

## Get Greater Precision at Science.gov 3.0

Find the research results you need!

### Science.gov 3.0 gives you:

- ★ *More sophistication in ranking your results*
- ★ *More power to customize your search*
- ★ *More precision*
- ★ *More intuitive site navigation*
- ★ *More user-friendly features*

### We've added:

#### MetaRank

Science.gov 3.0 deploys a new, more sophisticated method of ranking results. MetaRank uses more information – title, author, snippet, abstract, etc. – to assign relevancy to results of your search queries.

#### Advanced search fields

You can more precisely prescribe search terms, using our new fielded search.

#### Boolean searching

Queries can include expressions using logical operators AND, OR or NOT; parentheses; and wildcards.

#### Early search returns

You can view and work with results while Science.gov continues searching and ranking. When the search is complete, you can retrieve additional ranked results.

#### Preferences

From our preferences link, you can customize your search by selecting number of results, length of ranking time, and whether to update search results.

SCIENCE.GOV 3.0 = GREATER PRECISION + BETTER RESULTS

Science.gov Alliance: U.S. Departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, and the Interior; the Environmental Protection Agency, Government Printing Office, National Aeronautics and Space Administration, the National Science Foundation, with additional support from the National Archives and Records Administration
