Wendy Lochner

Dear FSIS,

I urge you to CLEARLY LABEL ALL FOODS CONTAINING GENETICALLY ENGINEERED ORGANISMS. Absent any knowledge of their long-term effects, the customer must be allowed to make her own mind, as in Europe and elsewhere.

In a similar vein, products such as milk, which contain bovine growth hormone, should also be clearly labeled. BGH has been identified as a possible carcinogen.

As John Hagelin points out on his website, genetically engineered food is a global experiment, and we are all the experimentees.

We the American people have the right to know what is in our food and to make informed choices as to what we will eat.

Sincerely,

Wendy Lochner
