To Whom it may concern,

First, I would like to thank the
USDA for its emergency measures to ban
the slaughter of downed cattle for human
consumption. I sincerely hope that this
ban will be permanent! Could you also make
it so that it will include all livestock—all
the unfortunate downed animals. Please!
And please, add a (requirement) that all downed
animals are humanely euthanized immedi-
ately wherever they become downed. No
creature should ever suffer. At least if the
end is near, help it to go as quickly and
painlessly as possible.

God may have given us dominion over the
birds and the beasts, but that does not
mean that we should not be compassionate
and humane. Don't forget, they are subject

to pain just as we are.
Have no doubt, animals are all amazing
creatures, each with its own uniqueness.
I realize that alot of business people don't
agree with the extra expense it may
generate, but I'm sure all can be worked
out. We are talking about living, feeling
creatures, Gods gifts. Put yourself in their
place, scared, in pain. Like little babies, they
can't tell you how they feel, you must be their
voice and Remember,

what goes around,
comes around.

Helping animals for 31 years... with your help.
