

bus voltage within 10 minutes in the event that it is needed.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that the proposed exemption would not increase the probability or consequences of accidents previously analyzed and would not affect facility radiation levels or facility radiological effluents.

Granting the exemption would not significantly increase the probability of unavailable offsite power in the event of an accident and, therefore, would not significantly increase the probability of a radiological release from CPS. The availability and reliability of the onsite power sources would not be affected by the exemption. The availability and reliability of the offsite source having adequate voltage (i.e., the 138-kV circuit) would also not be affected. Although there is a slight increase in the probability of having the low-voltage offsite source unavailable following a plant trip, or both sources unavailable in the event of a loss of the other offsite source, this increase is small based on the factors identified, and actions available to restore offsite voltage.

Electric power would still be available for safety-related equipment required to mitigate an accident. The proposed change does not involve an increase in the consequences of an accident, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact.

Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the Commission has concluded that there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. The principal alternative to the proposed action would be to deny the requested action. Denial of the requested action

would effectively preclude operation of the facility until the intermittent voltage condition is resolved (i.e., until the end of hot, summer weather).

Alternative Use of Resources

This action does not involve the use of resources not previously considered in connection with the Nuclear Regulatory Commission's Final Environmental Statement dated May 1982, related to the operation of the Clinton Power Station, Unit No. 1.

Agencies and Persons Consulted

In accordance with its stated policy, on July 22, 1997, the NRC staff consulted with the Illinois State representative regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this action, see the licensee's letter dated July 22, 1997, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Vespasian Warner Public Library, 310 N. Quincy Street, Clinton, IL 61727.

Dated at Rockville, Maryland, this 23rd day of July 1997.

For the Nuclear Regulatory Commission.

Gail H. Marcus,

Director, Project Directorate III-3, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

[RI 30-10]

Proposed Collection; Comment Request for the Revised Information Collection

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub.

L. 104-13, May 22, 1995), this notice announces that the Office of Personnel Management intends to submit to the Office of Management and Budget a request for a revised information collection. RI 30-10, Disabled Dependent Questionnaire, is used to collect sufficient information about the medical condition and earning capacity for OPM to be able to determine whether a disabled adult child is eligible for health benefits coverage and/or survivor annuity payments under the Civil Service Retirement System or the Federal Employees Retirement System.

Approximately 2,500 RI 30-10 forms are completed annually. Each form takes approximately 30 minutes to complete. The annual estimated burden is 1,250 hours.

For copies of this proposal, contact Jim Farron on (202) 418-3208, or E-mail to jmfarron@opm.gov

DATES: Comments on this proposal should be received on or before September 23, 1997.

ADDRESSES: Send or deliver comments to—Lorraine E. Dettman, Chief, Operations Support Division, Retirement and Insurance Service, U.S. Office of Personnel Management, 1900 E Street, NW, Room 3349, Washington, DC 20415-0001.

For Information Regarding Administrative Coordination—Contact: Mary Beth Smith-Toomey, Management Services Division, (202) 606-0623.
