Dear Dr.,

We at Friends of Freedom considered the following article interesting and wanted to send it to you.

**Friends of Freedom comments - this quote** *'The global controversy over genetically engineered foods and crops has intensified. Sensing that they are losing the battle for the hearts and minds of the public, even in the US and Canada, Agbiotech interests, large food corporations, and their allies in government have stepped up their propaganda and intimidation campaign.*

*Since the beginning of 2001 an unprecedented number of editorial, opinion, and news stories have appeared in the world press, extolling the virtues of agricultural biotechnology while denouncing opponents as know-nothing Luddites. Accompanying this industry media barrage, choreographed by leading public relations firms, are a number of other recent noteworthy aggressions:' clearly indicates why everyone of that that are concerned about these issues need to join our group on-line now.*

*It is only via your memberships and donations that we can exist and bring forth the truth!*

*Join now and give generously.*
