To whom it may concern,

We are dairy farmers writing to you in reference to economic hardships which ~~are~~ caused by the new lan on downer cows. When a cow falls or is paralyzed from calving she is just but "not sick". So we need to have this term changed to "acute injuries" so that they can be accepted by our down cow trucker.

Cows are too costly and the milk price is too low for us to

waste our animals because
of this new lan on downer
sows.

Thank You

Sincerely

Norma & David
