**Subject:** My 2 cents

Hi my name is Dave clutter and I have a disease called von hipple lindau in which my body makes tumors in my brain and kidneys.  
Since 1996 I have had 2 tumors removed from my brain and 1 from my kidney.  
I have found over the years that the use of vitamins and colloidal minerals slows or even puts my tumor growth in remission.  
I would hope that Codex will have some provision for medical use of vitamins and minerals ??  
I would hate to think I would have to resort to smuggling in my vitamins and minerals ??  
Has anyone thought about the illegal smuggling that will follow after this crazy bill passes ??  
I can see it now Lady 60 years old busted for giving kids vitamins. :)  
I say down with Codex!
