General Comment:Regarding docket # FDMS 05-036F

I am appalled that the USDA seems intent on denying the wishes of the American Public and appeasing these foreign owned businesses who want to export American horsemeat. I am sickened that you deliberately have looked for a way to 'back door' the process by re-classifying the equids into exotic status. As a taxpayer and voter I am ashamed for my country and fellow citizens that foreign interests are put above our own. It is a sad day when special interest groups are able to over-ride the Congress of the United States.
