M. Sun

FDA :

This is to remind you that Item 5.9 of Agenda Item No. 6 is in VIOLATION of the **DSHEA** (The Dietary Supplement Health & Education Act of **1994**)!

I am writing my request for it to be removed and deleted! The **DSHEA** law was written for the general public to make informed decisions on their own after obtaining truthful and non-misleading information to support their own choices about nutrition and nutritional supplements. And there is truthful information to be found and verified if one only seeks.

The skyrocketing medical schemes can be dealt with more appropriately when people take responsibility to educate themselves on truthful, science based information, not just the one sided story of someone else with a license giving them something to make a sale for the 'good ol' boys club' usurpations.

Item 5.9 is misleading in and of itself! It is NOT in the best interest of the consumer, but in the best interest of a select few for their own gain. Again, this is in severe violation of the **DSHEA** Law of **1994**. I ask you to remove Item 5.9 as I vehemently oppose this selfish scheme!

Sincerely,
M. Sun
