++ Effectes Determination abbreviations

NE = no effect

NLAA = (may affect) not likely to adversely affect

LAA = (may affect) likely to adversely affect

* Annual parameters identified should be monitored every year at the end of the growing season.

** Only 20 percent of these pastures will be monitored on an annual basis.

*** H = Highly sensitive M = Moderately sensitive

**** PFC - Proper Functioning Condition

ARUT - At Risk Upward Trend

ARDT - At Risk Downward Trend

ARNAT - At Risk Nonapparent Trend

NF - Non-Functional

? - PFC Assessment has not been completed

NA - Not Applicable

KA - Key Area

¹ Pastures within bull trout subsheds.
