Name: Bret Schuhmacher

Comment on: Net metering

Comment on: Interconnection of consumer generation

Comments: As a resident of Tennessee and a concerned citizen of the world, I'd like to see Tennessee join the ranks of other enlightened states such as Georgia, Texas, and California to name just a few, and offer a benefit to individuals who would like to reduce their CO2 output through the use of alternative, home generated electricity. To this end, I encourage you to allow interconnection and net metering.
