Subject: JPA Mid-term review

As Minister of technology in St. Kitts and Nevis,

We believe that ICANN is fulfilling its responsibilities under the JPA with the US Department of Commerce. As a huge stakeholder, we have been a part of fulfilling these responsibilities and the accountability of the organization to its stakeholders.

We would like to see a transition as long-envisaged, and believe, like the Board of ICANN, that the JPA should be concluded, and there should be discussion over the coming months before the JPA concludes to define the final shape of the organization.

Thanks for your kind consideration.
