

Dear Sir

455

RECEIVED  
FSIS DOCKET ROOM

Pertaining to reference number 03-025 IF  
04 MAR 15 PM 3:30

Cows with acute injuries are not considered  
downer cows, they have no medicine, no  
disease and are okay for human consumption

Cows with Broken Bones, splints, pinched nerves  
etc which happen very suddenly are okay  
for human consumption with proper  
time frame

The word Downers needs to be looked  
at very strong with a different definition  
will be from \$200 to \$300 per animal  
depending on weight. Take these facts  
into consideration and thank you

Kermit P. Zeigler
