Company: Consumer

Comment on: Net metering

Comments: Thank you for considering a Net metering program in Tennessee. I will be moving back from military (USAF) service in Oct 2007. I grew up in Memphis, and plan to move back to be closer to family anywhere in Tennessee. Net Metering is a very important program in my opinion. I will be considering a Photovoltaic solar system for my residence. These systems provide benefits for TVA as well including: buying power at a wholesale rate, employment for TVA consultants, and improving your environmental impact policy.

Tennessee is one of a few states that do not allow net metering at this time. We are usually such a forward thinking state! Thank you so much for this forum.

Sincerely,
Ed Ballard
