I write to tell you how imperative it is to maintain the prohibition on the slaughter of downer cows. These creatures must be treated humanely as well! An end to prodding them with hooks and leaving them to die amidst the trash. They are living creatures with nervous systems that feel pain just as we do.

The prohibition needs also to be extended to other animals including sheep and pigs.

Chickens too do not deserve the cruel conditions of agribusiness.

Yours truly,

Debbie Kahn
