Subject: Keep our vitamins on shelves & reachable! 02-022N-435

Dear FDA:

I am writing to you to request to stop medicalization of dietary supplements. Let people have access to them. Do not stop people's freedom of using them. By medicalizing the vitamins & supplements, you are just making the drug companies richer and harder for people to cure themselves. As you have seen for many years drugs did not cure people, but rather helped with faster death of many people. Let people have another chance of living & surviving.

Thank You.
