As a cancer patient, and the founder of The Annie Appleseed Project, I urge you to reject the CODEX decision to limit **access** to dietary supplements.

This would definitely NOT be in the best interest of consumers. Particularly those of us who have chosen to use dietary supplements as one aspect of our healthcare treatment program.

Thank you for your attention to this **email**. Our site has had over 28,000 visitors in just three years. People interested in and using dietary supplements represent a very large segment of the United States.

Please remember that we need your representation.

Ann F.
