usdhs usfda - dockt 05 013N
meeting on december 15 in illinois

why are you meeting ten days before christmas when the public is fully engaged in holiday preparation - is it so that the public is fully NOT engaged in having any say in this meeting? i hereby petition that this meeting date and location be changed. if it cannot, i would appreciate having a toll free tie line into this meeting so that i can follow what happens with this matter.

i think usda represents only agribusiness and its profits. this agency is clearly under the thumb of agribusiness profiteers.

i think fda primarily should be interested in drug safety for american citizens and the job they are doing is not satisfactory - they seem to be under the thumb of drug companies.

i believe a new agency interested in consumer food protection should be formed which regulated american food. it is clear that the influences of profiteers have resulted in cattle and poultry all drugged up, so that the products put in them to fatten them up quickly are now making americans obese. it is clear the extreme drugging of american farm animals is NOT good for american consumers and the animals are abused and then drugged up to make up for the abuse.

we need an entirely new system to be in charge of this

since right now american consumers are getting packaged food full of cholesterol, fat, cheap ingredients that are not healthy. the situation is abysmal.
