customer FAX: (504) 736-2620

DIAGRAM SELECTION. The extent of the published diagram coverage and the latest approval date for each protraction is shown on the index. Each diagram is designated by a number and may also carry the name of a city, town or prominent natural feature within it. Diagrams should be ordered by number, name, and date of approval from the appropriate MMS OCS Region, or from <http://www.mms.gov/ld/maps.htm>.

The Supplemental Official OCS Block Diagrams (SOBDs) depicts areal measurements, projected and non-projected boundaries, offshore boundary intersection coordinates, and Federal and State land ownership for individual Outer Continental Shelf marine cadastre blocks. The Limit of '8(g) Zone' occurs within a zone three nautical miles seaward of any coastal State's Submerged Lands Act Boundary using the same principles and baselines used to project the SLA for any state's 8(g) royalty purposes.
