Wigeons forage in freshwater marshes and other wetlands.

Conceptual Plans

Introduction

The plans for the visitor center/headquarters will closely follow those for a similar facility recently completed at the Rhode Island National Wildlife Refuge Complex. Map G-1 below provides an aerial view of the proposed site described in chapter 4. Please refer to map 4-2 in chapter 4 for details on other proposed facilities associated with the visitor center/headquarters.

The figures that follow are standard plans from the Region 5 family of buildings for a medium-sized facility. Those plans give a general overview of what the proposed visitor center and headquarters will look like. Please note that the final design will vary.

Figure G.1. Medium visitor center/headquarters - Perspective

Figure G.2. Medium visitor center/headquarters - Elevations
