provided means to combat fraud in the coupon redemption process.

Legislation enacted in 1995, prevented a one-time decrease of food stamp allotments in Alaska for the year beginning October 1, 1994, even though the cost of the TFP for Alaska had declined slightly.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193) made sweeping changes to the Food Stamp program. Additional restrictions were placed on the eligibility of certain low-income persons.

- Legal immigrants became ineligible for benefits, unless they met one of the following criteria: were naturalized citizens, had worked and paid taxes in the country for 40 quarters (or were the spouse or minor child of someone who had met the work requirement), had served in the U.S. armed forces (or were the spouse or child or a veteran) or were refugees, asylees, or persons granted a stay of deportation when admitted and have lived in the United States for less than 5 years. Legal immigrants currently receiving benefits were allowed to receive benefits until their first recertification after April 1, 1997, or until August 22, 1997, whichever date came first.
- · Time limits were imposed for childless unemployed

adults aged 18–50. Those who are not disabled are limited to receiving 3 months of benefits in any 36-month period, unless they are working 20 hours per week, participating in a work training program for at least 20 hours per week, or participating in work fare. States may request waivers for areas with at least 10-percent unemployment or insufficient jobs.

Other key provisions included the following:

- The maximum allotment was set at 100 percent of the Thrifty Food Plan, effective October 1, 1996.
- The standard deduction was frozen at \$134.
- The excess shelter deduction cap was set at \$250, effective January 1, 1997 (instead of being lifted), to be raised to \$275 on October 1, 1998, and \$300 on October 1, 2000.
- The earnings of elementary or high school students aged 18–21 was counted again.
- Households with breaks in participation of less than a month received prorated benefits for the period of the break.
- Adult children under age 22 living with their parents were counted in the same household as their parents.
- The amount of Fair Market Value for a household's first vehicle that is excluded from the asset test was frozen at \$4,650, effective October 1, 1996.
- State and local energy assistance was counted as income.
- Recipients could be disqualified or given sanctions for a variety of reasons, such as failure to pay child support, receipt of multiple benefits, or failure to meet work requirements.
- States were permitted to operate a simplified Food Stamp program for households in which all household members participate in the state's Temporary Assistance for Needy Families program. In the simplified Food Stamp program, states may utilize their TANF rules to determine Food Stamp program benefits provided the TANF rules do not increase the aggregate cost of the Food Stamp program.
- States were required to implement Electronic Benefit Transfer (EBT) systems for issuing benefits before October 1, 2002, unless USDA granted a waiver.

The Balanced Budget Act of 1997 (P.L. 105-33) increased funds for the Food Stamp Employment and Training program, restricted the use of these funds, and made them available until spent. States were required to earmark 80 percent of these funds to provide work or training programs to childless, unemployed, able-bodied 18–50 year olds. The Act also allowed states to grant discretionary exemptions from the time limits for up to 15 percent of a state's unwaived caseload of childless, unemployed, able-bodied 18–50 year olds.

The Agricultural Research, Extension, and Education Reform Act of 1998 (P.L. 105-185) partially restored benefits to legal immigrants. Those who were lawfully residing in the United States on August 22, 1996, and are either: (1) blind or disabled (using the Food Stamp Act definition of "disability"), (2) aged 65 or older on August 22, 1996, or (3) under the age of 18 were eligible for benefits effective November 1, 1998. In addition, refugees and asylees were made eligible for the first 7 years after admittance into the United States (extended from 5 years). Members of Hmong or Highland Laotian tribes aiding U.S. personnel during the Vietnam War, and their spouses or unmarried dependent children were made eligible. Cross-border Native Americans were also made eligible. Other provisions reduced the funding for Employment and Training Programs by \$100 million in 1999 and by \$45 million in 2000 and reduced payments for Food Stamp program administrative costs.

The Electronic Benefit Transfer (EBT) Interoperability and Portability Act of 2000 (P.L. 106-71) required states to make their EBT systems inter-operable across state lines by October 2, 2002.

The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriation Act, 2001 (P.L. 106-387) made the following changes to the Food Stamp program:

- Effective July 2001, at state option, state agencies could substitute TANF vehicle rules in place of food stamp vehicle rules provided that the TANF vehicle rules were more liberal.
- Effective March 2001, for households whose certification period began on or after March 1, 2001, the maximum excess shelter deduction limit rose to \$340, and was to be adjusted for inflation on October 1, 2002 and every year after.

The Farm Security and Rural Investment of 2002, H.R. 107-171, reauthorized the Food Stamp Program through September 30, 2007. It contained the following provisions:

- Effective April 1, 2003, legal immigrants with 5 years residency in the United States become eligible for food stamps. Effective October 1, 2003, eligibility is extended to legal immigrants under age 18, regardless of date of arrival in the United States.
- The current fixed standard deduction was replaced with a deduction that varies according to household size (with larger households receiving larger deductions) and is adjusted annually.
- The resource limit for households with a disabled member was increased from \$2,000 to \$3,000, consistent with the resource limit for households with elderly members.
- The requirement that federal costs for electronic benefit transfer systems not exceed the costs of paper coupon systems was eliminated.
- · The Quality Control System, which currently mea-

sures payment accuracy, was substantially changed, with the liability threshold raised to 105 percent of the national average for 2 consecutive years. The current incentive system was replaced by bonuses for states demonstrating high or most improved performance.

This legislation also provided states with a number of options:

- States could extend from 3 months to 5 months the period of time that households leaving TANF could receive food stamps without recertification. The benefit amount would be equal to the amount received by the household prior to the household leaving TANF, with adjustments made for the loss of TANF income.
- States could exclude certain types of income that were excluded under the state's TANF plan. States could exclude types of resources that were excluded under the state's TANF or Medicaid programs.
- States could disregard reported changes in deductions during certification periods unless the changes were associated with a new residence or earned income.
- States could use the full standard utility allowance (SUA) rather than a prorated SUA for households sharing living quarters.
- States could treat child support payments to nonhousehold members as an income exclusion rather than a deduction.
- States could extend semi-annual reporting of changes to all households not exempt from periodic reporting.

# **Low-Income Home Energy Assistance Program**

The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35), signed into law by the President on August 13, 1981, authorized seven block grants to be administered by the Department of Health and Human Services (HHS). As one of HHS' block grants, the Low-Income Home Energy Assistance Program (LIHEAP) is administered by the Administration for Children and Families' Office of Community Services (http://www.acf.hhs.gov/programs/liheap).

#### Reauthorization

Title XXVI of the Act authorized LIHEAP for fiscal years 1982-1984. Title VI of the Human Services Reauthorization Act of 1984 (P.L. 98-88) reauthorized and amended LIHEAP for fiscal years 1985-1986. Title V of the Human Services Reauthorization Act of 1986 (P.L. 99-425) reauthorized and amended LIHEAP for fiscal years 1987-1990. Title VII of the Augustus F. Hawkins Human Services Reauthorization Act of 1990 (P.L. 101-501) reauthorized and amended LIHEAP for fiscal years 1991-1994. Title XX of the National Institutes of Health Revitalization Act of 1993 (P.L. 103-43) reauthorized LIHEAP for fiscal year 1995. Title III of the Human Services Amendments of 1994 (P.L. 103-252) reauthorized and amended LIHEAP for fiscal years 1995-1999.2 Title III of the Coats Human Services Reauthorization Act of 1996 (P.L. 105-285) reauthorized and amended LIHEAP for fiscal years 2000-2004.

## **Recent Legislation**

The following provisions became effective in fiscal year 2000:

• Emergency Contingency Fund Revisions. Section 2603 is amended to add definitions of the terms "natural disaster" and "emergency" to clarify the conditions under which energy emergency contingency funds may be released. Specifically, this section authorizes the release of contingency funds to meet additional home energy needs resulting from floods, earthquakes, tornadoes, hurricanes, or ice storms, as well as abnormal heat or cold. Also, section 2603 is amended to authorize the release of funds in cases of supply shortages or disruptions and for significant increases in (1) home energy costs; (2) home energy disconnections; (3) participation in a public benefit program such as Food Stamps, Supplemental Security Insurance (SSI), or

Temporary Assistance for Needy Families (TANF); or (4) unemployment, layoffs, or applications for unemployment benefits. The President retains the authority to determine whether to release any of the contingency funds.

Section 2604(g) is renumbered as Section 2604(e) and clarifies the conditions that the Secretary must consider in determining whether to allocate contingency funds to specific grantees.

- Priority for Weatherization Assistance. Section 2604(k) is amended to add language that grantees should give priority for weatherization services to those households with the lowest incomes that pay a high proportion of their income for home energy.
- Technical Assistance Training, and Compliance Reviews. Section 2609A is amended to increase to \$300,000 the authorization to set aside funds for training and technical assistance. Also adds authority to use these funds to make interagency agreements, including with other federal agencies, and to conduct on-site compliance reviews of LIHEAP grantees.

Under LIHEAP, grants are available to assist eligible households to meet the costs of home energy. In addition to the 50 states and the District of Columbia, grants were provided in fiscal year 2000 to 128 Indian tribes or tribal organizations and 5 trust territories.

In accordance with the Act, the Secretary of HHS has left maximum policy discretion to the grantees. The federal information collection and reporting requirements for grantees were substantially reduced to require only information essential to federal administration and congressional oversight. Grantee decisions, directed by public participation in the development of grant applications, largely replaced federal regulations in shaping the program for fiscal years 1982–1999.

#### Funding

For fiscal year 2000, \$1.1 billion was appropriated as advanced funding under P.L. 105-277, including the set aside of \$27.5 million for leveraging incentive awards. The Consolidated Appropriations Act for fiscal year 2000 (P. L. 106-113), included an appropriation of \$300 million for fiscal year 2000 for the LIHEAP emergency contingency funds. Under the terms of the contingency fund provision, the President could request all, part, or none of the \$300 million for fiscal year 2000; could distribute any amount so requested to all LIHEAP grantees or to just a portion of them; and could use the regular block grant formula or a different formula.

Because of substantially higher prices for fuel oil and propane during the 1999–2000 winter, the President released by February 2000 all \$300 million in contingency

Effective in fiscal year 1987 the Primary Care Block Grant was repealed by the Health Services Amendment Act of 1985 (P.L. 99-80) enacted April 26, 1986.

The 1994 amendments provided that up to 25 percent of leveraging incentive funds may be set aside for the Residiential Energy Assistance Challenge (REACH) program.

funds that had been appropriated by Public Law 106-113. He requested an additional \$600 million in LIHEAP contingency funds for fiscal year 2000 to meet continuing needs. The Emergency Supplemental Act of 2000 (P.L. 106-146) appropriated an additional \$600 million in LIHEAP energy emergency contingency funds to be available to HHS until expended. In fiscal year 2000, the President released contingency funds seven times for a total of \$744.35 million (of the \$900 million available).

Fiscal year 2000 LIHEAP funds were distributed approximately as follows:

- \$1.06 billion in block grants to the 50 states and the District of Columbia;
- \$11 million in direct block grants to 128 Indian tribes and tribal organizations;
- \$1.5 million in block grants to American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and the Virgin Islands; and
- \$18.9 million in leveraging incentive awards to 37 states and \$1.7 million in leveraging incentive awards to 29 tribes and tribal organizations;
- \$5.5 million in REACH awards to 5 states, \$845,000 to 6 Indian tribes and tribal organizations, and \$124,000 to American Samoa;
- \$732 million in emergency contingency funds to 50 states and the District of Columbia, \$12.3 million to 128 Indian tribes and tribal organizations, and \$386,000 to American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and the Virgin Islands; and
- \$0.3 million for training and technical assistance.

The funds appropriated for LIHEAP provide payments to eligible households for heating or cooling costs and for home energy crises. Up to 15 percent of the available funds may be used for low-cost residential weatherization or other energy-related home repairs. Grantees can request from HHS a waiver to allow up to 25 percent of available funds to be spent for low-cost residential weatherization or other energy-related home repairs.

To receive grants in each of the three fiscal years, each grantee had to submit an application consisting of signed assurances by its chief executive officer and a plan describing how the grantee would carry out those assurances. In the assurances, the grantee agreed to:

- Use funds only for the purposes of the statute;
- Make payments only to eligible low-income households;
- · Conduct outreach activities;
- Coordinate LIHEAP activities with similar and related programs;
- Provide, in a timely manner, that the highest level of assistance will be furnished to those households with the lowest incomes and highest energy costs in

- relation to income, taking into account family size, except that the grantee may not differentiate between categorically eligible and income eligible households:
- Give consideration to agencies that have previously managed the program when designating local agencies to carry out the purposes of the program;
- Assure that energy suppliers receiving benefits directly on behalf of eligible households not treat assisted households adversely;
- · Treat owners and renters equitably;
- Use not more than 10 percent of its allotment for planning and administration;
- Establish fiscal control and accounting procedures for proper disbursal of and accounting for federal funds, establish procedures for monitoring assistance provided, and prepare an annual audit;
- · Permit and cooperate with federal investigations;
- Provide for public participation in the development of its plan;
- Provide an opportunity for a fair administrative hearing to individuals whose claims for assistance are denied or not acted on with reasonable promptness;
- Cooperate with HHS in collecting and reporting data under section 2610 of the statute;
- Provide outreach and intake through additional state and local government entities or community-based organizations under certain circumstances; and
- Use no more than 5 percent of funds to encourage and enable households to reduce their home energy needs.

## **Eligibility**

The unit of eligibility for energy assistance is the household, defined as any individual or group of individuals who are living together as one economic unit for which residential energy is customarily purchased in common, either directly or through rent. The Act limits payments to those households with incomes under the greater of 150 percent of the income guidelines or 60 percent of the state's median income; or to those households with members receiving benefits from the Temporary Assistance for Needy Families (TANF) program, SSI, Food stamps, or needs-tested veterans' benefits. No household may be excluded from eligibility on the basis of income alone if household income is less than 110 percent of the poverty guidelines. Grantees are permitted to set more restrictive criteria as well.

## **Payments**

Grantees make fuel assistance payments directly to eligible households or to home energy suppliers on behalf of eligible households. Payments can be provided in cash, fuel, prepaid utility bills, or as vouchers, stamps, or coupons that can be used in exchange for energy supplies. Payments are to vary in such a way that the highest level of assistance is furnished to households with the lowest incomes and highest energy costs in relation to income, taking into account family size.

Table 2.A1—Type of covered employment and self-employment

| ear enacted | Coverage election<br>or waiver if any | Category of worker                                                                                                                                                                                                                                                                                                                        |
|-------------|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1935        |                                       | All workers in commerce and industry (except railroads) under age 65 in the continental United States, Alaska, and Hawaii and on American vessels. (Covered after 1936.)                                                                                                                                                                  |
| 1939        |                                       | Age restriction eliminated.                                                                                                                                                                                                                                                                                                               |
| 1946        |                                       | Railroad and Social Security earnings combined to determine eligibility for and amount of survivors benefits.                                                                                                                                                                                                                             |
| 1950        |                                       | Regularly employed farm and domestic workers. Nonfarm self-employed (except members of professional groups). Federal civilian employees not under a federal retirement system. U.S. citizens employed outside the United States by American employers. Workers in Puerto Rico and the Virgin Islands (effective Jan. 1, 1951).            |
|             | Elective by employer                  | State and local government employees not under a state and local government retirement system.  Termination permitted 2 years after giving notice if group has 5 years of coverage when notice is given                                                                                                                                   |
|             | Elective by employer and employee     | Employees (other than members of the clergy) of nonprofit organizations (upon election by employer, each current employee given a choice as to coverage; new employees are covered). Nonprofit organizations permitted to terminate coverage 2 years after giving notice, if the organization has 8 yea of coverage when notice is given. |
| 1951        |                                       | Railroad workers with less than 10 years of service, for all benefits. (After October 1951, coverage retroactive to 1937.)                                                                                                                                                                                                                |
| 1954        |                                       | Farm self-employed. Professional self-employed except lawyers, dentists, physicians, and members of other medical groups (taxable years ending after 1954). Additional regularly employed farm and domes workers. Homeworkers.                                                                                                            |
|             | Elective by employer                  | U.S. citizens employed outside the United States by a foreign subsidiary of an American employer.                                                                                                                                                                                                                                         |
|             | Elective by employer and employee     | State and local government employees (except fire fighters and police personnel) under a state or loca government retirement system (coverage provided at state's option; a majority of the eligible employee must vote in favor). See above (elective by employer, 1950) for termination rule.                                           |
|             | Elective by individual                | Members of the clergy and of religious orders not under a vow of poverty.                                                                                                                                                                                                                                                                 |
| 1956        |                                       | Members of the uniformed services on active duty or on active duty for training. Remainder of professional self-employed except physicians (taxable years ending after 1955). Farm landlords who materially participate in farm operations.                                                                                               |
|             | Elective by employer and employee     | Fire fighters and police personnel in designated states. State and local government employees under state or local government retirement system in designated states may be divided into two systems, one excluding employees not desiring coverage (new employees covered).                                                              |
| 1960        |                                       | U.S. citizens employed in United States by foreign governments or international organizations. Parent working for children (except domestic or casual labor). Workers in Guam and American Samoa.                                                                                                                                         |
| 1965        |                                       | Interns. Self-employed physicians (taxable years ending on or after Dec. 31, 1965). Tips for employee tax only.                                                                                                                                                                                                                           |
|             | Elective by individual                | Members of certain religious sects may obtain exemptions from self-employed coverage (retroactive to 1951).                                                                                                                                                                                                                               |
| 1967        | Elective by employer<br>and employee  | Fire fighters under state and local government retirement system (under a majority favorable vote) and only if governor of state certifies Social Security protection.                                                                                                                                                                    |
|             | Subject to waiver<br>by individual    | Members of the clergy and of religious orders not under a vow of poverty are covered automatically, but hey can choose to be exempt on grounds of conscience or religious principles. Taxable years ending after 1967.                                                                                                                    |
| 1972        | Elective by employer                  | Members of a religious order who are subject to a vow of poverty. Retroactivity allowed for 5 years but not earlier than Jan. 1, 1968.                                                                                                                                                                                                    |
| 1977        | Elective by individual                | Members of the clergy and of religious orders who filed an application for exemption from coverage marevoke the exemption if the revocation is filed before the due date of the individual's federal income tax return for the first taxable year beginning after Dec. 20, 1977.                                                          |
| 1982        |                                       | Federal employees—Hospital Insurance (Part A) program only, effective Jan. 1, 1983.                                                                                                                                                                                                                                                       |
| 1983        |                                       | Federal employees (except reemployed annuitants hired before Jan. 1, 1984), including executive, legislative, and judicial branch employees and including those with previous periods of federal service the break in service lasted more than 365 days.                                                                                  |
|             |                                       | Legislative branch employees hired before 1984 who were not participating in the Civil Service Retirement System on Dec. 31, 1983.                                                                                                                                                                                                        |
|             |                                       | Members of Congress, the President, the Vice President, sitting federal judges, and most executive-level political appointees of the federal government.                                                                                                                                                                                  |
|             |                                       | Employees of nonprofit organizations.                                                                                                                                                                                                                                                                                                     |
|             | Florence                              | U.S. residents employed outside the United States by American employers.                                                                                                                                                                                                                                                                  |
|             | Elective by employer                  | U.S. residents employed outside the United States by a foreign affiliate of an American employer.                                                                                                                                                                                                                                         |

Table 2.A1—Type of covered employment and self-employment—Continued

| Year enacted | Coverage election or waiver if any                  | Category of worker                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|              |                                                     | Employees of nonprofit organizations placed under compulsory coverage; nonprofit organizations prohibited from terminating coverage of their employees on or after Mar. 31, 1983.                                                                                                                                                                                                                                                                                                                                                       |
|              | Elective by employer or by<br>employer and employee | States prohibited from terminating coverage of employees (after Apr. 20, 1983) and permitted to reinstate coverage for a terminated group.                                                                                                                                                                                                                                                                                                                                                                                              |
| 1984         |                                                     | Rehired federal employees whose previous service was covered.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|              |                                                     | Persons exercising reemployment rights to noncovered federal employment retain exemption after a period (not limited to 365 or fewer days) of military or national guard service or work for an international organization.                                                                                                                                                                                                                                                                                                             |
|              |                                                     | Generally, all legislative branch employees except those who were participating on Dec. 31, 1983, and are also currently participating in the Civil Service Retirement System or another federal retirement system.                                                                                                                                                                                                                                                                                                                     |
|              |                                                     | Employees of nonprofit organizations who are also participating on a mandatory basis in the Civil Service Retirement System are treated like federal employees for Social Security tax and coverage purposes. They are therefore not covered unless hired on or after Jan. 1, 1984, or reemployed after a break in service of more than 365 days.                                                                                                                                                                                       |
|              | Elective by employer                                | Churches or church-related organizations may elect irrevocably to have services performed by their employees excluded from covered employment. Their employees are then treated as self-employed for Social Security purposes.                                                                                                                                                                                                                                                                                                          |
| 1986         |                                                     | State and local government employees hired after Mar. 31,1986—Hospital Insurance (Part A) program only.                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|              | Elective by individual                              | Members of the clergy and of religious orders who filed an application for exemption from coverage may revoke the exemption if the revocation is filed before the due date of the individual's federal income tax return for the first taxable year beginning after Oct. 22, 1986.                                                                                                                                                                                                                                                      |
| 1987         |                                                     | Members of uniformed services reserve components on inactive duty training. Irregularly employed farm workers (if employer's annual expenditures for farm labor is at least \$2,500). Services performed in trade or business of spouse or by children aged 18 or older in trade or business of parent. For employers, the full amount of covered tips.                                                                                                                                                                                 |
| 1990         |                                                     | State and local government employees not under a state or local government retirement system. Exceptions: (1) students employed by the educational institution they attend and (2) election workers paid less than the mandated amount (\$100), unless either group covered under a state's Section 218 agreement.                                                                                                                                                                                                                      |
| 1994         |                                                     | Threshold for exclusion of wages paid to election workers raised from \$100 to \$1,000 annually beginning Jan. 1, 1995, and will be indexed for wage increases each year after Dec. 31, 1999.                                                                                                                                                                                                                                                                                                                                           |
|              |                                                     | Police and fire fighters under a public retirement system can be covered for Social Security in all states.                                                                                                                                                                                                                                                                                                                                                                                                                             |
|              |                                                     | Threshold for coverage of domestic employees' earnings raised from \$50 per calendar quarter to \$1,000 per calendar year per employer; amount subject to annual automatic adjustments. Domestic workers no longer covered for years in which they were under age 18, unless they are no longer in school and domestic employment is their principal occupation. Coverage of earnings of domestic workers on farms becomes subject to new annual threshold for domestic workers instead of annual threshold for agricultural employees. |

## 2.A OASDI: Coverage, Financing, and Insured Status

## Table 2.A2—Noncontributory wage credits (in dollars)

| Year enacted | Provision                                                                                                                                                                                                                                                                                                               |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1946         | Fully insured status and average monthly wage of \$160 for World War II veterans who died within 3 years after discharge.                                                                                                                                                                                               |
| 1950         | Wage credits of \$160 per month of military service during World War II period (Sept. 16, 1940–July 24, 1947).                                                                                                                                                                                                          |
| 1952         | Same military wage credits to Dec. 31, 1953.                                                                                                                                                                                                                                                                            |
| 1953         | Same military wage credits to June 30, 1955.                                                                                                                                                                                                                                                                            |
| 1954         | Same military wage credits to Mar. 31, 1956.                                                                                                                                                                                                                                                                            |
| 1956         | Same military wage credits to Dec. 31, 1956.                                                                                                                                                                                                                                                                            |
| 1967         | For uniformed services, wage credits of \$100 for each \$100 (or fraction thereof) of basic pay not in excess of \$300 per calendar quarter, beginning in 1968.                                                                                                                                                         |
| 1972         | For uniformed services, wage credits of \$300 per calendar quarter of service after 1956. (Supersedes 1967 provision.) For U.S. citizens of Japanese ancestry, wage credits for the period they were interned by the U.S. government during World War II period (Dec. 7, 1941–Dec. 31, 1946) and were aged 18 or older. |
| 1977         | For uniformed services, wage credits of \$100 for each \$300 of basic pay up to maximum credit of \$1,200 per calendar year after 1977.                                                                                                                                                                                 |
| 2002         | For uniformed services, deemed wage credits are eliminated for all years after calendar year 2001. Deemed wage credits will continue to be given for appropriate earnings for periods prior to calendar year 2002.                                                                                                      |

NOTE: . . . = not applicable.

CONTACT: Greg Diez (410) 965-0153 or Curt Pauzenga (410) 965-7210.

b. Includes tax credit, see Table 2.A5.

c. Based on automatic adjustment, under 1972 legislation (as modified by 1973 legislation), using a transitional rule, specified by the Omnibus Budget Reconciliation Act (OBRA) of 1989, for computing a "deemed" average annual wage for 1988, 1989, and 1990.

d. Based on 1990 legislation.

e. Upper limit on earnings subject to HI taxes was repealed by OBRA 1993.

| 1966         |                     | For cost of transitional uninsured monthly benefits for those aged 72 and older with fewer than 3 quarters of coverage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1972         |                     | For cost of gratuitous wage credits for Japanese-American internees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1983         |                     | A lump-sum payment to the OASDI trust funds equal to (1) the present value of the estimated additional benefits arising from the gratuitous military service wage credits for service before 1957 and (2) the amount of the combined employer-employee OASDI taxes on the gratuitous wage credits for service after 1956 and before 1984 but less any amounts previously transferred. After 1983, the trust funds will be reimbursed on a current basis for employer-employee taxes on such wage credits for service after 1983.  A lump-sum payment to the OASDI trust funds representing the amount of uncashed benefit checks (including interest) issued in the past. In the future, the trust funds will be credited on a |
|              |                     | regular basis. All transfers made for uncashed benefit checks will be subject to the annual appropriation process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|              |                     | Transfers in each year from the Treasury Department to the OASDI trust funds amounts equal to income tax receipts attributable to inclusion of Social Security benefits in taxable income. For tax credits for part of the 1984 employment FICA tax and part of the tax on self-employment                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|              |                     | income under SECA for 1984–89, see Table 2.A5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 1993         |                     | Transfers in each year from the Treasury Department to the HI trust fund of amounts equal to income tax receipts attributable to the increased portions of Social Security benefits included in taxable income under the 1993 Act.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 1981         | Interfund borrowing | Interfund borrowing permitted among OASI, DI, and HI trust funds as needed until Dec. 31,1982. For all or part of any loan to be repaid, the managing trustee determines if assets of borrowing trust fund(s) are sufficient for that purpose. Interest with respect to any outstanding loan balance at a rate equal to the rate earned by lending trust fund is transferred from time to time.                                                                                                                                                                                                                                                                                                                                |
| 1983         |                     | Interfund borrowing reauthorized among OASI, DI, and HI trust funds for calendar years 1983–87, with provisions for scheduled repayment, no later than Dec. 31, 1989, of principal and interest (including amounts borrowed in 1982). No borrowing permitted from any fund that has been reduced to specified levels.                                                                                                                                                                                                                                                                                                                                                                                                          |

| 1954         | Disability definition    | 870                                                                                                                                                                                                                                                                                                                                                                          |
| 1965         |                          | Disability lasting at least 12 months. For blind persons aged 55–64, inability to engage in usual occupation.                                                                                                                                                                                                                                                                |
| 1967         |                          | Disability that precludes engagement in any substantial gainful work existing in the national economy. For surviving spouse, disability precludes any gainful activity.                                                                                                                                                                                                      |
| 1990         |                          | More restrictive definition for surviving spouse eliminated.                                                                                                                                                                                                                                                                                                                 |
| 1954         | Period of disability     | Continuous period of at least 6 months as defined above or of blindness.                                                                                                                                                                                                                                                                                                     |
| 1972         | -                        | At least 5 months of disability.                                                                                                                                                                                                                                                                                                                                             |
| 1935         | Fully insured            | Cumulative wages of \$2,000 and employment in each of 5 years after 1936 and before attainment of age 65.                                                                                                                                                                                                                                                                    |
| 1939         |                          | QC equal to one-half the quarters elapsed after 1936 (or quarter in which age 21 attained) and before quarter of death or attainment of age 65. Minimum 6 QC, maximum 40 QC.                                                                                                                                                                                                 |
| 1950         |                          | Elapsed period measured after 1950 (QC earned at any time are used).                                                                                                                                                                                                                                                                                                         |
| 1954         |                          | Period of disability excluded from elapsed period. Alternatively, QC earned in all quarters after 1954 and before quarter in which age 65 attained (minimum 6 QC).                                                                                                                                                                                                           |
| 1956         |                          | Elapsed period measured to age 62 for women. Alternatively, QC earned in all except 4 quarters after 1954 and before quarter in which age 65 attained (62 for women).                                                                                                                                                                                                        |
| 1960         |                          | QC reduced to 1/3 the elapsed quarters.                                                                                                                                                                                                                                                                                                                                      |
| 1961         |                          | QC equal to years elapsed after 1950 (or year age 21 attained) and before year of death or age 65 (62 for women).                                                                                                                                                                                                                                                            |
| 1972         |                          | Elapsed period for men reaching age 62 after 1972, measured to age 62 or to 1975, if later.                                                                                                                                                                                                                                                                                  |
| 1983         |                          | Any person aged 55 or older on Jan. 1, 1984, and employed by a nonprofit organization to whose employees coverage is extended solely by reason of the new compulsory coverage provision, will be deemed fully insured upon subsequently acquiring 6 QC if aged 60 or older on Jan. 1, 1984; 8 QC if aged 59; 12 QC if aged 58; 16 QC if aged 57; and 20 QC if aged 55 or 56. |

Table 2.A7—Insured status (benefit eligibility)—Continued

| Year enacted | Eligibility concept                            | Provision                                                                                                                                                                           |
|--------------|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1939         | Currently insured                              | 6 QC earned in 12 quarters before quarter of death.                                                                                                                                 |
| 1946         |                                                | 6 QC earned in preceding 13 quarters, including quarter of death.                                                                                                                   |
| 1950         |                                                | Including quarter of retirement added.                                                                                                                                              |
| 1954         |                                                | Including quarter of disablement added.                                                                                                                                             |
| 1954         | Disability insured                             | 20 QC earned in last 40 quarters, including quarter of disablement, and currently insured.                                                                                          |
| 1956         |                                                | Fully insured requirement added.                                                                                                                                                    |
| 1958         |                                                | Currently insured requirement eliminated.                                                                                                                                           |
| 1960         |                                                | Alternatively, 20 QC earned before quarter of disablement (not necessarily in last 40 quarters) but QC earned in all quarters after 1950, with minimum of 6 QC.                     |
| 1965         |                                                | Alternatively, for blind under age 31, QC earned in one-half the quarters elapsed after age 21, with minimum of 6 QC. For blind under age 24, 6 QC earned in preceding 12 quarters. |
| 1967         |                                                | For all disabled under age 31, same alternative.                                                                                                                                    |
| 1972         |                                                | For blind, requirement for recent QC eliminated.                                                                                                                                    |
| 1983         |                                                | For those who become disabled again at age 31 or older and who were previously disabled before age 31, same alternative as that for those under age 31.                             |
| 1965         | Transitionally insured                         | Same as fully insured, but minimum reduced to 3 QC.                                                                                                                                 |
| 1966         | Requirement for special age-72 monthly benefit | $3\ \text{QC}$ for each year elapsed after 1966 and before attainment of age 72. (No QC if aged 72 before 1968.)                                                                    |

a. National average wage levels. For years before 1978, average wages were determined from wages earned during the first quarter of the year and reported to the Social Security Administration (SSA) for Social Security tax purposes. These wages were then multiplied by 4 to obtain the average wage for the year. For 1973-1977, from data collected on all taxable wages reported to SSA; for 1957-1972, based on 1 percent statistical sample; for 1951-1956, based on 1/10 of 1 percent statistical sample. For 1978-1984, from wage data collected by the Internal Revenue Service during processing of annual tax returns. For years after 1984, from W-2 data processed by SSA. For years after 1977, the average wage amounts have been adjusted to be consistent with the pre-1978 series.

b. The indexing factor for a given year represents the ratio of the average annual wage (column 2) for the second year before the year of first eligibility to the average annual wage for the year to be indexed. Multiplying a worker's covered earnings, up to the maximum taxable amounts for various years after 1951, by the indicated factors gives the indexed earnings. Earnings in the year before the year of first eligibility, and any earnings thereafter, are not indexed. The actual taxable earnings for those years are considered in calculating the average indexed earnings (AIME).

a. National average wage levels. For years before 1978, average wages were determined from wages earned during the first quarter of the year and reported to the Social Security Administration (SSA) for Social Security tax purposes. These wages were then multiplied by 4 to obtain the average wage for the year. For 1973-1977, from data collected on all taxable wages reported to SSA; for 1957-1972, based on 1 percent statistical sample; for 1951-1956, based on 1/10 of 1 percent statistical sample. For 1978-1984, from wage data collected by the Internal Revenue Service during processing of annual tax returns. For years after 1984, from W-2 data processed by SSA. For years after 1977, the average wage amounts have been adjusted to be consistent with the pre-1978 series.

b. A worker's earnings for each year after 1950 and through the second year before the year of first eligibility are indexed by multiplying covered earnings, up to the maximum taxable amounts, by specified indexing factors (see Table 2.A8). The indexing factor for a given year represents the ratio of the average annual wage (column 2) for the second year before the year of first eligibility to the average annual wage for the year to be indexed. For example, if the year of first eligibility is 1999, the indexing factor for 1982 is \$27,426.00/14,531.34, or 1.8873690. Multiplication of maximum taxable earnings of \$32,400 for 1982 by this factor gives maximum indexed earnings of \$61,150.75 for 1982.

Table 2.A10—Average monthly wage (AMW) and average indexed monthly earnings (AIME)

| Year enacted | Earnings measure | Provision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1939         | AMW              | Computed using creditable earnings after 1936 and before year of death or retirement, divided by months after 1936 and before quarter of death or retirement, excluding months before age 22 in quarters not QC.                                                                                                                                                                                                                                                                                                                                                                                         |
| 1950         |                  | Alternatively, computed using creditable earnings after 1950 (or year aged 21, if later) and before year of death, year of retirement or subsequent year, or year age 65 attained if then insured, divided by number of months in those years.                                                                                                                                                                                                                                                                                                                                                           |
| 1954         |                  | Earnings and months in 4 years may be excluded in all cases, 5 years if worker has 20 QC. Period of disability may be excluded.                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 1956         |                  | Earnings and months in 5 years may be excluded in all cases. Computation period may end at age 62 for women then insured.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1960         |                  | Earnings may be used for any year after 1950 and before year of retirement but including year of death with the number of years equal to the years elapsed after 1955 (or year age 26 attained) and before year of death or age 65 attained (62 for women).                                                                                                                                                                                                                                                                                                                                              |
|              |                  | Same method may be used for earnings after 1936 and year elapsed after 1941.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 1972         |                  | Number of years for men reaching age 62 after 1972, measured to age 62 or to 1975, if later.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 1977         |                  | For workers who attain age 62, become disabled, or die after 1978, excludes earnings in year of attainment of age 62 and later, computed using creditable earnings after 1936.                                                                                                                                                                                                                                                                                                                                                                                                                           |
|              |                  | For workers who attain age 62 after 1978 and before 1984, excludes earnings in year of attainment of age 62 and later, computed using creditable earnings after 1950.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1977         | AIME             | For workers who attain age 62, become disabled, or die after 1978, AIME is computed by using indexed earnings after 1950 for the same computation period applicable in calculating the AMW. Indexed earnings for a given year equal actual creditable earnings multiplied by the national average wage for the second year before worker attains age 62, becomes disabled, or dies, divided by the national average wage for the given year, except that for years after the second year before the worker attains age 62, becomes disabled, or dies, indexed earnings equal actual creditable earnings. |
| 1980         |                  | For disabled workers, the number of years of earnings used equals the number of years elapsed after 1950 (or year age 21 attained, if later) and before year of disability, minus dropout years equal to one-fifth of the number of elapsed years rounded to the next lower integer (to a maximum of 5 dropout years). However, the number of years of earnings used is at least 2. <i>Effective for initial entitlement after June 1980</i> .                                                                                                                                                           |
|              |                  | Disabled workers who receive less than 3 dropout years under the one-fifth rule may be credited with additional dropout years based on child care, up to a total of 3 dropout years. (To receive this credit, a worker must have had no earnings in that year and have been liviing with a child under age 3.) However, the number of years of earnings used is at least 2. <i>Effective for July 1981</i> .                                                                                                                                                                                             |
| 1983         |                  | For workers who die after 1978 but before attaining age 62, indexed earnings for a given year equal actual creditable earnings, multipled by the national average wage for the earlier of (1) the year in which the worker reached or would have reached age 60 or (2) the second year before the survivor becomes eligible for aged or disabled widow(er) benefits, and then divided by the national average wage for the given year. This computation method applies only if it results in a higher benefit. Effective for surviving spouses newly eligible after 1984.                                |

- a. The 1977 amendments provided for annual automatic adjustments of bend points (AIME brackets) in benefit formula in proportion to increases in average wage level. As a result, separate formulas are applicable to workers who were first eligible (attained age 62, became disabled, or died) in successive calendar years. The legislation also "froze" the minimum PIA at \$122.
- b. For workers who attained age 62 in the 1979–1983 period, PIA cannot be less than that derived from PIA table in effect in December 1978 (approximated by PIA formula in Table 2.A16) based on provisions in effect before 1979 but excluding earnings after year aged 61 in computations of AMW, and including any general benefit increase after year aged 61.
- c. Not subject to automatic adjustments until earlier of year of attainment of age 65 or year of first receipt of benefits.
- d. Minimum PIA eliminated by 1981 legislation for workers who attain age 62 or die after 1981 (after 1991 for members of certain religious orders). August 1981 legislation would have eliminated the minimum PIA effective March 1982 for workers who attained age 62 before November 1981 or who died (before attaining age 62) before March 1982; for all others, the minimum would have been eliminated effective November 1981. This legislation was superseded by December 1981 legislation that restored the minimum PIA for workers who attained age 62 or died (before attaining age 62) before 1982.
- e. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106–554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

Reduction in PIA will not be greater than one-half of the periodic payment based on noncovered employment performed after 1956. See Table 2.A12. Before 1991, a year of substantial coverage for WEP was the same amount as for the minimum PIA (25 percent of the "old law" contribution and benefit base). For 1991 and following, a year of substantial coverage under WEP provisions remains 25 percent of the old law old law base, while the criterion for computing the special minimum PIA was changed to 15 percent of the base.

Table 2.A12—Special minimum PIA (formula applies to years of coverage)

|              |                   | Years of coverage                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | PIA computation                                                              |                              |                |  |
|--------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|------------------------------|----------------|--|
| Year enacted | Applicable period | Number                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Amount <sup>a</sup><br>per year<br>of coverage<br>over 10 years<br>(dollars) | 30 or more years of coverage | Effective for- |  |
| 1990         | After 1990        | Number of years with creditable earnings equal to at least 15% of what the annual taxable maximum would have been if the statutory increases in the maximum under the 1977 amendments had not been enactede (the "old law" contribution and benefit base), that is: 1991 \$5,940 \$1992 \$6,210 \$1992 \$6,210 \$1993 \$6,435 \$1994 \$6,750 \$1995 \$6,795 \$1995 \$6,795 \$1996 \$6,975 \$1997 \$7,290 \$1998 \$7,605 \$1999 \$8,055 \$2000 \$8,505 \$2001 \$8,955 \$2002 \$9,450 |                                                                              |                              |                |  |

- a. The amount effective for a given month applies, as of that month, to all workers from the date of entitlement to benefits.
- b. Provision for future automatic cost-of-living increases of amount per year of coverage (and maximum amount), beginning with the June 1979 increase.
   c. Factors were obtained by applying cost-of-living increases to initial 1979 factor of \$11.50 and rounding each one to nearest cent. An approximate PIA may be computed by multiplying factor in year of entitlement by the number of years of coverage in excess of 10 with a maximum of 20. Actual PIA's

may be computed by multiplying factor in year of entitlement by the number of years of coverage in excess of 10 with a maximum of 20. Actual PIA's are published yearly in the *Federal Register*.

d. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106-554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

e. For 1991, and following, a year of substantial coverage under the Windfall Elimination Provision remains 25 percent of the old law base, while the criterion for the special minimum PIA was changed to 15 percent of the base.

criterion for the special minimum PIA was changed to 15 percent of the base.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," *Federal Register*, vol. 66, no. 207 (October 25, 2001).

NOTES: Alternative PIA applicable when it exceeds the regularly computed PIA. The usual rates of actuarial reduction apply for retirement before age 65. No delayed retirement credits are applicable to the benefit derived from the special minimum PIA. However, the resulting retirement benefit will be raised if necessary to equal the benefit derived from the regularly computed PIA plus any delayed retirement credits. ... = not applicable.

a. The 1977 amendments provided for annual automatic adjustments of bend points (PIA brackets) in maximum family benefit formula in proportion to increases in average wage levels. As a result, separate formulas are applicable to workers first eligible in successive calendar years.

Table 2.A14—Formulas for computing maximum family benefit, and increases in maximum based on cost-of-living adjustments, for workers first eligible for disability benefits in 1979 or later

| Year enacted      | Year of first eligibility | Formula for maximum family benefit                                                                           |
|-------------------|---------------------------|--------------------------------------------------------------------------------------------------------------|
| 1977 <sup>a</sup> | 1979 b                    | 150% of first \$230 of PIA +272% of next \$102 of PIA + 134% of next \$101 of PIA + 175% of PIA over \$433 ° |
|                   | 1980 <sup>b</sup>         | 150% of first 248 of PIA + 272% of next \$110 of PIA + 134% of next 109 of PIA + 175% of PIA over 467 °      |
| 1980 <sup>d</sup> | 1979 or later             | Smaller of (1) 85% of the AIME (or 100% of PIA, if larger) and (2) 150% of PIA $^{\rm e}$                    |

a. The 1977 amendments provided for annual automatic adjustments of bend points (PIA brackets) in maximum family benefit formula in proportion to increases in average wage level. As a result, separate formulas are applicable to workers first eligible in successive calendar years.

b. Applicability of formula limited to workers with initial entitlement before July 1980, as a result of 1980 amendments.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). b. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106–554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

c. Calculated amount subject to cost-of-living adjustments beginning with the one effective for June of the year of first eligibility.
 d. Formula for computing maximum family benefit revised effective for workers with initial entitlement in or after July 1980. New formula remains unchanged for workers eligible in successive calendar years because it has no bend points requiring adjustments.

e. Calculated amount subject to cost-of-living adjustments beginning with the one effective in year of first eligibility (or in 1981, if later).

Table 2.A16—Formulas for computing primary insurance amount (PIA) from average monthly wage (AMW) based on earnings after 1950, and percentage increases in PIA

| Effective forPercentage increase in PIA                                                                                                                                                                                                                                                                                                                                                                                        | Apr. 1952<br><sup>a</sup> 77.0                                                                                                                | Sept. 1952<br><sup>b</sup> 12.5                                                                                                               | Sept. 1954<br>c 13.0                                                                                                                                             | Jan. 1959<br><sup>d</sup> 7.0                                                                                       | Jan. 1965<br><sup>e</sup> 7.0                                                                                                                                                      | Feb. 1968<br>13.0                                                                                                                                                                            | Jan. 1970<br>15.0                                                                                                                                                                                      | Jan. 1971<br>10.0                                                                                                                                                                                               | Sept. 1972<br>20.0                                                                                                                                                                                     |

- a. Average increase in benefits of about 77 percent-from 100 percent at the lowest level to 50 percent at the highest level.
- b. Increase of 12.5 percent or \$5, if larger.
- c. Average increase of about 13 percent, with minimum increase of \$5.
- d. Increase of 7 percent or \$3, if larger.
  e. Increase of 7 percent or \$4, if larger.
- Applied to first \$100 of AMW. f.
- Applied to next \$200 of AMW.
- Applied to next \$190 before 1955 and to next \$240 effective for January 1955.
- Applied to next \$150 effective for January 1973 and to next \$350 effective for January 1974.
- j. Increase effective in two steps: 7 percent for March–May and other 4 percent for June.
   k. Beginning June 1975 all benefit increases are based on automatic cost-of-living adjustments
- Applied to next \$100 before January 1975.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the Federal Register can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," Federal Register, vol. 66, no. 207 (October 25, 2001).

NOTE: ... = not applicable.

m. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106-554, benefits will be calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

Table 2.A17—Minimum primary insurance amount (PIA) and maximum family benefit for workers who attained age 62, were first eligible for disabled-worker benefits, or died before 1979

NOTE: ... = not applicable.

<sup>a. Based on earnings; subject to reduction if claimed before age 65.
b. For AMW of \$628 or more, 175 percent of PIA.
c. Superseded by 1973 legislation.
d. Beginning in 1975, minimum PIA and percentages in maximum family benefit formula subject to automatic cost-of-living increases. (Superseded 1972 legislation for automatic increases beginning in 1974.)
e. Superseded by 1981 legislation that restored the minimum PIA for these groups.
f. Minimum PIA eliminated by 1981 legislation.</sup> 

The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L.106–554, benefits was calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

## Table 2.A18—Automatic adjustment provisions

| Year enacted | Adjustment of—                                    | Provision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------|---------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1977         | Quarter of coverage                               | Mandatory annual determination, beginning in 1978, as to whether or not an adjustment is required in the amount of wages and self-employment earnings an individual needs in order to be credited with a quarter of coverage (QC) in the succeeding year. The amount required for a QC is the product of \$250 (in effect in 1978) multiplied by the following quotient: the national average wage for the year before the year of determination, divided by the average wage for 1976 (see column 2 in Table 2.A8 for average annual wages after 1950). The resulting product, rounded to the nearest multiple of \$10, is the new amount required for a QC. In no case, however, is the new amount reduced below the amount in effect in the year of determination.                                                                                                                                                                                                          |
| 1972         | Maximum amount of taxable and creditable earnings | The 1972 Act (as modified by the 1973 legislation) mandated a determination in 1974, and in every subsequent year in which a cost-of-living benefit increase is established, as to whether or not an adjustment is required in the maximum amount of annual earnings that will be taxed and credited toward benefits.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|              |                                                   | The determination in the years after 1975 is made by multiplying the "maximum" in effect in the year of determination by the following quotient: the national average wage for the year before the year of determination, divided by the average wage for the year before the most recent year in which an automatic determination was made that resulted in an increase or in which an increase in the maximum was enacted. (See column 2 in Table 2.A8 for annual amounts of the average wage after 1950). The resulting product, rounded to the nearest multiple of \$300, is the new maximum amount of taxable and creditable earnings, effective with respect to remuneration paid after the year of determination and with respect to taxable years beginning after that year. In no case, however, is the maximum reduced to an amount below the maximum in the year of determination.                                                                                  |
| 1976         |                                                   | In the 1974 and 1975 determinations the quotient was the average wage for the year of determination, estimated from data for the first calendar quarter, divided by the corresponding amount for the year before the year of determination. Public Law 94–202 (signed Jan. 2, 1976) revised the adjustment method by increasing by a year the lag in average wages used in the computation. Thus, for example, the 1976 determination was based on the percentage increase in the average wage from 1974 to 1975.                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1977         |                                                   | Statutory in lieu of automatic increases in the maximum instituted for 1979, 1980, and 1981. Also, for purposes of establishing a "year of coverage" used in the computation of the special minimum PIA, annual maximum taxable and creditable earnings after 1978 are the amounts that would have been determined under the automatic adjustment provisions if the statutory increases in the maximum under the 1977 Act had not been enacted (see Table 2.A12).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1989         |                                                   | Automatic increases in the maximum for 1990, 1991, and 1992 determined under a transitional rule, specified by the Omnibus Budget Reconciliation Act of 1989, for computing "deemed" average annual wage for 1988, 1989, and 1990. The purpose of the legislation was to include contributions to certain "deferred compensation" plans, most importantly sections 401(k) pension plans, in the average annual average wage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1994         |                                                   | The determination for years after 1994 is made by multiplying \$60,600, the "maximum" for 1994, by the following quotient: the national average wage index for the year before the year in which the determination is made, divided by the national average wage index for 1992. (See column 2 in Table 2.A8 for annual amounts of the national average wage index.) The resulting product, rounded to the nearest \$300, is the new maximum amount of taxable and creditable earnings, effective with respect to renumeration paid in (and taxable years beginning in) the year following the year the determination is made. In no case, however, is the new maximum reduced to an amount below the maximum in the year of determination.                                                                                                                                                                                                                                    |
| 1977         | Benefits—Computation                              | New benefit computation method based on average indexed monthly earnings (AIME) after 1950, effective for workers first eligible after 1978. Provision for automatic adjustment of the dollar amounts, or bend points, defining (1) the AIME brackets in the PIA formula (see Table 2.A11) and (2) the PIA brackets in the maximum family benefit formula (see Table 2.A13). New bend points are established by multiplying the bend points in effect in 1979-\$180 and \$1,085 for the PIA formula and \$230, \$332, and \$433 for the maximum family benefit formula-by the following quotient: the national average wage for the second year before the year for which the determination was made, divided by the average wage for 1977 (see column 2 in Table 2.A8 for average annual wages after 1950). The resulting products, rounded to the nearest dollar, are the new bend points.                                                                                   |
| 1980         |                                                   | Modified maximum family benefit formula applicable to workers with initial entitlement to disability benefits in or after July 1980 (see Table 2.A14). New formula for disabled workers has no bend points subject to automatic adjustment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1972         | Benefits—<br>Cost-of-living increase              | Under the original provisions (based on 1972 and 1973 legislation), the arithmetical mean of the consumer price index (CPI) for January, February, and March in the year of determination was compared with the arithmetical mean of the CPI for the later of (a) January, February, and March of the year in which the last effective cost-of-living increase was established or (b) the 3 months of the calendar quarter in which the effective month of the last general benefit increase occurred. (Before the introduction, in 1977, of the alternative CPI series for "all urban consumers," or the CPI-U, the CPI-W was referred to as the CPI.) If the percentage increase in the CPI, rounded to the nearest one-tenth of 1 percent, was at least 3.0 (the triggering requirement), a cost-of-living benefit increase was established and the level of benefits increased by the same percentage, effective for June of the year in which the determination was made. |
| 1983         |                                                   | The 1983 Act moved the effective date for a cost-of-living benefit increase from June to December, beginning in 1983, and eliminated the "triggering requirement" for the 1983 increase only. Effective with the determination made in 1984, the two periods used in calculating the CPI-W percentage increase were shifted from the first to the third quarter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

### Table 2.A18—Automatic adjustment provisions—Continued

| Year enacted | Adjustment of— | Provision                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|              |                | The 1983 Act also introduced an alternative method for determining the size of a cost-of-living adjustment. This method, called the stabilizer provision, is applied when the ratio of the combined OASDI trust fund assets to estimated outgo falls below a certain percentage. The "triggering" percentage is 15 percent for 1985–1988 and 20 percent for years after 1988. Under these circumstances, the cost-of-living adjustment is based on the lesser of the CPI-W percentage increase determined above or the increase in average wages. The latter increase is the percentage, rounded to the nearest one-tenth of 1 percent by which the national average wage for the year before the year of determination exceeds the average wage for the year before the most recent year in which either a cost-of-living increase or a general benefit increase occurred. (See column 2 in Table 2.A8 for the annual amount of the average wage after 1950 and footnote 1 in Table 2.A8 for the underlying data sources.) |
|              |                | The 1983 legislation also included a provision for making up any benefit increases that are based on a lower wage increase rather than on the increase in the cost-of-living. When the fund ratio is greater than 32 percent, additional increases will be provided so that benefits are increased to the level at which they would have been if all increases had been based on the CPI-W. (See Table 2.A19 for the cumulative effect of statutory and automatic increases in benefits.)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1986         |                | Triggering requirement eliminated for cost-of-living increases in and after 1986 by P.L. 99–509 (signed Oct. 21, 1986).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2001         |                | The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106-554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1972         | Earnings test  | The 1972 Act (as modified by the 1973 Acts) mandated a determination in 1974, and in every subsequent year in which a cost-of-living increase is established, as to whether or not an adjustment in the exempt amount—the amount of earnings permitted without reduction in benefits—is required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|              |                | The determination in the years after 1975 is made by multiplying the monthly exempt amount in effect in the year of determination by the following quotient: the national average wage for the year before the year of determination, divided by the average wage for the year before the most recent year in which an automatic determination was made that resulted in an increase or in which an increase in the exempt amount was enacted. (See column 2 in Table 2.A8 for annual amounts of the average wage after 1950). The resulting product, rounded to the nearest multiple of \$10, is the new monthly exempt amount, effective with respect to remuneration paid after the year of determination and with respect to taxable year beginning after that year. In no case, however, is the new exempt amount reduced below the exempt amount in the year of determination. The new annual exempt amount is determined by multiplying the new monthly amount by 12.                                                |
| 1976         |                | In the 1974 and 1975 determinations the quotient was the average wage for the year of determination, estimated from data for the first calendar quarter, divided by the corresponding amount for the year before the year of determination. Public Law 94–202 (signed Jan. 2, 1976) revised the adjustment method by increasing by a year the lag in average wages used in the computation. Thus, for example, the 1976 determination was based on the percentage increase in the average wage from 1974 to 1975.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1994         |                | The determination for years after 1994 is made by multiplying the monthly exempt amounts in effect for 1994 (\$930 for beneficiaries who have, \$670 for beneficiaries who have not yet, reached "full retirement age." See footnote 6 in Table 2.A29) by the following quotient: the national average wage index for the year before the year in which the determination is made, divided by the national average wage index for 1992. (See column 2 in Table 2.A8 for annual amounts of the national average wage index.) The resulting products, rounded to the nearest \$10, are the new monthly exempt amounts effective for the year following the year the determination is made. The new annual exempt amounts are determined by multiplying the new monthly amounts by 12.                                                                                                                                                                                                                                         |
| 1996         |                | Public Law 104–121, enacted Mar. 29, 1996, suspended the automatic indexing of the exempt amounts through the year 2002 for workers aged 65–69. It legislated ad hoc increases in the annual exempt amounts to \$12,500 in 1996; \$13,500 in 1997; \$14,500 in 1998; \$15,500 in 1999; \$17,000 in 2000; \$25,000 in 2001; and \$30,000 in 2002. Thereafter, the exempt amounts will increase automatically based on the annual increase in the national average wage index as under the 1994 legislation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2000         |                | Public Law 106–182, enacted Apr. 7, 2000, eliminated the earnings test beginning with the month a beneficiary reaches full retirement age (FRA). The annual earnings test that applies in the year of attainment of FRA is based on the annual limits established under P.L. 104–121 (including the \$1 for \$3 withholding rate). In determining annual earnings for purposes of the annual earnings test under this legislation, only earnings before the month of attainment of FRA will be considered. Public Law 106–182 did not change the annual exempt amount for beneficiaries who are under FRA throughout the year, which continues to be pegged to increases in the average wage.                                                                                                                                                                                                                                                                                                                               |

a. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106–554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

Table 2.A22—Monthly benefits for survivors of deceased workers—Continued

| Type of benefit                     | Year<br>enacted | Age                | Percent<br>of PIA | Condition or qualification                                                                                                                                                                                                          |
|-------------------------------------|-----------------|--------------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Surviving divorced wife (continued) |                 |                    |                   | Married 10 years.                                                                                                                                                                                                                   |
| (continued)                         |                 |                    |                   | Reduced by full amount of pension payable based on own earnings in noncovered governmental employment (noncovered pension offset). Reduction does not apply if eligible for such pension before December 1982 and married 20 years. |
|                                     | 1983            |                    |                   | Noncovered pension offset provision not applicable if first eligible for such pension before July 1983 and dependent. Reduced by only two thirds of such pension if first eligible for it after June 1983.                          |
|                                     |                 | 65 and 2 months-67 |                   | Beginning in year 2000, the age at which 100% of PIA is payable will be increased gradually (see Widow).                                                                                                                            |
|                                     |                 | 60–66              |                   | The percent of reduction for each month depends on the age at whic 100% of PIA is payable. The percentage is adjusted so that the total reduction, in equal monthly steps, is always 28 1/2% at age 60.                             |
|                                     | 1984            |                    |                   | Noncovered pension offset limited to two-thirds of such pension.                                                                                                                                                                    |
| Disabled surviving divorced wife    | 1967            | 50–59              | 82 1/2            | Fully insured. Dependent. Married 20 years. Not counted toward family maximum. Reduced 13 1/3%, plus 43/198 of 1% for each month under age 62.                                                                                      |
|                                     | 1972            |                    | 100               | Reduced 28 1/2%, plus 43/240 of 1% for each month under age 60.                                                                                                                                                                     |
|                                     |                 |                    |                   | Dependency requirement eliminated.                                                                                                                                                                                                  |
|                                     | 1977            |                    |                   | Increased by any delayed retirement increment husband (or former husband) would be receiving.                                                                                                                                       |
|                                     |                 |                    |                   | Married 10 years.                                                                                                                                                                                                                   |
|                                     |                 |                    |                   | Reduced by full amount of pension payable based on own earnings noncovered governmental employment (noncovered pension offset). Reduction does not apply if eligible for such pension before Decemb 1982 and married 20 years.      |
|                                     | 1983            |                    |                   | Noncovered pension offset not applicable if first eligible for such pension before July 1983 and dependent. Reduced by only two-thir of such pension if first eligible for it after June 1983.                                      |
|                                     |                 |                    |                   | Additional reduction for each month under age 60 eliminated.                                                                                                                                                                        |

a. Monthly benefit reduced by amount of any government pension excluding workers' compensation benefits and veterans' compensation for service-connected disability or death. Not available for persons receiving assistance.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," *Federal Register*, vol. 66, no. 207 (October 25, 2001). NOTE: . . . = not applicable.

Provision for future automatic cost-of-living adjustments.

Suspended by 1973 legislation.

Beginning June 1975, subject to automatic cost-of-living adjustments. Benefits no longer available to persons receiving payments under Supplemental Security Income program.

Separate rate for couples eliminated. Rate for individuals applied to all beneficiaries.

Effective for applications after Nov. 5, 1990.

The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106–554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

Table 2.A25—Lump-sum benefits and vocational rehabilitation services

| Year enacted | Type of benefit                    | Provision                                                                                                                                                                                                                                                                  |
|--------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1935         | Lump-sum refund                    | Persons not insured at age 65 eligible for lump-sum refund equal to 3 1/2 percent of cumulative wage credits.                                                                                                                                                              |
| 1939         |                                    | Lump-sum refund eliminated.                                                                                                                                                                                                                                                |
| 1935         | Lump-sum death payment             | Under age 65: 3 1/2 percent of cumulative wage credits. Aged 65 or older and fully insured: 3 1/2 percent of cumulative wage credits, less monthly benefits received.                                                                                                      |
| 1939         |                                    | Fully and currently insured: 6 times PIA if no survivor eligible for monthly benefits.                                                                                                                                                                                     |
| 1950         |                                    | 3 times PIA for all deaths.                                                                                                                                                                                                                                                |
| 1954         |                                    | 3 times PIA with maximum of \$255.                                                                                                                                                                                                                                         |
| 1981         |                                    | Payable only to a widow or widower who was living with the worker at time of the death or to a widow, widower, or children eligible for monthly benefits. Amount of lump sum fixed at \$255.                                                                               |
| 1965         | Vocational rehabilitation services | Available to selected disabled individuals. Costs of services payable from OASDI trust funds to state vocational rehabilitation agencies. Reimbursement in any year may not exceed 1 percent of the total amount of OASDI disability benefits disbursed in the prior year. |
| 1972         |                                    | Maximum annual reimbursement increased to 1.25 percent for fiscal year ending June 30, 1973 and 1.50 percent thereafter.                                                                                                                                                   |
| 1981         |                                    | Reimbursement from trust funds for cost of rehabilitation services made if the services result in the disabled individual's return to work (performance of substantial gainful activity for 9 consecutive months).                                                         |
| 1999         |                                    | Enhancements including expanded beneficiary choice of service providers and extended health care for beneficiaries who return to work.                                                                                                                                     |

a. Annual earnings are calculated by multiplying the federal minimum wage by 2,080 hours (see Table 3.B3). Increases in the minimum wage during the year are prorated.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," *Federal Register*, vol. 66, no. 207 (October 25, 2001).

b. See Table 2.A8. column 2.

c. See Ttable 2.A9, column 1.

d. Assumes the worker began to work at age 22, retired at age 62 in 2001 with maximum reduction, and had no prior period of disability.

e. Assumes the deceased worker began to work at age 22, died in 2001 at age 40, had no earnings in that year, and had no prior period of disability.

f. Assumes the worker began to work at age 22, became disabled at age 50 in 2001, had no earnings in that year, and had no prior period of disability.

g. The 1980 Amendments to the Social Security Act provide for a different family maximum amount in disability cases. For disabled workers entitled after June 1980, the maximum is the smaller of (1) 85 percent of the worker's AIME (or 100 percent of the PIA, if larger) or (2) 150 percent of the PIA.

Table 2.A27—Minimum and maximum monthly retired-worker benefits payable to individuals who retired at age 62, 1957–2002 (in dollars)

a. Assumes the worker began to work at age 22, retired at the beginning of the year, had no prior disability, and received the maximum reduction. Through 1999 the assumed reduction was 36 months at 5/9 of 1 percent per month or 20 percent. In 2000, with the increase in the full retirement age to 65 and 2 months, the reduction increased to 20.008333 percent (see Table 2.A20). In 2001 the full retirement age increased to 65 and 4 months for a maximum reduction to 21.666667 percent. In 2002 the full retirement age increased to 65 and 6 months for a maximum reduction of 22.5 percent.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," *Federal Register*, vol. 66, no. 207 (October 25, 2001).

NOTES: Benefit first available at age 62 to female workers effective November 1956 and to male workers effective August 1961. . . . = not applicable.

b. Final benefit amount payable after Supplementary Medical Insurance (SMI) premium or any other deduction is rounded to next lower \$1.

c. Effective February 1968

d. Derived from transitional guarantee computation based on 1978 PIA table.

e. Minimum PIA eliminated by 1981 legislation for workers who attain age 62 in 1982 or later. (The minimum is retained until 1991 for members of religious orders who were under a vow of poverty, provided that the order had elected Social Security coverage before Dec. 29, 1981).

f. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent, based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106–554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

- a. Assumes the worker began to work at age 22, retired at the beginning of the year, had no earnings after retirement, and had no prior period of disability.
- b. Final benefit amount payable after Supplementary Medical Insurance (SMI) premium or any other deduction is rounded to next lower \$1.
- c. Effective for February 1968.
- d. Derived from transitional guarantee computation based on 1978 PIA table.
- e. Minimum PIA eliminated by 1981 legislation for workers who attain age 62 in 1982 or later. (The minimum is retained until 1991 for members of religious orders who are under a vow of poverty, provided that the order had elected Social Security coverage before Dec 29, 1981.)
- f. The December 1999 cost-of-living adjustment (COLA) was originally determined to be 2.4 percent based on the consumer price index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to P.L. 106-554, benefits were calculated and paid in August 2001 and later as if the December 1999 COLA had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occured before August 2001.

a. Earnings of retired-worker beneficiary affect total monthly family benefit. Earnings of dependent or survivor beneficiary affect only his or her benefit. However, effective January 1985, earnings of retired-worker beneficiary do not affect benefit to divorced spouse who has been divorced at least 2 years. Effective for benefits after December 1990, the 2-year requirement is waived, if the worker was entitled to benefits before the divorce.
 b. Monthly test for self-employment income is defined in terms of substantial services. For taxable years beginning after Dec. 31, 1977, monthly test

Special provisions for earnings in noncovered employment outside the United States.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," Federal Register, vol. 66, no. 207 (October 25, 2001).

eliminated for both wage and self-employment income except that each individual may use monthly test for 1 grace year, usually the year of retirement. Applied to self-employment income only.

Became effective due to automatic adjustment provisions mandated by 1972 and 1973 legislation.

Age 65 for beneficiaries who attain age 62 (age 60 for widows and widowers) before 2000, gradually increasing to age 67 for beneficiaries who attain age 62 in 2022 or later.

Discretionary increase included in 1977 legislation.

h. Actual amount is \$1,041.66 2/3.i. Actual amount is \$1,208.33 1/3.

Actual amount is \$1,291.66 2/3.

Public Law 106–182, enacted Apr. 7, 2000, eliminated the earnings test beginning with the month a beneficiary reaches full retirement age (FRA). Theannual earnings test that applies in the year of attainment of FRA is based on the annual limits established under P.L. 104–121 (including the \$1 for \$3 withholding rate). In determining annual earnings for purposes of the annual earnings test under this legislation, only earnings before the month of attainment of FRA will be considered. Public Law 106–182 did not change the annual exempt amount for beneficiaries who are under FRA throughout the year, which continues to be pegged to increases in the average wage.

I. Actual amount is \$1,416.66 2/3

m. Actual amount is \$2.083.33 1/3.

a. Earnings above the maximum amount ordinarily demonstrate SGA; earnings below the minimum amount show that SGA has not occurred. When earnings are between the minimum and maximum, other factors are considered.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Social Security Administration, "Cost-of-Living Increase and Other Determinations for 2002," *Federal Register*, vol. 66, no. 207 (October 25, 2001).

NOTES: Earnings are net of any wage subsidies and impairment-related expenses. SGA guidelines for self-employed individuals differ from the guidelines for wage earners. Self-employment activity is generally examined in terms of time spent and degree of effort, as compared to that of nondisabled self-employed individuals.

b. The 1977 amendments provided that, effective 1978, earnings of blind beneficiaries would be evaluated under different SGA guidelines than nonblind beneficiaries.

c. Pre-1978 guidelines are the same as those applicable to nonblind beneficiaries.

d. Annual amounts were determined by automatic adjustments linked to increases in average wage level. The amounts equal the monthly exempt amounts under the earnings test applicable to beneficiaries who have reached full retirement age (see Table 2.A29—fourth column, third bank—for the 1983–1995 amounts).

e. Computed as follows: Nonblind SGA amount for 2001, multiplied by the ratio of the 2001 national average wage index to the 1998 index. Rounding is to the nearest multiple of \$10. (Had this computation produced a lower SGA level than the 2001 level, the 2001 level would have been used.)

f. Computed as follows: Blind SGA amount for 1994, multiplied by the ratio of the 2001 national average wage index to the 1992 index. Rounding is to the nearest multiple of \$10. (Had this computation produced a lower SGA level than the 2001 level, the 2001 level would have been used.)

a. Adjusted gross income (before Social Security or Railroad Retirement benefits are considered), plus tax-exempt interest income, with further modification of adjusted gross income in some cases involving certain tax provisions of limited applicability among the beneficiary population.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm. Taxation of Social Security benefits is governed by the Internal Revenue Service Code. IRS describes the rules governing taxation of Social Security benefits in IRS publication 915, available at http://www.irs.gov/pub/irs-pdf/p915.pdf.

b. Includes workers' compensation benefits to the extent they cause a reduction in Social Security or Tier 1 Railroad Retirement disability benefits.

c. Includes only married taxpayers filing separately who lived with their spouse at any time during the tax year; married individuals filing separately who did not live with their spouse are treated the same as unmarried individuals.

a. Adjusted gross income (before Social Security or Railroad Retirement benefits are considered), plus tax-exempt interest income, with further modification of adjusted gross income in some cases involving certain tax provisions of limited applicability among the beneficiary population.

SOURCES: Social Security Act of 1935 (the Act), as amended through December 31, 2001; regulations issued under the Act; and precedential case decisions (rulings). Specific laws, regulations, rulings, legislation, and a link to the *Federal Register* can be found at www.ssa.gov/regulations/index.htm.

Taxation of Social Security benefits is governed by the Internal Revenue Service Code. IRS describes the rules governing taxation of Social Security benefits in IRS publication 915, available at http://www.irs.gov/pub/irs-pdf/p915.pdf.

NOTE:... = not applicable.

b. Social Security and Tier 1 Railroad Retirement benefits, including workers' compensation benefits to the extent they cause a reduction in either of these two types of benefits.

c. For married couples filing joint returns, up to 50 percent of benefits are subject to income tax if gross income is over \$32,000 but less than \$44,000. If gross income is less than \$32,000, none of the Social Security benefits will be taxable. If gross income exceeds \$44,000, up to 85 percent of Social Security benefits will be taxable income. Similar lower and upper level thresholds or "base amounts" for single individuals are \$25,000 and \$34,000. There is no similar threshold or base amount for married individuals who live together but file separate returns (for example, up to 85 percent of Social Security benefits in those cases may be considered taxable income).

d. Includes only married taxpayers filing separately who lived with their spouse at any time during the tax year; married individuals filing separately who did not live with their spouse are treated the same as unmarried individuals.

<sup>a. For those in another person's household receiving support and maintenance there, the federal benefit rate is reduced by one-third.
b. For those without countable income. These payments are reduced by the amount of countable income of the individual or couple.
c. Includes persons in private institutions whose care is not provided by Medicaid.
d. Benefits originally paid in 2000 and through July 2001 were based on federal benefit rates of \$512.00 and \$530.00, respectively. Pursuant to Public Law 106-554, monthly payments beginning in August 2001 were effectively based on the higher \$531 amount. Lump-sum compensation payments were made based on an adjusted benefit rate for months prior to August 2001.</sup>

a. The HI and SMI deductible and coinsurance amounts begin in January unless otherwise noted. The HI and SMI monthly premium amounts were effective in July through 1983 and in January for 1984 and succeeding years.

- c. Beginning in July 1973 for the disabled.
- d. Benefit not provided.
- e. Professional inpatient services of pathologists and radiologists not subject to deductible or coinsurance, beginning in April 1968.
- f. Beginning in April 1968.
- g. Home health services not subject to coinsurance, beginning in January 1973.
- h. Monthly premium for July and August 1973 was reduced to \$5.80 and \$6.10, respectively, by the Cost of Living Council.
- i. Home health services not subject to deductible.
- j. Same as footnote e, but only when physician accepts assignment.
- k. Effective October 1, 1982, professional inpatient services of pathologists and radiologists are subject to deductible and coinsurance.
- Unlike all other years, the 1989 deductible was applied on an annual, rather than a benefit period, basis. Once the deductible was paid by the beneficiary, Medicare paid
  the balance of expenses for covered hospital services, regardless of the number of days of hospitalization (except for psychiatric hospital care, which was still limited by
  the 190-day lifetime maximum).
- m. The coinsurance amount in 1989 was equal to 20 percent of the estimated national average daily cost of covered skilled nursing facility care, rather than 1/8 of the inpatient hospital deductible. The beneficiary paid the coinsurance amount for the first 8 days of care in 1989, rather than for days of care 21 to 100 in a benefit period as in all other years. Skilled nursing facility benefits were available for up to 150 days of care per year in 1989, rather than for up to 100 days of care per benefit period as in all other years.
- n. Includes the standard monthly SMI premium and a supplemental monthly flat premium under the Medicare Catastrophic Coverage Act of 1988. Amount shown is for most Part B enrollees. Residents of Puerto Rico and other territories and commonwealths, as well as persons enrolled in Part B only, paid different supplemental flat premiums resulting in a smaller premium than that shown.
- o. A reduced premium is available to individuals aged 65 or older who are not otherwise entitled to HI but who have (or who were married to, widowed, or divorced from a spouse for certain periods of time who has or had) at least 30 quarters of Social Security coverage. The reduced premium is \$184, \$183, \$188, \$187, \$170, \$166, \$165, \$175, and \$174, for 1994 to 2003, respectively.

a. Section 1905 (b) of the Social Security Act specifies the method to be used to compute the federal medical assistance percentage. From this section the following formula is derived:

SOURCE: Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation.

CONTACT: Gene Moyer (202) 690-7861.

N = 3-year average national per capita personal income

S = 3-year average state per capita personal income

Federal medical assistance percentage:

State share =  $(S^2/N^2) \times 45$  or  $(45/N^2) \times S^2$ 

Federal share = 100 - state share with 50-83 percent limits.

b. This is the Title XXI enhanced federal medical assistance percentage rate specified in section 2105(b) of the Act. The enhanced federal medical assistance percentage is limited to no more than 85%.

c. Effective October 1, 1998, through September 30, 1999.

d. Effective October 1, 2000, through September 30, 2001.

e. Effective October September 1, 2002, through September 30, 2003.

For 1998, 1999, and 2000, the values in the table were set for state plans under Titles XIX and XXI and for capitation payments and disproportionate share hospital allotments under those titles. For other purposes, the percentage for Alaska is 52.26 and for the District of Columbia 50 percent.

g. For purposes of section 1118 of the Social Security Act, the federal medical assistance percentage used under Title I, X, XIV, and XVI, and part A of Title IV will be 75 percent.

#### Table 2.F1—Number of SSA offices, 2001

| Organization                                                                                                            | Number    |

a. Data not available.

SOURCE: Social Security Administration, Office of Finance, Assessment and Management, Office of Central Operations.

CONTACT: Bob Marks (410) 965-4527 or Jay Garrett (410) 966-1886.

b. Represents calendar year data.

c. Preliminary data.

d. Excludes determinations of disability.

e. Prior to FY 1999, percentages exclude errors of less than \$5. Any payments to ineligible beneficiaries are included regardless of the dollar amount of the error.

f. Beginning with FY 2000, the SSI payment review/stewardship results are reported as the percentage of payments free of preventable error.

g. Represents cases free of decisional and documentation errors.

a Revised data

SOURCES: Gross domestic product data from Department of Commerce, Survey of Current Business.

GDP figures revised in 1996 to reflect changes in the source data.

Social welfare expenditures data taken or estimated from Federal Budgets, Census of Governments, and reports of administering agencies.

NOTES: See Table 3.A3 for components of individual categories.

Through 1976, fiscal year ended June 30 for federal government, most states, and some localities.

Beginning in 1977, federal fiscal year ended September 30.

CONTACT: Martynas Ycas (202) 358-6215.

The series Social Welfare Expenditures Under Public Programs in the United States is undergoing review and revision.

b. Represents program and administrative expenditures from federal, state and local public revenues and trust funds under public law. Includes workers' compensation and temporary disability insurance payments made through private carriers and self-insurers. Includes capital outlay and some expenditures abroad.

c. Combines "health and medical programs" with medical services provided in connection with social insurance, public aid, veterans', and "other social welfare" categories.

d. Less than 0.05 percent.

a. Expenditures from federal, state, and local revenues and trust funds under public law; includes capital outlays and administrative expenditures unless otherwise noted. Includes some payments abroad. Through 1976, fiscal year ended June 30 for federal government, most states, and some localities; for federal government, beginning in 1977, fiscal year ends September 30.

- e. Excludes refunds of employee contributions; includes payments to retired military personnel and survivors. Administrative expenses for federal noncontributory retirement not available.
- f. Includes unemployment compensation under state programs, programs for federal military and civilian employees and trade adjustment and cash training allowances, and payments under extended, emergency, disaster, and special unemployment insurance programs.
- g. Cash and medical benefits in five areas; includes private plans where applicable and state costs of administering state plans and supervising private plans. Administrative expenses of private plans and all data for Hawaii not available
- h. Cash and medical benefits paid under federal and state laws by private insurance carriers, state funds, and self-insurers. Beginning in 1959–1960, includes Alaska and Hawaii.
   Administrative costs of private carriers and self-insurers not available. Beginning in 1969–1970, includes federal "black lung" benefit program.
- i. Categorical cash and medical payments under the Social Security Act, and general assistance from state and local funds. Beginning in 1968–1969, includes work-incentive activities.
- j. Income-maintenance payments began in Jan. 1974.
- k. Work relief, other emergency aid, surplus food for the needy, repatriate and refugee assistance, and work-experience training programs. Beginning 1974 includes Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) program. Beginning in 1981, includes Low-Income Home Energy Assistance.
- I. Excludes state and local expenditures for domicilliary care in institutions other than mental and tuberculosis, and services in connection with OASDI, state temporary disability insurance, workers' compensation, public assistance, vocational rehabilitation, and veterans' programs which are included in expenditures for these programs.
- m. Civilian and Department of Defense programs (including medical care provided to military dependents).
- Includes services for disabled children.
- o. Includes burial awards. Beginning in 1964–1965, includes special allowances for survivors of veterans who did not qualify under OASDI. Beginning in 1973–1974, subsistence payments to disabled veterans undergoing training shifted from the pensions and compensation to the education subgroup.
- p. Excludes the service persons' group life insurance program.
- q. Beginning in 1973–1974, excludes administrative expenses
- r. Federal expenditures represent primarily surplus food for institutions.
- s. Surplus food for schools and programs under National School Lunch and Child Nutrition Acts.
- t. Represents primarily child welfare services under the Social Security Act. Beginning in 1968–1969, excludes administrative expenses.
  u. Includes domestic programs consolidated in 1971–1972 under ACTION and special Office of Economic Opportunity programs. Beginning 1988, represents ACTION funds only.
- v. Federal expenditures include administrative and related expenses of the Secretary of Health and Human Services; Indian welfare and guidance, aging and juvenile delinquency, and certain manpower and human development activities. State and local expenditures include amounts for antipoverty and manpower programs, day care, child placement and adoption services, foster care, legal assistance, care of transients, and other unspecified welfare services; before 1969–1970, these amounts were included with institutional care.

SOURCE: Data taken or estimated from Federal Budgets, Census of Governments, and reports of administrative agencies.

a. Includes program administration and net cost of health insurance, research, and construction of medical facilities.

SOURCE: Various agency reports and privately compiled sources.

CONTACT: Martynas Ycas (202) 358-6215.

The series Social Welfare Expenditures Under Private Programs in the United States is undergoing review and revision.

b. Includes construction.

c. Represents sum of public and private expenditures as a percent of GDP, after adjustment for elimination of overlap. The overlap occurs when payments received under public or private income-maintenance programs are used to purchase medical care, educational services, or residential care.

d. Represents fiscal year expenditures as a percent of federal fiscal year GDP.

e. Represents calendar year expenditures as a percent of calendar year GDP.

a. For year in which minimum wage rate changes were effective.

SOURCE: Department of Labor, Bureau of Labor Statistics.

NOTE: ... = not applicable.

CONTACT: Greg Diez (410) 965-0153.

b. The 1938 Act was applicable generally to employees engaged in interstate commerce or in the production of goods for interstate commerce.

c. The 1961 amendments extended coverage primarily to employees in large retail and service trades as well as local transit, construction, and gasoline service station employees.

d. The 1966 amendments extended coverage to state and local government employees of hospitals, nursing homes, and schools, and to employees of laundries, dry cleaners, large hotels and motels, restaurants, and farms. Subsequent amendments extended coverage to the remaining federal, state, and local employees not protected in 1966, to certain workers in retail and service trades previously exempted, and to certain domestic workers in private household employment.

e. A training wage may be paid for a period of 90 days to an employee who has not attained age 20. The training wage was \$3.35 per hour effective April 1, 1990 and \$3.61 per hour effective April 1, 1991, through March 31, 1993. Effective October 1, 1996, the training wage is \$4.25 per hour.

a. For OASDI and HI contribution rates and wage base, see Table 2.A3. Beginning in 1952 (1959 for DI, 1968 for HI) employer and employee contributions differ by estimated amount of refunds of employee tax overpayments and, beginning in 1966, by employee tax on tips. For SMI premium rates, see Table 2.C1.

NOTE: ... = not applicable.

CONTACT: Jeff Kunkel (410) 965-3013 or Martynas Ycas (202) 358-6215.

b. Beginning in July 1973, aged ineligibles may voluntarily enroll for H. c. Includes premiums paid on behalf of eligibles by state governments under "buy-in" arrangements. Beginning in 1966, excludes HI contributions and includes employer contributions to supplemental benefit account.

Data not available

Employer share represents federal and District of Columbia government contributions; employee share includes voluntary contributions to purchase additional annuity. Beginning in 1980, estimated by the Social Security Administration from fiscal year data. Estimated by Social Security Administration from U.S. Census Bureau fiscal year data. Employer share represents government contribution.

b. Beginning in 1974, represents payments to the aged under the SSI program.

c. Effective July 1, 1997, the Temporary Assistance for Needy Families (TANF) block grant program replaced the Aid to Families with Dependent Children (AFDC) program. Beginning in 1997, payments include services.

Table 3.C5—Population aged 65 or older receiving Social Security (OASDI) benefits, Supplemental Security Income (SSI) payments, or both, by state rank, December 1940–2001, selected years

a. Includes persons receiving OASDI, SSI, or both.

SOURCE: Social Security Administration, Master Beneficiary Record and Supplemental Security Record, 100 percent data.

CONTACT: Art Kahn (410) 965-0186.

<sup>b. The number of OASDI disabled adult child beneficiaries aged 18–64 also receiving SSI was estimated based on the number of such beneficiaries aged 18 or older for the same year and on the comparative size of the two groups at the end of 1988.
c. December data for OASDI disabled beneficiaries also receiving SSI were not available. Instead, the average of the September 1989 and March 1990 numbers was used.</sup>

a. Beginning in January 1978, the Bureau of Labor Statistics introduced a new price index for all urban consumers (CPI-U) that forms a continuous series with the earlier index for urban wage earners and for clerical workers as of December 1977.

NOTES: ... = not applicable.

Three technical changes in the definition of poverty are described in "Characteristics of the Population Below the Poverty Level, 1980," U.S. Census Bureau, *Current Population Reports*, Series P-60, No. 133: (1) Distinctions based on the sex of the family householder will no longer be made; (2) income thresholds for farm families will be the same as for nonfarm families of the same size and composition, and (3) the increased sample size will now permit separate poverty income criteria for families of 7, 8, and 9 or more persons. Separate criteria for these family sizes by number of children have been developed by the Social Security Administration for the base year 1978 on the same basis as the original poverty matrix for smaller family sizes, and then updated by means of the all-items consumer price index. The dollar thresholds for larger families beginning in 1980 are:

|      |           |           | 9 persons |      |           |           | 9 persons |

a. Income and poverty status refer to the calendar year shown; family status is as of March of the succeeding year.

SOURCES: U.S. Census Bureau, Current Population Survey, public use file of the March 2001 Income Supplement. Data for 1970 and 1975 are based on the 1970 Census of Population controls.

NOTES: Table includes civilian noninstitutionalized population residing in the 50 states and the District of Columbia. For a discussion of standard errors of estimated numbers and percentages, see U.S. Census Bureau, *Current Population Reports*, Series P-60.

b. Based on revised methodology.

c. Includes armed forces in the United States living off post or with families on post. Excludes unrelated individuals under age 16.

d. Includes children in families with both spouses present and in families with male householder with no spouse present.

e. Includes persons under age 18 listed as unrelated individual, family householder, spouse of householder, or other family member.

Table 3.E3—Shares of money income from earnings and other sources for aged and nonaged families, 2000

a. Poverty status based on money income of all family members after receipt of Social Security and any other cash transfer payments.

SOURCE: U.S. Census Bureau, Current Population Survey, Public use file of the March 2001 Income Supplement.

NOTES: Table includes civilian noninstitutionalized population residing in the 50 states and the District of Columbia.

For a discussion of standard errors of estimated numbers and percentages, see U.S. Census Bureau, Current Population Reports, Series P-60.

b. Received by individuals or any family member at any time during 1999. Most individuals or families received more than one type of income during the year.

c. Social Security may include more than one type of income during the year.
 d. Unemployment insurance, workers' compensation, or veterans' payments.

e. Less than 0.05 percent.

Table 3.E4—Current living arrangements of persons aged 65 or older, March 2001

a. Aged family members who are neither the family householder nor the spouse of the householder. Official poverty classification is based on combined income of all related persons living together. Persons in this group are classified here on the basis of official poverty criteria for family income and on a comparison of their own income with official poverty criteria for elderly persons maintaining their own households. The hidden poor are other relatives in nonpoor households whose own income is below the official poverty line for unrelated individuals or married couples.

SOURCE: U.S. Census Bureau, Current Population Survey, Public use file of the March 2001 Income Supplement.

NOTES: Living arrangements as of March 2001.

Poverty status in 2000 as reflected by income of unrelated individual or family money income for year compared with official poverty income criterion for families of appropriate size and composition.

Table includes civilian noninstitutionalized population residing in the 50 states and the District of Columbia.

For a discussion of standard errors of estimated numbers and percentages, see U.S. Census Bureau, Current Population Reports, Series P-60.

Separate figures for Alaska and Hawaii reflect Office of Economic Opportunity administrative practice beginning in the 1966–1970 period. The U.S.Census Bureau, producer of the primary version of the poverty measure (the poverty thresholds), does not produce separate figures for Alaska and Hawaii. Before 1983, the guidelines shown are for nonfarm families only.

CONTACT: Gordon Fisher (202) 690-5880.

<sup>a. The guidelines are effective from the date of issuance (unless otherwise specified by a particular program using them).
b. Add this amount for each additional family member. Before 1973, increments between some of the smaller family sizes differed from the increment shown in the table. Beginning in 1973, the increment has been the same for all family sizes in each year's set of guidelines.</sup>

a. Beginning in 1983, includes transfers from the general fund of the Treasury representing contributions that would have been paid on deemed wage credits for military service in 1957–2001, if such credits were considered to be covered wages.

SOURCE: Department of the Treasury, 100 percent data.

NOTE: ... = not applicable.

b. Includes payments (1) in 1947–1951 and in 1966 and later, for costs of noncontributory wage credits for military service performed before 1957; (2) in 1971–1982, for costs of deemed wage credits for military service performed after 1956; and (3) in 1968 and later, for costs of benefits to certain uninsured persons who attained age 72 before 1968.

c. Net interest includes net profits or losses on marketable investments. Beginning in 1967, administrative expenses are charged to the trust fund on an estimated basis, with a final adjustment, including interest, made in the following fiscal year. The amounts of these interest adjustments are included in net interest. Beginning in October 1973, the figures shown include relatively small amounts of gifts to the fund. Figures for 1983–1986 reflect payments from a borrowing trust fund to a lending trust fund for interest on amounts owed under the interfund borrowing provisions. During 1983–1990, interest paid from the trust fund to the general fund of the Treasury on advance tax transfers is reflected. For the OASI trust fund, the amount shown for 1985 includes an interest adjustment of \$88 million on unnegotiated checks issued before April 1985.

d. Beginning in 1966, includes payments for vocational rehabilitation services furnished to disabled persons receiving benefits because of their disabilities. Beginning in 1983, amounts are reduced by amount of reimbursement for unnegotiated benefit checks.

e. Amount equals total receipts less total expenditures, plus amounts borrowed or less amounts repaid under interfund borrowing provisions.

f. Less than \$500,000.

Table 4.A2—Disability Insurance, 1957–2001 (in millions of dollars)

a. Beginning in 1983, includes transfers from the general fund of the Treasury representing contributions that would have been paid on deemed wage credits for military service in 1957–2001, if such credits were considered to be covered wages.

SOURCE: Department of the Treasury, 100 percent data.

NOTE: ... = not applicable.

b. Includes payments (1) in 1966 and later, for costs of noncontributory wage credits for military service performed before 1957; and (2) in 1971–1982, for costs of deemed wage credits for military service performed after 1956.

c. Net interest includes net profits or losses on marketable investments. Beginning in 1967, administrative expenses are charged to the trust fund on an estimated basis, with a final adjustment, including interest, made in the following fiscal year. The amounts of these interest adjustments are included in net interest. Beginning in July 1974, the figures shown include relatively small amounts of gifts to the fund. Figures for 1983–1986 reflect payments from a borrowing trust fund to a lending trust fund for interest on amounts owed under the interfund borrowing provisions. During 1983–1990, interest paid from the trust fund to the general fund of the Treasury on advance tax transfers is reflected. The amount shown for 1985 includes an interest adjustment of \$14.8 million on unnegotiated checks issued before April 1985.

d. Beginning in 1966, includes payments for vocational rehabilitation services furnished to disabled persons receiving benefits because of their disabilities. Beginning in 1983, amounts are reduced by amount of reimbursement for unnegotiated benefit checks.

e. Less than \$500,000.

f. Amount equals total receipts less total expenditures, less amounts loaned or plus amounts repaid under interfund borrowing provisions.

g. Reflects \$195 million in transfers from the DI trust fund to the general fund of the Treasury to correct estimated amounts transferred for calendar years 1984 and 1985.

a. Beginning in 1983, includes transfers from the general fund of the Treasury representing contributions that would have been paid on deemed wage credits for military service in 1957–2001, if such credits were considered to be covered wages.

SOURCE: Department of the Treasury, 100 percent data.

NOTE: ... = not applicable.

b. Includes payments (1) in 1947–1951 and in 1966 and later, for costs of noncontributory wage credits for military service performed before 1957; (2) in 1971–1982, for costs of deemed wage credits for military service performed after 1956; and (3) in 1968 and later, for costs of benefits to certain uninsured persons who attained age 72 before 1968.

c. Net interest includes net profits or losses on marketable investments. Beginning in 1967, administrative expenses are charged to the trust fund on an estimated basis, with a final adjustment, including interest, made in the following fiscal year. The amounts of these interest adjustments are included in net interest. Beginning in October 1973, the figures shown include relatively small amounts of gifts to the fund. Figures for 1983–1986 reflect payments from a borrowing trust fund to a lending trust fund for interest on amounts owed under the interfund borrowing provisions. During 1983–1990, interest paid from the trust fund to the general fund of the Treasury on advance tax transfers is reflected. For the OASI trust fund, the amount shown for 1985 includes an interest adjustment of \$88 million on unnegotiated checks issued before April 1985.

d. Beginning in 1966, includes payments for vocational rehabilitation services furnished to disabled persons receiving benefits because of their disabilities. Beginning in 1983, amounts are reduced by amount of reimbursement for unnegotiated benefit checks.

e. Amount equals total receipts less total expenditures, plus amounts borrowed or less amounts repaid under interfund borrowing provisions.

f. Less than \$500,000.

Table 4.A4—Total annual benefits paid, by type of benefit and trust fund, and as a percentage of personal income, selected years 1937–2001 (in millions of dollars)

a. Relates to wage and salary workers for 1937–1950. Beginning in 1951, includes self-employment. See Table 2.A3 for annual maximum taxable earnings.

SOURCES: Social Security Administration, Master Earnings File, 1 percent sample; Bureau of Labor Statistics; and Bureau of Economic Analysis.

b. Excludes railroad account numbers. Since program began, 408 million Social Security numbers have been issued. Some individuals have been issued more than one number.

c. Workers reported with first taxable earnings under program in specified year. During 1937–1999, 300 million different persons reported with taxable earnings.

d. Total wages, including estimated amounts above taxable limit, for 1937–1950. Beginning in 1951, also includes reported total net earnings of self-employed persons.

e. Preliminary data.

f. Taxable earnings are preliminary estimates based on Social Security data.

g. Data not available.

h. Preliminary estimates based on data from Bureau of Labor Statistics and the Bureau of Economic Analysis.

Table 4.B2—Number and amount of earnings for wage and salary and self-employed workers, 1951–2001

a. Not covered before 1951.

NOTE: ... = not applicable.

b. Preliminary data.

c. For all workers, medians relate to combined earnings from wage and salary employment and self-employment. For all wage and salary workers, medians relate to wages and salaries only.

Table 4.B4—Percentage of all workers and self-employed workers with total annual earnings below annual maximum taxable, by sex, selected years 1937–1999

|              | Annual<br>maximum     | А            | II workers a (perce | nt)          | All self-employed workers (percent) |              |              |  |  |

a. Represents workers attaining age 65 during the year. Workers aged 65 or older were not covered under the program in that year.

NOTES: Age refers to age attained during year.

b. Preliminary data.

<sup>. . . =</sup> not applicable.

Table 4.B6—Median earnings of all workers, by age and sex, selected years 1937–1999 (in dollars)

a. Earnings of workers attaining age 65 during the year. Workers aged 65 or older not covered under program in that year.

NOTES: The amount of median earnings includes estimates above the taxable maximum.

Age refers to age attained during year.

... = not applicable.

b. Preliminary data.

Table 4.B7—Number of wage and salary workers, by amount of taxable earnings and sex, 1992–1999

a. State designation based primarily on employee end-of-year residence, obtained from employer wage reports filed via magnetic media. State designation based on location of employer for reports filed via paper.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTE: Data are based on preliminary estimates.

b. Workers with earnings in both wage and salary employment and self-employment are counted in each type of employment. National and state totals and subtotals are unduplicated counts of workers in each type of employment.

c. Annual maximum taxable earnings for Social Security (OASDI) from a single employer or from self-employment were \$72,600 in 1999.

d. For 1999 earnings, paid at the rate of 6.2 percent of taxable wages by both employees and employers, 6.2 percent of taxable tips by employees, and 12.4 percent of self-employment income by self-employed workers. Data are unadjusted for multi-employer tax refunds.

e. Person's employed in American Samoa, Guam, Northern Mariana Islands, and Virgin Islands; U.S. citizens employed abroad by U.S. employers; persons employed on U.S. oceanborne vessels; and workers with unknown residence.

a. Workers with earnings in both wage and salary employment and self-employment are counted in each type of employment.
b. See Table 2.A3 for annual maximum taxable earnings.
c. See Table 2.A3 for contribution rates.

SOURCE: Social Security Administration, Master Earnings File, 1 percent sample.

NOTE: ... = note applicable.

CONTACT: Greg Diez (410) 965-0153 or William Kearns (410) 965-6750.

d. Unadjusted for multi-employer tax refunds. Unadjusted for tax credits. See Table 2.A5 for information on tax credits.

e. Preliminary data.

Taxable earnings are preliminary estimates based on Social Security data; employment data are preliminary estimates based on data from Bureau of Labor Statistics and the National Income and Product Accounts.

g. Preliminary estimates based on data from Bureau of Labor Statistics and the National Income and Product Accounts.

a. State designation based primarily on employee end-of-year residence, obtained from employer wage reports filed via magnetic media. State designation based on location of employer for reports filed via paper.

SOURCE: Social Security Administration, Continuous Work History Sample, 1 percent sample.

NOTE: Data are based on preliminary estimates.

CONTACT: Greg Diez (410) 965-0153 or William Kearns (410) 965-6750.

b. Workers with earnings in both wage and salary employment and self-employment are counted in each type of employment. National and state totals and subtotals are unduplicated counts of workers in each type of employment.

c. No annual maximum taxable earnings amount for Medicare.

d. For 1999 earnings, paid at the rate of 1.45 percent of taxable wages by both employees and employers, 1.45 percent of taxable tips by employees, and 2.9 percent of self-employment income by self-employed workers.

e. Persons employed in American Samoa, Guam, Northern Mariana Islands, and Virgin Islands; U.S. citizens employed abroad by U.S. employers; persons employed on U.S. oceanborne vessels; and workers with unknown residence.

a. Percentage of population fully insured aged 20 or older.

SOURCE: U.S. Census Bureau, 100 percent data.

NOTES: Population in the Social Security area includes residents of the 50 states and the District of Columbia adjusted for net census undercount; civilian residents of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands; federal civilian employees and persons in the armed forces abroad and their dependents; crew members of merchant vessels; and all other U.S. citizens abroad.

Population estimates are subject to revision.

a. Includes 163,160 persons of unknown race. In years prior to 1993, persons of unknown race were included with White.

NOTE: Race and ethnic designations are collected from the form SS-5 (Application for a Social Security Card). For dependents and survivor beneficiaries, race is assumed to be the same as that shown on the SS-5 for the wage earner on whose earnings record the benefit is based.

b. Includes Asians and Pacific Islanders, American Indians and Alaska Natives, and a subset of the total number of beneficiaries of Hispanic origin. The distribution of beneficiaries among those three groups is not available.

c. Provisions for Railroad Retirement beneficiaries are described in the section Social Security (Old-Age, Survivors, and Disability Insurance).

d. Includes special age-72 beneficiaries.

a. Includes 70,350 persons of unknown race.

NOTE: Race and ethnic designations are collected from the form SS-5 (Application for a Social Security Card). For dependents and survivor beneficiaries, race is assumed to be the same as that shown on the SS-5 for the wage earner on whose earnings record the benefit is based.

b. Includes Asians and Pacific Islanders, American Indians and Alaska Natives, and a subset of the total number of beneficiaries of Hispanic origin. The distribution of beneficiaries among those three groups is not available.

c. Provisions for Railroad Retirement beneficiaries are described in the section Social Security (Old-Age, Survivors, and Disability Insurance).

Table 5.A1.2—Number and average monthly benefit for disabled workers, by race, age, and sex, December 2001

a. Includes 37,410 persons of unknown race.

NOTE: Race and ethnic designations are collected from the form SS-5 (Application for a Social Security Card). For dependents and survivor beneficiaries, race is assumed to be the same as that shown on the SS-5 for the wage earner on whose earnings record the benefit is based.

b. Includes Asians and Pacific Islanders, American Indians and Alaska Natives, and a subset of the total number of beneficiaries of Hispanic origin. The distribution of beneficiaries among those three groups is not available.

c. Provisions for Railroad Retirement beneficiaries are described in the section Social Security (Old-Age, Survivors, and Disability Insurance).

Table 5.A1.3—Number and average monthly benefit for spouses, by race, sex, basis of entitlement, age, and marital status, December 2001

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | All rad             | ces a                                      | Wh               | ite                                        | Bla                 | ck                                         | Othe           | r <sup>b</sup>                           |
