Ask the FDA to delete item 5.9 item No. 6 in the draft guidelines for vitamin and mineral supplements. Tell them that every citizen is the real gatekeeper for truthful and non-misleading information about nutrition, and that item 5.9 of the labeling proposal is regressive, misleading, and not in the best interest of the U.S consumer. Also tell them that item 5.9 is in violation of the Dietary Supplement Health Act of 1994 (DSHEA).

Thank you for your assistance in this matter.

Sincerely Yours

This looks like to me that the drug companies are afraid that they are going to lose a lot of money. The health of all people should be the number 1 priority. Mannatech glyconutritionals meets all the standards of the DSHEA law.
