

Controlled Foreign Corporations, 1998

by John Comisky

For 1998, the 7,500 largest foreign corporations controlled by large U.S. multinational corporations held \$3.2 trillion in assets and reported receipts of \$1.7 trillion. These amounts increased from 1996 by 15.5 percent and 4.3 percent, respectively [1]. The 7,500 largest foreign corporations reported \$143.8 billion in earnings and profits (less deficit) before income taxes, a 2.0-percent increase from Tax Year 1996.

More than 78 percent of the 7,500 largest controlled foreign corporations (CFC's) were concentrated in three major industrial divisions: goods production, services, and finance, insurance, real estate and rental and leasing [2]. These three industrial divisions accounted for 85.8 percent of assets (\$2,763.7 billion), 73.7 percent of total receipts (\$1,289.4 billion), and 80.1 percent of current earnings and profits (less deficit) before income taxes (\$116.2 billion).

For 1998, the 7,500 largest CFC's were incorporated in 117 different countries [3]. Almost 55 percent, or 4,116 CFC's, were located in Europe. More than 92 percent of these European CFC's were based in European Union countries [4]. Latin America and Asia accounted for 15.0 percent and 10.8 percent of the 7,500 largest CFC's, respectively.

Controlled Foreign Corporations

Direct foreign investment by U.S. persons may take several forms, including establishing foreign branches of a U.S. corporation, partnerships with foreign entities, and separate corporations. For U.S. income tax purposes, a foreign corporation is "controlled" if U.S. shareholders own more than 50 percent of its outstanding voting stock, or more than 50 percent of the value of all its outstanding stock (directly, indirectly, or constructively) on any day during the foreign corporation's tax year. A "noncontrolled" foreign corporation is any foreign corporation which fails to meet either of the above requirements for control. For purposes of determining control, a U.S. shareholder is defined as a U.S. person who owns 10 percent or more of the foreign corporation's total

combined voting stock [5]. However, for SOI purposes, a foreign corporation is controlled only if one U.S. corporation satisfies either of the above 50-percent ownership requirements for an uninterrupted period of at least 30 days. For Tax Year 1998, there were 996 U.S. corporations that controlled the 7,500 largest CFC's.

In general, the foreign source income of a foreign corporation is not taxable to its U.S. shareholders until repatriated in the form of a dividend. Recognizing that income could be accumulated in a CFC, thus deferring U.S. tax on this income indefinitely, Congress enacted the Subpart F provisions of the Internal Revenue Code in 1962. These provisions require certain items of income to be treated as deemed paid to the U.S. shareholders (as if repatriated) and therefore subject to U.S. taxation. Currently, a U.S. shareholder of a CFC may be required to include in gross income the shareholder's ratable share of the CFC's: (1) Subpart F income (see *Subpart F Income* in the *Explanation of Selected Terms*); (2) earnings invested in U.S. property; (3) previously excluded Subpart F income withdrawn from "qualified investments" in less developed countries and in "foreign base company" shipping operations; (4) previously excluded export trade income withdrawn from investment in export trade assets; (5) increase in earnings in excess passive assets [6]; and (6) factoring income (income derived from the acquisition of a trade or service receivable).

CFC's by Industrial Sector Under NAICS

For 1998, the North American Industry Classification System (NAICS) was implemented as a means of measuring all economic activities more accurately, producing and nonproducing. NAICS was designed to group common businesses together according to their primary economic activity [7]. The development of NAICS came about in response to the North American Free Trade Agreement (NAFTA) between Canada, Mexico, and the United States and the desire for compatible industry statistics among the three countries [8]. With its implementation, NAICS replaced the existing Standard Industrial Classification (SIC) system, which was developed in the 1930's by the United States. As the course of the twentieth century progressed, the American economy shifted from a goods-producing economy to a more services-oriented one. NAICS was developed as a result of

John Comisky is an economist with the Special Studies Returns Analysis Section. This article was prepared under the direction of Chris Carson, Chief.

Controlled Foreign Corporations, 1998

these economic shifts as the SIC system was no longer able to properly capture all economic activity.

Tax Year 1998 was the first year foreign corporations used NAICS to classify their primary business activities, and, thus, was the first year for which Statistics of Income (SOI) compiled CFC data according to NAICS. For the 7,500 largest CFC's, the highest aggregate industry data are tabulated within seven major groupings:

- Raw materials and energy production, which includes agriculture, forestry, fishing, and hunting, mining, and utilities;
- Goods production, which includes construction and manufacturing;
- Distribution and transportation of goods, which include wholesale trade, retail trade, and transportation and warehousing;

- Information;
- Finance, insurance, real estate, and rental and leasing;
- Services, which include professional and business services, education, health and social services, leisure, accommodation, and food services, and all other services;
- Nature of business not allocable.

The most significant industry classification change for purposes of aggregating CFC data is the grouping of offices of management (holding companies). The SIC system included these companies in finance, insurance, and real estate. The NAICS system classifies these companies under professional and business services. Figure A highlights other significant industry classification changes affecting the CFC data for 1998.

Figure A

Selected Industrial Classification Differences between Standard Industrial Classification (SIC) System and the North American Industry Classification System (NAICS), Tax Year 1998

Selected NAICS industry sector	Major industrial division under SIC	Major industrial sector under NAICS or other groupings
Broadcasting and telecommunications	Formerly Communications industry under Transportation and public utilities	Information
Mining	Separate major division known as Mining	Raw materials and energy production
Motion picture and sound recording	Services	Information
Offices of management (holding companies)	Finance, insurance, and real estate	Professional and business services
Printing and publishing	Manufacturing	Information
Transportation and warehousing	Separate major division known as Transportation and public utilities	Distribution and transportation of goods
Utilities	Formerly Energy, gas, and sanitary services industry under Transportation and public utilities	Raw materials and energy production

Controlled Foreign Corporations, 1998

For 1998, CFC's engaged in finance, insurance, real estate, and rental and leasing accounted for 40.2 percent of end-of-year assets, 10.6 percent of total receipts, and 14.5 percent of current earnings and profits (less deficit) before income taxes reported by the largest CFC's (Figure B and Table 1). Nearly 62 percent of the total receipts and 50.9 percent of earnings and profits (less deficit) before income taxes for this industrial grouping were accounted for by two subsectors: security, commodity contracts, and other financial investments and related products; and insurance carriers and related activities. Goods producers accounted for 26.0 percent of end-of-year assets, 52.8 percent of total receipts, and 45.0 percent of earnings and profits (less deficit) before income taxes. Chemical, computer, and electronic products, and motor vehicles and parts manufactures collectively reported 54.9 percent of end-of-year assets, 55.9 percent of total receipts, and 61.0 percent of current earnings and profits (less deficit) before income taxes for all goods producers. In contrast, CFC's engaged in services reported 19.6 percent of end-of-year assets, 10.3 percent of total receipts, and 21.3 percent of current earnings and profits (less deficit) before income taxes. Over 89 percent of end-of-year assets, total receipts, and current earnings and profits (less deficit) before income taxes in services were reported by CFC's engaged in professional and business services. This group included offices of management (holding companies).

Table 4 presents the number of CFC's, end-of-year assets, total receipts, and earnings and profits (less deficit) before income taxes for both NAICS and SIC industry classifications using NAICS industry groupings. The implementation of the NAICS system had little effect on the industry classification of most of the 7,500 largest CFC's. The biggest change under NAICS for the 7,500 largest CFC's was the grouping of offices of management (holding companies) under services. These CFC's were grouped with the major division of finance, insurance, and real estate under SIC. A majority of the increases in end-of-year assets (319.8-percent increase), total receipts (114.2-percent increase), and earnings and profits (less deficit) before income taxes (292.5-percent increase) for services are attributable to the addition of these holding companies. As a result of this change, finance, insurance, real estate, and rental and leasing experienced large decreases in

end-of-year assets (26.6-percent decrease), total receipts (29.4-percent decrease), and earnings and profits (less deficit) before income taxes (52.2-percent decrease). Another significant NAICS industry change occurred in the newly created information sector. This sector consists of the printing industries (under manufacturing for SIC), broadcasting and telecommunications (formerly communications under transportation and public utilities for SIC), motion picture and sound recording industries, and information services and data processing services (both primarily under services for SIC).

The overall industrial composition of the 7,500 largest CFC's shifted during the period of 1992 to 1998, moving away from manufacturing, wholesale and retail trade, and construction. Figure C (based on SIC for time series purposes) displays the 7,500 largest CFC's by industrial division [9]. The number of foreign corporations increased steadily in the following industries during this period: transportation and public utilities (60.1-percent increase); mining (52.9-percent increase); finance, insurance, and real estate (23.1-percent increase); and agriculture, forestry, and fishing (7.7-percent increase). Decreases in the number of foreign corporations occurred in the following industries: construction (28.8-decrease), services (21.6-decrease) wholesale and retail trade (20.1-decrease), and manufacturing (14.5-decrease).

Geographic Distribution

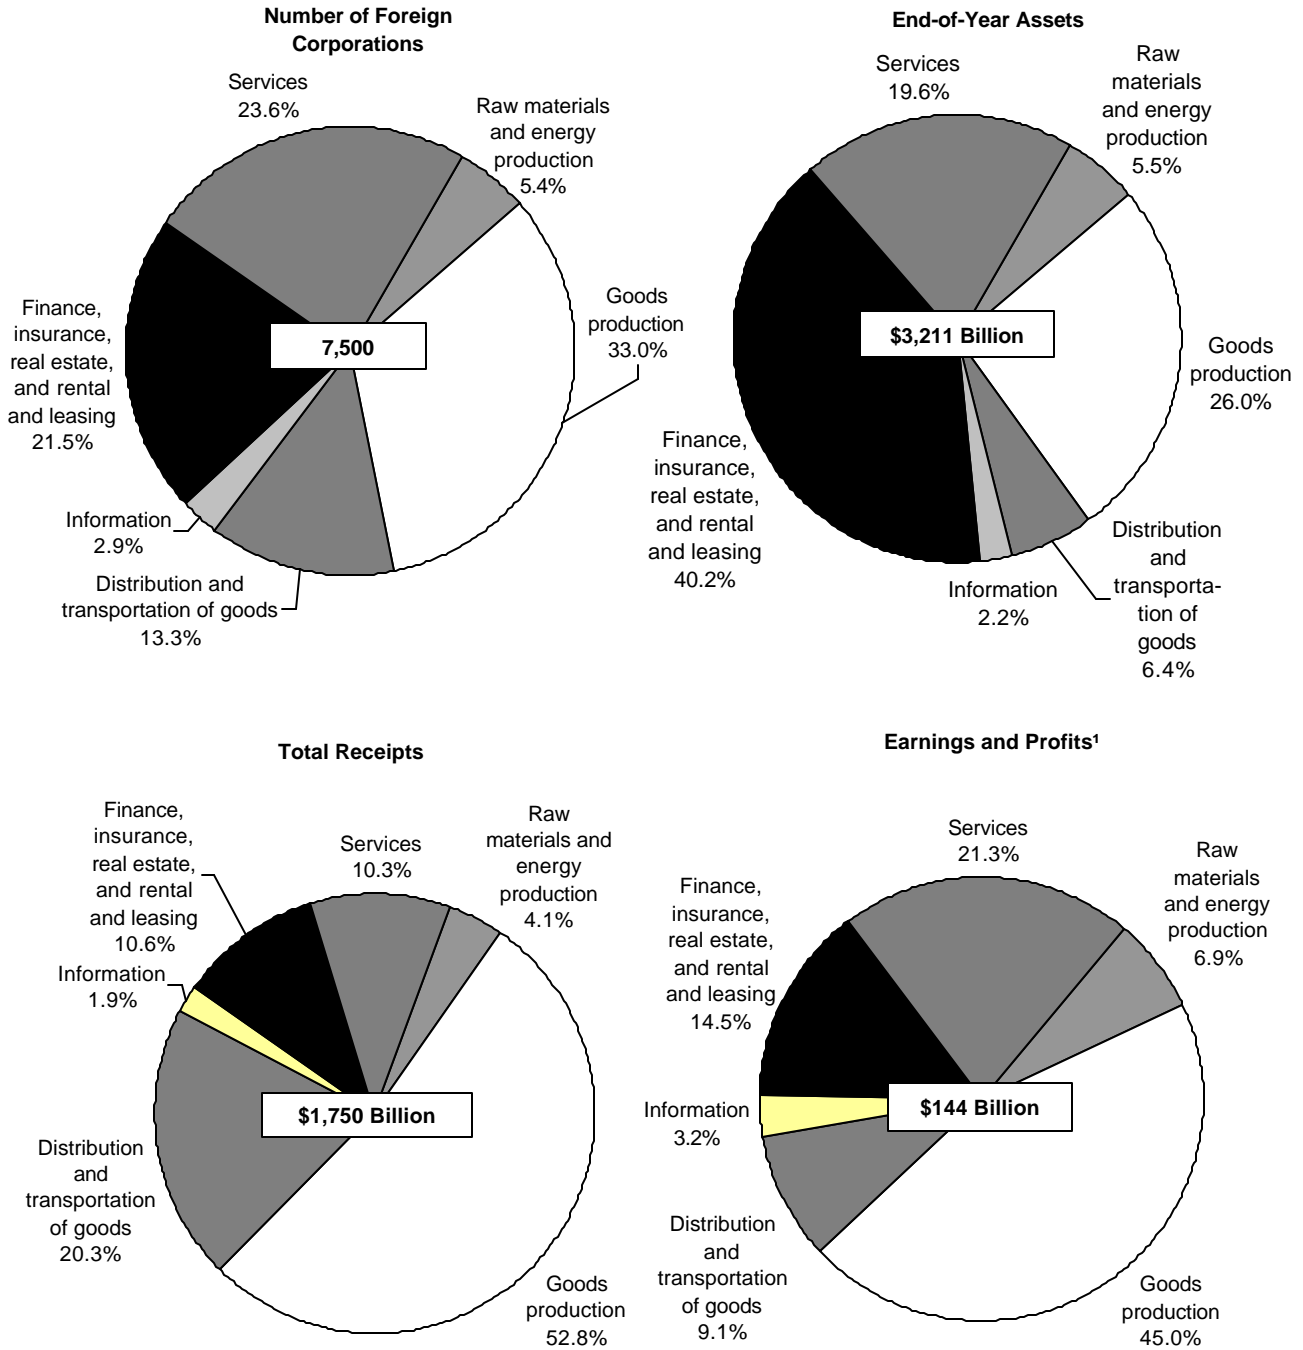

For 1998, Europe accounted for 62.7 percent and 58.5 percent of assets and total receipts for the 7,500 largest CFC's, consistent with 1996 levels (Figures D and E, Tables 2 and 3). Current earnings and profits (less deficit) before income taxes rose more significantly from 54.2 percent to 63.5 percent. Foreign entities incorporated in other Western Hemisphere countries, including Canada, accounted for 12.5 percent (\$402.2 billion) of end-of-year assets, 14.0 percent (\$244.9 billion) of total receipts, and 11.9 percent (\$17.1 billion) of earnings and profits (less deficit) before income taxes. The smallest distribution of the 7,500 largest CFC's occurred in Africa and U.S. Possessions (including Puerto Rico). These two geographic regions collectively accounted for slightly more than 1.0 percent of end-of-year assets, total receipts, and earnings and profits (less deficit) before income taxes.

CFC's based in the following countries reported

Controlled Foreign Corporations, 1998

the largest amounts of total receipts: United Kingdom (\$301.4 billion), Canada (\$209.5 billion), Germany (\$172.7 billion), Netherlands (\$168.2 billion), France (\$100.9 billion), Japan (\$100.3 billion), and Brazil (\$63.2 billion). These seven countries accounted for 63.8 percent of the total receipts of the 7,500 largest CFC's. These countries reported a 3.9-percent increase in total receipts (\$1,116.2 billion) for 1998 compared to 1996 (\$1,074.6 billion). CFC's in these countries engaged primarily in goods production and distribution and transportation of goods.

For 1998, United Kingdom-based CFC's reported \$129.1 billion in total receipts for goods production activities, a decrease of 7.0 percent from 1996 (\$138.8 billion). CFC's engaged in manufacturing and construction still accounted for 42.8 percent of total receipts generated by United Kingdom-based CFC's for 1998, while CFC's engaged in finance, insurance, real estate, and rental and leasing accounted for 19.7 percent (\$59.4 billion) of total receipts. The information sector accounted for 1.9 percent (\$5.7 billion) of total receipts, the smallest distribution for United Kingdom-based CFC's.

The number of Netherlands-based CFC's, in the pool of 7,500 largest foreign corporations, increased by 13.2 percent from 1996 to 1998. Total receipts for these CFC's increased 43.7 percent from 1996 to \$168.2 billion for 1998. In addition, earnings and profits (less deficit) before income taxes increased

42.2 percent from 1996 to \$20.5 billion for 1998. Nearly a quarter of Netherlands-based CFC's were engaged in the goods production division, reporting \$85.8 billion in total receipts. Netherlands-based CFC's also engaged in the services and distribution and transportation of goods industries, with total receipts of \$26.5 and \$26.4 billion, respectively.

Profitability

For the purpose of this article, two measures are used to assess pre-tax profitability for the 7,500 largest CFC's: rate of return on assets and profit margin. Rate of return on assets was defined as current earnings and profits (less deficit) before income taxes divided by end-of-year assets. Profit margin was defined as current earnings and profits (less deficit) before income taxes divided by total receipts.

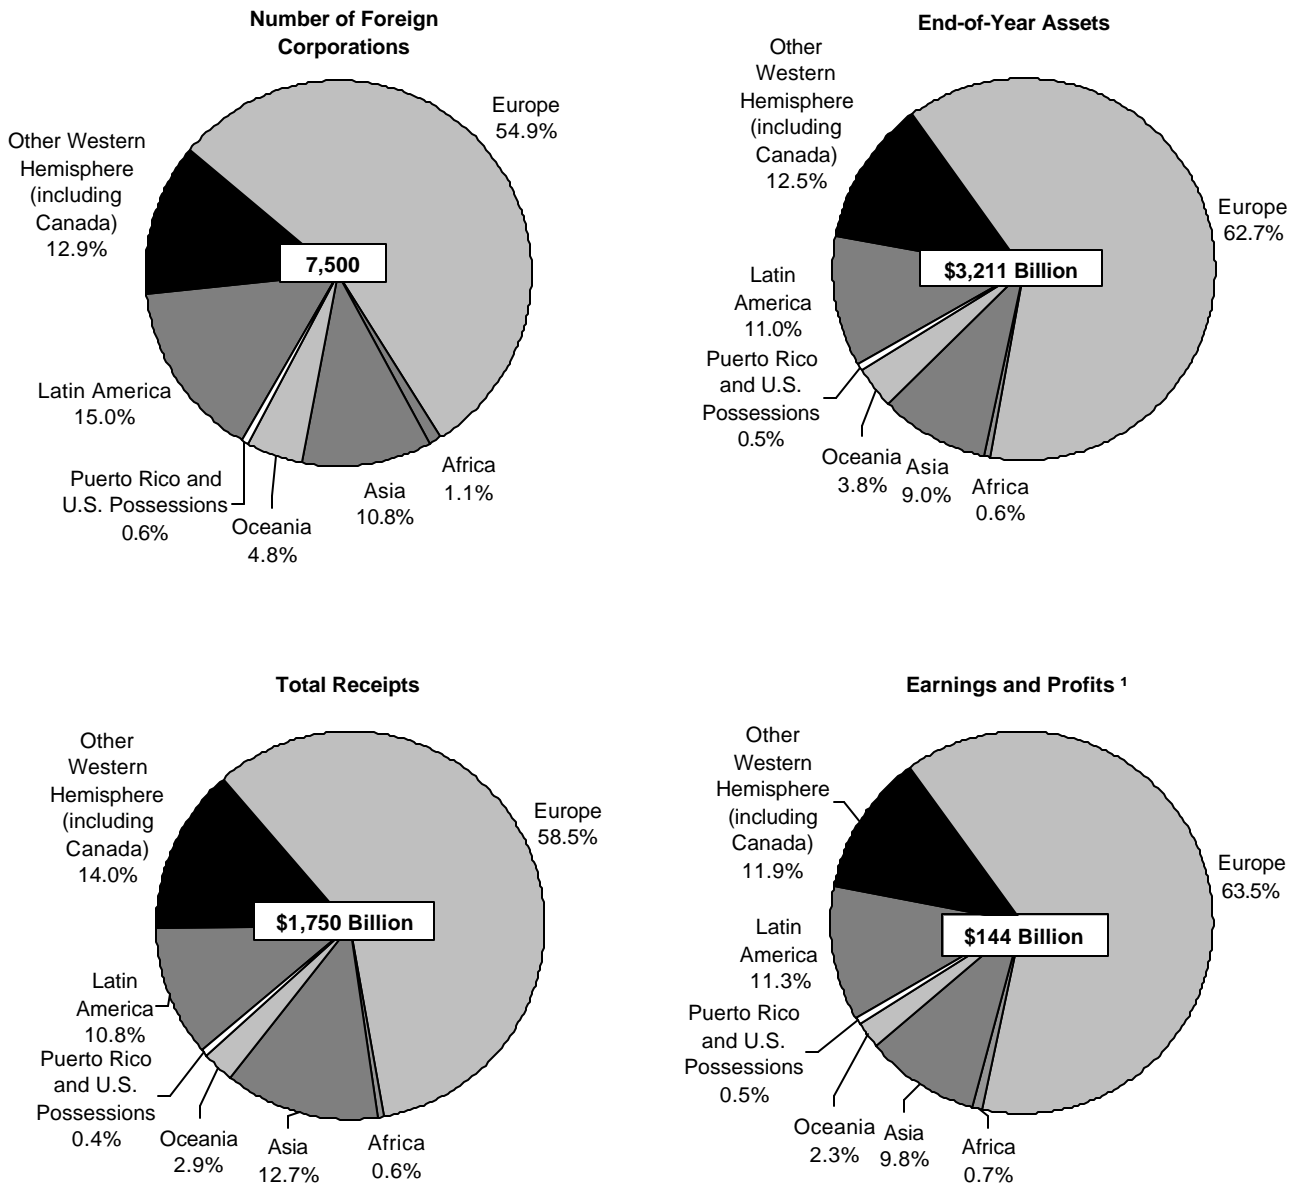

From 1992 to 1996, the 7,500 largest CFC's saw overall profitability increase in both measures yet decrease between 1996 and 1998. Between 1992 and 1996, the rate of return on assets increased on the aggregate level from 4.4 percent to 5.1 percent. However, the rate of return on assets decreased to 4.5 percent for 1998. Profit margins followed a similar pattern during the period 1992 to 1996, but were more stable from 1996 to 1998. Profit margins increased from 5.7 percent to 8.4 percent between 1992 and 1996, but decreased slightly to 8.2 percent for 1998.

On the industry level, the rate of return on assets

Singapore.....	114	111	39,656	43,336

and profit margin varied relative to the aggregate totals. Most industries' rate of return on assets decreased from 1996 to 1998, while profit margins were mixed. The most profitable activities occurred in the services and information industries. For 1998, the profit margin for CFC's based in the services sector was 17.0 percent, up from 9.6 percent for 1996. The large increase in the services industry's profit margins was directly attributable to the inclusion of CFC's engaged in the management of companies (holding companies) sector. For 1998, CFC's engaged in the management of companies reported a profit margin of 28.4 percent [10]. These CFC's were classified under finance, insurance, and real estate under the SIC system. As a result of this classification change, profit margins in finance, insurance, real estate, and rental and leasing dropped from 18.7 percent in 1996 to 11.2 percent in 1998. CFC's engaged in the information sector had a rate of return on assets and a profit margin of 6.3 percent and 14.0 percent, respectively. Finance, insurance, real estate, and rental and

leasing CFC's experienced the lowest rate of return on assets of 1.6 percent, while CFC's engaged in the distribution and transportation of goods reported the lowest profit margin of 3.7 percent.

Distribution of Earnings and Profits

For 1998, the 7,500 largest CFC's distributed \$74.2 billion to U.S. parent corporations and shareholders. Nearly 67 percent of distributions out of earnings and profits were from not previously taxed earnings and profits (\$49.6 billion), while the remainder was distributed from previously taxed earnings and profits (\$24.6 billion).

Goods production and services accounted for 64.0 percent (\$47.5 billion) of total distributions out of earnings and profits. Goods producers distributed 71.0 percent (\$20.1 billion) from not previously tax earnings and profits and 29.0 percent (\$8.2 billion) from previously taxed earnings and profits. With the inclusion of holding companies under NAICS, the services industry distributed \$19.2 billion of its earnings and profits, a dramatic increase from the \$2.7 billion distributed in 1996. More than 97 percent (\$18.7 billion) of these distributions were attributed to CFC's engaged in professional and business services. CFC's engaged in the information sector accounted for 1.6 percent of the total distributions out of earnings and profits, the smallest industry aggregate amount.

European-based CFC's accounted for 62.5 percent (\$46.3 billion) of all distributions out of earnings and profits. Nearly 70 percent of these distributions were from not previously taxed earnings and profits (\$32.3 billion), with the remainder distributed from previously taxed earnings and profits (\$14.1 billion). CFC's engaged in other Western Hemisphere countries (including Canada) and Latin America accounted for 13.1 percent (\$9.7 billion) and 11.4 percent (\$8.4 billion) of total distributions, respectively. In contrast, Africa and U.S. Possessions (including Puerto Rico) distributed the least amount of earnings and profits, with 0.5 percent and 0.1 percent, respectively.

Data Sources and Limitations

The statistics presented in this article are based on information collected from corporation tax returns with accounting periods ending July 1998 through June 1999 and their attached Form(s) 5471, *Informa-*

Controlled Foreign Corporations, 1998

tion Return of U.S. Persons With Respect to Certain Foreign Corporations. A U.S. corporation is required by Internal Revenue Service regulations to submit a Form 5471 for any Controlled Foreign Corporation (CFC) with an accounting period ending with or within the U.S. parent's accounting period. Thus, the CFC's accounting period may have ended as early as July 1997 or as late as June 1999. However, most CFC activity occurred in Calendar Year 1998.

These statistics report data for the largest (in terms of total assets) active 7,500 foreign corporations controlled by U.S. corporations with total assets of \$500 million or more. (See definitions of "Active versus inactive Controlled Foreign Corporations" in the *Explanation of Selected Terms*.) The 7,500 largest CFC's accounted for 90.8 percent of total end-of-year assets, 81.6 percent of total receipts, and 89.1 percent of current earnings and profits before taxes reported by all active CFC's of these U.S. corporations with assets of \$500 million or more [11]. The amount of total assets for these 7,500 largest CFC's ranged from approximately \$57 million to \$127 billion [12].

Since the 996 parent corporations with assets of \$500 million or more were selected at a 100-percent rate for the Statistics of Income sample of all corporation income tax returns, the data are not subject to sampling variability, although they may be subject to nonsampling error. Thus, it is difficult to determine the exact population of CFC's controlled by these U.S. corporations.

Several limitations apply when making comparisons to prior-year statistics for the 7,500 largest CFC's. First, the composition of the 7,500 largest CFC's is not completely consistent across years. For example, only 66.1 percent of the largest 7,500 CFC's for 1998 were also included in the 7,500 largest CFC's for 1996. Many of the 7,500 largest CFC's for 1996 that were not included among the 7,500 for 1998 were still controlled by large U.S. corporations, but the size of their total assets for 1998 excluded them from this group. In addition, some of the 7,500 largest CFC's for 1996 were not included for 1998 because they were no longer "controlled," or because the size of the U.S. parent's total assets had fallen under \$500 million.

Second, the industrial mix of the 7,500 largest CFC's is not always representative of the industrial mix of all CFC's controlled by U.S. corporations

reporting \$500 million or more in assets. For 1998, 54.6 percent of the 7,500 largest CFC's were primarily engaged in goods production and professional and business services, while accounting for 68.2 percent of the 45,876 total for active CFC's of U.S. corporations with \$500 million or more in total assets [13]. However, the distribution and transportation of goods and finance, insurance, real estate, and rental and leasing groupings have increased among the largest CFC's. The distribution and transportation of goods and finance, insurance, real estate, and rental and leasing groupings accounted for 13.3 percent and 21.5 percent, respectively, for the largest 7,500 largest CFC's. These same two groupings only accounting for 8.9 percent and 8.2 percent, respectively, for all active CFC's controlled by parents with \$500 million or more in total assets [14].

Finally, statistics previously published by *Statistics of Income* for tax years before 1986 were for all CFC's controlled by U.S. parent corporations, not just the largest CFC's. Therefore, the statistics for these years include smaller and inactive CFC's. For this reason, comparisons between statistics on the largest CFC's and statistics for years before 1986 should be made with caution.

In addition, caution should be used when comparing data by industrial groupings. For 1998, CFC's were classified under the NAICS system, which differs somewhat from the SIC system used in prior years. While most industries were not affected by the implementation of NAICS, the grouping of some economic activity was changed, specifically in the finance, insurance, real estate, and rental leasing, and services divisions where offices of management (holding companies) shifted from finance, insurance, and real estate under SIC to services under NAICS. Furthermore, CFC's were classified by industry based on their principal business activity as reported on Form 5471. However, assets, receipts, and profits may have also been related to secondary business activities. It is not possible to measure the extent of these secondary business activities, because these activities were not detailed on Form 5471.

Explanation of Selected Terms

Active versus inactive Controlled Foreign Corporations.--In general, a CFC was considered "active" if earnings and profits, income taxes, receipts, expenses, or certain transactions between the CFC

Controlled Foreign Corporations, 1998

and its majority shareholder were reported on Form 5471, *Information Return of U.S. Persons With Respect to Certain Foreign Corporations*. The filing of Form 5471 was required even if a CFC was dormant or inactive for 1998. The 7,500 largest CFC's used for this study were all active.

Controlled Foreign Corporation.--The Internal Revenue Code section 957 defines a foreign corporation as "controlled" if more than 50 percent of the value of its outright voting stock, or the value of all its outstanding stock, is owned (directly, indirectly, or constructively) by U.S. shareholders on any day during the foreign corporation's tax year. A U.S. shareholder for these purposes is defined as a "U.S. person" owning 10 percent or more of the foreign corporation's voting stock. A U.S. person could be a U.S. citizen or resident, a domestic partnership, a domestic corporation, or an estate or trust (other than a foreign estate or trust whose income from sources outside the United States is not includable in the beneficiaries' gross income). For purposes of these statistics, a foreign corporation was "controlled" only if a single U.S. corporation satisfied the ownership requirements for an uninterrupted period of at least 30 days. A CFC could be owned indirectly through a partnership if the U.S. corporation was a controlling partner. To the extent possible, these CFC's were also included in the statistics.

Country of incorporation.--The country of incorporation of a CFC was not necessarily the principal place of business. For 1998, there were 268 (4.6 percent) of the 7,500 largest CFC's whose principal places of business were in countries other than their respective countries of incorporation. Tables 2 and 3 provide data by country of incorporation; data by principal place of business are not included in these statistics.

Current earnings and profits.--"Current earnings and profits" represent the difference between total earnings and profits of the foreign corporation at the end of the current year (before reduction by dividends paid during the year) and the accumulated earnings and profits of the corporation at the beginning of the year. Although current earnings and profits typically are an after-tax measure of profits, they are shown in the article both before and after taxes. Earnings and profits are a tax concept referring to the economic capacity of a corporation to make a distribution to shareholders that is not a return

on capital. The concept is similar to the notion of retained earnings. The term "earnings and profits" is not specifically defined in the Internal Revenue Code. In those instances where current earnings and profits were not reported for the foreign corporation, net income per books was used in the place of missing earnings and profits.

Distribution from earnings and profits.--A distribution comes first from current earnings and profits and then from accumulated earnings and profits.

Income taxes.--Income, war profits, and excess profits taxes paid or accrued to the United States and to any foreign country or U.S. possession, following U.S. generally-accepted accounting principals (GAAP) for the annual accounting period were reported as income tax by the CFC.

OPEC countries.--The members of the Organization of Petroleum Exporting Countries (OPEC) for 1998 were: Algeria, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, and Venezuela.

Previously taxed earnings and profits.--This includes any earnings and profits amounts that were taxed in a prior year but not distributed. Previously taxed earnings and profits include amounts related to Subpart F income (see definition below), earnings related to investments in certain U.S. property, previously excluded subpart F income withdrawn from qualified investments, previously excluded export trade income withdrawn from investment in export trade assets, factoring income, and earnings invested in excess passive assets.

Profit margin.--For purposes of this article, a CFC's profit margin is the ratio of current earnings and profits (less deficit) before income taxes to total receipts.

Return on assets.--For purposes of this article, a CFC's return on assets is the ratio of current earnings and profits (less deficit) before income taxes to end-of-year assets.

Subpart F income.--Internal Revenue Code sections 951 and 952 stipulate specific cases in which earnings and profits are deemed to have been paid by a CFC to the U.S. shareholder. These "deemed" distributions are taxable, even though the income may not have been repatriated to the United States in the form of an actual dividend. Internal Revenue Code section 951 provided that U.S. shareholders include in their gross income certain undistributed profits of

Controlled Foreign Corporations, 1998

foreign corporations controlled by U.S. shareholders. Subpart F income from a CFC includes certain insurance income of U.S. risks, "foreign base company" income, international boycott participation income, bribes and other illegal payments to foreign government officials, and income from any country which the United States does not recognize or with which it has severed relations, or which repeatedly provided support for acts of international terrorism.

Total assets.--Two types of total assets are shown in Tables 1 through 3: beginning-of-year and end-of-year. However, not all of the 7,500 largest CFC's reported beginning and end-of-year total assets; 164 CFC's reported beginning-of-year assets only, and 516 CFC's reported end-of-year assets only.

Total receipts.--Total receipts equal business receipts (gross receipts from sales and operations), plus income from investment. In the statistics reported prior to 1990, business receipts were used to describe the larger of gross receipts from sales and operations and "total income." The latter is a tax return concept used to describe the sum of business receipts less cost of sales and operations (gross receipts from sales and operations), plus income (less loss) from investments.

Notes and References

- [1] Statistics of Income studies of Controlled Foreign Corporations are conducted for even-numbered tax years. For 1996 data, see Nutter, Sarah E., "Controlled Foreign Corporations, 1996," *Statistics of Income Bulletin*, Spring 2001, Volume 20, Number 4.
- [2] Starting with Tax Year 1998, industry composition is defined by the North American Industry Classification System (NAICS). In previous tax years, the Standard Industrial Classification system (SIC) was used to show distribution of the 7,500 largest CFC's. For purposes of this article, Figure C presents the number of foreign corporations by SIC during Tax Years 1992 to 1998. Table 4 has been added for 1998 as a crossover table to show comparisons between NAICS and SIC using NAICS industry group-

ings. See the section *CFC's by Industrial Sector Under NAICS* for further explanation.

- [3] Based on unpublished data.
- [4] For Tax Year 1998, Austria, Finland, and Sweden are included with the European Union in Table 2. For 1996, these countries were included in "Other West European countries."
- [5] The current definition of a Controlled Foreign Corporation is given in Internal Revenue Code section 957. Ownership attribution rules are discussed in section 958.
- [6] During Tax Year 1999, increase in earnings in excess passive assets was repealed.
- [7] *North American Industry Classification System United States, 1997*, Executive Office of the President, Office of Management and Budget, 1998.
- [8] See footnote 7.
- [9] Data reported in Figure C show the 7,500 largest CFC's by SIC and do not reflect the industry shifts between SIC and NAICS for Tax Year 1998. Caution should be taken when comparing foreign corporations by industry.
- [10] Based on unpublished data.
- [11] Based on unpublished data. For 1998, there were 1,742 U.S. corporation returns with 45,876 active controlled foreign corporations. The controlled foreign corporations reported \$3,549.3 billion in end-of-year assets. For 1998, the 45,876 active CFC's reported total receipts of \$2,143.0 billion, current earnings and profits before taxes of \$161.5 billion, current earnings and profits after taxes of \$119.5 billion, and distributions out of earnings and profits of \$86.1 billion.
- [12] Based on unpublished data.

¹ Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial group. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporations.

² Includes "Wholesale and retail trade not allocable," which is not shown separately.

NOTE: Detail may not add to totals because of rounding and because data are shown for selected industries only.

¹ Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one country of incorporation.

² Includes "Europe not allocable."

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.

** Not shown to avoid disclosure of information on specific corporations. However, the data are included in the appropriate totals.

¹ Number of returns is not additive because some U.S. corporations had Controlled Foreign Corporations in more than one industrial group. The industrial activity of the parent corporation filing the return often differs from that of the Controlled Foreign Corporations.

² Includes "Nature of business not allocable" not shown separately.

NOTE: Detail may not add to totals because of rounding and because data are shown for selected countries only.
