

# **TOXICOLOGICAL PROFILE FOR COBALT**

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES  
Public Health Service  
Agency for Toxic Substances and Disease Registry

April 2004

## **DISCLAIMER**

The use of company or product name(s) is for identification only and does not imply endorsement by the Agency for Toxic Substances and Disease Registry.

## **UPDATE STATEMENT**

A Toxicological Profile for cobalt, Draft for Public Comment was released in July 2001. This edition supersedes any previously released draft or final profile.

Toxicological profiles are revised and republished as necessary. For information regarding the update status of previously released profiles, contact ATSDR at:

Agency for Toxic Substances and Disease Registry  
Division of Toxicology/Toxicology Information Branch  
1600 Clifton Road NE,  
Mailstop F-32  
Atlanta, Georgia 30333

## FOREWORD

This toxicological profile is prepared in accordance with guidelines\* developed by the Agency for Toxic Substances and Disease Registry (ATSDR) and the Environmental Protection Agency (EPA). The original guidelines were published in the *Federal Register* on April 17, 1987. Each profile will be revised and republished as necessary.

The ATSDR toxicological profile succinctly characterizes the toxicologic and adverse health effects information for the hazardous substance described therein. Each peer-reviewed profile identifies and reviews the key literature that describes a hazardous substance's toxicologic properties. Other pertinent literature is also presented, but is described in less detail than the key studies. The profile is not intended to be an exhaustive document; however, more comprehensive sources of specialty information are referenced.

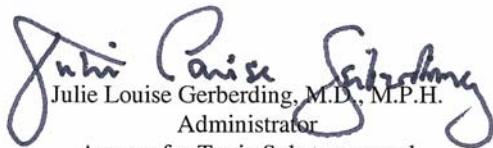

The focus of the profiles is on health and toxicologic information; therefore, each toxicological profile begins with a public health statement that describes, in nontechnical language, a substance's relevant toxicological properties. Following the public health statement is information concerning levels of significant human exposure and, where known, significant health effects. The adequacy of information to determine a substance's health effects is described in a health effects summary. Data needs that are of significance to protection of public health are identified by ATSDR and EPA.

Each profile includes the following:

- (A) The examination, summary, and interpretation of available toxicologic information and epidemiologic evaluations on a hazardous substance to ascertain the levels of significant human exposure for the substance and the associated acute, subacute, and chronic health effects;
- (B) A determination of whether adequate information on the health effects of each substance is available or in the process of development to determine levels of exposure that present a significant risk to human health of acute, subacute, and chronic health effects; and
- (C) Where appropriate, identification of toxicologic testing needed to identify the types or levels of exposure that may present significant risk of adverse health effects in humans.

The principal audiences for the toxicological profiles are health professionals at the Federal, State, and local levels; interested private sector organizations and groups; and members of the public.

This profile reflects ATSDR's assessment of all relevant toxicologic testing and information that has been peer-reviewed. Staff of the Centers for Disease Control and Prevention and other Federal scientists have also reviewed the profile. In addition, this profile has been peer-reviewed by a nongovernmental panel and was made available for public review. Final responsibility for the contents and views expressed in this toxicological profile resides with ATSDR.

Julie Louise Gerberding, M.D., M.P.H.  
Administrator  
Agency for Toxic Substances and  
Disease Registry

### Background Information

The toxicological profiles are developed by ATSDR pursuant to Section 104(i) (3) and (5) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA or Superfund) for hazardous substances found at Department of Energy (DOE) waste sites. CERCLA directs ATSDR to prepare toxicological profiles for hazardous substances most commonly found at facilities on the CERCLA National Priorities List (NPL) and that pose the most significant potential threat to human health, as determined by ATSDR and the EPA. ATSDR and DOE entered into a Memorandum of Understanding on November 4, 1992 which provided that ATSDR would prepare toxicological profiles for hazardous substances based upon ATSDR's or DOE's identification of need. The current ATSDR priority list of hazardous substances at DOE NPL sites was announced in the Federal Register on July 24, 1996 (61 FR 38451).

# **QUICK REFERENCE FOR HEALTH CARE PROVIDERS**

Toxicological Profiles are a unique compilation of toxicological information on a given hazardous substance. Each profile reflects a comprehensive and extensive evaluation, summary, and interpretation of available toxicologic and epidemiologic information on a substance. Health care providers treating patients potentially exposed to hazardous substances will find the following information helpful for fast answers to often-asked questions.

### ***Primary Chapters/Sections of Interest***

**Chapter 1: Public Health Statement:** The Public Health Statement can be a useful tool for educating patients about possible exposure to a hazardous substance. It explains a substance's relevant toxicologic properties in a nontechnical, question-and-answer format, and it includes a review of the general health effects observed following exposure.

**Chapter 2: Relevance to Public Health:** The Relevance to Public Health Section evaluates, interprets, and assesses the significance of toxicity data to human health.

**Chapter 3: Health Effects:** Specific health effects of a given hazardous compound are reported by type of health effect (death, systemic, immunologic, reproductive), by route of exposure, and by length of exposure (acute, intermediate, and chronic). In addition, both human and animal studies are reported in this section.

**NOTE:** Not all health effects reported in this section are necessarily observed in the clinical setting. Please refer to the Public Health Statement to identify general health effects observed following exposure.

**Pediatrics:** Four new sections have been added to each Toxicological Profile to address child health issues:

- Section 1.6** How Can (Chemical X) Affect Children?
  - Section 1.7** How Can Families Reduce the Risk of Exposure to (Chemical X)?
  - Section 3.8** Children's Susceptibility
  - Section 6.6** Exposures of Children

#### **Other Sections of Interest:**

- ## **Section 3.9 Biomarkers of Exposure and Effect**

## **Section 3.12 Methods for Reducing Toxic Effects**

*ATSDR Information Center*

The following additional material can be ordered through the ATSDR Information Center:

*Case Studies in Environmental Medicine: Taking an Exposure History*—The importance of taking an exposure history and how to conduct one are described, and an example of a thorough exposure history is provided. Other case studies of interest include *Reproductive and Developmental*

*Hazards; Skin Lesions and Environmental Exposures; Cholinesterase-Inhibiting Pesticide Toxicity;* and numerous chemical-specific case studies.

*Managing Hazardous Materials* Incidents is a three-volume set of recommendations for on-scene (prehospital) and hospital medical management of patients exposed during a hazardous materials incident. Volumes I and II are planning guides to assist first responders and hospital emergency department personnel in planning for incidents that involve hazardous materials. Volume III—*Medical Management Guidelines for Acute Chemical Exposures*—is a guide for health care professionals treating patients exposed to hazardous materials.

*Fact Sheets (ToxFAQs)* provide answers to frequently asked questions about toxic substances.

### THE PROFILE HAS UNDERGONE THE FOLLOWING ATSDR INTERNAL REVIEWS:

1. Health Effects Review. The Health Effects Review Committee examines the health effects chapter of each profile for consistency and accuracy in interpreting health effects and classifying end points.
2. Minimal Risk Level Review. The Minimal Risk Level Workgroup considers issues relevant to substance-specific Minimal Risk Levels (MRLs), reviews the health effects database of each profile, and makes recommendations for derivation of MRLs.
3. Data Needs Review. The Research Implementation Branch reviews data needs sections to assure consistency across profiles and adherence to instructions in the Guidance.

## PEER REVIEW

A peer review panel was assembled for cobalt. The panel consisted of the following members:

1. Dr. Herman Cember, C.H.P., Ph.D., PE., Adjunct Professor, School of Health Sciences, Purdue University, Lafayette, Indiana;
2. Dr. James Hansen, Ph.D., Environmental Contaminant Specialist, U.S. Fish and Wildlife Service, Spokane, WA;
3. Dr. Dominique Lison, M.D., Ph.D., Vice-Chairman of the Doctoral School in Genetics and Immunology, Catholic University of Louvain, Brussels, Belgium, and
4. Dr. Nancy Pedigo, Ph.D., Research Assistant Professor, Department of Pharmacology, University of Kentucky Medical Center, Lexington, KY.

These experts collectively have knowledge of cobalt's physical and chemical properties, toxicokinetics, key health end points, mechanisms of action, human and animal exposure, and quantification of risk to humans. All reviewers were selected in conformity with the conditions for peer review specified in Section 104(I)(13) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

Scientists from the Agency for Toxic Substances and Disease Registry (ATSDR) have reviewed the peer reviewers' comments and determined which comments will be included in the profile. A listing of the peer reviewers' comments not incorporated in the profile, with a brief explanation of the rationale for their exclusion, exists as part of the administrative record for this compound. A list of databases reviewed and a list of unpublished documents cited are also included in the administrative record.

The citation of the peer review panel should not be understood to imply its approval of the profile's final content. The responsibility for the content of this profile lies with the ATSDR.

|-------|--|-----|
| 3-1.  | Levels of Significant Exposure to Cobalt—Chemical Toxicity—Inhalation .....  | 41  |
| 3-2.  | Levels of Significant Exposure to Cobalt—Chemical Toxicity—Oral .....  | 71  |
| 3-3.  | Levels of Significant Exposure to Cobalt—Radiation Toxicity—External Radiation .....   | 102 |
| 3-4.  | Transfer Parameters for Cobalt Following Inhalation of Cobalt Oxide ( $\text{CO}_3\text{O}_4$ ) Particles, Showing the Fractions of the Lung Content, $L(t)$ , and Time, $t$ , Cleared Per Day by Each Route ..... | 124 |
| 3-5.  | Conceptual Representation of a Physiologically Based Pharmacokinetic (PBPK) Model for a Hypothetical Chemical Substance .....  | 139 |
| 3-6.  | Compartment Model to Represent Particle Deposition and Time-Dependent Particle Transport in the Respiratory Tract.....   | 141 |
| 3-7.  | Reaction of Gases or Vapors at Various Levels of the Gas-Blood Interface .....   | 144 |
| 3-8.  | The Human Respiratory Tract Model: Absorption into Blood .....   | 149 |
| 3-9.  | ICRP Biokinetics Model for Cobalt.....   | 151 |
| 3-10. | Relation Between Mean Cobalt Exposure and Mean Blood Concentration of Cobalt in Exposed Workers.....   | 165 |
| 3-11. | Existing Information on Health Effects of Stable Cobalt .....  | 172 |
| 3-12. | Existing Information on Health Effects of Radioactive Cobalt .....   | 173 |
| 6-1.  | Frequency of NPL Sites with Cobalt Contamination.....  | 208 |
| 6-2.  | Frequency of NPL Sites with $^{60}\text{C}$ obalt Contamination .....  | 209 |

## LIST OF TABLES

|       |   |     |
|-------|---|-----|
| 3-1.  | Levels of Significant Exposure to Cobalt—Chemical Toxicity—Inhalation .....   | 31  |
| 3-2.  | Levels of Significant Exposure to Cobalt—Chemical Toxicity—Oral .....   | 56  |
| 3-3.  | Levels of Significant Exposure to Cobalt—Chemical Toxicity—Dermal .....   | 85  |
| 3-4.  | Levels of Significant Exposure to Cobalt—Radiation Toxicity—External Radiation .....  | 89  |
| 3-5.  | Genotoxicity of Cobalt <i>In Vitro</i> .....  | 119 |
| 3-6.  | Initial (Day 3) Lung Deposits of Cobalt Oxide and Summary of Lung Retention at 90 and 180 Days .....  | 125 |
| 3-7.  | Summary of Measurements of Retention and Excretion After Intragastric Administration of Cobalt Oxide ( $\text{Co}_3\text{O}_4$ ) Particles (Mean Percentage of Recovered Activity at 7 Days After Administration) ..... | 127 |
| 3-8.  | Peak Translocation and Average Mechanical Clearance Rates After Inhalation of Cobalt Oxide.....   | 133 |
| 3-9.  | Summary of Measurements of Retention and Excretion of Cobalt Following Injection of Cobalt Nitrate $\text{Co}(\text{NO}_3)_2$ Solution (Mean Percent Recovery) .....  | 136 |
| 3-10. | Reference Respiratory Values for a General Caucasian Population at Different Levels of Activity .....   | 143 |
| 3-11. | Reference Values of Parameters for the Compartment Model to Represent Time-dependent Particle Transport from the Human Respiratory Tract .....  | 145 |
| 3-12. | Cobalt Exposure Concentrations and Amounts in the Blood and Urine of Subjects Examined .....  | 164 |
| 4-1.  | Chemical Identity of Cobalt and Selected Compounds .....  | 184 |
| 4-2.  | Physical and Chemical Properties of Cobalt and Selected Compounds .....   | 188 |
| 4-3.  | Principal Radioactive Cobalt Isotopes .....   | 192 |
| 5-1.  | Current U.S. Manufacturers of Cobalt Metal and Selected Cobalt Compounds.....   | 197 |
| 5-2.  | Facilities that Produce, Process, or Use Cobalt and Cobalt Compounds.....   | 199 |
| 6-1.  | Releases to the Environment from Facilities that Produce, Process, or Use Cobalt and Cobalt Compounds .....   | 214 |
| 6-2.  | Concentration of Cobalt in the Atmosphere .....   | 232 |

|      |  |     |
|------|--|-----|
| 6-3. | Cobalt Levels in Water .....   | 236 |
| 6-4. | Cobalt Levels in Sediment .....  | 240 |
| 6-5. | Cobalt Levels in Food.....   | 244 |
| 6-6. | Cobalt Content of Miscellaneous Substances .....                                     | 247 |
| 6-7. | Mean Daily Dietary Intake of Cobalt for Selected Population Groups in Canada .....   | 248 |
| 6-8. | Cobalt Levels in Human Tissues and Fluids.....                                       | 250 |
| 6-9. | Ongoing Studies on Cobalt .....  | 263 |
| 7-1. | Analytical Methods for Determining Stable Cobalt in Biological Materials.....        | 266 |
| 7-2. | Analytical Methods for Determining Radioactive Cobalt in Biological Samples .....    | 268 |
| 7-3. | Analytical Methods for Determining Stable Cobalt in Environmental Samples .....      | 274 |
| 7-4. | Analytical Methods for Determining Radioactive Cobalt in Environmental Samples ..... | 276 |
| 8-1. | Regulations and Guidelines Applicable to Stable Cobalt .....                         | 282 |
| 8-2. | Regulations and Guidelines Applicable to Radioactive Cobalt .....                    |     |
