

Dear Ms Sene

Re: Midterm Review of Joint Project Agreement (JPA) between United States Department of Commerce (DoC) and ICANN

Thank you for the opportunity to provide comments on the continued transition of the technical coordination and management of the Internet's domain name and addressing system.

We believe that ICANN has been fulfilling its obligations under that current JPA to a good extent.

We believe, like the Board of ICANN, that the JPA should be concluded, and that the coming months should be dedicated to define ad new model for the management of the Internet where no government or organization or individual is capable of making interventions.

Yours
Ibaa Oueichek
