Subject: Funding for USDA inspections at horse slaughterhouses

I am beyond disgusted at the USDA's willingness to cooperate with pet murderers. In the United States, horses are pets - every bit as much part of many families as dogs and cats. The American public is disgusted and horrified by the continual slaughter of pets to feed a foreign demand for their meat, and yet it continues. Why? Money? It infuriates me to think that my tax dollars are being used in such an unethical and unjustifiable way. This is revolting news.
