

Say No to CO!

Protect yourself and your family from carbon monoxide poisoning (CO) when using pressure washers, generators and other gasoline-powered tools.

- You cannot see or smell CO, but it can kill you or make you sick. **CO poisoning can occur in minutes.**
- Be safe when you're using these machines.

BE SAFE:

- ✓ NEVER use generators, pressure washers, or other gasoline powered tools inside homes, garages, carports, basements, or other enclosed spaces.
- ✓ Keep generators or pressure washer engines outside and away from doors, windows, and vents during use.
- ✓ Read product directions for other safety tips.
- ✓ Use battery operated CO detectors in your home, near the bedrooms.
- ✓ Chain the generator to a tree or other fixed object to prevent theft.
- ✓ Look for symptoms of CO poisoning:

Headache

Fatigue

Dizziness

Nausea/vomiting

Confusion

Seizures

Loss of consciousness

Get out of the house and seek medical help immediately if you or family members have these symptoms!
