

Helen Reef Resource Management Project (HRRMP)

- One of the most diverse atolls in Pacific
- HRRMP works to protect the natural resources of the reef for the benefit of the Hatohobeian people that depend on them.

Biological Monitoring

Helen Reef Project

Community Involvement

Future Plans and Actions

- **Maintain 100% protection of Helen Reef from foreign and local infractions**
- **Continue to monitor and evaluate the ecological recovery of the resources and species.**
- **Initiate small scale coconut bio-fuel production in the SW islands for sustainable resource use**
- **Work together and encourage sharing with local and international groups to achieve our goals**
- **Research feasibility of eco-tourism in the Southwest Islands as a means of income for conservation work and the community.**
